2. That the defendant may be ordered to pay to the plaintiff $1,500 damages.

3. That the defendant may be ordered to pay to the plaintiff the costs of this action.

4. That the Plaintiff may have such further or other relief as the nature of the case may require.

AMBROSE B. WALFORD,
Counsel for the Plaintiff.

The defendant to this Petition is Mr. James Raymond Anglin, of No. 70, Yokohama.

James Raymond Anglin, the above named defendant, in answer to the petition of the above named plaintiff, says:—

1. That he admits the agreement mentioned in the first paragraph of the said petition. And that the said agreement was afterwards modified, but wishes to refer to the said agreement to determine the terms of the plaintiff's engagement.

2. The defendant denies that the plaintiff was ready and willing to serve the defendant as alleged, but says that the plaintiff, contrary to the expressed wishes of the defendant, absented himself from the office of the *Gazette* newspaper on the 1st day of January, 1891, and has since absented himself from such office without consent or approbation of the said defendant and has refused to obey the directions of the said defendant.

3. The defendant denies that he has determined the engagement of the plaintiff.

4. The defendant denies that the plaintiff has suffered any damage by the action of the said defendant as alleged.

5. The defendant says that he never was indebted to the plaintiff as alleged.

(Signed) HENRY C. LITCHFIELD,
Defendant's Counsel.

Mr. Walford in opening the case for the plaintiff, said the plaintiff in this case, Mr. Nuttall, had been until recently editor of the *Japan Gazette*, the defendant, Mr. Anglin, having been until the same period the proprietor of that journal. Mr. Nuttall had been serving under an agreement with Mr. Anglin, which would naturally have expired in October this year. The agreement was determinable by Mr. Anglin at any time before October, but by the terms of the agreement, if it were determined, Mr. Anglin was to pay Mr. Nuttall compensation equivalent to three months' salary, and also to provide Mr. Nuttall with a second-class return passage to England. Mr. Anglin did in fact terminate the agreement, and now refused to pay the compensation provided, and therefore

Digitized by Google

Mr. Nuttall was driven to bring the present action. The petition stated in the first place an agreement made in England by which Mr. Nuttall was engaged as sub-editor and reporter by Mr. Anglin for the *Gazette*, and subsequently by another agreement made in December, 1889, an alteration was made by which instead of being sub-editor he was made editor of the paper, and his salary was increased to $185 per month. In all other respects the agreement was confirmed. By the third paragraph of the petition it was stated that the plaintiff served the defendant until Jan. 1st, 1891, and has always been ready and willing to serve him, but the defendant assigned the *Japan Gazette* to a company from the end of the year, and the said company assumed proprietorship on January 1st, 1891. In the fourth paragraph of the petition it was claimed that the defendant, in assigning the *Gazette*, had determined the engagement of the plaintiff, but refused to pay the compensation, so that the plaintiff now claimed for compensation and damages. The answer admitted all the facts stated in the petition, but denied that the action of Mr. Anglin amounted to a determination of the agreement, and denied also that Mr. Nuttall had sustained any damage by such determination.

Mr. Litchfield said he did not, in the answer, admit all the facts.

Mr. Walford understood they were admitted. As he understood, the answer admitted the facts but denied their consequences.

Mr. Litchfield denied that the agreement was broken by the defendant or that the plaintiff had suffered any damage.

Mr. Walford said the real facts of the case were somewhat as follow. The plaintiff, Mr. Nuttall, had been for many years engaged in journalism, and was on the staff of the *Rochdale Observer* in 1888 when it came to his knowledge that Mr. Anglin was on the lookout for some one to take a position on the staff of the *Japan Gazette*. Mr. Nuttall put himself in communication with Mr. Anglin's agents in London, Messrs Harwood and Stevenson, solicitors. Mr. Harwood showed him a draft agreement, the terms of which were discussed, and after some conversation the clause providing for the determining of the agreement by Mr. Anglin was shaped into its present form, namely that Mr. Anglin should have the power of determining the agreement, but if he did so he should pay Mr. Nuttall his return passage and compensate him by the equivalent of three months' salary. The agreement was signed by both parties, and Mr. Nuttall determined his engagement with the *Rochdale Observer* and took passage for Japan, arriving here in October, 1888. On his arrival in Yokohama he introduced himself to Mr. Anglin, and asked to see the editor, but found to his astonishment that there was no editor. He went to work immediately, and from that time was really editor of the *Japan Gazette* for rather more than a year, till, at the end of 1889, his agreement was modified, and Mr. Anglin agreed that he should take rank as editor his salary being fixed at $185 per month. From that time, therefore, he was really editor of the *Gazette* under a distinct agreement. The paper was not in a very flourishing state when Mr. Nuttall first came out, but by his exertions and talent its tone was very much raised; and its circulation very much increased, in fact nearly doubled. Mr. Anglin was very well satisfied with the work done by Mr. Nuttall, and from about the middle of 1890 frequently approached him with the idea of entering upon a new and better agreement, saying that from the beginning of 1891 he would pay Mr. Nuttall a better salary and enter on an agreement for a much longer time, so that Mr. Nuttall might in fact consider himself in a permanent position in Yokohama. At the same time Mr. Anglin told the plaintiff that it was not consistent with his position that he should live in a hotel, and recommended him to take a house and furnish it. Relying upon this, Mr. Nuttall took a house, rented it for a year and spent considerable money in furnishing it. That, Counsel thought, was in July, 1890, and everything went smoothly till a rumour was started that a company was being formed to purchase one of the Yokohama newspapers. Eventually the *Gazette* was purchased by the company from Mr. Anglin in October, 1890. Discussion took place between Mr. Anglin and Mr. Nuttall as to whether the latter should enter the service of the new company. Obviously Mr. Anglin could not assign to the company his contract with Mr. Nuttall, and obviously also there may have been many objections to Mr. Nuttall entering the service of the new company. Even when the proprietor and the editor were distinct and separate, difficulties might often arise when the views of the proprietor and editor did not coincide. But it appeared to be well understood among journalists that to take service under a company placed an editor in a very difficult position, because he had to deal with the views of a board of directors, who might not themselves be unanimous and who would be frequently changing. While these considerations were floating about in Mr. Nuttall's mind, Mr. Dening was engaged as editor by the company, and then Mr. Nuttall told Mr. Anglin that he could not enter the service of the company because they had another editor. Mr. Anglin said the company would make that all right, and shortly afterwards Mr. Anglin arranged an interview between Mr. Nuttall and Mr. Lowder, who was chairman of the new company. They discussed the matter. Mr. Nuttall was not anxious to enter the service of the company—in a subordinate position especially—and told Mr. Lowder so, but at the same time said if the company could make him any good and satisfactory offer he would be prepared to consider that offer. The result of that was that he received a letter from Mr. Lowder enclosing the proposed terms of an agreement which Mr. Nuttal might enter into with the company. In that agreement the plaintiff's salary was to remain at $185 a month, and he was to take the post of sub-editor and reporter, and the agreement was to be determined by six months' notice at any time. That was not satisfactory to Mr. Nuttall, because it gave him no advantage over his former agreement in salary, and because he had an objection to serving under a company at all, but the most serious objection was because it involved a fall from the editor's chair to the sub-editor's stool. Mr. Nuttall had his own reasons for believing that he would not be employed for the company beyond a part of this year, if so long, and he considered that his agreement with the company, leaving him only as sub-editor and reporter, would place him in a very much worse position to obtain new employment than if he left Yokohama as editor of the *Japan Gazette*. Under his agreement with Mr. Anglin, he was entitled to leave Japan in October as editor of the *Japan Gazette*, and, going back to England, having been editor of a flourishing paper which owed its prosperity to his exertions, considered that he would then be in a very good position to obtain a position in England, whereas his position would be much prejudiced if he went from here simply as sub-editor. He therefore refused to enter the service of the company on such terms. Mr. Anglin, who did not quite like the look of matters, said if Mr. Nuttall would accept the salary proposed by the company he himself would make it up to $200 a month by supplying $15 a month from his own pocket. Mr. Nuttall, however, refused that offer entirely, upon which Mr. Anglin shifted his whole position. By that time he had recognized that he could not assign Mr. Nuttall, body and mind, to the company, but he now said "You are still bound by your old agreement, although I have assigned the newspaper." It would be for the other side to make out how Mr. Nuttall could be bound by his old agreement, considering that he had agreed to serve Mr. Anglin and that Mr. Anglin had parted with the paper so that the only person the plaintiff could serve would be the company, which as a matter of fact had already engaged an editor, and could only offer him a subordinate position. On this point Counsel quoted the remarks of Pollock in his work On Contracts; first edition, page 384, referring also to Stevens against Benning reported in 24 *Law Journal* (Equity) page 156, in which it was held that a publisher's contract with an author was not assignable without the author's consent. Applying the words of that case to the present one, Counsel submitted that Mr. Nuttall had made an agreement to serve Mr. Anglin, and that he had not agreed or intended to place confidence in the Yokohama Printing and Publishing Company, however trustworthy; nor had he intended to associate himself with them, however respectable. Counsel also quoted the case of Reid against the Explosives Company (Limited) reported in *The Times* Law Reports, volume 3, page 588, which said that the appointment of a receiver and manager of the business of a company operates as a discharge of the servants and officers of the company. As to the other point, that Mr. Nuttall could not be compelled to serve as sub-editor when his agreement was to serve as editor, it was illustrated by a Scotch case, Ross against Pender, mentioned in Macdonald's Master and Servant, page 193, in which it was held that a head gamekeeper who was offered the post of assistant game keeper at the same salary could not be compelled to accept the subordinate position. Having pointed out that the present case was even stronger than the one he had quoted, Counsel said in the matter of damages there was a clause in the agreement providing for a stipulated amount, but as Mr. Anglin had not paid that amount, Mr. Nuttall was entitled to some damage for Mr. Anglin's breach of contract, Mr. Nuttall having been kept in Yokohama *from* 1st January to the present time. He would therefore be entitled to some compensation as the equivalent of his salary during the time of his detention, and he had also suffered considerable loss in being compelled to sell his furniture, which he only bought last July, and in being compelled to determine the lease of his house.

Edgar Pearson Nuttall, sworn, deponed—I am the plaintiff in this case. I am a journalist by profession and have been so for 11 years. In 1888 I was on the staff of the *Rochdale Observer*, and became aware of a vacancy on the staff of the *Japan Gazette*. I went to London and interviewed Mr. Harwood, who produced a proposed agreement. Several clauses were discussed, more particularly the one as to determination of the agreement. Eventually we decided on it as it stands. The agreement (dated 17th July, 1888) shown me is the one entered into between me and Mr. Harwood as Mr. Anglin's attorney. On this document there is another agreement dated 9th November, 1888, and another dated 28th December, 1889.

Mr. Walford here read the agreement as follows:—

Articles of Agreement made the Seventeenth day of July, One thousand eight hundred and eighty-eight between James Raymond Anglin of Yokohama in Japan the Proprietor and Manager of the *Japan Gazette* a daily newspaper published at 6 p.m. in Yokohama with a morning supplement for advertisements, and a fortnightly summary of the news for dispatch for the United States Mail by his Attorney William Harwood of No. 31, Lombard Street in the City of London, Solicitor of the one part, and Edgar Pearson Nuttall of Rochdale in the County of Lancashire, journalist of the other part. It is mutually agreed as follows:—

1.—The said Edgar Pearson Nuttall shall leave London and proceed with all diligence to Yokohama aforesaid by the Peninsular and Oriental Steam Navigation Company's steamer leaving London on the twenty-third day of August next for Yokohama aforesaid, his passage (second class being provided by the said James Raymond Anglin, who shall also allow the said Edgar Pearson Nuttall the sum of ten pounds in or towards payment of the incidental expenses of the said Edgar Pearson Nuttall on his said passage, the said sum of Ten pounds to be paid to the said Edgar Pearson Nuttall immediately after the signing of these presents.

2.—The said Edgar Pearson Nuttall shall during the term of three years from the date of his arrival at Yokohama act as Sub-editor and Reporter of the said James Raymond Anglin for the said *Japan Gazette* and shall proceed to such place or places in Japan or elsewhere as the said James Raymond Anglin shall direct, his necessary travelling expenses on any such journey being paid by the said James Raymond Anglin.

3.—The duties of the said Edgar Pearson Nuttall during the said engagement will be to report all law cases, meetings, theatrical performances, and sports in the Settlement and neighbourhood, also to write paragraphs and "locals," correct proofs and generally to promote the interests of the said newspaper, and the said Edgar Pearson Nuttall shall during the said engagement conduct himself with all due diligence, honesty, sobriety, and temperance and shall diligently and faithfully perform the said duties and devote his whole time and attention thereto and shall use his best endeavours to promote and extend the interests of the said newspaper, and shall in all respects diligently and faithfully obey and observe all lawful orders and instructions of the said James Raymond Anglin in relation thereto and shall not without his consent divulge any secrets or dealings relating thereto.

4.—The said James Raymond Anglin shall pay to the said Edgar Pearson Nuttall during the said term of three years so long as he shall duly observe and perform the agreements herein on his part contained, a salary which shall be as follows namely, the sum of seventeen pounds a month during the first year of the said term, the sum of twenty-five pounds a month during the second year of the said term and the sum of thirty pounds a month during the third year of the term. The said salary shall be paid in Japanese *yen* or dollars at the current rate of exchange of the day, and shall commence from the date of the arrival of the said Edgar Pearson Nuttall at Yokohama to take up his duties as aforesaid, and shall be paid monthly on the last day of each month in which the same becomes due, and shall cover all board lodging and other personal expenses whatsoever of the said Edgar Pearson Nuttall (except the travelling expenses mentioned in Clause 2).

5.—Provided always that the said James Raymond Anglin may determine the engagement of the said Edgar Pearson Nuttall at any time before the expiration of the said term of three years and without assigning any reason whatsoever for so doing on giving or sending by post to the said Edgar Pearson Nuttall one week's previous notice in writing (such notice to be given or sent to the said Edgar Pearson Nuttall at his usual or last known place of abode in Yokohama or at the Office for the time being of the said newspaper, and on giving to the said Edgar Pearson Nuttall a sum equal to three calendar months salary: Provided also that if the said James Raymond Anglin shall determine the engagement of the said Edgar Pearson Nuttall pursuant to this clause he shall provide the said Edgar Pearson Nuttall with a second class passage to England, provided the said E. P. Nuttall shall start on his journey to England within one calendar month from such determination of the engagement.

6.—If the said Edgar Pearson Nuttall shall at any time wilfully neglect or refuse or from illness become or be unable to comply with any of the provisions herein contained or to obey any of the orders of the said James Raymond Anglin or to perform any of the duties devolving upon him under this engagement it shall be lawful for the said James Raymond Anglin to suspend the salary of the said Edgar Pearson Nuttall during such neglect refusal, illness, or inability as aforesaid. And further it shall be lawful for the said James Raymond Anglin immediately to determine the engagement of the said Edgar Pearson Nuttall without giving any such notice in writing or making such payment as is provided for in Clause 5. From and after the determination of the engagement of the said Edgar Pearson Nuttall pursuant to this clause no further salary shall be payable to the said Edgar Pearson Nuttall.

7.—The said Edgar Pearson Nuttall shall not at any time within twenty years after the determination from any cause of this agreement accept or take any situation as reporter, sub-editor, or editor with or in relation to any other journal or newspaper in Japan and further shall not during such period engage or be interested directly or indirectly in China or India or accept employment in China or India with or on any newspaper for which he may have come out to Japan as agent or correspondent, and if he the said Edgar Pearson Nuttall shall commit any breach of the stipulation contained in this clause or any of them, the said James Raymond Anglin shall be entitled to recover from the said Edgar Pearson Nuttall substantial damages for each and every such breach and the receipt of such damages shall no wise affect or prejudice the right of the said James Raymond Anglin to obtain an injunction to prevent the continuance or repetition of any such breach.

8.—The said William Harwood shall incur no personal liability under or in respect of this agreement.

In witness whereof the said parties to these presents have hereunto set their hands the day and year first above written.

Signed by the said James Raymond Anglin by his attorney William Harwood in the presence of
(Signed Gregory Haines, Clerk to Messrs. Harwood and Stephenson.
31, Lombard Street, London.

(Signed, James Raymond Anglin
by his attorney
William Harwood.

It is hereby agreed that clause 4 of this agreement shall be so far modified as to read that the salary of the said Edgar Pearson Nuttall shall be twenty-five pounds a month during the said term of three years instead of the amounts in the said clause specified.

Dated Yokohama, Japan, 9th November, 1888. J. R. Anglin.

Signed by the said J. R. Anglin in the presence of
(Signed) H. C. Litchfield,
No. 32, Yokohama.

It is hereby agreed that the second clause of this agreement shall be so far modified that as from the first day of January, 1890, the within named Edgar P. Nuttall shall assume charge of the editorship of the *Japan Gazette*, and that clause IV. of the said agreement shall be further modified, in that from the same date the salary to be paid to the said Edgar P. Nuttall as such Editor shall be $185 per mensem, in local silver currency. In all other respects the said agreement is confirmed.

(Signed) J. R. Anglin.

Dated the 28th day of December, 1889.
Witness to the Signature of J. R. Anglin.
(Signed) H. C. Litchfield.
No. 32, Yokohama.

Examination continued—Having entered into this contract and determined my engagement with the *Rochdale Observer*, I left England, arriving in Yokohama in October, 1888. I met Mr. Anglin, and was informed that there was no editor for the paper. The day following my arrival I entered on my duties—on the 12th October. I performed the duties of editor, and eventually in 1889 I became editor. I worked under that agreement till the 31st December, 1890. Mr. Anglin has expressed himself satisfied with my services, and said he would give me an increase of salary in 1891. In the middle of 1890 he pressed me to enter on a new agreement and to go and see Mr. Litchfield with the view of entering on an agreement for three, five, or seven years at my option. No salary was mentioned. About that time or a little previous he had said it was scarcely consonant with my position to live in a hotel, and added that it would be more comfortable to live in a private residence. I told him repeatedly that I liked Japan, and he said he was well satisfied with me, and that I might view myself as a permanent servant of his. I so viewed myself. I took a house and furnished it. I had a half share in the furniture, and I estimate my loss at $150 on the sale of my half share. In October, 1890, the *Gazette* and all its appurtenances were sold by Mr. Anglin to the Yokohama Printing and Publishing Co., Lt'd. This was on the 27th October. Prior to this it was intended to purchase the *Herald*, and Mr. Walter Dening was spoken of as the editor. Eventually, however, the journal purchased was the *Gazette*, and Mr. Dening was appointed editor in November and advertised as such for two months. Mr. Anglin himself informed me of the sale, and that Mr. Dening was coming down as editor. I told him I could not remain on under another man. I told him I viewed the sale as a breach of agreement in the first place, and that in the second place I viewed the appointment of Mr. Dening as another breach. He responded that he would make that all right with the company. He did not do so. The next I heard was in November. Mr. Lowder was in the office one day, and Mr. Anglin half introduced me to him in reference to my serving the company. I invited Mr. Lowder up to my room, and we had a long conversation, when Mr. Lowder expressed himself as surprised at my unwillingness to enter the service of the company, and suggested that Mr. Anglin had evidently misrepresented my views on the subject. He was not aware that I had been engaged as editor; he was under the impression that I was sub-editor. The result of the conversation was that I left it with Mr. Lowder, as Chairman of the Directors, to make an offer. About a fortnight later he wrote to me enclosing a draft agreement. The letter stated that the financial condition of the Company would not permit of my salary being increased, but offered me the post of sub-editor and reporter, it being open to the company to make me do practically any work from washing the ink roller to writing an article. I was to take a subordinate position at the same salary; and was to be dismissed at six months' notice. There was not the slightest compensation offered on termination at all. I refused the offer. My first reason was that the proprietary had been changed. It had become corporate property, and I should have above me an editor and a board of directors, men holding diverse opinions on many subjects, and it would be very unsatisfactory and unpleasant to work for such a board of directors. Another reason was that Mr. Lowder had stated to me that while regretting my departure from Japan, they would view it as a distinct saving of $185 a month to the company. I had also to find a motive for the company's engagement of me, and the motive was not all satisfactory to me. Further, under the proprietary of one man, the expenses were exceedingly light, but under the new proprietary the expenses were quadrupled, and, knowing the concern, I thought it could not stand the lavish expenditure to which it was pledged. I mean as a matter of fact to say that I thought my engagement would not be permanent. I objected to serve the board, and in any subordinate position. Later an offer was made by Mr. Anglin, who offered me $200 a month. The inference I drew was that he was going to pay the salary himself. I replied that I could not consider any offer from him to serve the company. The offer must come from the company. We had some discussion, and he asked me to sleep on it; I think that was the expression. I slept on it, and I refused it. He then ordered me to return to the office on the 1st of January and thenceforward. I had been told by Mr. Anglin that I must give up my office to Mr. Dening. I did so, and left on December 31st, and Mr. Dening came in on January 1st. Mr. Dening had previously asked me to let him have the office on December 28th, and to this I consented as a favour. Mr. Dening, however, was otherwise occupied, and did not come on December 28th. I have been connected with the *Japan Gazette* for more than two years; during that time the circulation has advanced—taking the three publications, the morning supplement, the evening paper, and the mail summary—the circulation has advanced from 244 to 380 copies, a gain of 136 copies. At the same time the advertisements have increased. Having been appointed editor, if I had returned to the sub-editorship, the impression would certainly be that I had been inefficient. The reversion to the lower position would mean that I was incompetent for the higher position. That certainly is how it would be viewed, and in consequence of that it would be much more difficult to obtain a position. I wrote Mr. Anglin that I would be willing to go on under my agreement as editor. Since the 1st January I have had no engagement. I could not obtain a position as editor under my agreement. Under it I must bear the expense of going home, and could not work here or in China or in India. I have had to sell my furniture in consequence of the breach of my agreement. A second-class passage home costs $250. I should say, having lost touch with home affairs, that six months would elapse before I could secure a post.

Cross-examined—I went to see Mr. Lowder.

Did not you tell Mr. Lowder that the chief objection to the agreement between yourself and Mr. Anglin was the harshness of the terms, which restricted you from taking any appointment in China and India as well as Japan?—I did not tell Mr. Lowder in the sense in which you put it. I raised the objection as a minor one, one of many, that my dignity would not permit me to consent to an agreement which would not allow me to work for my living. I did not put it in the abnormal sense in which you put it. Mr. Lowder prepared a draft agreement. In that draft the restrictive covenant was modified. The remuneration in the draft was $185, the same as I was obtaining from Mr. Anglin. I had a conversation with Mr. Anglin, and told him I should not return to the office on the 1st January as I deemed that he had broken the contract. He wrote me a letter saying:—"With regard to our conversation, I order you to attend at this office on January 1st and thenceforward." I replied that I was willing to fulfill my part of the agreement.

To the Court—This would be near the close of December.

To Mr. Litchfield—The letter dated 30th Dec. is the letter, and is as follows:—

"I was surprised to receive your letter last evening. You have repeatedly informed me that you have sold your newspaper, and that Mr. Dening has been engaged as editor from the 1st of January.

"If this had not been so I should willingly have continued working under my agreement with you, but as you have put an end to the agreement as from the end of this year, and as I am not prepared to enter into any fresh arrangement, I must claim the compensation which the agreement provides." That is the only occasion on which I wrote to that effect. I had told Mr. Anglin the same several times. Mr. Anglin did not propose a continuation of my engagement at $200. He proposed a new engagement as sub-editor. That was later than the middle of December. The only engagement mentioned was an engagement as sub-editor of the Yokohama Printing and Publishing Co., at a salary of $200. I did not accept it. I told Mr. Anglin I could not take any offer from him on behalf of the company. I saw Mr. Lowder afterwards on the same subject. He did not at that interview say that he was busy, and that he thought he could make me an offer through Mr. Anglin. I went there on the understanding from Mr. Anglin that the company would make me a better offer. Instead of that the previous offer was renewed, and curtly refused. The interview did not last three minutes. After the offer was made in December, I had an interview with Mr. Lowder, who said the offer came from the company through Mr. Anglin. He made this explanation when I said the offer was by Mr. Anglin. Mr. Anglin before the sale told me negotiations were pending to carry on the *Gazette* by a company. I expressed my willingness to serve as editor with him, not with the company. After the purchase by the company Sir Edwin Arnold did not make any proposals to me for an engagement.

Did not Sir Edwin Arnold make an offer to you for the London *Telegraph*?—He did not. He made nothing approaching an offer.

Did not you tell Mr. Anglin that he had made an offer?—No; I did not.

You say that the circulation of the newspaper increased very much during your editorship?—Yes.

Do you know whether or not it has increased since you left?—I know by rumour that it has increased by 15 copies.

Even among editors, I suppose there are grades, one editor is better than another?—Certainly; just as in the case of barristers.—(Laughter.)

This closed the plaintiff's case and the Court adjourned for tiffin.

On resuming,

Mr. Litchfield said the present claim was founded on the 5th paragraph of the agreement. That paragraph was optional, not compulsory on Mr. Anglin; that was to say he was not obliged under such circumstances as Mr. Nuttall might suggest to him to determine the engagement, and it was not for Mr. Nuttall to say "You must pay me so much salary and provide me with a passage to England." The defendant might, if he chose, determine that engagement. Counsel would therefore contend that unless the plaintiff had made out that the necessary notice was given, and that he had started on his journey to England within one month of such notice—assuming it to have been given—or that he was ready and willing to start, which was not alleged in the petition, then the plaintiff's case must fall. As to the allegation that the defendant put himself in such a position that he incapacitated himself from carrying out his agreement with Mr. Nuttall, Counsel submitted that that allegation had to be proved emphatically and clearly by the plaintiff. Counsel took it that there were two issues, first that the contract terminated in the manner stipulated for by paragraph five, for which there was no evidence—the testimony indeed going entirely the other way—or the alternative issue that the defendant had by his actions incapacitated himself from carrying out his contract. Counsel referred to case of Frost against Knight, reported in Law Reports, 7 Exchequer, page 111, for the purpose of pointing out that that case was one of breach of promise of marriage. Of course by the law of England a man could not have two wives—perhaps fortunately so—but there was no law in England establishing that newspapers might not have two editors. If, the defendant was ready and willing to continue Mr. Nuttall in his engagement to pay his salary until the termination of the time stipulated by the contract of July 17th, 1888, then by that agreement the defendant had no cause of complaint. The plaintiff admitted that Mr. Anglin had required him to continue work after December 1st, but Mr. Nuttall declined to accede to his request. If Mr. Nuttall had been at work on January 1st, as Mr. Anglin wished him to be, the former's salary would have been paid regularly. Even more; Mr. Anglin was ready, with the sanction of the company, to employ him and to raise his salary to $200 per month. Under those circumstances, Counsel submitted that the contract had been broken by the defendant. Even supposing it were technically broken, the plaintiff had suffered no damage by not being continued in employment under the agreement because he had been offered a continuation of his employment at an increase of salary. The position of the defendant after the formation of the new company was to a certain extent changed, but not so absolutely changed as to prevent him from carrying out his agreement with Mr. Nuttall of July, 1888. The present case was different from those referred to by the other side, for the *Japan Gazette* was not a company the business of which had been wound up and stopped, but was sold as a going concern, the company being willing to continue the existing agreements with Mr. Anglin's staff or to make new agreements if those were wished. He submitted that by the formation of the company Mr. Anglin was not incapaciated from continuing the agreement. As a matter of fact the agreement had really been broken by Mr. Nuttall, unnecessarily and very much to the prejudice and inconvenience of the defendant.

John Frederick Lowder, sworn, deponed—I am a barrister-at-law. In October I was one of the promoters of the Yokohama Printing and Publishing Co. (Ld.) I had some negotiations with Mr. Anglin as to the purchase of the *Japan Gazette*, its plant and goodwill. Subsequently an agreement was made for the purchase of the plant and goodwill, and that agreement was reduced to writing. There was an agreement as to the staff of the *Gazette*. The agreement was that we should take over the whole of the staff if they wished to remain in our service. Among other members of the staff I communicated with the plaintiff. I had an interview with him. The first interview was about the latter end of October or the early part of November. I presume it must have been in October that I first spoke to Mr. Nuttall. It was in consequence of a communication that I had from Mr. Anglin. I went up to Mr. Nuttall's office. He was aware of the fact that a company was formed or in process of formation for the purchase of the *Japan Gazette*, and I asked him whether he was willing to continue in the service of the company. He said he took a great interest in the venture, but that there were certain parts of the agreement between himself and Mr. Anglin to which he took exception, notably the restrictive clause which prevented him from joining the staff of any newspaper in Japan, China, and India. He also raised another point. "I understand," he said, "that you are getting a new editor; I have hitherto been acting as editor of the paper, and it is a question of *amour propre* with me." Those were the two principal points; I think the only two points that he made. I may say he was speaking for himself and also for Mr. Littlewood at this time. Mr. Littlewood was also in the employ of the *Gazette* as shorthand reporter. I replied—"As far as the editorship is concerned we have appointed a new one, and there can be no question about that." But I said that as to the restrictive clause point we were prepared to make a great concession and to insert a clause in the agreement to the effect that it was determinable at six months' notice on either side. The result of it was that he said to me, "Well, Mr. Lowder, I will leave the matter entirely in your hands." I then undertook to send him the draft of an agreement based upon the conversation that had taken place, and I did so. Unfortunately I have destroyed the draft, but I can tell you that it was in fact what I have said just now, the rate of salary being the same as Mr. Nuttall had hitherto had. Afterwards, much to my surprise I received a letter from him saying that he objected to the draft. I presumed the matter was all settled until I received this reply from Mr. Nuttall. The longer of the two letters you hand me is the one I received first. I wrote to the best of my recollection expressing my surprise at receiving such a letter, the matter having been placed in my hands and the shorter letter is the one I received in reply to it.

The letters were as follows:—

"November 22nd.

"Dear Mr. LOWDER,—Mr. Littlewood and the writer have carefully considered the proposals of the Directors of the Yokohama Printing and Publishing Co. (Lit'd.) and we regret that they are not such as to induce us to enter the service of the company. We are already aware, as you say, that the expenses of the company are heavy, but we fail to see why we should be viewed as a medium by which in some small measure to counterbalance the outlay to which the directors have pledged themselves. You know the circumstances under which we can leave Japan. You know also that we were distinctly promised an increase of salary at the end of the present year. The offer the directors submit does not, however, take either of these phases into consideration, and it would perhaps be out of place to expect otherwise seeing that they were in no sense party to them. Again there are other circumstances which influence us in the decision contained in the present answer. In conclusion we desire to recognize your individual promise which, however, is not really tangible, to remark that there is no feeling on our side, and that our earnest hope is for the success of the journal to which we are at present attached.

"Yours, &c., "E. P. NUTTALL."

"November 22nd.

"Dear Mr. LOWDER.—Herewith the draft. I did say that I left the offer to you and your co-directors, or, as you put it, left my interests, in your hands. We are sure you have done your best, and we sincerely thank you for your endeavours.

"Yours, &c., "E. P. NUTTALL."

Examination resumed—In December I authorised Mr. Anglin to make a proposal to Mr. Nuttall. It was that Mr. Nuttal and Mr. Littlewood should either remain in Mr. Anglin's employment or in the company's; Mr. Nuttal at a salary of $200 and Mr. Littlewood at a salary of $150 a month; either carrying out the existing agreements with Mr. Anglin or entering into new agreements with the company at their option. After that offer was made Mr. Nuttall called upon me. I am inclined to think that that interview was stated to be without prejudice. I see that Mr. Nuttall nods his head, and that convinces me it was so. I am not quite certain whether what he said then was without prejudice or not, but to be on the safe side I would prefer not to answer your question. My co-promoters were cognizant of the offer I had made; all the promoters were to be directors of the company for a year at least. If Mr. Nuttall had accepted the offer of $200 a month, the promoters were prepared to carry out their part of the arrangement—clearly so; we should not have made the offer unless we were.

Cross-examined—The draft agreement was sent to Mr. Nuttall by me as representing the directors of the company. I was a promoter and was to be a director. Whether I sent it personally or officially I do not know, but it came from the company. All that I did in reference to Mr. Nuttall was after consultation with the directors.

How came you, then, to write to Mr. Nuttall that it was in no sense a proposal from the directors but that it emanated from yourself?—Did I write that? (Letter shown). Well, as a matter of fact, as I said before, I took no step whatever without consulting the promoters. You are placing a slightly strained construction on that letter. Perhaps if you will read it will be better understood.

The letter was as follows:—

"November 22nd.

Dear Mr. NUTTALL.—Please return the draft agreement I sent for the consideration of yourself and Mr. Littlewood. It was in no sense a proposal from the Directors of the new Company, but emanated entirely from myself. Had it been accepted, or rather I should say, favourably entertained, it was my intention to have submitted it to the Board of Directors for their consideration. I understood from you that you had placed your interests in my hands, and the draft was the result of the best thought I have been able to give to the matter. But of course you are the best judge.

"Yours, &c., J. F. LOWDER."

Cross-examination continued—It would be clear to the recipient of that letter that the offer came from me.

And that it was an offer for his consideration?—Well, the letter speaks for itself.

I mean you sent it as an offer for him to favourably consider?—Yes,

And what he left for you to do was to make him an offer which he would consider?—Well, I cannot say it was so, because the last words were—"I leave the matter in your hands," after speaking of the terms of the new agreement. The matter having been left in my hands I drafted an agreement which I believed to embody practically what had taken place between us. In that sense it was an offer; that is to say it was putting into writing the result of the conversation between us.

In the interview I think I am correct in saying you did not fix on any salary?—In the interview I think I told him that the salary would be the same, and he replied that it seemed rather hard that the editor and manager were to get such high pay, and that his pay could not be increased. I think it was at that interview. I answered that the company were not in a position to increase the salary at present, but that in time if it were prosperous, we wanted all our employés to be satisfied with the service and held out hopes of an increase.

You did that in your letter, but at the interview before you wrote to him the question of salary had not been fixed?—It had not been fixed, but I think it was mentioned at that interview. He did not positively say he was not willing; he said:—"Here is your editor getting so much and your manager so much." He was willing to remain in the service but he was raising these points. There was no final agreement. The final agreement or remark was that the matter was left in my hands. Not only Mr. Anglin but Mr. Nuttall had told me that the latter was willing to enter the service of the company. He mentioned those points, but he gave me to understand and said distinctly that he wished to remain in the service of the company.

On satisfactory terms of course?—Yes.

The following letter was here read:—

"November 21st.

Dear Mr. NUTTALL—Will you and Mr. Littlewood look over the accompanying draft agreement and let me know whether you are willing to enter into the service of the Printing & Publishing Co. on the terms therein set forth. Our expenses will be very heavy and until we have felt our way a little further we are not in a position to pay higher salaries than you at present receive from Mr. Anglin, but as long as I am on the board of directors my policy will be to treat the employés of the company as generously as our funds will permit.

"Yours, &c., J. F. LOWDER."

Cross-examination continued—That evidently has reference to the conversation which I thought had taken place at this interview.

And your proposal was that he should enter your service as sub-editor and reporter?—My proposal was that he should enter the service as sub-editor and reporter, but I added that if he liked we could make an arrangement to call him editor of the morning paper to get over his scruples. I told him our intention was to enlarge the morning edition and if that was the only doubt in his mind we might call him editor of the morning *Japan Gazette*.

That was after the agreement was sent to him?—Subsequently did you not tell Mr. Nuttall that the paper could not afford to pay him $200 a month?—Subsequently to the offer of $200 a month? Certainly not. I do not know now whether it can afford it or not and could not have said so.

Was not there some discussion as to whether Mr. Nuttall should not take the morning paper at a salary of $210 a month?—To reply to that I should be replying to a question which I refused to answer when put by Mr. Litchfield.

Mr. Walford did not press the question.

James Raymond Anglin, sworn, deponed—I have for some years been proprietor and manager of the *Japan Gazette*. At present I am part proprietor (holding $27,000 of shares) and manager. Mr. Nuttall was one of my employés at the time the company was formed. He came out under agreement in 1888. From that time the salary was increased over the original amount. I was satisfied with him up to a certain period. An agreement was made by which the company was to take over the staff at the same wages if they were willing; if not the staff to stay under my control till the engagements expired—I to have supreme control. All hands have been kept on except the interpreter, and Mr. Nuttall and Mr. Littlewood, who did not come to work after Jan. 1st. The very day that Mr. Lowder and Mr. Walter called on me in the office and asked me to sell the paper, I said the paper was not in the market. They said if I did not sell they would start a paper in opposition to me. I considered and said my price was so much. I consulted my friends, and you as my legal adviser, and I accepted their offer. They were desirous of buying the *Herald*, and it seems Mr. Brooke would not give them any information about the accounts, or plant, or anything of that sort. After that Sir Edwin Arnold came to the office and saw Mr. Nuttall who came down immediately after he left and told me that he had an offer from Sir Edwin to go home to London to join the *Telegraph* for £500 a year, that he would not work for the company, that he had me "on toast," and that he would make me pay three months' wages and his passage to England. That was the first time he said anything about leaving the employ of myself or the company. I was authorised by Mr. Lowder to offer to him and Mr. Littlewood that they should remain with me or enter into a new agreement, Mr. Littlewood at $150 and Mr. Nuttall at $200 from January 1st. He thought he had me settled, and therefore said he would stick to what he was doing, and that from the 1st of January he would not work for me or the company. Last night I found out for the first time that Mr. Nuttall never made that offer to Mr. Littlewood. I made the offer to Mr. Nuttall, as he had taken Mr. Littlewood in his hands, and he answered for Mr. Littlewood, and wrote to the directors that he was writing for both. I made the offer to him, and last night Mr. Littlewood told me for the first time that the offer was never made to him. In my opinion the services of both were required for the newspaper after January 1st, 1891. Since that date the subscription has increased by about 125 to 140 subscribers. One day Mr. Nuttall told me he was going to make an agreement with the company, and next day he said he would not, and again he was going to London on the staff of the *Telegraph*. He certainly definitely told me he would not work on the staff of the *Gazette*, on which I wrote to him in these terms:"—

"December 29th.

"Dear Sir,—In reference to your conversation with me this afternoon I have to inform you that I require your attendance at this office on the 1st of January next and thenceforward, to discharge your duties in performance of your contract with me.

"Yours, &c., J. R. ANGLIN."

The result of the withdrawal of Messrs. Littlewood and Nuttall was that I was put to great inconvenience. An important law case against me by

Digitized by Google

Mr. Beale, manager of the *Japan Mail*, and another case in the Portuguese Court, I could not report. On the 1st of January, all the deserving clerks and compositors got increases of wages. I gave all my men a bonus, except Messrs. Nuttall and Littlewood, and if they had stopped they would have had $500 between them.

Cross-examination—I have a number of shares in the company. You now show me the articles of association of the company; I have read them through.

Mr. Walford read Art. 107 stating that the management of the business and the control of the company was vested in the directors; and Art. 108, sub-section 5, empowering the directors to appoint and at their discretion to remove employés of the company.

Cross-examination continued—Mr. Nuttall was on my staff under an engagement with me. I as manager of the company am responsible for the staff.

You are responsible for the whole staff of the company?—Except the editor, the working staff are all under my control as manager.

You do not appoint the editor?—I have no power to appoint any one without the expressed consent of the directors; except the native staff; they are all in my hands. If I have a complaint against a member of the foreign staff I have to send it in to the board of directors. The appointment of the foreign staff is in the hands of the directors.

You make a statment, which has been contradicted in advance, that Mr. Nuttall told you Sir Edwin Arnold had made him a definite offer?—He told me that Sir Edwin had offered him £500 a year. Those were his words to me about five minutes after Sir Edwin came down-stairs. I think that was about a month previous to Sir Edwin's leaving Japan. It was some time in November. I do not know what the position was on the *Telegraph*. I did not ask. I was authorised—and told Mr. Nuttall so—to make the offer to Mr. Nuttall. I had not the power to do so myself. I told Mr. Nuttall he could either serve me to the end of the engagement, or I would break it and he could make a new one with the company. Mr. Nuttall did not tell me Sir Edwin Arnold would do his best for him. He told me he had an engagement, and I went immediately and told Mr. Lowder.

Frank Littlewood, sworn, deponed—I am a reporter on the *Gazette* and was so last year—reporter, sub-editor, and assistant manager nominally. In Dec. last Mr. Nuttall told me that Mr. Anglin had offered an advance of $15 himself. He did not tell me of any offer from the company—except that the company would pay the same salaries, and Mr. Anglin would pay an additional $15 from his own pocket.

This closed the case for the defendant.

Mr. Litchfield submitted that if Mr. Nuttall had suffered any damage it had been entirely owing to his own wilfulness. As would be gathered from Mr. Anglin's statement, the plaintiff had objected to continuing in the service either of Mr. Anglin or the company. That fact distinguished the claim in the present case from those cases which approached most nearly to it. Counsel instanced the case of Planchet against Coulburn, referred to in Cutter against Powell in Smith's Leading Cases, volume 2 page 37, and Robinson and Sharpe against Drummond on page 35 of the same work. This case differed from those quoted in respect that the defendant was able to carry out his contract.

The Judge—Do you consider that he was entirely able to carry it out, or do you say that he was able to do something that was equivalent to it? Because you see the agreement was that Mr. Nuttall should be editor. Now do you say Mr. Anglin was in a position to continue him as editor of the *Japan Gazette*?

Mr. Litchfield—As editor of the *Japan Gazette* if he close to call himself so. I submit there is nothing in the name.

The Judge—Do you say Mr. Anglin ever offered to continue him as editor or an editor of the *Japan Gazette*.

Mr. Litchfield said no; he did not say it was the defendant's business to make an offer. It was for the plaintiff to show that he was prevented by Mr. Anglin from continuing as an editor. There was no reason why there should not be two editors of a paper; no reason why there should not be an editor of the evening paper and an editor of the morning paper; an editor and a conductor. There had been no evidence to show that Mr. Nuttall after January 1st, attempted to be editor of the paper or offered his services as editor on any paper.

The Judge—Your best point is that no damage ensued. It seems to me to be quite out of the question to contend that it was necessary for Mr. Nuttall to go down there and try to turn out Mr. Dening from his chair. That was the only way he could offer to become editor.

Mr. Litchfield did not say there was a necessity for such violent measures, but he submitted that the mere fact of the appointment of one editor did not preclude Mr. Anglin in the circumstances of the case from continuing Mr. Nuttall as an editor of the *Japan Gazette*. It was difficult to cite any particular case on all fours with this one, because as a rule a man did not choose—to use a homely phrase—to quarrel with his bread and butter, and when a business was sold as a going concern he was generally too ready and willing to accept a continuation of his services, especially when an increase of pay or its equivalent was offered. From the evidence of Mr. Lowder it would be seen that for some time Mr. Nuttall was playing fast and loose with the company; first ready to enter into a new agreement, then declining, then apparently coquetting for further advances from the company or from Mr. Anglin; and it was not until December 29th that he finally made up his mind that he would not continue in the service any longer. He definately declined at the eleventh hour to fulfill his part of the agreement, and therefore by his own conduct he was precluded from claiming damages; such damages as he fancied he had suffered being entirely the result of his own wilfulness. The formation of the company did not create dissolution of the agreement between the plaintiff and the defendant. After quoting a case reported in volume 27 of the *Law Journal*, Exchequer Cases, page 205, Counsel went on to say that if Mr. Nuttall went to England, instead of his editorship of the *Japan Gazette* being a feather in his cap as the result of which he would be welcomed and probably eagerly snapped up, he would have to rely more upon his individual talents, which were undoubtedly considerable, than upon any fancied glamour thrown upon them by the fact of his having been editor of the *Japan Gazette*. If he went back to England he would probably find himself in the same position as the *Eatonswill Gazette* or the *Eatonswill Independent*, the editors of which when they moved out of their provincial town found that neither they nor their principles, nor their politics had ever been heard of before. Counsel could not help thinking that Mr. Nuttall had been led by a will-o-the-wisp to quarrel with his bread and butter. Mr. Anglin stated positively that offers had been made to Mr. Nuttall by Sir Edwin Arnold, and it was very evident that Mr. Nuttall could not make up his mind whether he would accept them or continue with the company. With a view to swelling the claim in this case, Mr. Nuttall told them that Mr. Anglin had pressed him to make an engagement for two, three, or five years. But no doubt Mr. Nuttall preferred to remain under the three years engagement under which he came out. He wished to leave himself free—and Counsel could not blame him—to act for his best interests, but he ought to home made up his mind as to what he considered best for his own interests, instead of waiting till the eleventh hour and they declaring that he considered himself no longer in Mr. Anglin's service and leaving the new concern without help or assistance at the time of its starting. Counsel contended that the petition was based upon the specific clause in the agreement which provided that the plaintiff had power to determine the agreement in a certain way. There was no allegation, and no proof that the plaintiff did determine the contract in that way. On the other hand, there was strong proof that Mr. Anglin was ready, if Mr. Nuttall had asked, to pay him his salary, and strong evidence to infer that if Mr. Nuttall had continued to work for the *Gazette* his agreement would not have been determined at the end of the three years unless he wished it.

Mr. Walford said the petition was framed in such a way as to provide if necessary for the objection raised by the other side, claiming in fact under clause 5, but also claiming apart from that clause. If the Court held plaintiff entitled to damages under clause 5, of course all that Mr. Litchfield said about the damages being the result of plaintiff's own folly must fall through. In addition to the three months salary and a passage home, Mr. Nuttall would be entitled to some damages for his detention in Yokohama and also for the loss incurred on the sale of his furniture. The other side contended that as notice was not given the agreement was not determined under that clause, but Counsel held that it was entirely against the plaintiff that no notice was given. Mr. Nuttall had waived the notice which was entirely inserted for his benefit, and therefore Counsel contended the clause did apply. If, however, the plaintiff was not limited by that clause of the agreement then the damages he had sustained became an important feature in the case, and as it appeared had been more considerable than the small sum of three months' salary. In fact they might very well be assessed on the basis of salary to the end of the engagement in October as well as loss sustained on the sale of furniture and the passage to England.

The Judge—What do you say to the offer of the company to engage him at a salary of $200 per month?

Mr. Walford said he was coming to that point. Mr. Anglin had said that Mr. Nuttall had been offered £500 a year from Sir Edwin Arnold, but Mr. Nuttall had denied that Sir Edwin made the offer or that he said so to Mr. Anglin. After again quoting the case of Reid against the Explosives Company, Counsel said it was quite beyond the power of Mr. Anglin to assign his contract to the company, and it was mere subterfuge for him to say to the plaintiff, "You go on and work for the paper belonging to the company but in my service." Mr. Litchfield had reflected upon what he called the uncertainty of Mr. Nuttall's position, but they had it from Mr. Nuttall that he had frequently told Mr. Anglin he would not go on, and the letter of December 29th, which Mr. Litchfield regarded as his first, was really the last indication that he would not go on. Further, Mr. Anglin engaged Mr. Nuttall as editor, not sub-editor, of the newspaper, and when Mr. Anglin sold the paper the company appointed another editor. How was it possible for Mr. Nuttall to go on? Mr. Anglin had nothing more to do with the appointing of editors, and could not appoint an editor for the morning paper. He had in short rendered the performance of the contract quite impossible, and by so doing had determined the engagement of Mr. Nuttall, who was therefore entitled to damages. Counsel was then about to refer to his Honour's remark as to the offer of £200 by the company when,

The Judge said the exact point in his mind was this: that Mr. Walford was saying that the damages might include salary up to the time of the expiry of the engagement with Mr. Anglin. Suppose Mr. Nuttall had been wrongfully dismissed, but that during that time it could be proved that somebody offered him $200 a month. It was quite manifest that he would not be entitled to recover the whole of his salary for the time. It was from that point of view that his Honour desired to call Counsel's attention to the fact that plaintiff had been offered $200, whereas he was only getting $185.

Mr. Walford referred to the case of Rose against Pender.

The Judge did not see that that case gave any indication of the measure of damages. In that case evidently a man had been offered by his old employer the same wages in a different employment as it were. That was almost on all fours with Mr. Anglin offering to take the plaintiff back at $185 as sub-editor. Plainly according to that case Mr. Anglin would not have a complete defence, but it said nothing about the measure of damages. Suppose his Honour came to the conclusion that some damages were to be given, that case would not help him to say what the damages should be.

Mr. Walford said the measure was the wages of the servant less the value of any employment he might have got by reasonable exertions, but he was not bound to take any post which was subordinate. Counsel then referred the Court to the morning supplement of the *Japan Gazette* to show that the post of editor would be a purely nominal one; contended that a man was not altogether blotted out when he came to this foreign land, and that Mr. Nuttall's performances and the fact that the paper flourished while under his management would be recommendations in his favour at home, which would be considerably injured if he returned as sub-editor, after being removed from the post of editor. Mr. Nuttall then was entitled to damages under clause 5 of the agreement; for detention and for the loss on the sale of his furniture. If not entitled under the clause, then he was entitled outside the clause, and those damages would be assessed to the end of his engagement, adding his passage home and the loss on his furniture, without reference to any other position which he might have obtained out here, and which it would have been very much against his interest and to the prejudice of his future prospects in life for him to accept.

Judgment was reserved.

FOR DEBILITY USE HORSFORD'S ACID PHOSPHATE.

Dr. B. MALLAM, M.R.C.S., and L.S.A., Meadow Sides, Staines, says: "I find it a most admirable preparation in cases of extreme debility."

[Bradlaugh, Charles, M.P., son of Mr. Charles Bradlaugh, a solicitor's clerk, was born in the East end of London, Sept. 28th, 1833. He was educated at elementary schools in Bethnal Green and Hackney Road; and afterwards became successively errand-boy, coal-dealer, Sunday School teacher, and a free-thought lecturer. In Dec. 1850, he enlisted in the 7th Dragoon Guards, and served for some time in Ireland. He became orderly-room clerk, got his discharge, and in 1853 returned to London, becoming clerk to a Mr. Rogers, a solicitor. Having become confirmed in his Secularist views, he began to write and lecture regularly, adopting the pseudonym of "Iconoclast." He lectured at the Hall of Science, City Road; wrote abundantly, and in a few years was well-known throughout the country for his discussions with clergy and others on public platforms. In 1868 he began his efforts to enter Parliament, and after three times contesting Northampton in vain, was returned for that borough in 1880, his colleague being Mr. Labouchere. Meantime, in 1868-9, he fought a great battle in the law courts against the Attorney-General (who was prosecuting *The National Reformer*), which resulted in complete victory for himself. He also took a considerable part, during the winter of 1870, in getting up expressions of sympathy for France; and he travelled in Spain and in America, lecturing in several cities, and being well received. Since his entering Parliament, his name has been chiefly heard in connection with the long, arduous, and unfortunate struggle with regard to his right to take, or dispense with, the oath of allegiance. It is impossible here to find room for all the details of this most painful controversy; how the committee appointed to examine whether he had the right to affirm, pronounced, by one vote, in the negative; how he was refused permission to take the oath; how he persisted, was forcibly removed from the House, and committed to the custody of the Sergeant-at-Arms; how he was sued for a penalty for sitting and voting, being unqualified; how he in return sued Mr. Newdegate for "maintenance," and got a decision against him; how he thrice resigned his seat, in order to appeal to his constituency against the House, and was thrice, after fierce contests, re-elected; how the Affirmation Bill was brought in, and, in spite of one of Mr. Gladstone's finest speeches, was lost by a majority of 3; and how finally, after the Parliament of 1880-85 was dead, Mr. Bradlaugh (who had been again elected by Northampton) was allowed to take his seat in peace. He has since then taken a prominent part in debate, and has signalised himself by successfully moving for the establishment of a Labour Bureau. Of Mr. Bradlaugh's opinions it is nesessary to say very little. He is the leader of the Secularists, and with Mrs. Annie Besant has professed what are called Malthusian opinions on the population question. Prosecuted in 1868 for the publication of an old book by a certain Dr. Knowlton, Mr. Bradlaugh and Mrs. Besant were sentenced to six months' imprisonment and £200 fine; but the Court of Appeal quashed the conviction. Mr. Bradlaugh has also headed the agitation against perpetual pensions.—*Men of the Time.*]

*Satsuma Maru*, Japanese steamer, 1,160, Brown, 3rd February,—Hakodate, General.—Nippon Yusen Kaisha.

*General Werder*, German steamer, 1,820, Eichel, 4th February,—Hongkong viâ ports, General.—H. Ahrens & Co., Nachf.

*Lydia*, German steamer, 1,169, Peterson, 4th February,—Kobe, General.—Simon, Evers & Co.

*City of Peking*, American steamer, 3,128, R. R. Searle, 4th February,—Hongkong, General.—P. M. S.S. Co.

*Haiphong*, British steamer, 1,122, Harris, 4th February,—Kobe, General.—Jardine, Matheson & Co.

*Nagato Maru*, Japanese steamer, 1,160, Ekstrand, 4th February,—Kobe, General.—Nippon Yusen Kaisha.

*Yamashiro Maru*, Japanese steamer, 1,512, C. Young, 5th February,—Hakodate, General.—Nippon Yusen Kaisha.

### PASSENGERS.

ARRIVED.

Per British steamer *Verona*, from Hongkong, viâ Nagasaki and Kobe:—Mr. and Mrs. Carleton, Misses Carleton (3), and maid, Captain D. Lewis, Mrs. W. L. Merriman, Miss Pole, Messrs. A. Rogers, R. Yue Pwon, C. Henrique, Melmann, J. Chandos Pole, and Chope in cabin; 3 passengers in steerage.

Per American steamer *City of Peking*, from San Francisco:—For Hongkong: Miss Billings, Mrs. C. Richards, and Mrs. Liebenthal in cabin.

Per Japanese steamer *Omi Maru*, from Hakodate:—Messrs. Yuzawa and U. Kasiwagi in cabin; Rev. Beliose in second-class; 44 passengers in steerage.

DEPARTED.

Per British steamer *China*, for San Francisco:—Mrs. K. Williams, Mrs. Weston, Miss Gracie Plaisted, Mrs. E. Marston, Mrs. A. C. Corham, Miss Kirkpatrick, Mrs. Boss, Dr. Boninger, Miss A. B. West, Miss A. D. H. Kelsey, Messrs. R. S. Furlonge, S. Garcia, A. Boss, M. Russell, G. C. Wood, R. Lucas, E. M. Wood, M. Ikuta, Thos. Smith, and J. Hensen in cabin.

Per French steamer *Iraouaddy*, for Shanghai viâ Kobe:—Mr. and Mrs. Modest and child, Messrs. A. Deguy, E. C. Passey Adams, Wong Ye Won, E. de Smot, M. Lehmont, Sujo, Faussemagne, V. Longine, and Breton in cabin.

Per Japanese steamer *Saikio Maru*, for Shanghai and ports:—Mr. and Mrs. N. Bougard and child, Messrs. R. Kirby, Perrott Forshaw, O. Sasaki, H. Orita, and H. A. Collins in cabin; Mr. Kee Shi Yoong in second-class; 50 passengers in steerage.

Per German steamer *General Werder*, for Hongkong viâ ports:—Consul von Krencki, family, and European maid, Mr. Otto Reimers, family, and governess, Mrs. Feicke and servant, Miss E. Wood, Messrs. W. Blütgen and Loo King Cheen in cabin; 1 Portuguese, 2 Turks, and 6 Chinese in steerage.

Per American steamer *City of Peking* for Hongkong:—Mr. and Mrs. M. W. Belshaw in cabin.

### CARGOES.

Per French steamer *Iraouaddy*, for Shanghai viâ Kobe.—Raw Silk for France, 603 bales; for Italy, 31 bales; for other countries, 15 bales; total, 649 bales; Waste Silk for France, 315 bales; Treasure for Shanghai, $3,000.

### REPORTS.

The Japanese steamer *Satsuma Maru*, Captain F. E. Brown, reports:—Left Kobe January 31st at 00.30 p.m.; moderate N.W. wind and rain up to Hino Misaki; thence N.W. winds and cloudy weather to Oshima, which was passed at 9.25 p.m., afterwards moderate N. and N.E. winds up to arrival. Arrived at Yokohama February 1st at 6.30 p.m.

The Japanese steamer *Nagato Maru*, Captain Ekstrand, reports:—Left Hakodate January 31st at 2 p.m.; moderate north easterly winds and overcast sky; February 1st fresh breeze, overcast, with snow squalls. Arrived at Oginohama at 12.00 m. and left the 2nd at 4.45 p.m.; moderate breeze from west to north and cloudy sky. Arrived at Yokohama February 3rd at 6 a.m.

The Japanese steamer *Yamashiro Maru*, Captain C. Young, reports:—Left Kobe February 3rd at noon; had light variable winds and clear weather to Oshima, which was passed at 8.15 p.m., wind freshening from the northward; passed Rock Island the 3rd at 10.15 a.m., fresh breeze and fine weather to port. Arrived at Yokohama February 3rd at 4.30 p.m.

The American steamer *City of Peking*, Captain R. R. Searle, reports:—Left San Francisco on the 10th January; crossed the Meridian in 34° N.S., S.W., and westerly gales throughout the entire passage. Arrived at Yokohama on the 4th February.

The Japanese steamer *Omi Maru*, Captain J. Wynn, reports:—Left Hakodate February 2nd at 2 p.m.; had light northerly to westerly winds throughout the passage, with clear weather and moderate or N.E. swell. Arrived at Yokohama February 4th at 0.30. p.m.

The Japanese steamer *Niigata Maru*, Captain Arai, reports:—Left Kobe February 4th at 12.10 p.m.; had S.E. heavy winds and high sea to Rock Island; heavy rain from Rock Island to port, with strong N.E. winds and heavy sea. Arrived at Yokohama February 5th at 1.30 p.m.

### METALS.

Dull market, sales and deliveries both being on the most retail scale. Prices nominally unchanged.

| | per picul. | | |
|---|---|---|---|
| Flat Bars, ¼ inch | $2.60 | to | 2.65 |
| Flat Bars, ½ inch | 2.70 | to | 2.75 |
| Round and square up to ¾ inch | 2.60 | to | 2.75 |
| Nailrod, assorted | Nom. | | |
| Nailrod, small size | Nom. | | |
| Iron Plates, assorted | 2.70 | to | 2.80 |
| Sheet Iron | 3.00 | to | 3.40 |
| Galvanized Iron sheets | 5.80 | to | 6.00 |
| Wire Nails, assorted | 4.20 | to | 4.50 |
| Tin Plates, per box | 5.00 | to | 5.25 |
| Pig Iron, No. 3 | 1.20 | to | 1.30 |

### KEROSENE.

Market unchanged, dull tone. The *John Donald* has arrived from New York with a full cargo, thus increasing the stock once more.

QUOTATIONS.

| | | | |
|---|---|---|---|
| Chester | $1.70 | to | 1.72½ |
| Comet | 1.67½ | to | 1.70 |
| Devoe | 1 65 | to | 1.67½ |
| Russian | 1.60 | to | 1.65 |

### SUGAR.

Better market reported for White Refined, and buyers are said to be willing to pay higher prices. New Browns are shortly expected to arrive from Formosa.

| | per picul. | | |
|---|---|---|---|
| Brown Takao | $3.80 | to | 3.85 |
| Brown Daitong | 3.00 | to | 3.75 |
| Brown Canton | 4.50 | to | 5.50 |
| Brown Java and Penang | 4 80 | to | 5.20 |
| White Refined | 4 00 | to | 7.00 |

## EXPORTS.

### RAW SILK.

Our last issue was of the 30th ult. since which date settlements in this market amount to 730 piculs divided thus:—*Filatures*, 479; *Re reels*, 161; *Kakeda*, 40; *Oshu*, 50. In addition to these figures Japanese shipments have been 138 bales, making the total export trade of the week equal to 870 piculs.

The Market has continued strong, and with a declining exchange sellers have managed to advance prices, while many holders refuse to sell at all.

The telegraphic news from abroad continues dull, and we think holders here would do well to settle currently and not block the trade by raising their pretentions.

There has been some amount of daily trade from Europe; American buyers keeping out of the Market. Good silks of prime summer reelings get more and more scarce every day, and holders who are not in want of money seem justified in their conservative course.

Arrivals from the interior continue small, and the stock is reduced day by day. It is now less than 11,000 piculs, and with any revival in trade at all we shall soon see a further smart reduction.

There have been two shipping opportunities during the week, the S. S. *China* on the 31st ult, took 1,293 bales for the New York trade; while the *Iraouaddy*, on the 2nd inst, had 946 bales for Europe. These departures bring the present export figures up to 17,575 piculs, against 31,747 last year and 34,542 at the same date in 1889.

*Hanks.*—Not a single transaction during the week. The stock is small; sellers are not anxious and prices are all nominal in the absence of business.

*Filatures.*—Considerable enquiry for these for Europe. Good quality of fine size being freely settled at $600 per picul. Others a little worse in quality at $590, $580, and $575. For the States but little has been done, holders asking higher prices which buyers do not seen willing to pay.

*Re reels.*—Business in these has been small. The principal brands of *Joshu* are still held off the Market and holders generally are unwilling to do business. We apparently require a short spell of inaction to bring them round into the Market again.

*Kakeda.*—Here again prices have been forced up as the exchange declined, with the consequence that very little business has been done.

*Oshu.*—Here there has been a little more doing; some demand for these coarse silks coming from Europe. *Hamatsuki* has been done at $540 for best, with $515 and $510 for the lower grades.

| | piculs. | piculs. | piculs. |
| Settlements and Direct Export from 1st July | 19,600 | 34,100 | 34 500 |
| Stock, 6th February | 10,900 | 2,850 | 6,400 |
| Available supplies to date | 30,500 | 36,950 | 40,900 |

### WASTE SILK.

There has been rather more doing this week, and settlements are 700 piculs divided thus:—*Noshi*, 300; *Kibiso*, 315; *Neri*, 85.

The trade appears to languish for lack of prime quality, especially in *Noshi*. It looks as though the bulk of the trade for the present season were already done.

Prices are unchanged, but decidedly firm for anything of choice quality.

There have been two shipping opportunities, the French and German Mails. The former, *Iraouaddy*, on the 2nd inst., carried 315 bales and the latter, the *General Werder*, 4th inst., had 95 bales, all for Europe. These shipments bring the present total export up to 21,310 piculs, against 20,395 piculs last year, and 23,772 piculs at the same date in 1889.

*Pierced Cocoons.*—No transactions at all this week, and the stock seems likely to remain on hand until holders are willing to sell at a reasonable price.

*Noshi.*—One parcel of *Tama ito* has been done at $207½. Good *Oshu* has been done at $130, with medium at $120. The better qualities being now very scarce, buyers are turning their attention to *Joshu*, and several long lines have been fixed at from $60 to $75, according to assortment.

*Kibiso.*—Not a large business in this class; filatures have been done at $110, $105, $100, and $90. Ordinary *Hira* kinds at from $50 to $30, according to grade.

*Mawata.*—Still no business, the quality on offer not being suitable for buyers' requirements.

*Neri.*—Considerable business passing, and two or three large parcels have been done at from $9 to $13 for the uncleaned stock.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).

LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated) — the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." 1y. June 28, 1890.

KEATING'S COUGH LOZENGES.

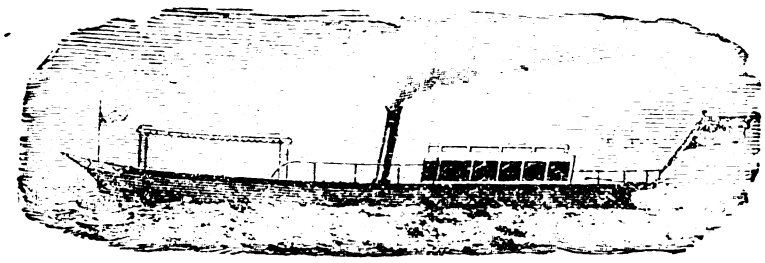
COUGHS, ASTHMA, BRONCHITIS, DIFFICULTY OF BREATHING are speedily cured by KEATING'S COUGH LOZENGES (recognised and recommended by the Medical Faculty). No other remedy is half so effective. One Lozenge alone gives relief. They contain no Opium, Morphia, nor any violent drug, and may be taken by the most delicate. One or two at bed-time ensure rest when troubled by the throat. Sold by all Chemists, in Small Tins. Dec. 27th, 1890.—21ins.

THE GREATEST WONDER OF MODERN TIMES.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."



SIMPLE, SAFE, AND CERTAIN!

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

MR. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

YARROW'S

SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

MACHINERY CONSTRUCTED FOR BOATS BUILT ABROAD.

YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition.

ASK FOR

LIEBIG COMPANY'S EXTRACT OF MEAT

FINEST AND CHEAPEST MEAT-FLAVOURING STOCK FOR SOUPS, MADE DISHES AND SAUCES.

And see that each Jar bears Baron Liebig's Signature in Blue Ink across the Label.

J. Liebig

Invaluable for India as an Efficient Tonic in all cases of Weakness. Keeps good in the hottest Climates, and for any length of time.

To be had of all Storekeepers and Dealers throughout India.

Cookery Books Post Free on Application to the Company.

LIEBIG'S EXTRACT OF MEAT Co., Limited, Fenchurch Avenue, London, England.

Sold wholesale by COCKING & Co., Yokohama. Cookery Books on Application to office of this paper.

June 7th, 1890.

DINNEFORD'S

The Universal Remedy for Acidity of the Stomach, Headache, Heartburn, Indigestion, Sour Eructations, Bilious Affections.

The Physician's Cure for Gout, Rheumatic Gout and Gravel: the safest and most gentle Medicine for Infants, Children, Delicate Females, and the Sickness of Pregnancy.

DINNEFORD'S FLUID MAGNESIA

MAGNESIA

Sold by all Druggists and Storekeepers.

N.B. ASK FOR DINNEFORD'S MAGNESIA.

AWARDED GOLD MEDAL L'POOL INTERN'L EXHIBITION, 1886.

ENGLISH MANUFACTURED

TOBACCOS

RICHMOND CAVENDISH CO.,
LIMITED.

LIVERPOOL.

SPECIAL BRANDS:—
"Pioneer" Golden Flake Cut.
"Richmond Smoking Mixture."
Superfine Bird's Eye.

"FAIS CE QUE DOIS: ADVIENNE QUE POURRA!"

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, FEB. 14, 1891.

BIRTH.

On February 10th, at No 3, Kaga Yashiki, Tokyo, the wife of Dr. L. BUSSE, of a daughter.

DEATHS.

At the General Hospital, Yokohama, on the 8th instant February, Charles Wirgman, aged 57 years.

On February 9th, at 239, Bluff, Yokohama, JAMES MARTIN, in his 81st years.

At No. 7, Kaga Yashiki, Tokyo, on the 10th instant, HENRY PELHAM, son of Professor C. G. Knott, D. Sc., F.R.S.E., aged 1 year and 2 months.

## *SUMMARY OF NEWS.*

THE Prince Imperial, who is now at Atami, will remain there during the present month.

THE section between Inabayama and Sanoji on the Osaka Railway was opened for traffic on the 8th instant.

THE Japanese man-of-war *Chiyoda Kan* started from Gibraltar on the 3rd instant for Port Said *en route* to Japan.

THE work of laying a tramway between the Kanzaki Station, Hyogo, and Kameoka, Tamba, will be commenced shortly.

HIS IMPERIAL MAJESTY THE EMPEROR, who had been suffering for some time from influenza, has now recovered from his illness.

THE House of Representatives has voted the adoption of the Committees Report in the case of all the Departments of State hitherto discussed.

H.I.H. PRINCE KOMATSU AKIHITO returned to the capital on the 7th instant from Shizuoka Prefecture, where he had been staying for some time.

THE resignation of Mr. Okamura, President of the Yokohama Law Courts, was accepted on the 10th instant. Mr. Komatsu, Chief of the Civil Bureau in the Judicial Department, will, it is stated, succeed him.

A MEETING of the Committee of the Seamen's Aid Society was held on the 7th instant, to discuss the advisability of erecting a life-saving station at Oshima in Kishiu.

A FIRE of considerable magnitude occurred in the Igura district of Tokyo on the 10th instant. The Episcopalian Church and the residence of Bishop Bickersteth barely escaped destruction.

THEIR Imperial Highnesses Princesses Kane and Tsune, who left the capital on the 1st instant, are at present at the Shorinkan, Oiso, where they intend to remain for about five weeks.

A GENERAL meeting of shareholders of the Taiko Shipping Company, Otsu, Shiga Prefecture, was held a few days ago, at which a dividend was declared at the rate of 1.8 per cent. per annum.

A REPORT by the Toyama Prefectural Government shows that owing to the recent heavy snowfall in that Prefecture some 343 buildings were destroyed or damaged, 6 persons severely injured, and 7 persons killed.

DURING the month of January last, gold, silver, and nickel coins were struck in the Osaka Mint to the following amounts:—Gold 5 *yen* pieces *yen* 57,175, silver 1 *yen* pieces *yen* 210,440, and nickel 5 *sen* pieces *yen* 297.000.

RESIDENTS of Osaka, desiring to have various articles shown in the Exhibition to be held at Chicago in 1893, held a meeting on the 5th instant at the Osaka Industrial Museum and discussed arrangements.

VISCOUNT KABAYAMA, Minister of State for the Navy, who had been suffering for some time from influenza, was able to attend business on the 6th instant. The same day he proceeded to the Palace, and was received in audience by the Emperor.

AN ordinary meeting of the Cabinet was held on the afternoon of the 6th instant, at which Counts Yamagata, Saigo, Oyama, and Matsukata, and Viscount Kabayama were the only Ministers present. The meeting closed at a little past 5 p.m.

A TELEGRAM from Osaka dated the afternoon of the 10th instant announces that fire broke out the same morning in the godown of the Temma Cotton Spinning Company, Osaka, and destroyed 30,000 catties of cotton before the flames could be subdued.

ON the night of the 31st ultimo an outbreak of fire took place in the house of Umeda Kinosuke, residing in Kanaoka-mura, Yamamotogori, Akita Prefecture, and destroyed 11 dwellings, 4 persons being burned to death before the flames could be subdued.

THE regular half-yearly general meeting of shareholders of the Japan Beer Company was held on the 8th instant at the Kosei-kan, Kyobashi, Tokyo. The loss on the working of the Company during the latter half of last year amounted to over *yen* 10,000.

THE shareholders of the Osaka Mercantile Shipping Company have presented to Mr. N. Kawahara, Director of the Company, the sum of *yen* 1,500, accompanied by a letter of thanks, in recognition of his services to the Company. Mr. Kawahara, while accepting the letter, placed the money to the credit of the Company.

AT the regular general meeting of shareholders of the Omi Hemp Spinning Company held on the 18th ultimo, Messrs. Koizumi Shinkichi and Yamanaka Riyemon were elected President and Vice-President respectively, Messrs. Takaya Mitsuo, Igari Yazayemon, and Abe Ichitaro being elected Directors.

LORD LI, the new Chinese Minister, and Mr. Li Shu-chang, his predecessor, proceeded on the 10th instant to the Palace, where they were received in audience by Their Majesties the Emperor and Empress. On the same day Major Sakamoto Hachirota, who was appointed some time ago a military attaché of the Japanese Legation at St. Petersburg, was admitted to an Imperial audience.

THE ceremony of presenting certificates to graduates of the Koshu Gakko (a Preparatory School of Engineering) was held on the 8th instant, the ceremony being opened by the reading of the reports of the school for the last year. Mr. Wada, Director of the Mining Bureau in the Agricultural and Commercial Department, and Mr. Fujioka Ichisuke addressed the meeting. Viscount Enomoto, a Privy Court Councillor, was also present at the meeting.

THE receipts of the Omi Hemp Spinning Company during the latter half of last year were *yen* 61,473.768, to which *yen* 5,012.324, brought over from the last account, were added, making a total of *yen* 66,486.082. Of this amount *yen* 56,288.530 were set apart for miscellaneous expenses, *yen* 400.000 for rewards to officers, and *yen* 3,397.562 were carried forward to the next account, the remainder, that is *yen* 6,400.000, being appropriated as a dividend for the half-year at the rate of .8 per cent. per annum.

THE ordinary half-yearly meeting of shareholders of the Hokkaido Coal Mining Railway Company was held on the afternoon of the 10th instant at the Kosei-kan, Kyobashi, Tokyo. The net profits during the latter half of last year were 212,422.025, to which *yen* 11,273.685 brought over from last account were added, making a total of *yen* 223,695.710. Of this amount, after adding to the reserve fund, and setting aside the usual amounts for rewards to officers, and miscellaneous expenses, *yen* 137,150.000 was appropriated as a dividend for the half-year, to be declared at the rate of 11 per cent. per annum.

THERE is no improvement in the Import trade, Yarns and Shirtings being in the same position as last reported. The Metal market is dull. Holders try to get an advance to level up exchange, but buyers are few and will not take anything if they can help it. The little doing in Kerosene seems to be principally damaged cargo *ex* late arrivals. Rates are easy, and deliveries appear to be fairly good. The Sugar trade has been active, and some large parcels of white Refined have sold for more money. Brown sorts are quiet, but a good deal has arrived during the week There has not been a great deal of Silk sold. The market is strong, and holders take every opportunity of pushing prices up, many taking their Silk off the market altogether. A little low grade Tea has been bought, but there is nothing left now but undesirable leaf. Exchange has fluctuated, and during the last few days the tendency has been downwards.

## *EDITORIAL NOTES.*

### THE DIET.

THE 6th instant was a day full of the keenest interest. However little concern Japanese domestic politics may seem to have for the residents of Yokohama—a point concerning which we by no means share the opinion of the author of "Things Japanese"—the issues depending upon the debate now commenced in the Diet cannot but attract attention. After weary days of endless questioning, the House of Representatives has at last addressed itself to the serious business of dealing finally with the Budget. Before proceeding to the task it had to decide how to divide the Budget for purposes of discussion, and in respect of this two propositions were submitted, one making a Bureau, the other a Department, the unit of voting. The former course seems to have been regarded as favourable to the Government. It was rejected, and thereupon, with a degree of haste certainly looking injudicious under the circumstances, the President put the second motion and declared it carried by a majority. Vigorous protests ensued, but the House abided by its decision. At this stage another attempt was made to bring about a re-discussion of the whole question of the Committee's Report. Mr. Suyehiro Shigeyasu, an eminent journalist, moved a resolution which, if adopted, would have involved that result. His speech in support of the motion was forcible and eloquent, but permeated by an undertone of hopelessness. He knew that he was fighting a losing battle. Of course the House refused to grant urgency for the motion. Then the debate on the Budget began at last. It was opened by Mr. Shiota Okuzo, a member of the *Riken Jiyu-to*, who supported the Committee's Report, making, indeed, no attempt to demonstrate its legality, but dwelling on the general necessity of reducing the present expenditure, which, he alleged, was not really required for State purposes, but had been swelled to unbearable dimensions by the system of favouritism developed under a Bureaucratic Government. The line taken in this speech doubtless indicates the tone that will be generally adopted by the opposition. The next speaker was Mr. Inouye Kakugoro, formerly a prominent member of the *Rikken-Jiyu-to*, but now a free lance. Mr. Inouye set himself to pull the Report to pieces in the most systematic manner. After he had spoken for about an hour, it was found that the time for the House to rise had already passed. Thereupon a member inquired politely how much longer the speech was likely to last, and Mr. Inouye, with an air of meditative alacrity, said that he thought he could get through in about four hours more, an announcement that sent the members home at once. It should be remembered, in order to understand the proceedings, that in addition to the Committee's Report, there are other schemes of reduction before the House, and that an opponent of the Committee's Report is not necessarily a supporter of the Budget. Still, speaking generally, the House may be divided into two camps, the one occupied by men advocating reductions which the Government will certainly decline to concede; the other by men also advocating reductions, but not of such a character as to challenge strong official opposition.

* * *

The proceedings in the House of Representatives on the 7th were uneventful. Mr. Inouye Kakugoro, whose attitude in respect of the Budget seems to be particularly exasperating to the members of the *Riken Jiyu-to*—the party that recently numbered him as a prominent members—continued his powerful indictment of the Committee's Report. He did not indeed, carry out his threat of devoting four hours to the delivery of the portion of his speech remaining over from Friday, but he did address the House for nearly two hours, and his criticisms of the Report were of an exceedingly damaging character. But it is now abundantly evident that the opposition cares very little whether the methods of dealing with the Report are constitutional or not. "If the reductions recommended involve changes of the organization of the Administration, then let those changes be made," say the Extremists. This attitude was well illustrated by Mr. Minoura's replies to the pertinent questions of Mr. Takanashi. His own opinion, the former said, was that the administrative changes necessitated by the reductions ought to follow as a direct result of the reductions, but at the same time he thought it advisable that the steps prescribed by the Constitution should be followed. In other words, the Constitution provides that "the Emperor determines the organizations of the different branches of the administration, and the salaries of all civil and military officers, and appoints and dismisses the same." It further provides that if the Diet has any reforms to suggest in respect of the exercise of these Imperial prerogatives, the suggestions shall take the form of representations. And it finally provides that the expenditures required for the exercise of these prerogatives shall not be reduced or rejected by the Diet without the Government's concurrence. But the opposition asks the House to reduce not only the expenditures, but also the number of officials, and either to rest content that the Organization of the Administration must be re-adjusted so as to suit the reduced Budget, or, if any doubts are entertained on that point, to prepare and forward the prescribed representations. "First do what you want to do, and afterwards ask permission to do it," appears to be the motto of the Extremists. Presumably a vote will be taken to-day, but possibly the speeches still to be delivered will occupy the House until to-morrow. The Foreign Office happens to come first on the list, and is consequently the point about which the battle rages most fiercely, for inasmuch as the same principles of reduction are applied to every Department, the decision of the House with reference to any one will be equivalent to a decision with reference to the whole.

* * *

Monday furnished another surprise. The House having listened during a great part of three sittings to speeches for and against the Budget Committee's Report, and understanding that quite a long list of members still desiring to speak was in the President's hands, voted the closure at 2.30 p.m., by the very small majority of 4 in a House of 251. It seemed as though now, at length, the first conclusive decision would be taken in reference to the Budget. But no; another serious interruption occurred. Viscount Okabe, Vice-Minister of State for Foreign Affairs, who appeared as Government Delegate for the Foreign Office, had intimated to the President his desire to address the House after the voting of the closure. If the President had entertained any suspicion that the House would object to hear the Delegate at such a time it would obviously have been his duty to give immediate publicity to the intimation he had received. But he appears to have suspected nothing, knowing, in the first place, that the Government Delegates have the right to address the House at any time, and remembering, in the second, that no objection had been raised when Count Matsukata recently spoke after a decision had been arrived at in respect of the procedure under Art. 67 of the Constitution. Accordingly the President allowed the closure to be voted, and announced that he had given permission to Viscount Okabe to address the House. Protests were immediately raised. A majority of the members showed plainly that they disapproved altogether of the Government Delegates addressing them after the opportunity of further discussion had been lost. No feeling could be more natural. An explanation offered or an announcement made by a Government Delegate might greatly influence the voting, and ought to be subject to full discussion. So resolute was the House on this point that despite the precedent of its own behaviour a few days previously, and despite the plain language of the Constitution, it voted against hearing the Delegate, albeit by the smallest majority yet on record, a majority of 2 in a House of 270. But there was evidently a feeling of uneasiness among the members. The decision not to hear the Delegate had been taken on a motion which included a proposal to rescind the closure. It was therefore still possible to consider the simple question of allowing the Delegate to speak, and a proposition to that effect was made. Thereupon Viscount Okabe declared, as the Cabinet's opinion, that he had the right to speak, and the House was thus suddenly placed in the position of determining whether its own interpretation of the Constitution—for it had in effect voted against hearing the Delegate—or the Government's interpretation, was correct. It wisely decided to sleep over so important a question, and thus, instead of a virtually definite vote on the Budget that day, the business of discussing a weighty point of procedure intervened. There can be little doubt, we think, that the convenience of the House would be best consulted by the Delegates of the Government making any necessary announcements before the closure has been voted, and while the House is still at liberty to debate the subject matter of such announcements. But as to the question of right, we fail to see how there can be any hesitation. The Constitution is perfectly clear. It says:—"The Ministers of State and the Delegates of the Government may, at any time, take seats and speak in either House;" and the Law of the Houses says:—"The Ministers of State and the Delegates of the Government shall be allowed at any time to speak, but the speech of no member shall be interrupted that they may do so." It is thus absolutely certain that a Delegate is legally competent to address the House after the closure is voted or before it, just as he pleases, and the House placed itself on the 8th in the not very creditable position of having postponed its regular business for the purpose of discussing whether it would do what it could not refuse to do without a flagrant breach of the Constitution. If it objected—and it had, we think most excellent reason to object—to a Government Delegate speaking after the voting of the closure has effectually silenced every one else, then its simple course was to make a representation on the subject.

* * *

The House of Representatives must have felt rather foolish on Tuesday. At the commencement of a debate which promised to land it in an unpleasant dilemma, the Minister-President of State appeared upon the scene, and in a brief address intimated very plainly that the course contemplated by the House with regard to the expenditures enumerated in the 67th Article of the Constitution was regarded by the Government as unconstitutional, and could not possibly be endorsed. In other words, Count Yamagata told the House that if it persisted in going its own way despite the Government's—and therefore the Emperor's—declaration of the unconstitutionality of its proceedings, it must look forward to finding its resolutions treated as illegal. The Minister-President, answering questions subsequently put to him by members, gave three reasons for the Government's interpretation of the 67th Article; namely, first, that since the Diet has no means of rescinding or reducing public expenditures except by voting, a law forbidding it to rescind or reduce without the Government's concurrence, can only mean that concurrence must be sought and obtained before voting. Secondly, that the right to make Representations to the Government, as provided in the Constitution, is distinctly designed to meet such contingencies (*i.e.* is distinctly designed as a means of enabling the Diet to seek the Government's consent or concurrence in respect of steps which the Diet is not competent to take of its own motion). And thirdly, that since each House carries on its procedure independently of the other, the word "Diet" in the 67th Article must be taken to mean each House separately, for the purposes of the procedure mentioned in that Article. In brief, Count Yamagata declared that, in order to obtain the Government's concurrence for reducing or rejecting the "fixed expenditures" of Article 67, the one and only constitutional plan is to make a "Representa-

Digitized by Google

tion," and that the Government will not be a party to any other course. This significant announcement was accompanied by a statement that the Delegates of the Government have a right to address the House at any time according to the Constitution, and that, as much as the House values the rights enjoyed by itself under the Constitution, so much is the Government entitled to guard the rights similarly conferred on it. Receiving these intimations, a section of the House showed some disposition to re-consider the decision previously taken with regard to the 67th Article, but the Radicals and Progressianists, confident in their majority, refused to suffer any step of the kind. Thereupon the debate was about to be continued, when Viscount Okabe, whose attempt to speak the preceding afternoon in his capacity of Government Delegate had been opposed, rose and said that as the communication he himself had desired to make had now been made by the Minister-President, he need not trouble the House any further. The more sensible members ought to have felt relieved by this *denouement*, but there was no concealing the fact that while the House hesitated and chafed about allowing a Government Delegate to speak after the voting of the closure, the Minister-President of State had come quietly and said what the Delegate wanted to say. There the episode of the Delegate was suffered to drop, and the voting on the Budget proceeded. Contrary to expectation, a great majority—52 in a House of 254—voted for the Budget Committee's Report, the minority numbering only 101. It had been known, indeed, for some days that all chance of the Report being rejected was gone, but the public did not suppose that the majority on the side of the Extremists would be so large. There is no longer, we imagine, any doubt about the fate of the amended Budget. If it comes into existence at all, which is very problematical considering the rumoured attitude of the Upper House, not to speak of the brief interval remaining before the close of the session, it will be rejected by the Government as unconstitutional. The Lower House might have avoided this abortive result by a very small exercise of circumspection and judgment, but neither of these qualities has been conspicuous in the attitude of the Representatives towards the Budget.

* * *

Thursday's divisions in the Diet show that a sense of hopeless defeat has driven out of the field many of the opponents of the Budget Committee's Report. They mustered in full strength on the occasion of the first vote, that relating to the Foreign Office oppropriations, and succeeded in making a powerful minority—101 against 153. But that vote practically settled the question, since it pledged the House to the general principles of reduction applied by the Committee to all the Departments alike. Thus, though the opponents of a manifestly unconstitutional measure, continue to raise their voices at each stage of the proceedings, they evidently take little interest in the balloting. Only 32 gave themselves the trouble to vote on the Finance Department Section, and thus it resulted that the supporters of the Report had a majority of 83 in an evidently listless House. The whole proceedings, indeed, were exceptionally devoid of interest. Some flash of vitality was imparted to them by Mr. Shirane, Vice-Minister for Home Affairs, when, in the course of an exhaustively reasoned speech, he proudly claimed that while the Report adopted by the House flagrantly violated the Law and the Constitution, the Budget itself had been compiled in strict obedience to every legal provision. Mr. Suyematsu Kencho, too, helped to relieve the general monotony by charging that whereas the Government should have aided the House to arrive at the proper interpretation of a knotty Constitutional problem, the members had been left to work it out for themselves, and then, having committed themselves to a solution, had been told, too late, that the Cabinet disagreed with them.

### THE DIET'S PROCEEDINGS.

It seems only fair to remonstrate against the unacknowledged use to which our reports of the Diet's proceedings are put. The preparation of these reports is a matter of no small labour. By deferring their publication for one day, our task would be greatly lightened, since it would then be possible to use the stenographic records appearing in the *Official Gazette* the morning after a debate. But we have not been able to reconcile ourselves to so much delay. The House of Peers seldom sits after five o'clock in the afternoon and the House of Representatives used to rises at 6 p.m. and now rises at 4. It is therefore possible, by making special arrangements, to obtain reports of the proceedings during the same day, and to translate them for publication in the *Japan Mail* the following morning. The reports reach us in instalments, from 5 or 6 p.m., until 11 or 12 p.m., and their epitomised translation is seldom completed before the small hours of the morning, the task necessarily devolving upon the editor himself. These reports, prepared at such heavy cost of labour and attention, are taken by the *Japan Gazette* when convenient, and published in its evening issue the same day in a re-epitomised form without acknowledgement of any kind. We cannot think that this is either fair or consistent with journalistic courtesy. That our reports should be used by a contemporary is in no sense a grievance. On the contrary, we are pleased if anything appearing in our columns can serve to lighten the editorial task of a confrère. But, after all, the foreign journals published in this settlement are competitors, and it cannot be considered just that our keenest competitor should appropriate our work to its own purposes without the least acknowledgement. The present editor of the *Japan Gazette* can translate and epitomise Japanese reports or other documents at least as well as we can. But even for him the task of rendering into English and abbreviating, where necessary, page after page of parliamentary proceedings, could be no light labour. On the other hand, to take an already translated report and cut it down to a fraction of its length, without making any material alterations of phraseology, is a business of great ease, capable of being achieved in twenty or thirty minutes. We are entitled to ask, therefore, that if our reports be employed in the latter fashion, their source should be acknowledged.

* * *

In connection with this question of journalistic competition, we desire to make brief and final reference to the matter of telegrams, so frequently discussed lately in the columns of a local contemporary. The story of Reuter's telegrams to the *Japan Mail* has been fully related before, but for some reason its simplest facts are persistently misunderstood. Originally Yokohama obtained its telegraphic news by means of a combination among public bodies, leading mercantile firms, and the newspapers. This arrangement proving unworkable, was ultimately discontinued, and for a time the Settlement remained in darkness so far as foreign intelligence was concerned. The *Japan Mail* then subscribed for Reuter's telegrams, bearing the whole cost itself, a very heavy item. There was no monopoly whatever. Any other newspaper might have done as the *Japan Mail* did. Neither of our local contemporaries made any attempt in that direction for a long time—some two years, if we remember aright. They contented themselves with reproducing our telegrams. By and by the *Japan Gazette* proposed combination. No obstacles were thrown in its way, but when figures were submitted, the proposal quietly expired and things fell into their former groove. Again after a long interval, during which we continued to bear the whole expense of the service, Reuters' Agent at this port, without consulting us, entered into an agreement to furnish the same telegrams to the *Official Gazette*. It became necessary then to consider the question of combination, and in the sequel of various consultations an agreement was finally concluded which, though not by any means securing a monopoly to the *Japan Mail*, did provide that neither of the Yokohama evening journals should be allowed to become partners in the arrangement. The chief reason of this proviso was very simple. Between newspapers published at the same hour, approximately, there need be no difficulty in effecting a combination for the purposes of telegraphic items. But between newspapers of which one is published in the morning and another in the evening, no conceivable terms of partnership are consistent with the hypothesis of competition. Further, when a jonrnal has for several years incurred heavy expense to procure telegraphic news, it aquires a title to any advantage connected with the sole publication of that news. This is surely a principle of ordinary justice. Any business man would laugh at the notion of being required to share with keen rivals special facilities which he has secured for himself at heavy cost, and which, by his own enterprise, he has been enjoying for years while they, too timid or too economical, shrank from making a similar effort. The attempt which has been made to import spurious sentiment into this matter by representing the *Japan Mail* as a selfish monopolist, scarcely deserves serious notice.

### BANKRUPTCY OF AN OLD FIRM.

It is stated that the Shimada Bank in Kyoto has put up its shutters. The firm of Shimadagumi is one of the oldest and most respected in Japan. It occupied a high position in the days of the eighth Shogun of the Tokugawa Dynasty, and received from that Prince the honour of being appointed one of the *yo-tasshi* of the Yedo Court. At the beginning of the *Meiji* era, the house stood almost on the same level as the houses of Mitsui and Ono. But in 1885, troubles overtook it, and only by great exertions was it enabled to continue its business. Its chief employment of late years has been banking. The Shimada Ginko in Aya-no-Koji, Kyoto, was well known and generally trusted, and its downfall will doubtless entail heavy losses. The cause of the catastrophe is the recent deadlock in the silk trade.

### A COINCIDENCE.

A curious coincidence is said to have occurred a few days ago in Tokyo. A number of electrical experts held a meeting at the rooms of the Geographical Society, in Nishikonya-cho, Tokyo. A lecture was given by Mr. Katogi Shigenori, on the subject of electricity and fires. The lecturer demonstrated by drawings and by reference to actual electrical apparatus, that, speaking scientifically, there ought to be absolute security against fire in using electric lights. A few questions were asked, and then one of the audience rose and said:—"Mr. Katogi has just told us that fires ought not to be caused by electricity, but if the safety fuses are not properly constructed and attached, it is too much to predict immunity from fire. As I was on my way to this meeting, I passed through Minami Kinrokucho, and heard people saying that fire had broken out from electric lighting apparatus in the upper storey of a furniture shop. On going there I found that the statement was true. Some three feet of the flooring had been destroyed by a portion of the electric wire becoming red hot, owing to the safety-fuse being defective."

### OGASAWARA-JIMA.

Mr. Taguchi, in a recent number of his journal the *Keizai Zasshi*, writes on the peculiar position which Ogasawara-jima (Bonin Islands) occupies in regard to the South Sea trade, and argues that that group of islands should be made a free port open to the commerce of the whole world. At present the islands are not open to foreign commerce, but they are visited every year by a number of American whaling vessels on their way to the North. These vessels are considered to be seeking shelter under stress of weather. Further, there are many Japanese who go abroad in these vessels without satisfying the necessary formalities. Such irregularities, Mr. Taguchi continues, may be passed over, but there are other things which cannot be so easily overlooked, considering their bearing on the growing trade between Japan and the South Sea Islands. According to the present customs regulations,

Digitized by Google

vessels engaged in foreign trade are prohibited from trading in any port not opened for foreign commerce. Such a provision is at present necessary for the purpose of preventing smuggling, but as to Ogasawara-jima, Mr. Taguchi pleads that its case presents a widely different aspect. Its only chance of becoming prosperous consists in trading with foreign vessels, and there would be little harm if smuggling were carried on there. He consequently thinks it absurd to bring Ogasawara under the regulations applicable to other parts of the Empire. He then alludes to his personal experience of the inconvenience of the rule as applied in the Bonin Islands. When he touched there on his way home from the South Sea Islands, he found the islanders greatly disturbed about the scarcity of rice in stock. He had some surplus quantity of the grain in his ship, and to the great joy of the people, he sold it, after receiving the approval of the local authorities. He did this for the benefit of the inhabitants, but he questions the perfect legality of such a proceeding on his part. Further when he was on the point of leaving for Tokyo, he was entreated by the islanders to transport a quantity of sugar to the latter place, but in consideration of the regulations now in force, he declined to comply with their wish. Thus the application of the rigid customs regulations in Ogasawara-jima excludes it from whatever benefits it might otherwise receive from the increasing trade between Japan and the South Sea Islands. Such a condition of things in that outlying group is also regrettable from another point of view. Ogasawara-jima occupies an extremely important position in the outer lines of national defence. It was here that Commodore Perry established his head-quarters in view of probable hostilities with this country. An enemy once establishes there, the arms of the sea at the head of which Tokyo stands would be virtually in a state of blockade, and within two months the capital would be deserted by its inhabitants through the fear of starvation. The best method of guarding against such contingencies, is, in the opinion of Mr. Taguchi, to made Ogasawara-jima what Hongkong already is, a free port to all the world. The objection that much of the trade now centring in Yokohama would that be diverted to the Bonins, and that import duties would be evaded by passing goods through there, does not possess any weight with Mr. Taguchi who, an enthusiastic free-trader, is not at all perturbed about such contingencies.

### EMPLOYMENT OF WOMEN IN JAPAN.

THE practice of employing female labour in Government offices was, we believe, inaugurated by the Finance Department. Everybody who has visited the Printing Bureau of that Department remembers the long rows of dapper, clean-looking girls, with their simple uniform, that worked there, and still retains a vivid recollection of the extraordinary minbleness and precision of their fingers. The introduction of telephones has now opened up a new field for the services of women. At most of the exchanges (*Kokan Kyoku*) the work is almost entirely carried on by females, and the results are eminently satisfactory. It is rumoured that the Ministry of Communications, finding that things get on so smoothly in the Telephone section, contemplates extending the experiment to the Telegraph section also.

### RING UP THE CURTAIN!

THERE has been a most criminal habit of concealment in vogue for several years in Yokohama. If such a system were pursued in London it would "call forth a howl of indignation and scorn," but "in Japan from ancient times concealment of the faults of statesmen while they are in power has been customary." The general motto of public writers, who ought to know better, drat 'em! has been that "while men are in office their practices are of the most unquestionably honourable and straightforward type," and that even "if a foreign journalist in his own secret soul knows it to be otherwise, it ill becomes him to take the public into his confidence." "The principle has been to conceal as much as possible." "If you can't hide everything, then go on the principle of hiding as much as possible." But thank the kind stars a new era has dawned. The veil is about to be lifted, and the penetralia of wicked officialdom exposed to our unaccustomed gaze. How exciting it will be! And what gratitude the community ought to feel towards the Great Unveiler! He will be a general benefactor. He possesses access to "secret-revealing newspapers like the *Toyo* and the *Nippon*" and he's really going to take us all behind the curtain with him. Isn't it thrilling? Only twenty *yen* a year and you can sit at the perpetual peep-show; aye, and get a copy of Webster's dictionary free gratis all for nothing into the bargain. The servile villains who have been hiding the naughty Government's wickedness and exploiting the credulity of the foreign public for all these years, will now be put to utter shame. The day of triple honesty peeps, and line upon line of startling revelations will teach us the truth. Oh, happy time! oh, blessed Unveiler!

### EDUCATION.

OUR education continues. We have now learned another point in the art of journalism. It is this:—If, having avowedly "given a summary of the articles" contained in another journal, you are proved to have included matter not contained in those articles, then fall back upon the device of saying that the interpolated portions were what you "read between the lines of the articles." The beauty of this scheme is that it has absolutely no limit. The unprinted matter contained between printed lines is capable of endless expansion. You are therefore quite secure against any charge of exaggeration or misrepresentation. Your answer simply is that your "acquaintance with the style of the articles was sufficiently minute to enable you to read between the lines," and that, if other folks are not gifted with equally microscopic vision, so much the worse for other folks. Under pretence of quoting what a writer says, you are thus always enabled to represent him as saying what you wish that he had intended to say.

### THE "SOSHI" AGAIN.

THE *Choya Shimbun* says that the *soshi* are again becoming truculent. The present objects of their wrath are Messrs. Inouye Kakugoro, Oyagi Biichiro, and Suyematsu Kencho, all prominent opponents of the Budget Committee's Report, though it is not distinctly stated that this particular question is the direct cause of the *soshi's* excitement. They belong, we read, to the *Young Men's Association* (*Seinen-kai*) of the *Kwan-to*, and they have been considerate enough to convey a warning to the above three gentlemen that assault and battery are in the air. Information of this outlook was immediately conveyed to the police, says the *Choya*, with the result that the constables on duty at the Diet were increased, on the 7th instant, and that a guard of three men each was attached to Messrs. Inouye, Yanagi, and Suyematsu after the session closed.

### A DESERVING FAMILY.

ENGLISH readers, happening, in their perusal of home journals, to light on reports of the proceedings of the various Royal Commissions appointed to investigate the condition of the Scotch crofter, must have been peculiarly impressed by the ignoble whine which at times marked that interesting person's appearances in the witness box. In the Highlands, as in Ireland, the wily tongue of the agitator has had its effect, and while many stories of real distress and hardship have come before the Commissioners, there have not been wanting such witnesses as have awakened less the sympathy than the derision and contempt of their examiners. In too many instances the publication of the evidence of these unworthy representatives of a most deserving class have given rise to the impression that the Scotch crofter is a whining, lazy vagabond, who shrinks even from emigration, because of the prospect of hard work which it unfolds to his gaze. Here is a story which may serve to illustrate the character of the real Scotch crofter, untainted by the poison of the political agitator:—Father Macdonald, the parish priest of Shiel Bridge, in Ardnamurchan, tells the following: Poor old John Macdougald, with his little holding and his stock of three cows and a few sheep, is now in his ninety-third year. He has been burdened for twenty years with a bed-ridden wife and an idiot daughter incapable of work. John himself, some six years ago, was stricken down, and for twelve months was unable to leave his bed. During—and it might almost be said, long before and since—this period the cultivation of the croft, besides the entire care of attending to the parents and the imbecile sister, has been bravely undertaken single-handed by the aged couple's unmarried daughter Anne. "No one," says Mr. Macdonald, "can say how she faced the difficulty; but she did it, and without a murmur." Meanwhile Margaret, another unmarried daughter, the only remaining member of the family in a position to render help, being in service in the south, has, year after year, done her part by regularly remitting a considerable portion of her earnings. The result is that, with the exception of being excused from paying the poor rates, neither the crofter nor his children have ever asked for a penny of assistance from the public. It is pleasing to read that old John has lately recovered something of his bodily powers in a marvellous way, so as to be able to take a hand again in the work of the little farm.

### THE EMPEROR OF RUSSIA AND HIS LONDON COUNSELLORS.

IT is to be hoped that the kind folks in London who, through the Lord Mayor, addressed the Emperor of Russia on behalf of the Jews within Russian territory, will appreciate the justice of the rebuke they have received. The notion of a body of philanthropic gentlemen constituting themselves into a sort of tribunal of judgment to pronounce upon the propriety or impropriety of a European Ruler's conduct towards the inhabitants of his own realm, has little to commend it to sensible people. But when the self-constituted tribunal undertakes to forward a species of remonstrance to the Sovereign concerned, one is puzzled whether to call the proceeding officious or impertinent, or both. We should like to see how the Lord Mayor of London and his busy fellow-agitators would look if some citizens of St. Petersburg addressed, through their civic dignitary, an appeal to the Queen of the United Kingdom on behalf of her subjects in Ireland. The Russian humanitarians would receive a pretty strong hint to mind their own concerns.

### COUNT YAMADA.

THE immediate resumption by Count Yamada of the active duties of his post as Minister of State for Finance is now, we believe, assured. It was, indeed, expected that an intimation to that effect would appear in the *Official Gazette* yesterday, but doubtless no further delay will take place. We cannot be surprised that Count Yamada's chagrin at the postponement of the Commercial Code induced him to think seriously of resigning his portfolio. So far as the main body of the Code is concerned, the postponement of its operation until 1893 cannot, we think, be regretted. Its enactment separately from the Civil Code always seemed a measure of doubtful utility from a purely legislative point of view. But when we remember that the postponement voted by the Diet involves the continued want, for two years longer, of any efficient laws of bankruptcy or companies, it is impossible not to regret deeply that the originally fixed date had to be altered. With the laws in their present condition, the Japanese Courts are virtually closed to foreign creditors. The Judges may be intelligent, competent, and well-disposed, but the dishonest debtor can snap his fingers in the face of their judgment; an appeal is always open, and pending its hearing the debtor's property may be effectually placed beyond the reach of his unfortunate creditor. Such a state of affairs being quite elysian for unscrupulous Japanese dealing with foreigners, we can easily account for the alacrity

Digitized by Google

with which one section of public opinion opposed the speedy operation of the Commercial Code. Another and much more important section is composed of merchants, manufacturers, and speculators directly or indirectly interested in the bubble enterprises that have been floated during the past five years. The Osaka tradespeople made a gallant fight in the interests of the law that would have subjected these gentlemen to thorough control, but prejudice, aided, says rumour, by persuasive methods not unworthy of the cause in which they were employed, turned the scale against the Code. Perhaps in the history of modern Japan no stranger spectacle has been seen than that of respectable barristers and foreign journalists uniting to oppose the operation of laws so essential to the sound and prosperous conduct of business as were the Bankruptcy and Company Sections of the discredited Code. Count Yamada, we repeat, might well be disgusted to encounter opposition of such a character. The point raised with reference to the connection between the Code and Treaty Revision is quite inexplicable, except in so far as the action of the Diet may be interpreted to signify hostility to the Civil Code and the Code of Civil Procedure also. In the interests of Treaty Revision it did not matter a whit whether the Commercial Code went into operation before the Civil Code or simultaneously with it. The speedier enforcement of the Commercial Code was evidently dictated purely by domestic considerations. For the rest, Count Yamada's return to his post must of course be interpreted to signify that he has confidence in the stability of the Cabinet.

### THE EMPEROR.

IT is pretty certain that His Majesty the Emperor has suffered from a very severe attack of influenza. A rumour to that effect found its way abroad at the time when nearly all the Court Ladies were attacked by the epidemic, but the Imperial ailments are kept wonderfully quiet in this country, and people soon became persuaded that the Sovereign's condition had been falsely represented. Now, however, the vernacular press states very confidently that this Majesty's illness lasted for forty days, and that a high degree of fever was registered at one time. Happily His Majesty is now convaleseent.

### THE "SOSHI."

THE *Soshi* who on Monday were reported to be menacing Messrs. Inouve Kakugoro, Suyematsu Kencho, and Oyagi Biichiro, made an attempt yesterday against the first-named gentleman. It appears that when the House of Representatives rose for its mid-day recess, Mr. Inouye proceeded directly towards the Dining Room, and just as he was about to enter it, he received a blow on the right side of the face from an iron stick. He turned at once, seized his assailant, just as the latter was about to repeat the blow, and, pinning him against the wall, held him there until the police, summoned by Mr. Suyematsu Kencho, came and secured the man. He proved to be a *shizoku* of Mito about 30 years of age, and named Aoki Yasuatsu, but no information of a fuller character has yet been obtained. Mr. Inouye, being only slightly injured, was able to attend in the House, where he gave an account of what had occurred. According to his version, the arrested man seems to have had three or four accomplices, for they were observed running away immediately when Aoki was seized. It is pretty evident that the intentions of these *Soshi* are not of a very deadly character, since, being armed with iron sticks, they deliver blows that do not even temporarily disable their victims, and since they think rather of making their escape than of accomplishing anything serious. All this only tends to confirm the gradually growing belief that some of them are actually in the pay of members of the Diet, at whose bidding they undertake the rôle of intimidation. Their presence within the very precincts of the House is an exceedingly suspicious circumstance. They could not have got there, or ought not to have been able to get there, without the assistance of members, unless, indeed, the arrangements for excluding strangers are not as complete in the temporary chamber as they were in the original building. It will certainly be the duty of the Diet to see that this affair is sifted to the bottom.

### EDUCATION.

OUR education proceeds. We now learn a new controversial device. It is this:—If you cannot disprove an opponent's statement, adopt it as your own, put it into the mouth of your own witnesses, and then turn round and ask your adversary whether he ventures to contradict you any longer. In order to explain this admirable process more clearly, we append a recent illustration of its practice:—

*Japan Mail*, JAN. 31ST, 1891.

No Japanese statesman would *dream of denying that the compilation of the Civil and Commercial Codes was expedited in the interests of Treaty Revision.* To that extent a connection exists, and everybody is well aware of it.

*Japan Gazette*, FEB. 5TH, 1891.

Mr. Suyematsu Kenchō, the son-in-law of Count Ito, and a man who has taken honours in England, Mr. Motoda Hajime an eminent lawyer, and a number of other men of reputation, *distinctly asserted that the primary object of hastening the compilation of the Codes was Treaty Revision.* We recommend our contemporary to study Mr. Motoda's speech on the postponement of the operation of the Code, if it really doubts our assertions on this subject.

### FIRE IN TOKYO.

ON Tuesday evening at a few minutes past 6 o'clock, fire broke out in Igura, Tokyo. A bitter and blustering wind had been blowing all day—one of those cruel winds that so often come at this season to make the citizens of the capital shiver, and seldom go without leaving a record of their presence in the form of a street, perhaps a whole district, reduced to ashes. The houses in the Igura quarter are, for the most part, inhabited by the lower middle classes, and being close together, they offer a ready prey to a conflagration, especially when it is fanned by such a boisterous wind as that of Tuesday. The flames literally swept along the narrow streets, reducing the wooden buildings to ashes as though they were constructed of tinder. The suffering must have been terrible, for although the force of the wind abated greatly before nine o'clock, the coldness of the night was quite exceptional. Fears were at one time entertained for the residence of the Venerable Archdeacon Shaw, but happily the flames did not reach so far.

* * *

It was ascertained the following morning that this disastrous fire reduced 163 dwelling houses and 6 godowns to ashes, and partially destroyed 11 dwellings and 1 godown. One life was lost. A man named Kawashima, who was helping to remove a friend's furniture, remained too long in a burning building, and was caught by the falling roof. Owing to the violence of the wind the spread of the conflagration was extraordinarily rapid. Very soon after the first alarm was given, the flames were found to be at work in three different places, and it seemed as though the whole district from Igura to Shiba, and possibly thence to Akabane and the seashore, must be included in the area of the catastrophe. Indeed, looking at the ruins as they now lie, it is difficult to conceive how this immensely greater calamity was averted. Driven by a fierce wind, the flames at first leaped intervals of thirty or forty yards, yet their course was finally arrested by a narrow street which even in calm weather could scarcely have been expected to detay their progress. The Igura Church and the residence of Bishop Bickersteth, with the adjoining school-house, were at one time in imminent peril. The church, a solid brick structure, would have been safe had not some officious folks, in obedience to the usual Japanese custom, removed a portion of the tiles from the roof, thus exposing inflammable material on which the flames did actually at one moment lay hold. The Bishop's residence, however, and the school-house are wooden buildings, which would have burned like a pack of cards had the fire spread a little more. The Venerable Archdeacon Shaw, at the very gate of whose garden the conflagration raged in its early stages, was able to relieve much suffering by distributing hot coffee and rice-cakes to the unfortunate sufferers. The Archdeacon's residence, the church, the Bishop's residence and the school-house were all placed at the disposal of the burned-out folks, but only the very poorest among the crowd availed themselves of shelter which ought, one imagines, to have been eagerly utilized on such a bitter night. Many people camped in the Archdeacon's grounds, sheltering themselves as best they could against the icy wind by raising ramparts of *shoji* and *amado* and crouching under cotton quilts. But into the rooms offered for their use, they would not come. A striking illustration this of habits that have become crystallized into a sort of code of honour among the citizens of Tokyo. The first article of their creed is that no one can be a denizen of the capital if he dreads a conflagration, and in accordance with this melancholy vaunt certain rules of conduct receive strict observance. Thus, the master of a burned house—assuming him of course, to belong to the lower middle classes—and the male servants are expected to camp out in the immediate vicinity of the scene, until the ruins of their former dwelling are fenced in. The speedy accomplishment of this latter operation is a point of pride: to defer it for many days suggests the humiliating notion that the fire has left the family resourceless. The women and children, indeed, are removed to the house of a relative or friend, but the men have a campaign to conduct and are expected not to flinch from its duties. Their friends and acquaintances, on the other hand, count it an inviolable dictate of etiquette to keep the campaigners well supplied with food, and to this principle is to be attributed a custom of sending gifts of picnic-boxes containing fish, rice, and vegetables, with bottles of hot *saké*, during the three or four days following the fire. Habit is a hard task-master, but we have seldom heard of any exercise of its tyranny quite so unreasoning as that furnished on the night of the 9th instant, when in obedience to a valueless tradition, people preferred a bed on the grass under the stars of a frosty sky to the comfortable shelter of a neighbouring roof. Some, doubtless, were influenced by the often quoted aversion of the Japanese to become objects of charity under any circumstances, but we suspect that the dictates of the fire-creed of Tokyo were chiefly responsible for such needless purgatory.

### COUNT YAMADA.

COUNT YAMADA'S temporary retirement and subsequent return to office have been severely criticized by his enemies, who liken his behaviour to that of a child hiding itself in a fit of pique, and then emerging from its place of concealment with a mien of mingled concession and contrition. But rumour now begins to deal less harshly with the Minister of Justice. It is understood that he was the recipient of more than one urgent message from the Emperor, and against such commands a loyal Japanese never ventures to struggle obstinately. Besides, his resignation of his portfolio was not actually accepted. Before the public knew anything definite as to his desire to leave the Cabinet, he had apparently consented to reconsider his resolve, and agreed to a compromise of which temporary relief from active duties constituted an item. He resumes those duties, it is said, on two conditions. These, whether truly or untruly we do not pretend to judge, are described as referring first to the state of the Cabinet itself, and secondly to its relations with the Diet. The Count thinks that the Cabinet is not sufficiently united, and therefore not as firm as it might be. He stipulates for fuller mutual confidence, and more practical concurrence on the part of its members. With regard to the Diet, he re-affirms a proposition often advanced before, namely, that the circumstances under which representative institutions have come into existence in Japan, differ radically from the circumstances of their birth in Western countries; for whereas there they were wrested from reluctant rulers by popular insistance, here they have been

Digitized by Google

voluntarily conceded by a benevolent monarch. If this be granted—and as a historical euphemism it cannot be denied—there follows at once the conclusion that the attitude of the Government towards the Diet ought to be essentially friendly and conciliatory, since in helping men to reap the fruits of a gift, the giver does not treat them as though they owed to their own exacting strength what is really due to his magnaminity. If these are indeed the theses of which Count Yamada, through Count Saigo's intervention, has secured his colleagues' endorsement before resuming his functions as Minister of State, he may count on public approval.

### THE DEFUNCT PANAMA CANAL.

ACCORDING to the report of the official liquidator of the Panama Canal Company, which gives the story of that disastrous enterprise, the total amount received by the Company on shares, bonds and various other receipts was £52,453,969. In addition, the company entered on the credit side of the account certain sums not yet paid which, added to this, bring up the total amount of the account to £53,187,723. The total amount expended on the isthmus, including preliminary administration expenses, installations, machinery, and implements, fuel and other materials, excavation works, purchase of land, &c., is £31,331,018. The expenditure in Paris, including promotion charges. the charges of the American Committee, interest on shares and bonds and redemption of bonds drawn, financial charges for the issue of the shares and bonds, office and general administrative charges, liquidation charges and costs of the Liquidation Commission of Inquiry into the state of the works at Panama, is given at £15,628.066. Of this sum the amount returned to the shareholders and bondholders as interest or for redemption, was £9,525,978, and the liquidation and investigation payments account for £11,499, leaving upwards of six millions sterling as the amount received by the various agents, committees, and officials in Paris, and expended in printing, office and other general expenses there in connection with this gigantic scheme. In addition to these two sets of accounts, for Panama and Paris respectively, there are certain miscellaneous entries, including the cost of the Panama Railway shares, £3,730,728, and sundry sums still in suspense or disputed and held in deposit making in all a further sum of £5,577,749. The grand total of these three groups of credit entries is £52,536,754, leaving the net assets in cash and bills on March 8th last, exclusive of the unfinished canal and other property on the isthmus, and the office and office furniture in Paris, £650,890. The history which the liquidator gives of the various stages of the enterprise, dealing first with the installation period under contracts of 1881-2; secondly, with the period 1883-5, when the work was divided amongst a number of small contractors; thirdly, with the period of large contractors who were substituted for the smaller men in 1885, when it was found that the work was likely to be indefinitely protracted: and finally, with the expenditure in connection with the last desperate effort to save the undertaking—M. Eiffel's scheme for locks over the Culebra—is a remarkable revelation.

### PLAGIARISM.

THE *Japan Gazette* essays to give a very equivocal and halting denial of our assertion that its reports of the Diet's proceedings are, when convenient, mere summaries of the reports previously published in these columns. In support of its denial the *Gazette* instances two reports which, it says, will, on comparison, be found to differ from ours. This is its answer to a charge not of *invariable* but of *frequent* copying! Such palpable equivocation is, in itself, sufficient to discredit the *Gazette*. But since, in however timid a fashion, it has undertaken to deny the justice of our complaint, we shall show briefly on what grounds the complaint was founded. Our reports are epitomes of matter averaging probably ten times their bulk. Day after day the *Japan Gazette* published reports amounting in length to only a fraction of ours, but never by any chance including any points not taken in our reports. Now it is beyond the remotest range of human probability that two foreigners, sitting down to make independent précis of a long Japanese document, would be found to have selected exactly the same salient points. Convincing as this consideration is, however, we should not have made it the basis of any public accusation, were it not confirmed by the repeated appearance of identical phrases in the two series of reports. Concerning the value of this latter piece of evidence, our readers can easily judge for themselves. We extract a few phrases from various reports of the Diet's proceedings, published in the *Japan Mail* and the *Japan Gazette*:—

| "JAPAN MAIL." | "JAPAN GAZETTE." |
|---|---|
| He wished to know why this great difference was observable in respect of the progress of the interior and exterior defences, | Mr. Kato Katsuya wished to know why there was so much difference between the progress of the interior and exterior defences, |
| to say why the ratio of the cost of provisions to that of clothing was nearly three times as great in the Army as in the Navy. | stated that the ratio of the cost of provisions compared with that of clothing was nearly three times as great in the Army as in the Navy. |
| Mr. Shigeno ridiculed the notion of saying that the adoption of foreign weights and measures affected the dignity of the nation. | Mr. Shigeno ridiculed the idea of the adoption of foreign weights affecting the national honour. |
| that public convenience would be better consulted by adhering to the Japanese system hitherto in force. | He considered public convenience would be better consulted by adhering to native measures as much as possible. |
| Mr. Tsuji replied by giving a brief retrospect of the history of the University. | In answer to these, Mr. Tsuji gave a short history of the University. |
| Mr. Mitsukuri, Vice-Minister of Justice, said that the reorganized system had only come into force in November last, and there were not yet sufficient *data* to form an idea of its results. | Mr. Mitsukuri, the Vice-Minister of Justice, who replied that the reorganisation of the Courts only commenced in November last, and that hence as yet there were no data for judging of results. |
| In answer to another member, he said that though the study of law had made great strides in Japan, it was not yet by any means perfect, and a necessity existed for sending students abroad Nevertheless, the number sent had been gradually reduced, and in time the practice might doubtless be discontinued. | In reply to a question about expenditure for students abroad, Mr. Mitsukuri said that though the law had made great progress in Japan, it was still imperfect, and hence there was a necessity for sending students abroad. The number sent, however, had been gradually diminished, and probably after a while the practice might be discontinued. |
| Mr. Mitsukuri, Delegate for the Department of Justice, answered a number of queries as to minor points. * * * Mr. Taketomi Tokitoshi, on behalf of the Committee, pointed out that, as compared with other Departments, the reduction (1,320,000 *yen* in a total of 4,660,00 *yen*) recommended in the case of the Department of Justice might seem excessive, but the difference was due to the principle adopted by the Committee, namely, to cut down administrative expenses as much as possible, and not interfere with expenses required for actual works of public utility. | After Mr. Mitsukuri, the Government Delegate, had answered a number of questions on minor points, Mr. Taketomi Tokitoshi, on behalf of the Budget Committee, observed that the reduction recommended might seem excessive when compared to that of other Departments, but that the principle on which they had acted was to cut down administrative expenses as much as possible, and leave untouched expenses required for works of public utility. |

In comparing these extracts, the phraseology of which is almost identical in every case, it has to be remembered that they are not literal translations, but greatly abbreviated epitomes, and that the original was not in a language bearing any resemblance to English, but in Japanese. Can there be a shadow of doubt as to the justice of our complaint that our reports were used without acknowledgment?

* * *

Another curious though trivial fact is that the *Japan Gazette* has steadily followed us in erroneously calling the Acting President of the Upper House "Marquis Konoye," whereas he is really "Prince Konoye." Strange that even our mistakes should be repeated by a journal claiming to be entirely independent.

### HARE AND HOUNDS.

THE game of hare and hounds is very entertaining when played well. Suppose that the hare is Treaty Revision. Then in order to play the part of hunter, a meeting should be held, and a vote passed to the effect that the time not having yet come for Revision, it must be driven out of the field. So, with hue and cry, the driving out is accomplished. Next, in order to run with the hare, you turn and declare yourself the animal's very good friend, your only objection being to the colour of its coat, which is unfortunately brown. Another way of playing the game is to edit a newspaper, and devote your columns to showing, first that the above meeting was quite right in denouncing the hare's appearance in the field, and secondly, that if the animal be allowed to remain there, serious trouble may occur with a landlord over the way, called China. You are then running full cry with the hounds, and therefore in a position to make a striking volte-face in the direction of the hunted animal. This latter feat may be accomplished by suddenly calling out that you "most emphatically repudiate the title of an anti-hare organ," and that, when you applauded the hunting operations of the meeting, and supplemented them by showing that the hare was bound to be driven out, your "attitude could not correctly be called anti-hare." People will laugh at you of course, but then the object of the game is to make merriment.

* * *

Another feature of the game is that, while hunting with the hounds, you can bring charges of insincerity against any one who prefers more deliberate methods. You can proudly ask him why he has neither the courage to acknowledge himself a hunter also, nor the honesty to be as heroically demonstrative as you are yourself. Then, when it comes to running with the hare, you can indignantly inquire why you were suspected of taking the other side, and with what show of justice your absolute impartiality has ever been doubted. By observing these rules, persons not in the game may be pleasantly bewildered, and you yourself may actually get the reputation of being a straight goer, despite your counter-marches and doubles.

### THE INTERPORT FOOTBALL MATCH.

THE match between football teams representing Yokohama and Kobe took place on Monday, and resulted in complete victory for the home team, the score being four goals to none. The Kobe team in respect of their fine physique were the favourites, but soon after the game commenced the superiority of the Yokohama representatives became apparent. The visitors were undoubtedly the heavier and more powerful team, but their opponents, playing in style which their practice had hardly prepared their warmest friends for, were undeniable. The first goal was disputed on the score of handling, but eventually awarded to Yokohama, and the other three followed in rapid succession. Towards the close Yokohama had to play against a mild breeze which manifestly operated to their disadvantage. Played under Association rules, the match presented few points to be described, and it seems invidious to mention individual players in such a lively game. It would be impossible, however, to omit mention of Edward's splendid play as a back, greatly neutralised though it was by the wind; of Crawford's brilliant and self sacrificing play; of the younger Edward's fine dribbling, or of Fenton's cool and careful work, though marred in many cases by reluctance to "pass." For the strangers capital work was done by Weston (back); Hall (right half back); Whymark (right back), and Stewart (centre forward). The match was witnessed by a large number of spectators. The following were the teams:—

| YOKOHAMA. | | V. | | KOBE. |
|---|---|---|---|---|
| Mr. C. H. Hinton | | Goal | | Mr. H. W. Gye. |
| Mr. W. D. S. Edwards (Capt.) | Backs. | | Mr. W. Weston. | |
| Mr. G. W. Barton | | | Mr. G. Whymark. | |
| Mr. D. McNeill | Half Backs. | | Mr. A. C. Sim, (Capt.) | |
| Mr. C. W. Arnould | | | Mr. F. J. Hall. | |
| Mr. A. L. Robinson | | | Mr. B. Enthoven. | |
| Mr. H. Fardell | | | | |
| Mr. F. B. S. Edwards | Forwards. | | Mr. W. Kerr. | |
| Mr. E. R. Morriss | | | Mr. P. A. F. Cabeldu. | |
| Mr. P. Morriss | | | Mr. A. Stewart. | |
| Mr. G. Fenton | | | Mr. F. Collins. | |
| Mr. K. F. Crawford | | | Mr. F. T. Lias. | |

### MR. INOUYE KAKUGORO AND THE "SOSHI."

MR. INOUYE KAKUGORO'S experience in the precincts of the House of Representatives on Monday is treated with some levity by the vernacular press, which apparently takes its tone from Mr. Inouye himself. That gentleman seems to have made light of the affair from the outset, speaking of his assailant as a silly fellow actuated entirely by a desire to gain notoriety, and not entertaining any really mischievous design. Mr. Inouye says, with evident truth, that if the

Digitized by Google

man had intended to accomplish anything, he would not have chosen for his scene of operations a place crowded with members of Parliament, and guarded by police. But, on the other hand, the *soshi* can scarcely have expected to encounter such a Tartar as Mr. Inouye, and had he not been mastered almost immediately by the superior strength of his intended victim, the result might have been very different. Mr. Inouye escaped with a swollen face and a dislocated finger, which apparently gave him no manner of concern. He is said to have gone home from the Diet the same evening in high spirits, guarded by fifteen friends, whom the newspapers are pleased to call *soshi*, and by three police constables.

* * *

It is to be hoped that this affair, insignificant as its immediate results were, will not be permitted to rest. The public has long suspected that *soshi* are in collusion with, or supported by, members of the Diet, and the suspicion acquires great force from the fact that the rioter of Monday must have gained admittance by the aid of a ticket obtained from a member. The Diet is bound to purge this stain from the early history of Parliamentary institutions in Japan. A committee of inquiry ought to be appointed, and if, after careful investigation, proof is found of the complicity of a member, he ought to be expelled from the House at once.

### M. RASPE AND CO. AGAINST ENOMOTO SHIUZO.

THE punishment inflicted by a Japanese Court on a fraudful dealer who had sold as Stock Beer imported by M. Raspe & Co. a beverage of a very much different nature, will, it is to be hoped act as a deterrent of similar impostures in future. For some considerable time it had been known that empty bottles bearing imported beer labels were utilised by persons like the plaintiff in the case under notice, for fraudulent purposes, but it was not till August, 1889, that the production of spurious "Stock Beer" was traced to the premises of Enomoto Shiuzo, where it was openly sold to a representative of the plaintiffs. Under the advice of Mr. Masujima, a criminal complaint was instituted in the Yokohama Court under Arts. 390 and 392 of the Criminal Code. These articles deal with all forms of criminal fraud, including the condition known in English law as "false pretences;" Art. 239 describing as an offence the act of selling or exchanging goods that are not genuine or are of false measure or weight. The defendant being proved to have refilled with his "Stock Beer" bottles bearing the complainants' labels or colourable imitations, the only question was whether the scope of the Act extended to the articles mentioned. The judge before whom the preliminary examination was conducted, dismissed the complaint, holding that the sale of spurious beer under forged labels on the one hand, and its purchase knowingly by the complainants did not constitute a breach of the law, no deception having been practised. An appeal was taken to the Supremer Court on the ground that the only fact of which proof was necessary was that of the sale of the spurious beer, injury sustained by an interested party forming no essential of the offence. This view was upheld by the Supreme Court and the case was transmitted for further examination to the Tokyo Criminal Court. Here the complaint was again dismissed, the Court deciding that the facts found by the Yokohama Court afforded no proof of criminal intention. A second appeal was taken, it being pointed out that criminal intention could only be inferred from facts; that direct proof could not exist of that which was really only a mental condition, and that if such proof were essential it would be impossible to administer criminal law. The Supreme Court upheld the appeal and sent the case to the Urawa Criminal Court, where the defendant was at length sentenced on the 5th inst. to suffer two month's imprisonment with hard labour, to pay a fine of 4 *yen* and to remain under police surveillance for six months. It is somewhat puzzling to account for the action taken by the Yokohama and Tokyo judges in acquitting the defendant, the contravention being so palpable and the offence so barefaced, and it is impossible, moreover, to avoid the reflection that a severer penalty would have been a more emphatic warning to dishonest dealers of the defendant's class.

### THE LATE MR. C. WIRGMAN.

MR. CHARLES WIRGMAN, whose remains have now been consigned to their last resting place, was one of the most generally and sincerely liked members of the Yokohama community from the day of his landing here thirty years ago until this moment when we are required to bid him a final farewell. Brilliant, genial, a boon companion and a staunch friend, he might have attained opulence and distinction had not his high qualities been marred by incapacity for steady application, a fault only too common in men of exceptional gifts. His artistic tendencies were very strongly developed, and with careful training might have gained him a distinguished place as a painter, but the easy rôle of caricature had fatal charms for him. He devoted the greater part of the few hours of his working week to the preparation of a comic paper, the Yokohama *Punch*, the pictures and letter-press of which were both from his own hand. During the long course of twenty years, with very few intervals, this publication made its appearance once a month, every incident of local interest and every resident of local note finding, at one time or another, a place in its columns. Very seldom indeed, and then only toward the close of its career, did the quaint periodical display any feeling save genuinely good-natured humour, and never, so far as we know, could it be charged with having cost its author a friend. Apart from the unique fact that one and the same pencil limned every picture, and one and the same pen composed every line, of the well known journal throughout such a long series of years, a melancholy interest now attaches to pages where we can once more find ourselves face to face with the mirth-making fancies and happy sketches of a friend who added something of sweet and light to every life, and bitterness to none, that came into contact with his own. It was inexpressibly sad that the closing days of such a man should have been clouded by the complete decay of his reasoning faculties, and that he should have passed his last years among, yet completely severed from the society of, a community that for more than a quarter of a century had known him as the very soul of merriment and laughter.

### DISCOVERY OF COAL.

FOR the past two months, says the *Nagasaki Express* of the 4th inst., we have been privately in possession of very important information referring to the discovery of a new seam of coal, or rather three seams, at Takasima; but by special request we have refrained from publishing the fact up to the present. However, as our native contemporary the *Chinzei Nippo* divulged the matter in its issue of the 28th ult., it can no longer be regarded as a secret. Had our contemporary followed our example, and waited until the proper time arrived for publishing the news, instead of obtaining its informa- surreptitiously, probably by bribery, it would no doubt have been furnished by the Company with full particulars. As it is, our contemporary's report is misleading. The facts of the matter are briefly as follow:—In working what is known as the eight-foot seam, a fault was met, and for a time it was thought useless to extend the mine in that direction. Eventually, however, it was decided to try the experiment of proving the fault, and in doing so three new seams were struck, of a total thickness of about sixteen feet. Steps were once taken to follow the discovery up, and so far, we are happy to say, there is every reason to believe that it means a new lease of life for the mine, which may now go on for many years to come, instead to dying a natural death from exhaustion. The new coal, it is unnecessary to state, is of excellient quality, and rather harder than the usual Takashima coal, consequently it will show a much greater percentage of large, but will be harder work, and the out-put not quite so prolific. The Company's reason for being reticent in the matter for a time is, that the new seams will have to be worked for a short distance before any idea can be formed of their value, and even then, owing to their lying under the sea, it is difficult, in fact impossible, to make any reliable calculation of their extent. Should things continue favourable after further exploration, it will eventually be necessary to shift a portion of the mining machinery to a convenient position on the other side of the island. It is, of course, to be hoped that the sanguine expectations raised that there is an extensive vein of coal in that direction will be realised, and, whilst there is still an element of doubt in the matter, we are very confident that Takasima will still prove a source of profit to its enterprising owners, and at the same time, what it always has been, namely, the mainstay of the foreign shipping trade of the port.

### HONESTY FIRST, HONESTY SECOND, AND HONESTY VERY MUCH LAST.

THE honest *Japan Gazette* having now exposed its data, the task of finally refuting it becomes at once easy. The point at issue is this—Did Mr. Suyematsu Kencho apply certain words to the Government Delegate, Mr. Ishida, or did he apply them to the Cabinet? The *Gazette* prints the words—in character—and says they were used by Mr. Suyematsu "when explaining in the Diet the Government's action," and that they "referred not to the Government Delegate as much as to the Cabinet." Very well. Here is a literal translation of the sentence in which the words quoted by the *Gazette* occur:—"As to yesterday, though the person who originated this affair (*Kono koto no genin wo nashta hito*) does not say distinctly that he made an error or an incorrect statement, he does explain that his meaning at that time was so and so. Regarded from one point of view, the language used by him is not an absolute admission of error, but when he says that what he appears to have said on that occasion was slightly wrong, and that what he really meant was so and so, it is the same as though he apologised to the Diet." Now there is not the shadow of obscurity about this. The reference is to the Delegate and to the Delegate only. The *Japan Gazette*, however, claims that the words refer to the Cabinet. So positive is the *Gazette* that, when originally charging us with error, it affirmed that Mr. Suyematsu had alluded to the communication received from the Government an hour before he made his speech, whereas he explicitly refers to words used the previous day. The honest *Gazette* has not the honesty to acknowledge that in the matter it has blundered grossly. It continues to defend its position, but has been rash enough to descend from generalities to particulars, thereby enabling us to identify the sentences on which it relies, and to adduce them as an evidence of its much-vaunted knowledge "of the meaning of Sinico-Japanese phrases." Yes, indeed, "puerilities" these things are from one point of view, but they should seem anything but puerilities to a newspaper which they place in the unenviable position now occupied by the *Japan Gazette*.

### CHINESE OR JAPANESE.

THE following paragraph appears in the *St. James's Budget*:—

At the West London Police Court yesterday, Charles Stewart Kaw, a barrister, was brought up on remand charged with attempting to murder Edwin Brooks, possession man to the bailiff of the Brompton County Court, by presenting a loaded revolver at him. It appeared that the prisoner, who was a native of China or Japan, rented a room at 4, Holly-terrace, Drayton-gardens, South Kensington, and on Monday afternoon the complainant with another officer went to eject him by order of the judge. They had to force open the door, when the prisoner, who was in bed, sprang out with a loaded revolver, which he took from under his pillow, and presented it at the complainant, who struggled and took it from him. He made a rambling statement about Lord Salisbury and Mr. Gladstone, and of his having £2,000 a month from his parents. The prisoner was brought up on Monday shortly before the closing of the court, and the Magistrate remanded him to be medically examined. This morning Dr. Walker said he had examined the prisoner; but he could not quite make out what he stated, as he spoke incoherently; but he was of opinion that he knew what he was doing. Mr. Plowden inquired

Digitized by Google

whether there was any fresh evidence. A police-constable was called and said he examined the revolver, which was handed to him. He found it fully loaded in five chambers with ball cartridge. In answer to the magistrate, the prisoner pleaded not guilty. In a long rambling story he stated that he heard a noise at the door; but he thought it was caused by a lodger who was going up and down stairs in a "facetious" manner. The door was broken open and he was pulled out of bed undressed. He wanted to know the meaning of the assault and battery upon him. He did not present the revolver, but simply carried it to use it in case of emergency. Mr. Plowden said he had great doubts whether he ought not to send the prisoner for trial; but he bore in mind that he was a foreigner, of Japanese extraction, and should deal with the case one of comm n assault. It was an assault to present a revolver. Although the prisoner, who was a barrister, should be acquainted with the English law, yet he might not have known that the use of firearms was not tolerated in this country. He called upon him to find two sureties in £25 to keep the peace for six months, and in default to be imprisoned for one month. The prisoner who wished to address the magistrate, was then removed.

It appears from this account that the English public is still confronted by the old difficulty of distinguishing between Chinese and Japanese. The magistrate indeed, described Mr. Charles Stewart Kaw as "of Japanese extraction, but we venture to think that this was a mistake. No trick of transliteration with which we are familiar could convert a Japanese name into "Kaw," unless, indeed, this somewhat eccentric barrister happens to be a believer in the curious system inaugurated some twelve years ago by two of our best sinologues—the system that converted plain "Tokyo" into "Taukiyau" and "Taiko" into "Taikafu."

### THE PEACE PRESERVATION REGULATIONS.

On Wednesday morning it became known in Tokyo that the authorities had decided to carry out the provisions of the Peace Preservation Regulations in the case of eight *soshi*, in addition to those expelled from the capital last month. The proximate cause of this renewed recourse to an exceptional and unpopular law was said to be the attack made upon Mr. Inouye Kakugoro within the precincts of the Diet on the 9th instant, which event, sufficiently disquieting in itself, had been supplemented by evidence that further outrages might be anticipated unless resolute preventive measures were adopted. The eight men destined to be banished from the capital during the Diet's session were the following:—

| | |
|---|---|
| Aoki Yasuatsu ..... | *Shizoku* of Ibaraki Prefecture. |
| Noguchi Mosaburo.. | *Heimin* of Gumma Prefecture. |
| Tsukui Jutaro..... | — |
| Jimba Yeikichi ..... | — |
| Hagiwara Motokichi. | — |
| Amako Yoshihisa ... | — |
| Ochiai Toraichi ... | *Heimin* of Saitama Prefecture. |
| Hasegawa Ito ..... | *Heimin* of Chiba Prefecture. |

More accurate enquiries showed, however, that of these eight men, the first five on the list are under arrest, and that, consequently, no sentence of banishment will be executed in their cases until the offences for which they are detained have been fully investigated and expiated. Against Amako Yoshihisa, also, grounds of suspicion are not yet clearly established. Thus two only, Hasegawa and Ochiai, were deported from Tokyo Wednesday, bringing to 56 the total number expelled under the Peace Preservation Regulations since they were put into operation for the second time on the 13th of January. It is not without a purpose that we record these names. Reference to the list of Peace-Preservation exiles of 1887 discloses the fact that many of the turbulent spirits of that time are now sitting in the House of Represtatives, and it may be that we shall have to consult the lists of the present epoch when we come to consider the antecedents of public men a year or two hence.

### ANOTHER VICTORY FOR FREE SPEECH.

The victory of the *Nippon* journal, recently recorded, has now been followed by another of a similar character. On the 14th of December last, a political meeting was held in the Suzuki-tei, Sakamoto-cho, Tokyo. Two of the speakers, Messrs. Ito Kichiyei and another, having used language which, in the opinion of the police constables present, constituted the offence of *Kanri bujyoku* (attempting to bring officials into contempt) in respect of the Minister President of State, the Public Procurator proceeded against them in the District Court, but failed to obtain a verdict, the evidence being declared insufficient. He carried the case to the Appeal Court, where judgment was delivered on the 9th instant, Judge Matsuda presiding. The Court dismissed the appeal, and endorsed the finding of the inferior tribunal. These two defeats of the Public Procurator in similar cases, occurring within so short an interval, will greatly strengthen the cause of free speech, and materially add to the confidence felt by the public in the independence and integrity of the judiciary.

### BURNING THE RECORDS.

There is some impish denizen of the *Japan Gazette's* office who burns records, day by day, and condemns the editor to depend upon his memory for consistency. The consequences are sometimes unhappy. For example, our contemporary recently brought against us a circumstancial accusation of having advocated in succession three different schemes of Treaty Revision, of which the third was said to be that of Viscount Aoki, the present Minister of State for Foreign Affairs. But the same *Gazette* now writes:—"With no definite programme of Revision before the public, to argue *for* or *against* Treaty Revision seems to us equally inane. It is like a fight over the unknown quantity. Data for discussion not being forthcoming, it is the duty of impartial writers to be silent." So then our honest contemporary, by its own admission, knew nothing of Viscount Aoki's scheme when it accused us of advocating it. Why not discharge the mischievous boy that meddles with the records?

### THE DEADLY CONTRAST.

| The Profession. | The Proof. |
|---|---|
| We are no enemy of the Japanese Government; on the contrary, we are one of its warmest friends, as we hope to prove in print before long.—*Japan Gazette*, Feb. 3rd. | The Minister President made his appearance in the House and, in the opinion of competent judges, perf rmed the first of a series of despotic acts by which the Government intends to suppress freedom of opinion and violate the rights of the Diet, provided the Representatives and the country consent to crouch b neath the iron rule of the Clan Government, of which all who know the strength of feeling that lies behind the present opposition of the Diet have serious doubts. * * * It is the fight of freedom and despotism that we are watching, despite the untiring efforts of pro-Government organs to represent it otherwise. |
| An attempt has been made, we observe, to represent this journal as an anti-government organ. We beg to state that it is nothing of the kind. * * * We deny that the tendency of our criticism is anti-government.—Idem, Feb. 4th. | There are strong men out of power to take the place of the present cabinet, and hence the country need shed no tears over its resignation. It has had its chance of controlling the nation since it has decked (*sic*) its constitutional dress and entered on a new era, it has proved itself unequal to the occasion, and consequently may well be called on by the country and by the men which (*sic*) it has supplanted to make room for abler hands.—*Japan Gazette*, Feb. 11th. |

### THE REVOLUTION IN BRITISH RAILWAY TRAVELLING.

From the latest British railway returns, which have recently been issued, it appears that in ten years first-class passengers in Scotland have decreased in number by 7.1 per cent, while in the same period those going third-class have increased from nearly 35 millions to about 66 millions, or 88.5 per cent. While ten years ago there were 23 railway passengers of the two higher classes to every 100 of the third, there were last year rather less than eight. In recent years the change has been proceeding more rapidly, for in 1887 third-clsss passengers numbered 90 per cent., and in 1890 the half-yearly figures indicate that the proportion will be nearer 95 per cent. In the second class the decrease has been most marked—from slightly over 3,000,000 in 1879 to 834,640 in 1889, and some companies, recognising the tendency of the times, have ceased running intermediate carriages. The revenue returns show a greater proportionate difference than in the case of the number of passenger journeys. In 1879 each £100 of the gross passenger revenue of Scotch railways was made up as follows:—£20 16s. from the first class, £8 14s. from second class, £65 from third, and about £5 10s. from season tickets, while in 1889 the receipts were in the proportion of £14 5s. from first, £1 15s. from second, £77 from third, and £7 from season ticket-holders. Of the last item £5 was paid by third-class passengers, so that of every £100 taken by Scotch companies £82 is paid by third-class travellers. In nearly all countries the same change is taking place. In Ireland a decrease is shown in first-class payments of about 35 per cent. in ten years, and an increase of 30 per cent. in payments by third-class passengers. There is also a gain in the intermediate class of nearly 10 per cent. Throughout the kingdom the receipts from first-class travellers have decreased by 23 per cent. to £3,187,000 those from the second class by 20 per cent. to £2,704,000, while third-class pay now about 20 millions sterling, or over 30 per cent. more than ten years ago. In France it is a common saying that only princes and fools travel first class. Belgium has the cheapest third-class rates on the continent of Europe, and the Belgians are the most extensive of continental travellers, yet the preponderance of third-class passengers to the total is not much greater than in England. Russia and Denmark are in the same position as regards proportion of third-class. Germany, with probably the most extensive railway system on the continent, and with 90 per cent. of the lines worked by the State, also runs Britain closely in this matter. The British colonies follow somewhat slowly. In New South Wales there are but two classes. The passenger traffic in the year ended in June last showed an increase of 10 per cent. over the previous year, and both classes contributed. In ten years the first-class payments had increased from £100,000 to about £395,000, and the second from £175,000 to about £440,000; but since 1887 the advance in the latter case has been relatively greater than in the former. In India during the year ended March last there were but three first-class and 23 second to each thousand passengers in the cheaper classes, and on an average not one first-class traveller to each train. Of course the natives all go third or fourth class. They pay about a farthing per mile. Third-class travellers last year paid three-fourths of the receipts from passengers on British railways, and about one-third of the total receipts. A first-class carriage, it is computed, earns on the average £514; second class, £561; and third class, £1,020.

### CORRECTIONS.

The following corrections may, perhaps, prevent misconceptions on the part of readers of our local contemporaries:—(1) It is not true that Mr. Suyematsu Kencho, in his speech in the Diet on the 5th instant, used the words *wabisuru* or *ayamari wo shasuru* with reference to the Government's action. (2) It is not true that, in the same speech, Mr. Suyematsu described the condition of the Cabinet as "penitent." (3) It is not true that Mr. Suyematsu, in the same speech, did not attribute an apologetic attitude to the Government's Delegate. (4) It is not true that the Minister of State for Finance spoke in support of Mr. Kubota's motion in the House of Representatives on the 6th instant.

### COMPETITION FOR THE NIPPON YUSEN KAISHA.

It is pretty generally rumoured that owing to a belief in the insufficiency of the Nippon Yusen Kaisha's ships to perform the extensive duties devolving on them, no less than eight minor shipping companies, at the instigation of the Osaka Sosen-kaisha, have agreed to combine for the purpose of opposing the big association. The names of the companies are, the Kyoritsu Kisen Kaisha, the Tokai Kisen Kaisha, the Hanyei-sha, the Kanyo-sha, the Yamamoto-sha, the Hokkai Kisen Kaisha, and the Hakodate Kisen Kaisha.

### HARD WEATHER IN KOBE.

A northerly gale of considerable violence prevailed at Kobe last evening, says the *Hyogo News* of the 10th instant. Four junks and some sampans were sunk in the harbour, while some of the new buildings in course of erection suffered severely. In one instance a house at Shi-

Digitized by Google

moyamatedori completely collapsed. The gale had its redeeming feature; it stopped the Chinese firework orgie. The U.S. man-of-war *Omaha* came in this morning with a large junk, which had been badly crippled, in tow. We are informed that during the bitterly cold wind of last night a Chinaman and a Japanese were frozen to death on board one of the cargo boats in the harbour.

### FIRE IN THE IMPERIAL HOTEL, TOKYO.

On Monday night the Imperial Hotel, Tokyo, was for a time in considerable danger. Owing to the exceeding cold of the night, large fires had been lit in the bedrooms, and at some time after twelve o'clock a quantity of live coals seem to have fallen from the grate in the chamber occupied by Mr. Mandl. Tumbling outside the fender, they burned their way through the floor, and had set fire to the space below the boards when fortunately Mr. Mandl awoke and gave the alarm. A little longer delay would probably have enabled the conflagration to gain a strong head. Whether, in that case, the Hotel would have been destroyed, it is difficult to say, for provision against fire has been made by placing an immense tank in the third storey. But what is certain is that had the building been burned, nothing could have persuaded the public that political incendiaries were not responsible for the destruction of both the Diet and the Hotel, since the latter is now used by the House of Peers.

### SOME FISHERY FIGURES.

The coast line of the principal islands of Japan is said to measure 6,400 *ri* (16,000 miles), and the value of the fish caught annually averages fourteen million *yen*, so that each *ri* of coast is worth 2,200 *yen*. The fishing population numbers 740,000 so that, speaking approximately, the income per head is 20 *yen*. In Hokkaido the record is much better. There we have 600 *ri* of coast, producing 7½ million *yen* worth of fish, with a fishing population of 6,000 persons. Thus each *ri* of coast is worth 12,500 *yen*, and the income of each person is 125 *yen* annually.

### THE BURNING OF THE DIET.

Counsel for the Electric Light Company in the action against the Chief Secretary of the House of Representatives, yesterday made application to the Court to have an expert examination made at once of the brick chimney stacks as they now stand. It is claimed that the chimnies afford strong evidences that the fire may have been caused by faults of construction, and that, as the lapse of time is injurious to the preservation of these evidences, an official examination should be made without delay.

### IBARAKI.

The possession of a railway connecting them with the capital has evidently produced a strong effect on the people of Ibaraki Prefecture. They have just made themselves conspicuous by sending a delegation to Tokyo to urge a reduction of the land-tax and the re-survey of their lands. We read also that Messrs. Koike and Yanagita, well known farmers of Ibaraki, have organized an Agricultural Society, which held its first meeting on the 20th of December, and will meet henceforth three times annually.

### EXHIBITION IN HOKKAIDO.

The industrial progress of Hokkaido has been so considerable of late years that the Local Authorities and leading residents are planning a domestic exhibition there in July or August of 1892. We trust the project will succeed. The productions and manufactures of the northern island, not to speak of its fisheries, are full of interest, and a trip there in the heat of summer with an exhibition in perspective would be delightful.

### CONCERT.

It will be seen by an announcement in this issue that Madame Patey will give a concert in the Public Hall on Tuesday, the 24th inst. Madame Patey, who is on her way home from Australia, has been giving concerts in Singapore and Hongkong, and is at present in Shanghai. With the company is Mr. John Lemmone, the flautist, who created so favourable an impression here with Miss Amy Sherwin's company.

### THE LATE MR. MARTIN.

The interment of the late Mr. Jas. Martin took place Tuesday afternoon at the General Cemetery. The coffin was followed to the grave by a large number of residents, and many wreaths attested the high esteem in which the deceased gentleman was held. At the grave Rev. Mr. Irwine made fitting reference to the loss the community had sustained by the melancholy event.

### THE BUDGET.

We publish elsewhere a translation of the Budget, accompanied by the Report of the Committee. Our readers will thus be able to see the reductions proposed by the Committee as compared with the original figures of the Budget. The explanation appended by the Committee will be published later on.

### NORTH AND RAE, LIMITED.

At the annual general meeting of North and Rae, Limited, held on Tuesday evening, the report of the directors was agreed to and the payment of a dividend of ten per cent. per annum on the subscribed capital declared and agreed to.

### COUNT YAMADA.

Count Yamada has now definitely resumed his functions at the Ministry of Justice, Count Oki being gazetted as having been relieved of his temporary appointment in that Department.

Dr. Meacham will preach in Union Church tomorrow morning, and his subject will be—"A Love Song."

## *THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.*

The collision between the Government and the House of Representatives in respect of the interpretation of the 67th article of the Constitution as to the process of obtaining the Government's concurrence in the reduction of expenditures mentioned in that article, has been the principal topic of discussion in the columns of the vernacular press during the week under review. On this question, as noted in our last weekly summary, several papers had expressed themselves in favour of an interpretation more or less in accord with that now adopted dy the members of the Cabinet; but even these papers join in general disapproval of the method taken by the Ministry in communicating its view to the Representatives. Some papers even hint that the ultimate object of the Government is to appeal to the nation, on the ground of the unconstitutionality of the Representatives' procedure with respect to the expenditures specified in the 67th article. But the prevailing idea is that the Cabinet will not resort to the dissolution of the Diet, but will either simply reject the Budget as amended and carry out the current estimates, or accept only such reductions as do not effect expenditures falling within the scope of the 67th article. It is, however, premature to predict the ultimate fate of the Budget, for there are still several contingencies difficult to culculate.

* * *

The *Yomiuri Shimbun*, writing on this subject, recommends the Representatives to proceed in the course they have choosen for themselves, regardless of what the Government may think or say. The Government may not endorse their action and the Sovereign many order their dissolution, but apprehension of such contingencies ought not to deter them from the exercise of their independent constitutional rights. Nothing, continues our contemporary, can be more degrading and unbecoming for the Legislature than to tamely obey the dictation of the Executive. Then turning to the Ministry, the *Yomiuri* tells the Minister President that what he ought to have done was not to make a useless speech in the House as he did some days ago, but to take early steps either to dissolve the Diet or to seek the Imperial decision on the point at issue. To try to induce the Legislature to abandon the position it had taken in due exercise of its constitutional rights, was on the part of the Government an evident insult to the dignity of the Diet. On the other hand, the Representatives are warned that the insult they have suffered at the hands of the Government is to a certain extent invited by themselves, for they displayed inconsistency and want of firmness. The Government is asked in conclusion to expedite the solution of the question by laying the points in dispute before the Sovereign and asking his decision.

* * *

The *Hochi Shimbun* calls upon the Privy Councillors to make public their opinion as to the sense in which they understood the 67th article when they were engaged in discussing it previously to the promulgation of the Constitution. Their opinion will settle the question one way or the other, and they are, says our contemporary, morally bound to let the public know their views as soon as possible.

* * *

The *Kokumin Shimbun* regrets the present difference of opinion between the Ministry and the Representatives, and observes that the only course left for the disputants will be to abide by the decision which the Privy Council may give on the point at issue. Meanwhile our contemporary calls upon the constituencies throughout the country to give public expression to their ideas on the question. They have abundant means of ventilating their opinions; they may present memorials or petitions; they may write in the newspapers and periodicals; they may hold lecture meetings; or they may organize associations. They are exhorted to use every method in their power, within the limits of law, to bring the pressure of their opinions to bear on the Diet, the Ministry, and the Privy Council.

* * *

As to the probable attitude of the House of Peers towards the amendments which the Representatives are now voting on the Budget, public opinion is very much divided. Some say that the amendments will be rejected by the Peers without debate, on the ground of unconstitutionalty. But there seems to be slender reason to anticipate such summary dealing. Others assert that a small but influential group of Peers contemplate reductions far more sweeping than those proposed by the extremists in the Lower House. Viscount Tani is said to be the leader of the section. But members who entertain such a radical plan—if indeed anything of the kind has ever been contemplated in the Upper House—must be too few to influence the decision of the House. The Upper House contains, however a popular element which may be expected to be far from unfavourably disposed to any fiscal reform, calculated to lessen public burdens. We refer to members representing the highest tax-payers in each locality. These members are peculiarly interested in the success of the reductions voted by the Representatives, because the avowed object of the reductions is to decrease the tax on land. To such members of the Upper House, therefore, the Extremists in the Lower House are now looking for support, as may be seen from the following paragraph.

* * *

The *Jiyu Shimbun* alludes to the rumour that members of the Upper House who represent the 15 highest tax-payers in each locality lately held a meeting, and decided to support whatever decision the Lower House might come to on the Budget. Our contemporary applauds in high terms the step said to have been taken by these members, and notices, with much satisfaction, that their opinion is shared by many of their fellow legislators. As these members are most directly interested in fiscal reforms, the *Jiyu* thinks it natural and proper

Digitized by Google

that they should have decided to endorse the Representatives' action.

* * *

The *Yomiuri Shimbun* mentions the same report, and hopes that the example of "the highest tax-paying members" may be followed by other members of the Upper House. Our contemporary admits that the Peers have a perfect constitutional right to introduce amendments in the estimates sent up from the Lower House, but hopes that they may imitate the conduct of their *confrères* in England and abstain from proposing amendments to the decision of the Representatives in respect of the Budget. The *Yomiuri* further thinks that it is the plain interest of the Peers to concur with the Representatives in this matter, for, should they choose either to reject or amend the decision of the Lower House, there would ensue a delay which might lead to the non-existence of the Budget. In that event the blame would rest with the Upper House and it would become an object of universal execration.

* * *

The whole press of the capital is united in rebuking in strong language the disorder and want of decorum shown in the House of Representatives. The *Kokkwai* goes so far as to state that the Representatives have forfeited the confidence of the nation, and suggests a novel experiment, that of taking a vote of want of confidence in the House of Representatives. "We do not find in the history of foreign countries," says the *Kokkwai*, "any instance of the people voting want of confidence in the Parliament. But our Diet, especially the House of Representatives, has already invited the severe censure of the nation, and there is not an impartial observer who does not complain of its disorderly conduct *(futeisai)*. Is it not then, most unfortunately and regrettably, time that the constituencies should vote want of confidence in the Diet?" We (*Japan Mail*) do not know whether the *Kokkwai's* opinion of the Diet is shared by the majority of the electors or not, but it is a fact that the present Diet has not given much satisfaction to the independent public.

* * *

Buddhist priests have presented to the Diet two petitions of contradictory nature. One is for the purpose of obtaining the franchise; the other is for release from compulsory service with the colours. When the Constitution was promulgated, a section of the Buddhist priests loudly clamoured, as noticed in these columns at the time, to obtain the franchise, of which they were deprived by the Law of Election. The movement, though strongly condemned by the press and the general public, still continues, and the result is the petition above alluded to. Another section of the Buddhist body has taken an exactly opposite course, and, being anxious to preserve the order free from all contact with political matters, has petitioned to be exempted from military service. The vernacular press, as may be expected, is in sympathy with the latter petitioners, while it is unsparingly hard upon the former for their persistent advocacy of a generally discredited course. We condense in the following paragraph a series of articles on this subject published in the columns of the *Mainichi Shimbun*.

* * *

After alluding to the two petitions above mentioned, the *Mainichi* observes that it cannot approve of petitioners who complain about their exclusion from the franchise. As to those asking for exemption from military service, our contemporary acknowledges the justice of their contention. The Government, when framing the existing Conscription Law, probably thought it unadvisable to make any exception on account of Buddhist priests, lest the priestly profession might be used by unscrupulous persons as an excuse for evading service with the colours. But this, in the opinion of the Tokyo journal, is like branding a whole family as robbers on account of the criminal tendency of one of its members. Turning to discuss the evils attending the mixing up of religion with polities, our contemporary refers to what Buckle said of the case of Spain, and further illustrates its point from the contemporary history of Ireland and the Catholic countries of South America. In Japan also, during the middle ages, Buddhist priests wielded immense influence in the practical politics of the country. But since the time of the coming into power of the Tokugawa family, religion has been systematically excluded from the political sphere, a state of affairs hightly beneficial for the sake of religion no less than of the State. Priests who clamour for the franchise are divided by the *Mainichi* into two classes, namely, those who are really desirous of interfering with the politics of the country, and those who have joined the present movement, from jealousy of certain advantages possessed over them by their deadly enemies, the propagandists of Christianity. Article 12 of the Law of Election provides that "Shinto priests, Buddhist priests, and teachers of religion shall be ineligible." (We do not follow the official translation, as it is slightly different from the original in the case of this article.) Now the term "teachers of religion" is generally understood to cover ministers of Christianity and other religions besides Shintoism and Buddhism; and the Buddhist priests complain that, while in their case it is easy enough to distinguish who are priests and who are not, it is extremely difficult, in the case of Christian ministers, to draw the line between those who ought and those who ought not to be included in the term "teachers of religion," and consequently their antagonists can easily contrive to get into the Diet, while they can never do so. Such jealousy on the part of Buddhists, continues the *Mainichi*, is natural enough, but it is at the same time founded on no good ground. On the contrary, our contemporary is of opinion that not Buddhists but Christians ought to complain of inequality of treatment. For while Buddhist temples and grounds occupied by them are exempt from taxation, no similar privilege is extended to buildings and grounds devoted to Christian worship. Our contemporary, therefore, thinks it only proper that the same exemption from taxation should be granted to the places of worship of all religions alike.

* * *

The question of seal fisheries off the islands of Chishima (Kurile Islands) is beginning to engage the attention of the native press. We have already reproduced in these columns what the *Kokkwai* had to say on this subject. We will here refer to an article in the *Hochi Shimbun*. After alluding to the fact that a great quantity of seals is yearly brought away by foreigners from the waters of the Chishima group, our contemporary proceeds to blame the Naval Authorities for not sending to the north a few of the war vessels now lying idle in the ports of the warmer regions of the country. In the present condition of fishermen, the Tokyo journal thinks it impossible to expect the ignorant members of that class to compete successfully with the foreign adventurers who are yearly robbing the products of the national waters. At present the difficult task of guarding the coasts of Chishima against the unlawful intrusion of foreign vessels, is entrusted to a few police constables stationed on board vessels belonging to the Imperial Marine Produce Company. As to the contention that the Naval Department does not undertake the task of protecting the seal fisheries because the northern waters are foggy and full of hidden rocks and may thus cause the loss of war-vessels, our contemporary ridicules such a plea, and observes that the alleged dangers of the northern voyage ought, on the contrary, to be a reason for sending war ships thither, for thus and thus alone can the Navy be expected to become efficient and strong in time of war. Some persons say that the seal fisheries had better be left alone until the completion of the military preparations of the country; but our contemporary cannot approve such a policy. Should foreign intruders be allowed to carry on their depredations unmolested, they may in time claim a right to pursue seals, and difficulties like those now pending between the British and the United States Governments in respect of the Behring Sea fisheries may possibly arise between Japan and foreign countries. Our contemporary, therefore urges upon the Naval authorities the paramount importance of dispatching to the north a few men-of-war.

* * *

The *Jiji Shimpo* as usual pays little attention to the exciting topics of current politics. In its issue of the 12th instant, it published a picture illustrating the present mania for political talk and discussion. A number of stores are represented, over which are respectively inscribed Politics, Commerce, Industry, Science, and Agriculture. "Politics," wearing a silk hat, is drawing all the customers to his own window; "Commerce" scratches his head; "Industry" is crest-fallen; "Science" sleeps with his face on his folded arms by the window; and "Agriculture" is yawning with his hands raised over his head. Our contemporary, as stated in our last summary, is waging a crusade against the social inequalities of the present day, especially the ennoblement of meritorious servants of State. The *Jiji's* ambition is to level down all artificial eminences in society, and make every man equal to his neighbour in every respect. It condemns in strong language the growth of aristocratic tendencies among statesmen who have been at the head of the State for the past twenty years. At the time of the Restoration these men were distinguished by simplicity and moderation, but gradually as they began to feel secure in power, they proceeded to load themselves with honours and rewards until at last they revived the old system of the orders of nobility, and raised themselves to the same height of social status with their former masters of the feudal times. But power and honours are very apt to invite envy and jealousy. So our contemporary, by implication, warns the great men of the day that the gathering clouds of popular opposition against them are partly of their own creation, and recommends them to spare nothing to rectify their errors and become more moderate and unostentatious while they continue in power. Our contemporary even advises them to return the large sums of money which they are believed to have received from the Crown at the time they were ennobled. The *Jiji* has just commenced another series of articles, in which it proposes to discuss the position of the merchant class.

* * *

The *Toyo Shimpo* devotes a series of articles to reviewing the foreign policy of the Muscovite power. The *Hochi Shimbun* writes on the impropriety of indiscriminately using the name of the Emperor in political discussions. The *Mainichi Shimbun* has concluded a series of articles on official salaries, its object being to prove that present salaries are higher than they ought to be. The *Kokumin Shimbun* exhorts Privy Councillors to prove their *raison d'etre* by making an impartial decision on the present constitutional controversy between the Government and the Diet. The *Kokkwai* regrets the defeat of the moderates in the House of Representatives, and rebukes the extremists, whose unconstitutional plan of reduction has given the Government a good pretext to reject all the reductions relating to the expenditures mentioned in the 67th Article of the Constitution. The *Nichi Nichi Shimbun* writes on the question of the independence of Representatives. The *Nippon* has brought to a conclusion its long series of articles on the recovery of tariff autonomy, discussing the question from the Japanese merchants' and farmers' points of view. In another article, our contemporary reviews the history of the commercial class during the past twenty years. Hitherto the business of the country has been chiefly in the hands of the so-called "new merchants" (*Shin Shōnin*), composed first of sharpers and adventurers who have made their fortune by trading with foreigners at the open ports, and, secondly, of another set of men of equally despicable character who have enriched themselves by catering to the cupidity and passions of the official class. The time has passed for such merchants, and the *Nippon* advises young beginners in trade to reflect on the changing condition of things and adapt themselves accordingly.

## *THE 67TH ARTICLE OF THE CONSTITUTION.*

AMONG all the Articles of the Constitution not one has given rise to anything like as much controversy as the 67th, which runs thus:—"Those already fixed expenditures based by the Constitution upon the powers appertaining to the EMPEROR, and such expenditures as may have arisen by the effect of law, or that appertain to the legal obligations of the Government, shall be neither rejected nor reduced by the Imperial Diet, without the concurrence of the Government." At first the controversy turned upon the significance of the phrase "already fixed expenditures based by the Constitution upon the powers appertaining to the EMPEROR." What did that mean? What expenditures were to be regarded as falling under that category? Critics whose opinions deserved the highest consideration professed to find no difficulty in interpreting the Article. Certain affairs of State, they said, had been expressly reserved by the Constitution to the independent control of the Sovereign, and all outlays required in connection with such affairs must be included in "expenditures based on the exercise of the Imperial Prerogative." But others opposed this view, not, so far as we could discover, because they found it inconsistent with the language of the Article, but because to admit its correctness, would be to reduce to a comparatively small amount the portions of the Budget falling within the control of the Diet. The matter was ultimately set at rest by the issue of an Ordinance defining the exact significance to be attached to the 67th Article for the purpose of compiling the Budget. Even this act on the part of the Government did not escape criticism, several writers claiming that the issue of such an Ordinance was *ultra vires*. The supporters of the Government, on the other hand, pointed out that the step had been taken under Article IX. of the Constitution, which provides that the EMPEROR issues or causes to be issued whatever Ordinances are necessary for the carrying out of the laws. In order to follow the provisions of the 67th Article in the actual compilation of the Budget, some authoritative explanation was absolutely essential, and the Government issued that explanation in an Ordinance, thus obeying the direction of Article IX. This phase of the discussion is, however, no longer before the public. It has been replaced by another question which turns upon a point of procedure. The Constitution, as quoted above, says that certain items in the Budget must not be "reduced or rejected without the Government's concurrence." How is that concurrence to be obtained. Our readers are already familiar with the complicated and tedious steps of the Budget's progress through the Lower House—its lengthy examination by a Special Committee; its subsequent revision, item by item, in a session of inquiry, and finally its debate by the House. Suppose, now, that in the course of this scrutiny, a majority of the House votes for the reduction or rejection of some item which cannot be touched without the Government's concurrence. Is it necessary that, before seeking that concurrence, the Budget must pass through all the prescribed steps of procedure in the Lower House; ascend to the Peers; be subjected by them, perhaps, to fresh alterations; be returned, in that case, to the Lower House; be there debated again in respect of the new amendments; be laid before a conference of the two Houses, in the event of the Peers' alterations not being endorsed by the Commons; be discussed again in the Commons, after adjustment in Conference; and finally pass once more to the Peers? Is all this wearisome procedure necessary before the possibility of obtaining the Government's concurrence can be ascertained?

Such is the question that has been agitating politicians of late. Naturally the Representatives desire to ascertain at the earliest possible moment whether their amendments of reserved items will be sanctioned by the Government. They desire this, not only for the sake of saving themselves needless discussion, but also because the Government's decision in respect of any particular item might materially affct their manner of dealing with the rest. Accordingly, there was introduced into the House on Thursday, by Mr. TSUBOTA SHIGERU, after due notice, a proposition that "with respect to the concurrence of the Government in the matter of expenditures mentioned in the 67th Article of the Constitution, so soon as this House comes to a decision involving such concurrence, steps shall be forthwith takeu to seek that concurrence."

Now it appears pretty plain that if the principle involved in this proposition were admitted, the relations between the two Houses, as laid down by the Constitution, would be affected. In fact, the Houses would become to a considerable extent independent, since the one would be entitled to submit its amendments for Government concurrence before the Bill under discussion had reached the other. Thus, in the case of the Budget, the Peers might be asked to debate it after reductions or rejections made by the Commons alone had received or failed to receive Government sanction. But the Peers have theoretically as full a right as the Commons to proceed to the discussion of the Budget in its original form; and the Government, on the other hand, seems bound to consult the opinion of both Houses before endorsing or rejecting the verdicts of either. The language of the 67th Article supports this view. It does not say:—"shall be neither rejected nor reduced *by either House*:" it says:—"shall be neither rejected nor reduced *by the Diet*." In a word, it implies that the view of the whole Diet must be taken before the concurrence of the Government is sought.

Thus we have, on the one side, a strong argument based on the relation between the two Houses and on the apparent signification of the Constitution; on the other an equally strong argument founded on the great practical inconvenience that would result from following the former course. The whole question was debated calmly and exhaustively in the Houses on Thursday. Several prominent members took the view that the relations of the two Houses are not the same for the purposes of the Budget as for the purposes of an Ordinary Bill, since an ordinary Bill may be presented to either House first, whereas the Constitution distinctly provides that the Budget shall be laid before the Lower House first. But this argument failed to convince the majority that the precedence thus given to the Representatives carried with it the right of treating the Budget as though the Peers had no voice in its control. It appeared, too, that the whole question had been debated and decided more than a year previously at a general meeting of the Constitutional Liberals, and on being reminded of this fact, several intending speakers refrained. Thus the debate was brought to an end by 4 o'clock, and a vote being taken, the motion was rejected by a majority of 45 in a House of 231. But immediately after the announcement of the members, Count MATSUKATA, Minister of State for Finance, rose and told the House that, according to the view taken by the Government, the proper course is for each House to seek the Government's concurrence in dealing with the expenditures enumerated in the 67th Article. In other words, the Government's interpretation of the Constitution differs from the interpretation of the House.

We are thus confronted by another strange conjuncture in the early history of Parliamentary institutions in Japan. The House of Representatives has voted that the Constitution is to be interpreted in one way; the Government has decided that it must be interpreted in another. It will occur to some persons, doubtless, that Count MATSUKATA'S declaration might have been made more advantageously at an earlier date, while others will ask why it was made at all after the House's decision. An answer to the former question is to be sought, we imagine, in the Government's reluctance to make its voice heard directly in the debates of the House; while as to the latter, the idea plainly conveyed in the language of the Finance Minister was that the Government considered itself under a moral obligation not to remain silent, lest its silence might be construed as a token of acquiescence in the decision of the House. Without pausing, however, to examine this phase of the incident, we note rather the curious consequences that are likely to result from the

Digitized by Google

present situation. The House of Representatives, following the course of procedure indicated by its decision, will doubtless, without any attempt to obtain the Government's concurrence make whatever reductions or rejections seem proper to the majority, and will transmit the Budget in its altered form to the Peers. How will the latter act on receiving it? The view of the Constitution taken by the Lower House is not binding on the Upper. The Peers will have to interpret the 67th Article on their own account, and, assisted by the Government's declaration, they will probably decide to adopt the rendering indicated by Count MATSUKATA. In that event, the duty of seeking the Government's concurrence in respect of reductions or rejections of expenditures coming within the scope of the 67th Article, will devolve upon the Peers, and the Commons will find that by their own action they have divested themselves of the virtually independent functions which they might have assumed in this all-important matter of Supply. Mr. OOKA IKUZO, speaking on Thursday in support of Mr. TSUBOTA'S motion, warned the Representatives that they would have themselves alone to blame for the consequences of rejecting the motion. We see now what he meant. The Lower House may find that it has surrendered to the Upper, no small part of the financial control properly devolving upon the elected representatives of the people.

## *FACTS v. FICTION.*

IF the question of Viscount AOKI'S action in the House of Representatives on the 17th of December simply supplied food for journalistic controversy, we should not think of devoting another inch of space to it. But it presents itself to us in a very different light. The *Japan Gazette* has publicly preferred an accusation of wilful falsehood and double-dealing against the Japanese Minister of Foreign Affairs, and is bound, by the commonest principles of fairness to substantiate its charge or to withdraw it. Eight days ago the charge was made in these emphatic words:—"Viscount AOKI in his speech in the House of Representatives distinctly denied the connection of the Commercial Code with Treaty Revision." During these eight days the *Gazette* has diligently endeavoured to fix the charge, and has claimed that its own action in the matter must be regarded as "persistent truthful representation." Now the simple and straightforward method of settling the question was to refer to the stenographic record of Viscount AOKI'S speech contained in the *Official Gazette*. If the *Japan Gazette* really cared to be just, it would have consulted the record before publishing its original charge. But even though, setting the interests of journalistic dispatch above the dictates of justice, it hastily snapped up a rough statement made by a vernacular journal known to be hostile to the person criticized, surely when the accuracy of that statement was challenged, the *Gazette* should not have hesitated a moment in examining the stenographic record. Will it be believed that up to the present moment our contemporary has apparently not given itself the trouble to take this essential step? Referring to the subject on the 5th instant, in an editorial where it claims to have "amply proved the point in dispute"—*i.e.* to have successfully branded Viscount AOKI as a double-dealing, disloyal man—it makes the astounding admission:—"We do not happen to have the *Kwampo* (*Official Gazette*) containing the report at hand." Anything more wonderfully barefaced than this it would, we think, be extremely difficult to find. There is only one verbatim stenographic report of the Diet's proceedings published in Japan. It appears every morning in the *Official Gazette*. Every other journalistic report is either partial or a précis. This one and only trustworthy report of Viscount AOKI'S speech the *Japan Gazette* "does not happen" to have consulted, all the while it has been founding, on the supposed language of the speech, accusations of duplicity and faithlessness against the man who made the speech.

Not having "happened," then, to see the verbatim report, but being in no wise daunted by that palpable disqualification for discussing the matter of the report, the *Japan Gazette* proceeds to confirm its original misrepresentation by three statements, every one of which is utterly untrue. The statements are; first, that "a commotion was caused in the Diet by the assertion of Viscount AOKI" (as to the Code and Treaty Revision); secondly, that "a visitor, alluding to the Minister's remarks denying the connection of Treaty Revision with the Code, said:—"'*Gi-in wo keibetsu suru-na* (do not treat members with contempt)'"; and thirdly, that "the Diet was certainly of opinion that the connection of the Commercial Code with Treaty Revision had been misrepresented by the Minister, and that a serious attempt to deceive the House had been perpetrated." Every one of these statements, we repeat, is untrue. We will examine them briefly in order. To the first the *Japan Gazette* attaches great importance. It describes the incident as "throwing more light on the impression produced by the Foreign Minister's assertion than anything else that has been published," and it reproves the *Japan Mail* for having failed altogether to notice the circumstance. The *Japan Mail* could not have noticed the circumstance, without inventing it, for it never occurred at all. Not one breath of visible commotion was produced in the House by Viscount AOKI'S statement about the Commercial Code. Not one member, except Mr. SUYEMATSU KENCHO, to whom Viscount AOKI'S remarks were addressed by name—not one other member alluded, either directly or indirectly, to the connection between the Code and Treaty Revision. The stenographic account places this beyond the shadow of a doubt, and we ourselves, having been present with a number of other foreigners in the House, can confirm the correctness of the record from point to point. A commotion did occur in the House at a later period, but it was due to a wholly different cause, as will presently be seen. So much for the incident which, according to the *Japan Gazette* "throws more light on the impression produced by the Foreign Minister's assertion than anything else that has been published," and so much for the charge that the *Japan Mail* failed in its journalistic duty by not publishing an account of the occurrence. We proceed now to the second count:—"A visitor, alluding to the Minister's remarks denying the connection of Treaty Revision with the Code, said 'do not treat members with disrespect.'" Now what actually happened was this. No sooner had Viscount AOKI turned to Mr. SUYEMATSU and begun to address him by name with reference to his speech in the House the preceding day, than Mr. ABEI, sprang to his feet, and protested that the Minister had no right to address a member by name. The President called Mr. ABEI to order, but the latter remained standing, and when Viscount AOKI had finished his sentence in regard to the Code, Mr. ABEI again loudly repeated his protest against a Minister of State's naming a member. Again, and this time more sternly, the President warned Mr. ABE to keep order, whereupon a voice from the gallery called out:—"Don't treat a member with disrespect." Mr. SUYEMATSU SABURO then called upon the President to have the strangers' gallery cleared, and the President sent officials to remove the offending visitor. This is the incident which the *Japan Gazette* endeavours to twist into a proof that even the visitors in the gallery regarded Viscount AOKI'S statement about the Code as a gross attempt to deceive the House, and therefore as an insult. A protest on a point of order is perverted into a denial of the truth of a statement. We come finally to the third false assertion, namely, "the Diet was certainly of opinion that the connection of the Commercial Code with Treaty Revision had been misrepresented by the Minister, and a serious attempt to deceive the House had been made." This statement is apparently based upon the fact that the House fell into a state of commotion. Now it is quite true that the House fell into a state of commotion; but the cause of the commotion had not the remotest connection with Viscount AOKI'S remarks about the Code. At the conclusion of the Minister's speech Mr. ARAI SHOGO, in whose name the original queries that led to the Minister's speech had been forwarded, asked some supplementary questions, and Viscount AOKI, having answered those as fully as he

Digitized by Google

considered expedient, withdrew. But other members had also desired to question him, and when his absence was discovered, various protests were uttered, with the final result that the House grew very excited, and passed a vote directing the President to apply for the Minister's attendance the next day. From the time that Viscount AOKI left the rostrum until the time when the House rose, not one syllable was uttered by a member referring, directly or indirectly, to the question of the Codes and Treaty Revision. That part of the affair had evidently passed entirely out of the recollection of the House, and the only thing present in the members' minds was that the Minister had taken his departure without waiting to hear whether any further questions would be addressed to him. The incident is among the most remarkable and best remembered in the annals of the first Japanese Diet, for it led to an excited discussion the following day, and its sequel established an important point of parliamentary procedure. In support of the *Japan Gazette's* assertion that "the Diet was certainly of opinion that the connection of the Commercial Code with Treaty Revision had been misrepresented by the Minister, and that a serious attempt to deceive the House had been perpetrated," there is not one title of evidence. Can anything be more reckless than to advance such an assertion in the face of the fact that, Mr. SUYEMATSU'S brief rejoinder excepted, not one solitary allusion, of however trivial a character, was made by any member of the House to the question of the Code and Revision, and in the face of the further fact that the House's subsequent excitement was caused entirely by the Minister's unlooked for withdrawal. Now, there is not the least use in the *Japan Gazette's* seeking to confuse the issue by charging us with bias, journalistic artfulness, an attempt to trip it up on minor issues, or a desire to conceal the truth. We have taken, one by one, the points upon which it avowedly bases its slander, and we have shown that every one of those points is false. Neither is there the least use in pretending that we have ever denied the influence exercised by Treaty Revision upon the process of compiling the Codes. Our unequivocal statement is on record that the work of compilation was undoubtedly expedited in the interests of Treaty Revision. The whole thing is narrowed to this:—that the *Japan Gazette* has preferred public charges of deceit and disloyalty against the Minister of State for Foreign Affairs; that it has endeavoured to confirm its charges by repeated arguments; that by its own confession, while continuing to assert the truth of its charges, it has not, to this day, taken the trouble to read the only existing verbatim record of the speech upon which it founds its accusations; and that, in support of those accusations, it has now published an utterly perverted and false description of the doings in the House of Representatives; a description the absurdity of which the editor of the *Gazette* would detect at once did he refer to the verbatim report. Our readers will readily believe that it wearies us just as much to write all this as it must weary them to read it. But there is no resource. Having once touched the subject, we cannot, in the face of the *Gazette's* repeated asseverations, lay it down without seeming to acquiesce in one of the most unwarranted slanders ever published by a responsible newspaper. Let us not be told what Mr. This has since asserted; where Mr. That received his education; or how high are the claims of Mr. the Other to be believed in preference to a pro-official organ. Such pleas are mere subterfuges. The facts are before the public, and to the facts let the author of the slander confine himself.

## *THE "HYOGO NEWS" AND YOKOHAMA JOURNALS.*

WE have failed, apparently, to make our meaning clear to the *Hyogo News*. Referring to its just and in the main accurate strictures on the style of Yokohama journalism, we advanced some considerations, not by any means intended to excuse that style, but sufficient, on the whole, to account for the fact that newspapers in this Settlement do not follow the wholesome example of their home contemporaries by letting each other severely alone. We did not discuss the question of invective and abuse, the importation of which into journalistic controversy we condemn as heartily as our southern contemporary condemns it. Our point was simply this—that misstatements circulated among a small audience have a peculiar capacity for mischief because they do not fall into that ample sieve of public opinion by which, in England or America for example, all assertions and theories are thoroughly winnowed, and the chaff is in the end effectually separated from the grain. Here the winnowing process takes place on a very limited scale only. There is a marked willingness to accept, without scrutiny, any criticisms unfavourable to the Japanese. It is natural that such should be the case, for a considerable section of the community, being reluctant to admit Japan's fitness to exercise jurisdiction over foreigners, gives ready credence to assertions or arguments helping to confirm its distrust and justify its conservatism. A writer who adapts himself to this tendency can confidently count on a favourable hearing, and has also the great advantage of knowing that his readers will be ready to believe him because they wish to do so. Under these circumstances it becomes a serious consideration whether a journalist can afford to take no notice of the contents of his local contemporaries' columns, and whether he does not himself become guilty of vicarious misrepresentation if he fails to correct statements which he deems erroneous or misleading. Local public opinion, in many cases, has no material to correct such statements, and, on the whole, is disposed to be hostilely credulous where Japan is at the bar of judgment. To attempt correction, however, is to challenge controversy, and, as the *Hyogo News* truly says, journalistic controversy in Yokohama never fails to offer a miserable spectacle of bickering and bitterness. The radical way to avert such discreditable exhibitions would be a policy of absolute mutual indifference on the part of the local newspapers. But for the reasons advanced here and in a previous issue, such a policy cannot be adopted without prejudice to the cause of truth. That difficulty, and that difficulty only, we sought to explain when writing recently on the subject. Certainly it never entered our conception to extenuate the practice of "jumbling together scraps of reasoning with opprobrious personal epithets." Neither can we think that we ourselves have ever descended to such a practice. Our rule, observed with all the consistency at our command, is to take no notice whatever of abuse levelled at ourselves or attacks directed again us personally, but only to discuss arguments, statements, and contentions of public interest. A complaint was advanced against us recently, with evident sincerity and a considerable show of feeling, that our style is "haughty" and that our language often implies an assumption of superiority which we are not entitled to claim. To be arraigned on such a charge seems a novel journalistic experience, but since criticism of style is based upon individual opinion, we do not think of disputing the accusation. Invective, personal abuse, and Eatenswill vituperation are horses of another colour, however, and it has long been a subject of surprised comment that Yokohama should patiently endure a perpetual parade of such sorry steeds. Still stranger is the distorted reasoning which underlies the creed implied, if not actually expressed, in many of the local journalistic utterances, the creed that courage of speech and independence of opinion can only be demonstrated by hostile criticism of the administration, legislature, judiciary, morality, and general ability of the Japanese. It is not easy to see how any proof of intrepidity or independence is furnished by carrying on a campaign against an opponent who cannot strike back; by trimming one's sails to the general set of the more demonstrative section of local public opinion, and by uttering loud condemnation where not even a shadow of inconvenient retort is possible. The courage of the preacher whose pulpit protects him against contradiction, is of a far higher quality, in our opinion, than the courage of men who, under the ægis of a system guaranteeing absolute immunity

Digitized by Google

from the usual consequences of evil-speaking, give free exercise to that least intelligent and most forcible of all faculties, the faculty of traduction. Simply by the force of fierce and importunate enunciation, some credit has been secured in this Settlement for the singular doctrine that the independent and intrepid writer is he who adroitly caters to local prejudice and loudly leads the chorus of uncontradicted criticism. Fallacies of that kind may flourish for a time, but will surely fall sooner or later. Reason, not to speak of any finer sentiment, must one day condemn a state of affairs which requires that any writer desiring to be popular should set out by attacking the institutions and rulers of the country, and which permits that while exercising this license under the immunity attaching to a specially privileged guest, he should at the same time claim to be honoured for courage and independence.

## *THE LAND-TAX AND PUBLIC OPINION.*

ANY observant reader of the vernacular press for the last few weeks must have noticed that a gradual and steady change is taking place in public opinion on the question of the land-tax. Until lately it appeared that the whole country was in favour of reducing the tax, but the independent section of the community—the section not associated with professional politicians—is beginning to make its voice heard. Instead of a chorus of approval, we are now invited to consider the fallacious nature of the arguments employed by politicians who, in order to curry favour with the masses, bring forward the question of fiscal reform in a popular and attractive manner. The practical and outspoken editor of the *Jiji Shimpo*, Mr. FUKUZAWA, at present the autocrat of the journalistic world, was one of the first to ventilate an opinion long entertained by the major part of the independent public. His voice soon found an echo in periodicals of such high standing as the *Keizai Zasshi* and the *Koku-Hon*. Mr. SAKATANI YOSHIRO, of the Department of Finance, a well-known writer on financial subjects, also discussed the question in an elaborate paper published in the journal of the *Kokka Gaku-kwai*. He explained, as we noticed in a former issue, that the land-tax in Japan partakes chiefly of the nature of rent, and that, thus regarded, the present rate is very moderate. More lately an able refutation of the fallacies of the popular creed on this subject appeared in the columns of the *Kokkwai*, from the pen of Mr. KON SOTOSABURO, one of the proprietors and regular contributors of the *Nippon-jin*. But the most elaborate, and in many respects the most interesting, essay appeared in a recent number of the journal of the Japan Agricultural Society. The writer is Mr. SAWANO JUN, of the Department of Agriculture and Commerce, one of the most distinguished graduates of the former Komaba Agricultural College. At the outset, he alludes to the explanatory document accompanying the Land Tax Amendment Bill, lately introduced in the House of Representatives by one of the members. In that document much stress is laid upon the expediency of maintaining a just proportion between the different kinds of taxes, and on the necessity of lessening the burdens of the agricultural population. On what ground, Mr. SAWANO asks, does the framer of the Bill base his estimate about the present rate of the land-tax? From the explanatory document, it would seem that the introducer of the Bill considers the present rate unbearably high, simply because he observes much distress among the rural population. Now the fact is that this much talked of distress is principally found in the section of the agricultural population having little or no concern with the land-tax; namely, the section consisting, either wholly or in major part, of tenants cultivating other people's land. The agricultural proprietors, who alone are affected by the incidence of land taxation, are doing very well, the majority of them being able to increase the acreage of their farms year by year. This simple consideration suffices to show the mistake of supposing that the alleged distress among the peasantry is caused by the burden of the tax on land. Some people, Mr. SAWANO observes, think the present rate of the land-tax high, because it is 2½ per cent. of the assessed value of the land (*chi-ka*). But the *chi-ka* is a quantity quite distinct from the real market value of a given estate, and cannot be taken as a standard for judging the heaviness or lightness of the land-tax. Another set of people argue that the present rate is excessive because it is higher per *tan* than the impost in other countries. To such people Mr. SAWANO replies that a *tan* of Japanese soil, under the present system of cultivation, is equal, in respect of producing capacity, to several *tan* of land in other countries. To substantiate his assertion, he adduces the following table, showing the average area of land under cultivation per head of the agricultural population in various countries :—

| COUNTRY. | AVERAGE AREA OF LAND PER FARMER. Cho (2½ acres.) |
|---|---|
| Germany | 1·953 |
| France | 2.275 |
| Italy | 1.233 |
| England | 9·714 |
| Austria | 1.239 |
| Belgium | 1·595 |
| Japan | 0.196 |

From these figures he argues that European farmers have to cultivate for their sustenance about fifteen-fold as many acres of land as their Japanese *confrères*, and that, consequently, it is only proper that the Japanese farmers should pay a larger tax than European farmers on a given area of land. As to this point, however, many who in the main are of the same opinion as the writer of the essay will be inclined to question the validity of his conclusion. Our present purpose, however, is to reproduce his views without any attempt to criticize them. There is yet, he goes on to say, another class of writers who consider the present rate of impost excessive because the proportion which the land-tax bears to taxes of other descriptions is very much greater in Japan than the corresponding proportion in European countries. Such an argument reveals ignorance of the essential difference in the economic condition of Japan and that of Western States. That the land-tax should be the most considerable source of national revenue in Japan is only natural, because in this country agriculture forms the principal occupation of the people. But the result of the recent growth of other kinds of industry is already visible in a gradual decrease of the land-tax. In 1879 the land-tax formed more than 67 per cent. of the whole revenue, but the percentage was reduced in 1887 to about 47. From what has thus far been said, Mr. SAWANO concludes that the land-tax is not unreasonably heavy in Japan. He then passes on to consider the general question of distress among the farming class. The cause of distress among the lower class of the rural population is assigned to the growth of luxurious habits since the Restoration; in other words, the expenditure of the peasants is not warranted by their income. And this, too, dispute the fact that their income has considerably increased, because, in the first place, improved methods of cultivation have augmented production, and, in the second, public burdens have repeatedly been lightened during the present era, as may be seen from the following figures :—

LAND TAX.

| Year. | Per Tan (¼ acre) Rice-fields (average quality.) Yen. | Per Tan. Upland Farms. (average quality.) Yen. |
|---|---|---|
| 1868 | 5.491 | 2.425 |
| 1872 | 2.620 | 1.109 |
| 1876 | 1.178 | 1.009 |
| 1877 | 1.625 | 0.882 |
| 1882 | 1·755 | 0 736 |
| 1888 | 1.678 | 0.704 |

N.B.—The figures for 1868 and 1872 are based on the then current price of rice.

From another table showing the comparative amount of land-tax (including local rates) paid by a middle-class farmer in Yosha Gun, in the Province of Tango, it is shown that an agriculturist who paid land-tax and local rates aggregating about 161 *yen* in 1868, paid only about 33 *yen* in 1889. Still another table demonstrates that a farmer possessing 5 *tan* of land in Arima Gun, in the Prefecture of Hyogo, paid the following taxes in different years :—25 *yen* 25 *sen* in 1868; 15 *yen* 66 *sen* in 1872; 14 *yen* 43 *sen* in 1877; 15 *yen* 64 *sen* in 1882; and 14 *yen* 83 *sen* in 1887. While thus the public burdens of the farmers have been gradually decreased, and while their land has increased in productive capacity

Digitized by Google

their expenditure has grown out of all proportion to the growth of their income. Hence it has come to pass that land held by improvident farmers is rapidly passing into the hands of their more frugal neighbours. According to the census of March, 1888, the number of farmers paying annually 5 *yen* and upwards in the form of the land-tax was 1,825,027; and the number of those paying 10 *yen* and upwards, 863,041. But in December, 1889, the corresponding figures were 1,602,249 and 884,754; that is to say, a decrease of 202,078 on the side of farmers paying 5 *yen* and upwards, and an increase of 21,713 in the total of those paying 10 *yen* and upwards. Mr. SAWANO concludes by examining the consequences likely to ensue to individual farmers from the proposed reduction of ½ per cent. in the present rate of the land-tax. According to agricultural reports fram Tokyo and twenty-four other localities for the year 1888, the agricultural population may be classified as follows :—

| | Those possessing 10 *cho* and upwards (1 *cho*=2½ acres.) | Those possessing less than 10 *cho*. | Those possessing less than 2 *cho*. |
|---|---|---|---|
| Number of Families | 22,486 | 304,004 | 1,219,579 |
| Percentage..... | 1½ | 19½ | 79 |

From this table it is plain that 15 farmers in every thousand would be benefited to the extent of 15 *yen* 73 *sen* annually, were a reduction of ½ per cent. made in the land-tax—assuming that a man holding 10 *cho* of land is at present paying land-tax to the amount of 78 *yen* 65 *sen*. On the other hand, 790 in every thousand—the men farming less than 2 *cho*—would be benefited only to the extent of 3 *yen* 14 *sen* at the utmost. According to other statistics furnished by the Department of Home Affairs, 75 out of every 100 farmers paying land-tax would only be benefited to the extent of about 1 *yen* annually, if the present rate were reduced by ½ per cent. Thus the vast majority of farmers would not derive any appreciable advantage from the proposed reduction. The substantial gains would fall to the share of the wealthy minority. Again, in the case of tenant farmers, the reduction would have no effect on the rents paid to landlords. For with the decrease of the tax, land would proportionately rise in price, and proprietors would naturally expect to receive the same rate of interest as before on the selling value of their properties. Thus the proposed reduction in the land-tax could do little or nothing towards alleviating distress among the peasantry. Mr. SAWANO recommends in preference the adoption of some measures calculated to increase production; as for instance, the introduction of a thorough system of drainage, the construction of good roads, and so forth.

It is very plain, if we are to accept statistics like the above and other gradually accumulating evidence, that the reduction of the land-tax, so vehemently advocated by political parties, is a measure dictated by sentiment rather than by practical reasoning. Yet for the sake of accomplishing this reduction, the Budget Committee in the House of Representatives has recommended such sweeping changes in the estimates that a conflict between the Diet and the Government seems inevitable, unless the former abates its pretensions.

## *IMPERIAL PARLIAMENT.*

HOUSE OF PEERS.—FEBRUARY 9TH, 1891.

The House met at 10.55 a.m. under the presidency of Prince Konoye. The business before the House was the third reading of the Registration Bill. Messrs. Obata Hoshiine and Murata Tamotsu opposed the third reading on the ground that certain portions of the Bill conflicted with the provisions of the Civil Code and Code of Civil Procedure. The debate was continued by several members. Mr. Kioka opposed the Bill on the ground that it was not up to the standard of the rest of the Government's legislation. Mr. Miura Yasu spoke at length and with force in reply to the various objections. He pointed out that the members who wished to have the provision as to Registration promulgated the in form of an Ordinance instead of being enacted as a law, might have had some reason on their side before the Constitution came into force, but were now entirely behind the time, since the respective provinces of Laws and Ordinances had been distinctly defined by the Constitution. Mr. Ando opposed the Bill, first because it contemplated cases of legal actions between parents and children, a notion entirely opposed to the moral code hitherto observed in Japan; and secondly because of the expense involved in carrying out its provisions. Marquis Hachisuka expressed astonishment at the opposition offered to the Bill at this stage. Every one of the points made by its present opponents had either been dealt with at the previous readings, or should have been advanced then if advanced at all. The third reading was finally put to the House and carried at 4.10 p.m.

FEBRUARY 10TH.

The House assembled at 10.45 a.m. under the presidency of Prince Konoye, and proceeded to consider a proposal by Mr. Hayashi Soyemon to amend the 116th clause of the Regulations of the House, in the sense of enabling persons who could not sign their names to become parties to memorials by merely affixing their seals. Mr. Miura Yasu supported the motion. He explained that since December the 6th the Memorials Committee had received 142 memorials, and out of 52 already examined, 19 had been rejected because the signatures attached to them were written in the same hand. It was essential to provide some means of legal signature for people not competent to write their own names. He suggested, however, that a change of phraseology be made in the draft of the proposal. Mr. Hayashi expressed his willingness to make the change suggested, but a discussion arose as to whether this was possible. The President ruled that Mr. Miura's proposal must be treated separately as an amendment of Mr. Hayashi's. After a long discussion, Baron Senge moved that Mr. Hayashi's proposal should be left to the Committee to deal with, but this motion was lost, as were the amendment of Mr. Miura and the original motion. Mr. Ozawa Takeo then proposed that a Conference Committee of nine be appointed to confer with the House of Representatives in the event of the latter's introducing any amendments into the Weights and Measures Bill. The motion was passed, and the House decided that the selection of the Committee be left to the President.

FEBRUARY 13TH.

THE House met at 11.15 a.m. under the presidency of Prince Konoye. The President announced that the following had been chosen to form a committee for conferring with the House of Representatives :—

| | |
|---|---|
| Viscount Kano Hisanobu | Mr. Ito Miyoji. |
| Mr. Miura Yasu. | Mr. Hozumi Chincho. |
| Baron Ozawa Takeo. | Mr. Watanabe Jinkichi. |
| Mr. Ozaki Saburo. | Mr. Takeguchi Kichiro. |
| Mr. Watari Masamoto. | |

The decision of the Qualifications Committee with respect to a petition from Wakayama Prefecture criticising the election of Mr. Mayeda Kensuke, was read. The decision was in Mr. Mayeda's favour. Mr. Murata Tamotsu contended that the petition having been sent up in the name of one person, should have been at once rejected, as not offering sufficient grounds for an inquiry. Mr. Kato Hiroyuki objected to the principle of the decision, and entered into a discussion of the difference between moral and legal codes, and the effect of this difference on methods of voting. A long debate ensued. Finally the closure was voted, and the House, by ballot, cast 58 votes for and 67 against the decision of the Qualifications Committee, so far as concerned the manner of voting endorsed by it. Further debate on the subject was postponed until the next day. The House rose at4.15 p.m.

HOUSE OF REPRESENTATIVES.—FEBRUARY. 6.

The House met at 10.40 a.m. A desultory discussion as to certain motions not yet in the hands of the members, ended by the House proceeding to debate a motion by Mr. Takei Itei, that in discussing the Budget, decisions need not be taken on each item but only on the totals for each Department. Mr. Takei explained that the object of his proposal was to expedite the business before the House. There were 482 items in the Budget, and if each were taken separately, the delay would be great. The motion was put and lost. A motion by Mr. Taketomi that a Bureau of a Department should be taken as the unit of discussion, was then immediately put and passed. This led to loud remonstrances. The two motions had been before the House simultaneously, and the opponents of the second motion claimed that no opportunity of discussing it fully had been given. The commotion grew so great that the President announced a recess (11.55 a.m.). The House re-assembled at 1.10 p.m. Mr. Hayama Chiuzayemon asked how the House intended to proceed in the event of the Budget Committee's Report being adopted, seeing that the Report dealt with expenditures falling within the scope of the 67th Article of the Constitution. Mr. Ayai Takeo complained again of the action taken by the President with regard to the motion of Mr. Taketomi. The House had been taken entirely by surprise. The usual course would have been to decide first whether urgency should be granted or not, and then to debate the motion. He proposed that another vote be taken. The point was put to the House, and lost. Mr. Otsu Junichiro asked the Government Delegates to inform the House, before the debate on the Budget opened, which items fell within the scope of Article 67th of the Constitution. Mr. Suyehiro Shigeyasu made an eloquent speech protesting against the arbitrary manner in which the majority was attempting to deal with the Budget. The changes recommended by the Committee could not be legally made without following certain prescribed steps, of which no notice was apparently to be taken. He thought that the majority was about to rush into a fight without properly marshalling its own forces or reconnoitering the position of the enemy. To employ the Budget as a weapon for attacking the Government, they had to obtain the cōoperation of the Upper House, and upon that they could not count. He proposed that before proceeding to discuss the Budget, the whole question of the legality of the course recommended by the Committee be fully debated. After some questions, the President asked the House to decide whetlfer urgency be granted to the motion. The House decided in the negative. The debate on the Budget then commenced, the Foreign Office being taken first. The President announced that the second and third readings should be dispensed with, to which Mr. Tachiiri took exception. Mr. Watanabe, Government Delegate, replying to the question put by Mr. Otsu, said that, in order to find what items fell within the scope of the 67th Article of the Con-

Digitized by Google

stitution, the easiest course was to consult the Finance Law now in the hands of the members. Mr. Taketomi Tokitoshi, referring to amendments proposed by Mr. Suge Ryoho, inquired by what authority he proposed to reduce the appropriation (31,100 *yen*) for foreign employés of the Foreign Office by 7,859 *yen*. The employés were engaged under fixed agreement, and though a vacancy had occurred at the Legation in Berlin and one at the Legation in Holland, these would have to be filled. He also inquired whether the Secret Service Fund (38,000 *yen*) of the Legations and Consulates abroad could be cut down as Mr. Suge proposed without disturbing agreements. Mr. Inouye Kakugoro, as a supporter of Mr. Suge's proposals, said that they knew nothing about the uses of the Secret Service money, but they considered it right to reduce it. Mr. Hayama Chiuzayemon pressed the Budget Committee to say how far they had obeyed party considerations in their proposed reductions. Mr. Ishida, on behalf of the Committee, said that an opportunity for discussing this would occur later on. Mr. Takanashi Tetsushiro inquired whether the reductions involving administrative changes were based on any precedents furnished by foreign countries, or on any scientific principle, or merely on the idea of the Committee. Mr. Ishida said that they were permitted by the Constitution. Mr. Takanashi asked by what article of the Constitution. Mr. Ishida replied, by the 64th. In reply to another member, he said that administrative changes could only be made by exercise of the Imperial prerogative, and that the Committee had dealt with questions of finance alone, but he failed to explain why the Committee, in its explanatory notes, had denied that its recommendations would interfere with the administrative organization. Mr. Arai Shogo urged the President to forbid any further questions. The House had sat in Committee during many days for the purpose of putting questions, and to continue the process now was only to waste time. Mr. Sasaki Zenyemon agreed with the principle of Mr. Arai's protest, but said that the errors of the Budget Committee must be held responsible for the delay. Mr. Shiota Ozuko, speaking from the rostrum, supported the Budget Committee's report. He said that the country, having long been governed by an oligarchy, suffered severely from the evils incidental to that system, and was now in the throes of eliminating them. Constitutional institutions had at last been established, and it was for the House to see that they became practical realities. Favouritism was at the root of the heavy expenditure of the nation. Offices were created for men, and one office led to the creation of another. Unless some drastic measures were adopted, the prosperity of the country could not be secured. The theory that some of the reductions recommended by the Committee trenched upon expenditures emunerated in the 67th article of the Constitution, was untenable. The Minister of State for Finance had told them that the Government could not consent to the Committee's Report. Such a discourteous declaration was probably to be regarded as emanating from that one Minister only. Mr. Inouye Kakugoro opposed the Report. He yielded to no one in his desire to reduce the burdens of the people, but he could not possibly agree to pursue that aim by illegal methods. The first objection to the Report was that the time fixed by law for the examination of the Budget by the Committee had been exceeded by 7 days. The second objection was that numerous mistakes of calculation occurred in the Report, some of which he pointed out. The third objection was that the recommendations contained in the Report involved an interference by the Legislature in Administrative affairs. In the converse case —administrative interference with the Legislature —the House would certainly be found in opposition. (Here the speaker was interrupted by shuffling of feet and cries of "We don't want to be lectured." The President warned Mr. Inouye to confine himself to the part of the Budget then before the House). Fourthly the Report was in conflict with the law. That the Diet, which made the laws, should also break them, was as though a publican should preach teetotalism, or an opponent of licensed prostitution build a brothel. Fifthly, the Report was contrary to Imperial Ordinances, and sixthly it could not be carried into practice. In deference to the President's ruling, he refrained from dwelling on these points and passed at once to the Foreign Office Section. Referring to the reductions recommended in salaries and travelling allowances, he showed that these expenditure could not be touched without encroaching upon the Sovereign's prerogatives. There were duly prescribed methods of bringing about such reforms. He then showed that the Committee had apparently adopted a regular general rule in cutting down the number of officials, as though special considerations need have no weight in such matters. The amount of the total reduction recommended also seemed excessive. In the 19th year of *Meiji* the salaries of Foreign Office officials had amounted to nearly double of the sum appearing under the same heading in the Committee's Report, although great efforts were made in the former year to get rid of all superfluous officials. There could be no doubt that the functions of the Foreign Office had increased during the past five years, yet it was now proposed to cut down its allowance for salaries by 100 per cent. At this point Mr. Suzuki Shoji enquired how much longer, Mr. Inouye's speech was likely to last. Mr. Inouye replied about four hours. The President said that, in that case, the House had better rise for the day (4.20 p.m.).

FEBRUARY 7TH.

The House met at 10.45 a.m. Mr. Inouye Kakugoro was about to continue his address when several members attempted to have him ruled out of order, Mr. Arai Shogo leading this attempt. The point made by these members was that several schemes of revision were before the House, and the speaker had not indicated which of them he supported. Mr. Inouye said that he spoke in opposition to the Committee's Report. Objections were still raised, and a member charged the President with allowing the time of the House to be wasted. The President warmly replied that the members themselves were responsible for whatever waste of time occurred, and ruled that Mr. Inouye should continue his speech. Mr. Tanaka Shozo objected to this ruling as improper. The President asked Mr. Tanaka whether he should appeal to the House to decide between them, to which Mr. Tanaka made no reply. Mr. Inouye then continued his speech. He explained, at the outset, that he approved of Mr. Sasada's scheme of amendment, but if that scheme were thrown out, he should support Mr. Suge's, and failing the last, he should vote for the Budget as submitted by the Government. He then proceeded to examine the items of the Committee's Report relating to the Foreign Office. The recommendation to reduce the salaries and ranks of Ministers Plenipotentiary, he declared to be a violation of the Imperial Prerogative, and opposed to the interests of the country in view of Treaty Revision negotiations. The same objections applied to the reduction of Consuls, nor could he understand why the Consulate at Canton alone was dealt with if the Committee had proceeded on any intelligible principle. He remembered that before Count Okuma came into office as Minister of Foreign Affairs, the *Hochi Shimbun* had advocated a reduction in the number of Ministers Plenipotentiary. The public had fully expected this recommendation of the Progressionists' organ to be carried into practice by Count Okuma, but, on the contrary, that statesman had declared such a course injurious to the national dignity and to the cause of Treaty Revision. Doubtless Count Okuma was wrong, and the Budget Committee were right. If they wanted the number of Consuls reduced, there were regularly prescribed means of approaching the Government with that object. The Committee proposed to make the appropriation for Legations and Consulates sixty thousand *yen* less than it had been in 1886. Were such measures consistent with the succesful conduct of Treaty Revision negotiations, and the recovery of the nation's tariff autonomy? How, again, did they propose to cut down the Legation allowances so suddenly? Did they think it would conduce to the national credit if the Japanese Minister in Paris were driven to begging his bread in the streets? For these reasons he supported Mr. Sasada's amendments, because they reduced the appropriation for the Foreign Office by a comparatively small amount. He also argued strongly against cutting off the allowance for students in foreign countries, and against the reductions made in respect of Repairs to Buildings, Travelling Expenses, and Office Expenses. With regard to the last item, the Budget Committee recommended a reduction amounting to 229 *yen* per head of the Foreign Office officials, whereas Mr. Sasada's amendments only amounted to 177 *yen*. He pointed out instances where the Committee had failed to recommend necessary economies, and he condemned the whole report as a disorderly and arbitrary scheme, not guided by any sound principle and not showing any obedience to proportion. His earnest wish was to effect such economies as would justify a reduction of the land-tax by however small an amount, but he could not, even for that purpose, be a party to methods which would interfere with the smooth practice of constitutional institutions and injure the reputation of the first Japanese Diet. He concluded with an eloquent appeal to the House to show itself capable of dealing worthily with an occasion so important. Mr. Shiota said certain words used by Mr. Inouye suggested that he held a brief for the Government; was that so? Mr. Inouye thanked him for the remark, and suggested that he should adopt some more creditable line of opposition. Mr. Koma Shiku supported the Committee's Report. He said that to answer all the arguments advanced by Mr. Inouye in a three hours' speech would require a six hours' reply. Speaking briefly, however, the gist of Mr. Inouye's contention had been that in certain items the Committee sought to reduce the appropriations to figures below those of 1886, whereas, and in view of the increased and increasing functions of the Administation, such a course was plainly impossible; and that the method of making these reductions interfered with the Imperial Prerogatives, and with the Organization of the Administration. As to the contention that no ratio was preserved in the manner of dealing with the various items of the Budget, he failed to understand it, seeing that no necessity for applying a hard-and-fast ratio existed. Mr. Inouye, in taking the Budget for 1886 as a standard of comparison, implied that no superfluous expenditures had been made in that year, but with such a hypothesis it was impossible to agree. He had also expressed his approval of schemes which adopted a fixed co-efficient of reduction, and applied it to every Department, as though circumstances did not alter cases in respect of finance as well as of everything else. Moreover, in point of fact the Committee's Report showed considerable uniformity of procedure, for, with the exception of the Army, Navy, and Communications Departments, to which special considerations applied, the reductions averaged forty thousand *yen*, more or less, for each Department. Proceeding to consider the various measures before the House, he dispensed with any discussion of the Budget itself, assuming that not more than two or three members in the whole House approved of it. As to Mr. Suge's scheme, however, it might suffice to point out that while it left the salaries of *Shinnin* and *Chokunin* officials virtually untouched, it recommended sweeping reductions in the salaries of *Sonin* and *Hannin* officials. In this respect and in many others, its proposals were distinctly opposed to public opinion. Passing on to Mr. Sasada's scheme, he showed that it reduced the appropriation for Building Repairs by 50 per cent., those for Office Expenses by 30 per cent., and those for Travelling Expenses by 40 per cent., while its method of dealing with salaries resembled that of Mr. Suge's scheme. In a word, the author of the scheme had applied himself to lopping off a few leaves and twigs, leaving the main trunk untouched. He denied altogether that the re-

Digitized by Google

ductions recommended by the Committee could be censured as interfering with the administration. Reforms of the administration might result from such reductions, but to claim that the House must not touch the appropriations for that reason, was to divest themselves deliberately of the power delegated to them. Even the Provincial Assemblies, in which powers much inferior to those of the Diet were vested, did not hesitate to debate administrative reforms. The reductions of salary advocated by the Committee could not possibly be regarded as interfering with administrative functions: they merely meant that the discharge of such functions should be less highly remunerated. Mr. Sasada Tsutomu offered a brief explanation of certain points in his scheme which seemed to be misunderstood by the House. The gist of his remarks was that he differed from the Committee's Report only in respect of items which trenched on the Imperial Prerogatives or the Administration's organization. His scheme recommended a reduction in the Secret Service Fund for the Foreign Office because he did not believe that secret covenants made by the Government were inviolable. He insisted that, if his scheme were adopted, the much desired reduction of the land-tax by one-half per cent. would be quite possible. Mr. Ayai Takeo opposed the Committee's Report. His arguments chiefly turned on the unconstitutional and illegal character of the reductions recommended by the Committee. Mr. Minoura Katsu said that, in this vital matter of finance, it was to be earnestly hoped that the Cabinet Ministers would be governed by public opinion, and would not refuse to endorse the decision of the House merely because some insignificant administrative reforms were involved. The Minister of Finance had told them that the Government could not agree to the Committee's Report, but he trusted that that statement was not final, and that the Cabinet would re-consider it. He then proceeded to advocate the adoption of the Committee's Report. All were agreed as to the necessity of economy; the difference of opinion only related to methods. But for his part, it seemed to him that the alternative schemes submitted to the House were calculated to interfere with administrative efficiency more than the Committee's scheme. He contended that since legislative power was vested in the Diet its capacity to effect reforms of administrative organization could not be questioned. As to the contention that the progress of Treaty Revision negotiations might be impeded by reducing the number of Ministers Plenipotentiary, he claimed that a reduction of numbers did not by any means involve a diminution of total efficiency. Some persons condemned the idea of applying to the Foreign Office appropriation a larger reduction, in proportion, than to the appropriations for other Departments, but it should be remembered that the principle observed with respect to domestic affairs need not be observed with respect to foreign. Mr. Takanashi Tetsushiro inquired whether it was maintained that the necessary administrative changes should be effected as a direct consequence of the reductions in the Budget, or whether it was proposed to petition the Throne on the subject. Mr. Minoura Katsu replied that, in his opinion, the changes should follow as a direct result of the reductions, but that, for his part, he thought it advisable to petition the Throne, according to the duly prescribed course. Mr. Okada Ryoichiro asked how it would be possible first to vote reductions of the Budget, and afterwards to prepare and present recommendations for the administrative changes involved in such reductions. Mr. Minoura saw no difficulty. Mr. Watanabe Osamu supported Mr. Suge's scheme of amendment. The House rose at 4 p.m.

FEBRUARY 9TH.

The House met at 10.35 a.m. The President announced that a question had been handed in by Mr. Takanashi Tetsushiro, to be forwarded to the Government, with respect to the subsidy to the Tea Company and the future policy of the Government in respect of such subsidies; also, a series of questions from Mr. Inouye Kakugoro relating to Korean affairs. Mr. Taketomi Tokitoshi supported the Budget Committee's Report. He contended that, by throwing out the motion proposed by Mr. Nishi, the House had long ago pronounced its opinion as to the legality of the reductions recommended by the committee. To debate that point again would be to slay the slain. He therefore addressed himself to special items. Some members claimed that the Commercial Bureau in the Foreign Office ought to be amalgamated with that in the Department of Agriculture and Commerce, but he pointed out that the functions of the two Bureaux were sufficiently different to justify their independent existence, as recommended by the Committee's Report. With regard to the criticism that the empire's relations with foreign States might be affected by reducing the number of Ministers Plenipotentiary, he reminded the House that the real purpose of the Committee's recommendation was to combine in the person of one Minister the duties of several posts. The business of Treaty Revision was entrusted to special Plenipotentiaries, and could not possibly suffer by any reduction in the number of Ministers abroad. Besides, although the fixed number of such Ministers was six, it very seldom happened that so many were serving at the same time. The actual number now was only five. The Committee had not interfered with the Legation in Holland, because it had existed for so many years, and because of the intimacy of Japan's relations with that State in ancient times; but no such argument applied to the Legations in Belgium and Switzerland, which might very well be dispensed with. He then dwelt at some length on features of the Budget which seemed open to criticism. He asserted that the Minister-President of State took no active interest in financial questions, and that although the Minister of Finance was undoubtedly very skilled in that branch of administration, it was a fact proved by history that every Minister hitherto appointed had increased the public expenditure. Mr. Ooka Ikuzo said that there were five schemes before the House for amending the Budget, the Committee's Report advocating the largest reductions, and the scheme of Mr. Suge the smallest. But the Committee's Report, being illegal in character would certainly be rejected by the Government, and the best that could be hoped from it would be a total reduction of 4½ million *yen*. Therefore he supported Mr. Suge's proposals. Apart from the question of amount, he opposed the Committee's Report as distinctly contrary to the 10th Article of the Constitution. With regard to the last speaker's contention that the House, by its rejection of Mr. Nishi's motion, had already declared the Committee's Report legal, he ridiculed it on the ground that they were assembled to-day to discuss that Report, and to reject it if they pleased. He denounced, in strong terms, the pretence made by the other side that he and his fellow-thinkers, in opposing the Committee's Report, were acting contrary to public interests. Both sides alike were animated by a desire to promote the prosperity of the nation, but they differed as to their methods of procedure. Alluding to the argument advanced by Mr. Inugai that administrative efficiency could not be impaired by cutting down the salaries of extravagant and luxurious officials, he protested against such attempts to stir popular prejudice by appeals to sentiment, and said that in order to got rid of finely painted and richly carpeted houses, some other way might be adopted than trampling the Constitution under foot and violating the laws. The other side complained that the present Administration was disfigured by favoritism. He did not deny it, but, on the contrary, was one of the most earnest advocates of reform. He believed, however, in the good old doctrine, "physician heal thyself," and he remembered that very recently Count Itagaki had preferred the very same charge against the Party which now called out so loudly for the correction of this particular abuse. He then dwelt at length on the defects of the Committee's Report, and compared its supporters to the wild boar which rushes at what it sees before it but never looks back. In their eagerness to oppose the Government they lost sight altogether of the Constitution and the laws. The House rose for the mid-day session, and on re-assembling at 1.30 p.m., Mr. Suyematsu Saburo called attention to an act of violence of which Mr. Inouye Kakugoro had been the victim. The outrage had occurred within the precincts of the House, and was attributed to the fact that Mr. Inouye belonged to the party of the Moderates. He urged that the matter be inquired into at once. Mr. Inouye Kakugoro said that when he left the chamber for the mid-day recess and was about to enter the Dining Room, he received a blow on the right side of the face. Turning quickly, he seized the arm of his assailant with his left hand and his breast with his right, and forced him against the wall. Mr. Suyematsu Kencho, who was three or four paces in the rear, called the police, and at the second summons they came and took charge of the rioter. Three or four others were apparently engaged in the affair, for they were seen to run off. He knew nothing of what had subsequently occurred. The President said that, according to the police report, the man arrested was a *shizoku*, by name Aoki Yasuatsu, of No. 5, Tokiwa-koji, Kamiichi, in Mito. The reason of the assault had not yet been clearly ascertained, and apparently the only course was to leave the matter in the hands of the police. Mr. Hayama Chiuzayemon said that, in view of the large number of members who had given notice of their desire to speak on the Budget question, he should hesitate to move the closure, were not the time at the disposal of the House so short. He therefore moved that the debate do now close. Several members approved, but the President said that as he had already given permission to Mr. Iwazaki Manjuro to speak, he could not immediately put the closure. Mr. Iwazaki Manjuro supported the Committee's Report. He claimed that the ultimate purpose of the Constitution was to give effect to public opinion in the counsels of State, and that it was entirely out of harmony with that purpose to pretend that any measure voted by the House could be unconstitutional in the sense claimed by the opponents of the Report. He also pointed out that in 1886 a larger reduction in the *personnel* of the Government than that now recommended by the Committee had been made without any loss of administrative efficiency. At the conclusion of Mr Hayama's speech the President put the closure, by the usual method, and declared it lost. This decision being challenged, a ballot by roll-call was taken, when 127 voted for and 123 against the closure. Mr. Inouye Kakugoro took exception to the ballot as having been taken without closing the doors of the Chamber. This led to some altercation, but the President explained that in the temporary Chamber then occupied, strict rules as to doors could not well be observed. Mr. Inouye withdrew his objection. The President announced that the Vice-Minister of Foreign Affairs desired to address the House. Messrs. Suyematsu Kencho, Suyematsu Saburo and others took exception to allowing the Government Delegates to speak after the closure had been voted. The President said that the Law of the Houses clearly gave the Delegates the right to speak whenever they pleased. Mr. Kono Hironaka said that the Government Delegate, having been present all the time in the House, need not have waited until the closure had been voted before asking permission to speak. He condemned such a course, and said it was calculated to produce friction between the Government and the Diet. Mr. Sasaki Genyemon urged that the words of the Law of the Houses referred to the period when debates were in progress, and not to the time when the closure had been voted. Mr. Kondo Jumpei suggested that as the manner of voting the closure had been challenged, the challenge might now be admitted with advantage, so as to hear the Delegate beforehand. Mr. Oota Minoru argued that, as the Law in question provided that the privilege of speaking must not be exercised by the Delegates in such a manner as to interrupt the speech of any member, it was obvious that the privilege

Digitized by Google

was only intended to be enjoyed while debates were going on. The discussion was continued by several members, the great majority protesting against the principle of allowing a Delegate to speak after the closure had been voted. Some, however, advised that as the Minister of State for Finance had been permitted to speak after a division, and as the Constitution and Law of the Houses gave this privilege at all times, the Delegate should be allowed to speak on this occasion, and the vote for closure should then be rescinded. Mr. Yamada Taizo said it appeared that the Delegate's request to be allowed to speak after the closure had been placed in the President's hands before the closure. The blame therefore rested with the President, who failed to convey the intimation to the House. The President replied that he had not seen any necessity to consult the House, inasmuch as the Minister of Finance had been allowed to speak some days previously after the House's decision had been taken. After some further discussion, a recess was taken at 3.20 p.m. The House reassembled at 4.45 p.m. Mr. Uyeki Yemori moved that although, according to law, it did not appear that the Delegate was entitled to speak after the closure had been voted, circumstances necessitated the granting of permission in this case; the closure should therefore be rescinded, and the Delegate permitted to speak. Mr. Tanaka Shozo did not think that the Delegate's remarks were likely to produce much effect, but he did think that the law distinctly authorized the Delegate to speak. Mr. Uyeki Yemori's motion was then put to the House by the usual method and declared carried, but, the decision being challenged, a ballot by roll-call was taken, when 134 "ayes" and 136 "noes" were found. The motion was therefore lost. Mr. Itakura urged that though Mr. Uyeki's motion, as put by him, had been lost, the House should be asked to decide the simple question whether it would or would not hear the Delegate. Viscount Okabe, Government Delegate for the Foreign Office, said that, according to the 54th Article of the Constitution, he had the right to speak. Mr. Suyematsu Saburo asked whether that was the opinion of the Delegate himself alone, or of the Cabinet. The Delegate replied that it was the opinion of the Cabinet. Mr. Misaki said that the question now acquired great importance, and that he thought it should be fully debated. Mr. Inouye Kakugoro moved that as the hour for adjournment had already past, the debate be deferred until the following day. Several members supported Mr. Misaki's suggestion. Mr. Suzuki Shoji thought there was no occasion for further discussion. The House had rejected Mr. Uyeki Yemori's motion, and should proceed to vote on the Budget. After some further remarks, from other members, in the sense of Mr. Misaki's suggestion, the President said that as the question at issue was the interpretation of the Constitution, its importance justified full debate. The House would therefore adjourn (5.35 p.m.)

FEBRUURY 10TH.

The House assembled at 11.35 a.m. The President announced that the Minister-President of State desired to address the House before the debate commenced. Count Yamagata said:—"Gentlemen—The Minister of State for Finance announced to you recently the view taken by the Government with respect to procedure for obtaining the Government's concurrence in the matter of expenditures enumerated in the 67th Article of the Constitution. The Government believes that the course then announced is the proper course. It would appear, however, from the direction which the affairs of the Budget have taken, that instead of each House seeking the concurrence of the Government before coming to a decision, concurrence is to be sought after both Houses have come to a decision. If that be so, there is a conflict of opinion between the Government and the House, and in consequence, the Government will be unable to offer any explanations with reference to the portions of the Budget falling under that category. In respect of other portions, however, the Government desires to offer the fullest explanations. Further, the 54th Article of the Constitution provides that the Ministers of State and Government Delegates shall be at liberty to address the Houses at any time. Yesterday, however, various objections were raised when a Government Delegate sought to address the House. Doubtless these objections were founded on the nature of that particular case. The Government, at the same time that it respects the privileges of the House, cannot possibly interfere with rights conferred by the Constitution and the Law. Even as the House values its own rights, I trust that it will consider this question carefully." Mr. Nishigata Tamezo asked Count Yamagata whether he interpreted the words "Imperial Diet" in the 67th Article of the Constitution to mean one House only. Mr. Ooka Ikuzo said that the House had already decided how to interpret the 67th Article, and no occasion existed to question the Government. In answer to further questions, Count Yamagata gave three reasons for the Government's interpretation of the 67th Article: first, that the reductions and rejections referred to in that article must not be decided upon by the House until after the Government's concurrence has been obtained; secondly, that the right of making representations is vested in the House with a view to contingencies of this nature; and thirdly, that since the legislative procedure of each House is carried on independently, their combined action cannot be referred to in the 67th Article. Some disposition was shown to put further questions to the Minister-President, but the House showed itself impatient of a course which seemed to reflect upon a decision already taken by it. A recess was taken at 12.15 p.m., and on re-assembling at 1.30 p.m. Viscount Okabe, Vice-Minister of Foreign Affairs, informed the House that, the statement which he had sought to make the preceding day having now been made by the Minister President, he had no further occasion to seek a hearing. The House then proceeded to vote upon the Foreign Office Section of the Budget. A discussion arose as to the manner of voting, but it was finally decided that the vote should be taken, in respect of the whole appropriation for the Foreign Department, first with regard to the amendments of Messrs. Sasada and Suge; secondly with regard to the Committee's Report, and thirdly with regard to the Budget itself. The voting commenced with Mr. Sasada's amendments, "ayes" 42; "noes" 215. Mr. Suge's amendments were then put, the result being "ayes" 98; "noes" 161. The Committee's Report was next voted upon, the result being "ayes" 153; "noes" 101. This last result was received with loud cheers on the part of both the members and the visitors. The House rose at 3.40 p.m.

FEBRUARY 12TH.

The House met at 10.50 a.m. The President announced that Mr. Suzuki Shigeto had applied for leave to bring in an urgency motion for a memorial to the Throne praying for administrative reforms; that a Representation had been presented by Mr. Kammuchi Tomotsune relating to customs duties and other matters; and that questions relating to the Osaruzawa Mine had been handed in by Mr. Takanashi and 31 others. The House then proceeded to discussion the section of the Budget referring to the Home Department. Mr. Shirane, Vice-Minister of Home Affairs, premising that, as already declared by the Minister President of State, no explanations could be offered with regard to expenditures falling under the category of Art. 67 of the Constitution, said that he should proceed to make some remarks about the other items of the Budget in this section. At the same time, he could not but remind the House that the recommendations of the Budget Committee were distinctly opposed to the Constitution, and that had the Budget itself been prepared in defiance of law, the House would surely have rejected it. Happily, however, it had been compiled in strict accordance with law and ordinance, and it "stood as firm as Fuji-yama towering above the storms at its base." He then proceeded to enter into an exhaustive explanation of the necessity of the various items in the Budget for the Home Department, showing that in some cases the recommendations of the Committee would involve expense nearly equal to the saving suggested, and that in others they would disturb arrangements commended by practical results of long standing, as well as interfere with the public service. Mr. Shiota Okuzo interrupted the Delegate, on the ground that at this stage of the debate and in view of the limited time at the disposal of the House, there was no occasion for a lengthy explanation from a Government Delegate. The Delegate retorted that he had been listening in silence for a tolerably long time to the speeches of the members, and he expected to be heard now in turn. He concluded his explanations. Mr. Kondo Jumpei said that he had spoken in support of the Budget Committee's Report, and he wished to ask the Chief Secretary why his speech alone had been omitted by the newspapers. This question elicited shouts of merriment throughout the House. Mr. Takatsu Nakajiro said that all laws had to receive the consent of the Diet. He wished to know, therefore, why the expenses for Kushiro Harbour had been included in the Budget before the passing of the law relating to that harbour. The Delegate said that the Government had had an object in view. Mr. Hamano Noboru argued forcibly against the amalgamation of the Sanitary Bureau with the Bureau for General Affairs. He said that sanitary arrangement were yet in their infancy in Japan, and after pointing out many matters that ought to be dealt with, he warned the House that the course recommended in respect of the Sanitary Bureau would, if adopted, do great injury to Japan's reputation. For the rest, he approved the Budget Committee's Report. Mr. Takagi Masatoshi critised the amendments proposed by Messrs. Sasada and Suge, and maintained that they were greatly inferior to the Report of the Budget Committee. The House rose for the mid-day recess at 12 15 p.m., and on its reassembly at 1.15 p.m., the President announced that the Minister of State for Agriculture and Commerce would attend the following morning, and answer the questions put by Mr. Takahashi and others as to the subsidy to the Tea Company, and the general policy of the Government in respect of aid to industry. Mr. Takagi Masatoshi continued his speech. Referring to the contention that the recommendations of the Budget Committee would interfere with the Administration's organization and were therefore illegal, he said that the Budget itself was illegal since the item relating to the Kushiro Harbour had been included before the law opening the harbour for purposes of foreign export had been passed. Mr. Shirane, Government Delegate, said that as reference had again been made to this point of the Kushiro Harbour, it might be well to remind the House that the Bill for creating special ports of export had been submitted to the Diet at the same time as the Budget, and that if the Bill did not pass, the appropriation in the Budget could be immediately omitted. That was very different from taking measures in direct contravention of existing laws. Mr. Suyematsu Kencho opposed the schemes of reduction of Mr. Sasada and of the Committee, as well as the Budget itself. He pointed out numerous instances of carelessness and disproportion in the items of the Committee's Report, and he adduced the reduction of the salary of the President of the House by 50 per cent. as in itself an ample proof that the Committee had treated the law without a particle of respect. On the other hand, he objected to the Budget, because he thought that some economy of the expenditure was absolutely necessary. It seemed to him that Mr. Suge's scheme best satisfied the conditions of the moment, since the reductions recommended by it were not excessive, whereas those recommended by the Committee could scarcely be carried out without much inconvenience, and certainly could not be put into force during the present year. He thought that the desired economies ought to be spread over several years instead of being rashly attempted at one *coup*. Finally he condemned the Government strongly for its action in respect of the interpretation of the Constitution. It was the Government's duty to help the House in such a

Digitized by Google

task, whereas the House had been left to interpret the Constitution according to its own lights, and the Minister President of State had then come and told them that as their view differed from that of the Government, no explanations could be given as to the items falling within the sphere of Article 67. The closure was here moved and carried. The following votes were then recorded by ballot:—

| | "Ayes." | "Noes." |
|---|---|---|
| Mr Sasada's Proposals | 22 | 183 |
| Mr. Suge's Proposals | 48 | 138 |
| The Committee's Report | 130 | 57 |

The House then proceeded to debate the Finance Department section of the Budget. Mr. Watanabe, Vice-Minister of Finance, in obedience to instructions received from the Minister of State for Finance, entered into an explanation of the various items. He pointed out that to reduce the appropriation to the Reserve from two millions to one million would be to disturb the stability of the whole financial system, and he demonstrated that the other reductions recommended by the Committee would cause much inconvenience. Mr. Tanaka Shozo wished to know how it happened that whereas Count Goto, when out of office, had declared four million *yen* a sufficient appropriation for the Finance Department, the Cabinet of which he was now a member endorsed a much larger expenditure. The Delegate replied that the Finance Department based its estimates on its requirements, not on the opinion of any individual. Various questions were put to the Delegate and answered. Mr. Ayai Takeo spoke in opposition to the Committee's Report. He did not discuss the legality or illegality of the measures recommended, that question having been fully examined already, but he pointed out that the Committee, instead of confining themselves to legitimate economies, had interfered with the interest on deposits and with the pension allowances; a proceeding obviously contrary to the provision of the Constitution. He instanced other items of an objectionable character, and warned the House that it was pursuing a course which would evidently end in no reductions at all being made. He particularly aminadverted on the proposal to cut down the pay of Privy Councillors to 1,500 *yen*, and pointed out that this step, unjustifiable from any point of view, would only result in a miserable saving of twenty or thirty thousand *yen* annually. It was conceivable that the members of the Radical Party should approve such a course, but he failed altogether to apprehend the considerations that influenced the *Kaishin-to*. If they thought that the salaries of the Privy Councillors should be reduced, why did they not reduce those of the members of the Diet also, who received far more in proportion than the proposed allowance for the Privy Councillors? Mr. Otsu Junichiro supported the Committee's Report. He did not think it worth while to attack the Budget, because it had not found a single defender, but he criticised several points in the proposals of Messrs. Sasada and Suge. The speech was of great length, and at its conclusion the closure was moved and carried. The following votes were then recorded:—

| | "Ayas." | "Noes." |
|---|---|---|
| Mr. Sasada's amendment | 13 | 137 |
| Mr. Suge's amendment | 33 | 117 |
| The Committee's Report | 115 | 32 |

The House rose at 4.50 p.m.

## *CORRESPONDENCE.*

### A "MINOR POINT."

To the Editor of the "Japan Mail."

Sir,—Not only are words "always capable of being understood in two ways," a piece of information a gapingly expectant public is indebted to the new editor of the *Japan Gazette* for, but new and novel ones may at a push be coined. Fitting thing that the *Gazette* has arranged to distribute dictionaries to trusting subscribers! The possession of such a work of reference seems likely to be peculiarly needed. Another authority on English as well as matters political appears to have arisen, an authority as "independent" as indifferent to the pertinency and weight of "minor points." Yesterday's *Gazette* contained a brief and confiding explanatory note that in an editorial of some days previous, *deceitfulness* had been erroneously substituted for *deceitlessness*. An escape more clever than happy! Unfortunately there is no such word as *deceitlessness* in the English language, conveniently elastic though it is. Even the much-prized Webster recognises no such noun. Sad somewhat, amusing very, true nevertheless. Of course this is only a "minor point," but it is one your honest and modest contemporary will do well to pay a little more heed to in future.

I am, Sir, yours faithfully,

SALTS.

Yokohama, February 7th, 1891.

### THE NAGOYA INCIDENT.

To the Editor of the "Japan Mail."

Sir,—Will you allow me a few words with regard to your comments upon my recent letter? It is, perhaps, true that my language was inaccurate when I wrote of a missionary's being "within his rights" in lecturing outside of treaty limits. Certainly it was not my intention to assert that in the legal sense of the term a missionary, or any other lecturer, had a *right* to take part in a meeting under such circumstances. In view of the uniform courtesy and even generously liberal treatment accorded me, in common with other travellers in the interior, it would be most ungracious to assume any such attitude toward the Government as the strict meaning of that word might seem to imply. I wished simply to repel the charge of law breaking most gratuiously brought against the touring missionary by your Hyogo contemporary, and to assert that he was within the limits of freely permitted practice.

It may not be out of place to call attention to the fact that the attitude of the Government has not been that of merely passive toleration. For many years it was, and to a certain extent still is, the custom to require a formal notification of the character of any contemplated meeting, including the names of the speakers and the subjects of their addresses, before permission to hold the meeting could be secured. These specific licenses have been many times given in cases in which I myself have been personally concerned. Moreover, the matter has several times been brought to the notice of the Minister of Foreign Affairs and the result has always been an assurance that the Imperial Government had no objection to urge. This assurance has come to me direct—from the lips of at least two American Ministers. This important privilege has been enjoyed for more than a dozen years, and while we have no wish to claim it as a "right," it will, I think, be generally conceded that to accept and act upon it involves no *wrong*.

I remain, yours faithfully,

D. C. GREENE.

Tokyo, February 9th, 1891.

### ROBERT ELSMERE AS A RELIGIOUS REFORMER.

To the Editor of the "Japan Mail."

Sir,—Perhaps most of your readers have heard that Mrs. Ward's attempts to put her religious ideas of "Robert Elsmere" into a practical shape by establishing a hall where free lectures are to be delivered on a *theistic* religion, based purely upon some sort of effervescent sentimentalism, of which it is needless to say its vapidity is a question of time only. These ideas or rather religions, are very much similar to the phenomena which show for a brief duration of time in the clear skies of these regions caused by the wonderfully phosphorescent comet which just has passed away, leaving behind a short tail with a feeble light flickering only for a short time.

It should be borne in mind that Mrs. Ward hitherto has not brought into the market any "ideas" which have not been hashed and rehashed a thousand times from the beginning of Christianity to the present day by adversaries far surpassing Mrs. Ward in every respect. Still there are some features which are quite interesting for a calm consideration from every human soul which is subject to salvation through Mrs. Ward's high priesthood.

Perhaps the most striking feature of this religion is the claim of being a scientific religion. With an unsurpassable audacity Mrs. Ward tells us that 19th Century science is adverse to Christianity, nay, its results are at variance with its fundamental dogmas. That there is a large group of the first rank scientists who openly avow these views it cannot be denied, but the researches and conclusions of that school of thought are not more favourable to Elsmerism than they are to orthodox Christianity. The conclusions of Darwin, Wallace, Huxley, Spence, Schmidt, Haeckle, and a large host of others do not prove that the new religion is based upon a scientific subjective human consciousness, nor that the seat of authority in religion is centred in man or anywhere else. Of course those who have tried all their life to destroy Christianity will be too glad to welcome a new and perhaps an efficient comrade, because when such gigantic bulwarks as the Church are destroyed, to destroy such childish works as Elsmerism is not a difficult task.

The positive features or principles of Mrs. Ward's religion is the belief in a Creator who reveals Himself subjectively only in the *heart* and never objectively in the history of mankind. It is needless to say that this is not a new idea, hence Mrs. Ward cannot claim the maternal honours. The German mystics of the 17th century held similar views though still believing in an objective revelation; the modern German rationalistic school, from which, by the way, Mrs. Ward has so freely borrowed that if the creditors demand payment she will become bankrupt ignonimously, held and hold, the same views; Parker and Emerson in America and a crowd of less conspicuous luminaries in England from the lack of originality have harped and still are harping upon it. Amongst the ancients, Plato's "Ideas" had the same meaning. Therefore when I say that Mrs. Ward has no right to claim the honour of such high fraternity, I hope no reader will accuse me of robbing this accomplished lady of her due honours. It is unnecessary to say that Mrs. Ward has also painted her religion with some phantastically attractive colours of philanthophy, the love of fellow man and many other similar godlike aspirations, which are the "cry of all but the game of a few," using an excellent expression of the great idealist philosopher, Bishop Berkeley.

The negative features of this religion can be told in a few words:—the denial of the true nature of the Deity, the denial of the Judaico-Christian revelation; the denial of miracles, and so on. To her the only recognizable trinity is compassed of three human persons, viz.:—Strauss, Baur, and Renan. It is very amusing to notice that two members of this trinity started from similar theistic notions and finally sank into the chaos of atheism: Strauss, in his "Leben Jesu" said that the greatest service of Christianity to the world was in raising human nature above the sensual religion of Greece on one hand, and Jewish *legalism* on the other; on one side the belief that the world is governed by a spiritual and moral Power; on the other, the perception that the service of such a Being can only be like Himself, namely, a moral and spiritual one, a worship of the disposition and the heart. In promoting this spiritual worship Strauss claimed that he was endeavouring to throw away the effete rubbish of Christianity. And the same Strauss in his last work "Old Faith and New" after reasoning in favour of a monastic cosmic organization, then pauses for a little while and gravely asks "Have we left any religion?" and calmly answers "No! and "Have we left any God?" "Yes or no, just as you please."

In regard to Renan, he seems to me a medley of contrarities; still his theism is more near to atheism than to Mrs. Ward. Now these are two principal authorities upon which the author of the new religion securely places her foundations!

It appears to me that Mrs. Ward has studied only one side of the German critical literature: of the orthodox side she hardly seems to have any knowledge. At the stupendous works of Schliermacher, Rathe, Nitzoch, Neander, and many others in the early stage and of an immense host of first class critics like Thoherk, Weisse, Hose, and Delitzch she hardly has condescended to look. The truth is that the Rationalistic Critical School in Germany has never reached the magnitude of intellectuality of the orthodox school. All those monuments of learning and philosophical acumen like Domei's "System," Neander's "Church History," Lange's Commentary, and Meyeer's unsurpassable New Testament Commentary are produced by these Christian scholars. While in the enemy's camp I cannot recollect a single work to match in any respect the above mentioned books. Now let me ask the impartial and calm reader: Is it not sheer dishonesty to say that the battle has been won by the enemy?

Another point which Mrs. Ward brings forward frequently is the impossibility of miracles. Of course it would be beyond my power at present to enter into that controversy, but for a man who calls himself a *theist* to exclaim in an excited manner like Robert Elsmere "Miracles never happen!" is absolutely nonsensical. A human being who believes in a Creator and Regulator of all cosmic laws and yet says that that Author will never suspend or alter the same laws does not understand what he is talking about.

Digitized by Google

I see every day in an infinite number of instances the same laws altered, suspended, and deranged by human will; how then can I have the presumption of saying that they have never been changed by their Creator? A human being who can make such an affirmation must possess a greater sphere of prophetic knowledge that has been manifested in the history of humanity; nay, he must be that God himself.

The most important question to us is: Will this religion prove permanent and supersede all others? I think it does not require great thinking power to answer this question negatively; because of one thousand and one convincing reasons. In the first place, because, as I have said before, the ideas constituting this religion are not new things, they have been tried before and have utterly failed. It is true that Mrs. Ward is stating them with such a reverential dignity as to make us think that no creature in heaven, or earth, or under the earth is able to unseal the great book or even to look upon it except the great female descendant of the Delai-Lama of Rugbi.

Again, because man is a sinful animal, he has an enormous appetite for sinning. If science tells him that there is no God, no soul, no future retribution, and his animal lusts and desires every moment excite him to their full satiation, Robert Elsmerism is not a strong dam to stop the downward rushing of the freshet. I am a rather close examiner of the present revolt of the masses against Christianity: hitherto I have not detected any imclination among those masses towards a theistic cult resembling the one which Mrs. Ward intends to inaugurate. In his article on "Robert Elsmere," Mr. Gladstone very forcibly showed that the present day Unitarianism, which is almost an identical stuff with Elsmerism, instead of increasing is dying away.

Of course every individual member of the human race has the right, an inherent right, to interpret the signs of the times according to his own reason and conscience, and both my reason and conscience honestly convince me that the new movement will not be a permanent institution for cultivating spiritual and moral faculties of mankind, though its priestess be the greatest literary Jezebel of the 19th century, who has bewitched by her charms such well balanced minds as the venerable Dr. James Martineau.

Truly yours, ISAAC DOOMAN.

Nara Eiwa-Gakko, January 30th, 1891.

## *DEAKIN BROS. & CO. (LIMITED).*

The ordinary general meeting of shareholders of Deakin Bros. & Co. (Limited), was held on Tuesday afternoon in the Grand Hotel. Dr. C: U. Gravatt took the chair, and among those present were Messrs. J. Rickett, Paymaster Macdonald, U.S.N.; Messrs. B. C. Howard, E. de Becker, H. Deakin, Magee, D. Simon, A. B. Walford, C. W. Arnould, and Dr. Tripler.

The Secretary, Mr. DE SOUZA, read the notice calling the meeting.

The CHAIRMAN said this report had been, or was supposed to have been in the hands of the shareholders for the last week, and therefore the chair would dispense with the formal reading of it unless objection were taken. (There being no objection the report was taken as read.) As there were several matters connected with the report and with the accounts in reference to which the directors desired that the shareholders should have fuller knowledge than could possibly be obtained in the report without carrying it to tedious and unnecessary length, the directors thought the report should be brief and condensed, and that such amplifications as might be considered necessary should be made by way of statement from the chair. In pursuance of that decision he would now say in the first place that merely because they did not find themselves in a position at this time to declare a dividend, that fact should not be looked upon in any way as discouraging. He thought all would agree that no company could in so short a time declare a dividend, unless operating under the most unusual and phenomenally favourable circumstances. In all lines of business there were seasonal fluctuations, ups and downs; and in looking over the past record of Deakin Brothers, as a firm, he found that it was no exception to the rule. There were certain seasons when the best business was done, and then there were other seasons, in autumn and winter, which corresponded to waves of depression, spring and summer, representing the highest tide. While the company earnestly desired local patronage, still they could not look on that as a very important feature towards their success. It was to the travelling public that they mainly looked and the same causes that affected travelling would quite naturally affect the conduct of such a business as this. They knew that spring and summer were the times for travellers, and hence they knew that those should be the important time for this business. He said those things to show that no brief period—especially if, as in this case it was the worst period—should be taken as the standard for calculating the business of the company. To illustrate his remarks, he might say that in looking over the past records of Deakin Brothers and Company for 1887 he found that in four months the gross sales were only $2,500, while the year's sales reached nearly $30,000; in 1888 during five months the gross sales were only $750, while the year's sales were nearly $30,000; in 1889 during four months the gross sales were $2,882, but for twelve months they were nearly $100,000; and in 1890 for three months they were a little over $1,500, but for the same year they reached over $70,000. In six consecutive months—October, November, and December, 1889, and January, February, and March, 1890, the business was less than $3,500, and yet on the whole year it reached over $75,000. They, however, must not get discontented or discouraged because of this period during which they had been operating, but must remember that it was the worst period of the year and must take the aggregate. There was another cause, different from those natural causes. There could be no question that the alarming and extravagant accounts of cholera in Japan which had appeared in American and European papers affected travelling to some extent, and hence it was not surprising to find that the ordinary depression to be expected at that season of the year was much greater. As a matter of fact last December was the largest December so far as regarded business that the firm ever had experienced, while the month that had elapsed from the time of the closing of the accounts was also larger than the corresponding month of any year in the history of the firm. The year had opened very auspiciously for the company. In regard to management it would be seen that the report stated that Mr. Deakin, in accordance with an arrangement entered into with the directors was about to go home, and the directors expected to make some satisfactory arrangement for the conduct of the business in his absence. In this connection he wished to impress upon the shareholders that without intending in any way to depreciate the importance of Mr. Deakin to the concern—no one valued Mr. Deakin's services more than the speaker did—still they recognised that no one man was ever essential to any business. A king might be dethroned but the nation went on; worlds might be destroyed but the universe still continued; for every vacant chair there was always some one found to fill it. Therefore the directors anticipated no difficulty in tiding over the time till Mr. Deakin's return. In addition to the two vacancies mentioned there was still another. At the time of drawing up the report the directors were under the impression that those two vacancies complied with the requirements of the articles of the association; but on looking into the matter closely they found that one of the remaining three directors should also retire. They had consequently determined by lot that Mr. Howard should retire, but he was very much pleased to say that Mr. Howard was elegible for re-election and that he offered himself.—(Applause.) Mr. Beyfus' chair had been declared vacant by reason of his departure and in accordance with section 89 of the articles of association; and Mr. Dare, he was sorry to say, was compelled to resign owing to a rule of his bank which prevented any of the staff from accepting a directorship in any company. Hence the directors had no choice but to accept his resignation. At the proper time Mr. Vacher's appointment as auditor would be put before the meeting for confirmation. Turning now to the accounts he would endeavour to go through them seriatim. The first item was goodwill, fixtures, &c.; the term fixtures in which represented some $6,000 at No. 16, which was the orginal item in the accounts. Furniture account, $1,878.05 represented glass show cases, shelves, tables, stands, &c., in the new building. Materials in hand represented wood and other materials for cabinet making. The item unexpired policies explained itself; the stationery, pamphlets, &c., in hand consisted of a thousand copies of "Hints to Tourists," 500 copies of the articles of association and 2,000 share warrants. The articles of association and the share warrants were each disposed of at a charge of 50 cents each. The "Hints to Tourists" was of course an advertising pamphlet and inasmuch as there was a supply to be used over a term of several years, probably two or three years, it was not thought proper to apply this to any one half-year, but to spread it as advertising over several years; and thus gradually writing it off, the sale of the articles of association and share warrants would wipe out the item. The stock account showed an increase of $7,552.75 over the original item. In the item of sundry debtors were represented amounts advanced to other dealers for very desirable articles, upon which they paid the company the current rate of interest, the articles themselves being held as approved security. Of course some of the amounts represented buyers and money not yet collected. The balance of $911.88 represented the profit of the working account. Under the heading of liabilities the item of sundry creditors $15,500.56 was almost entirely an over draft at the bank, against which the company had articles to show. The directors had informed the manager that generally he was to manage the business for the company as he had been in the habit of doing for the firm, and therefore in all questions of material he was to be the judge. Among other things Mr. Deakin told them that he had always been accustomed towards the close of the year, when he knew that owing to the condition of the Japanese, articles were put down at very low rates—he had been in the habit of taking advantage of those reduced rates to increase his stock. As the company had not sufficient money they obtained this overdraft from the bank without any difficulty, the articles purchased standing against the overdraft. It would be seen that the difference between the increase of stock and the sundry creditors item was $7,947, and that the items, cash in hand, furniture account, materials in hand, unexpired policies, stationery, sundry creditors, and balance from working account would exactly balance the account. Had it not been so the auditor would not have passed the accounts. In the working account the first item of any importance was the rent. It was necessary for them to take over the new premises on the 15th November, but it was found impossible to open them for business before the 16th December, so that for a considerable time the shareholders were paying rent on the building without any return. The matter, however, was an exigency of business. He wished the shareholders to understand certain things in regard to the rent of those premises, which might seem rather large. Had they not taken them at that rent they would have been put in the market, and the directors knew that another dealer in their line of business thought it so valuable that he offered a bonus of several thousand dollars—might he say five? (Mr. MacDonald—Yes, five thousand)—to have it for a term of years. They could understand therefore how valuable the building was, and there could be no doubt that if they had not taken it and it had been put into the market their competitor would have offered the present rent, and the company, would have been run up above $500, and have had the alternative of paying a increased rent or leaving the premises in the hands of a competing firm. Another thing was that the building was provided with the electric light, which would enable the company to carry on their business at any hour. Had they attempted to put in those lights themselves the cost would not have been less than $150 per month; so that properly the rent of the room was reduced to $350 a month. The salaries item explained itself, the staff of the company, he added being at present 14 persons. In general charges were included carting, printing, and advertising, gas, water rate, and all incidental expenses for carrying on the business. Of course the heavist item was the advertising, which came to nearly $100 a month. On the other side of the account he proceeded to explain the item of unalloted shares. The company's prospectus, he said, provided that any founders' shares that might remain unallotted should be allotted by the directors at such times and for such purposes as they might consider most desirable in the interests of the company. The unallotted shares were nine founders' shares. The directors disposed of these at $150 each, making in all $1,350, but $5 per share going to capital subscribed left $1,305, which was a distinct gain to the company. He had now endeavoured to go through the accounts and to give as full and lucid an explanation as he possibly could, but if anything had escaped him and if any shareholder wished further information he should be glad to give it.

Mr. DE BECKER said, referring to the stock account $77,500, he gathered from what the Chairman had just said that the item $15,000 put down to sundry creditors in the liabilities showed an overdraft from the bank, and that that overdraft was incurred for the purchase of certain things which could be bought very cheaply at the close of the year. That would bring down the normal stock to $62,000. Was that the stock value as shown in the books of Deakin Brothers? Or was it the present market value?

The CHAIRMAN—It is the book value.

Mr. DE BECKER—Has anything been written off since the concern was turned over?

Digitized by Google

The CHAIRMAN—Nothing has been taken off as yet.

Mr. DE BECKER went on to say that in connection with the unallotted shares, $1,305 had been placed to the credit of the working account, but supposing that this instead of being the first was the second half-year, the half-year's working—for the period to which the accounts referred was practically a half-year—would really show a loss just over $2,200.

The CHAIRMAN—Exactly so.

Mr. DE BECKER pointed out that this profit on unallotted shares must not be taken as a part of the working account of the business. Supposing those shares were not in hand, there would be a loss of $2,200 in actual cash.

The CHAIRMAN—Certainly.

Mr. DE BECKER said that showed the accounts were really in a worse state than they at first appeared. He supposed nothing whatever had been written off the goodwill?

The CHAIRMAN—Nothing.

Mr. DE BECKER—The directors propose doing that as the business works on?

The CHAIRMAN—Certainly; at the proper time.

Mr. DE BECKER thought—keeping in view the fact that there must have been a lot of breakages in removal, and that the price of curios was higher when the company was floated than when these accounts were made up—that something should have been written off the stock account.

The CHAIRMAN said in answer to the question relating to unalloted shares that if that line of argument were followed out they might say that if they did not consider the amount gained by transfer fees the loss would be much greater. These accounts must stand as they were; he offered them as they stood. Of course they might enter into any discussion as to how they would be in different circumstances, but as a matter of fact he offered them simply as they stood.

Mr. MAGEE moved that the report and accounts be adopted.

Mr. RICKETT seconded, and the proposal was carried.

The report and accounts are as follows:—

REPORT.

The Directors have the honour to submit their first report under the Articles of Association, accompanied by the Accounts and Balance Sheet duly audited.

The time embraced in this report is from the taking over of business on the 8th of August to the 31st of December, 1890.

Reference to the Balance Sheet will show that there is no fund available at this time upon which to declare a dividend, but Shareholders will doubtless appreciate in this connection the brief period covered by the report, less than five months, and the fact that, owing to unavoidable delays, control of affairs by the Company was not assumed until about the close of business activity for the year.

Notwithstanding these obstacles to success a decided reaction followed the opening of the new premises connected with the Grand Hotel, and the value of that extension is fully established.

As a Show-room it has no equal in the East, and the collection of Art Goods there displayed has probably no superior in any metropolitan city.

MANAGEMENT.

After a prolonged absence from home, and in accordance with an arrangement understood at the time of taking over the concern, our Manager, Mr. H. Deakin, expects to leave Yokohama in the coming summer. The Directors, however, have pleasure in announcing that he will return within twelve months to resume management, and that satisfactory arrangements will be made for conducting the business during his temporary absence.

DIRECTORS.

Two vacancies have occurred in the directorate by the departure of Mr. W. Beyfus, and the resignation of Mr. A. H. Dare, which should be filled at this meeting.

AUDITOR.

The appointment of Mr. H. Vacher as Auditor is presented for confirmation.

C. U. GRAVATT, Chairman.

DEAKIN BROTHERS AND COMPANY, LIMITED.—BALANCE SHEET TO 31ST DECEMBER, 1890.

ASSETS.

M. C. McDONALD, B. C. HOWARD } Directors.

I have compared the above statements with the books of the company, and fonnd the same to be in accordance therewith.

Yokohama, 17th January, 1891. H. VACHER, Auditor.

The CHAIRMAN next proposed as auditor Mr. Vacher who, he said, had already audited the accounts.

Mr. DE BECKER seconded and the appointment was agreed to.

The CHAIRMAN said the meeting had now to deal with uncompleted business in reference to a resolution passed at the former meeting in regard to the remuneration of the directors. That resolution was held in abeyance to be decided at this meeting. That question, therefore, was now in order.

Mr. WALFORD said in view of the state of affairs at the present time—and he might say he had the sanction of the Chairman in what he was about to propose—he would move that for the period which expired at the end of December no remuneration should be given to the directors.

The CHAIRMAN—Do you mean prospective also?

Mr. WALFORD—No, I am only speaking for the past.

Mr. McDONALD seconded the proposal.

Mr. RICKETT, on the grounds that the labourer was worthy of his hire, and that the directors had had a great deal of trouble, thought they should not consider the state of the accounts. The directors deserved remuneration and he thought it should be settled now. He was in favour of fixing a fee for the past five months in spite of the adverse state of the accounts.

The CHAIRMAN said the Directors had had no conversation on the matter. So far as he knew it had never been alluded to since the last meeting. But, speaking for his colleagues, he felt sure that it would be pleasanter for them if for the past five months no remuneration were voted.

Mr. RICKETT said if that were so he would withdraw his amendment except so far as it was applicable to the future.

In the course of some conversation which ensued,

Mr. MAGEE asked what was the custom as regarded Directors' fees in Yokohama.

The CHAIRMAN said it differed according to the company.

Dr. TRIPLER said the fee of each director of the Grand Hotel was $250 per annum.

In answer to Mr. MAGEE,

The CHAIRMAN said it was proposed that there should be a managing director to attend to affairs generally.

Mr. MAGEE thought under those circumstances the directors ought to be remunerated.

Mr. RICKETT wished to understand if during the absence of Mr. Deakin one of the directors was to act as managing director.

The CHAIRMAN said the proposal at present, in view of the difficulty of filling Mr. Deakin's place as manager satisfactorily during his absence, was that one of the directors should act as managing director, and take upon himself as much of the responsibility with the present staff as was possible.

Mr. DE BECKER thought that if one of the directors took the duties of managing director there should be remuneration. It was impossible to suppose that the directors should take up a great deal of their time and have no remuneration. Even if the particular period under review had not been as good as they wished there was no reason why there should not be, as the Chairman said, fluctuations and up and downs. They ought, he thought, to "stump up" as a company, and give a fee, especially to the managing director.

Mr. SIMON understood that the managing director was to receive a salary in addition to the fee the directors were to receive.

The CHAIRMAN said that was not proposed.

Mr. RICKETT proposed that the fee of the company should be decided at once and should not be fixed at less than $250 a year. He put it that way, because he did not wish to place a limit on the amount, to prevent its being increased at a future time if business warranted.

Mr. DE BECKER seconded, remarking that he thought the motion should refer to the past.

The CHAIRMAN said that had already been disposed of.

Mr. ARNOULD asked if any distinction was contemplated between the managing and the other directors.

Mr. RICKETT pointed out that the duties of managing director would be temporary, as Mr. Deakin would return shortly.

Mr. DEAKIN said he would be back in about ten months.

In reply to Mr. ARNOULD,

The CHAIRMAN said the board of directors consisted of five, and there was not supposed to be any distinction between one director and another. The amount voted would be for the five directors a total of $1,250 a year.

Mr. RICKETT'S motion was put and carried unanimously.

The CHAIRMAN said he had intentionally delayed to the last the question of electing directors so that if there was any difficulty they might adjourn to another day. He said he first proposed to name Mr. Howard for re-election under article 97 of the articles of association.

Dr. TRIPLER seconded and the motion was unanimously agreed to.

The CHAIRMAN said that in answer to the notice given no names had been handed into the head office for election to the board. He invited the shareholders present to propose names for election, but none being offered, said the directors had the pleasure of recommending the names of Mr. E. Andreis and H. E. Mr. Neyt.

Mr. RICKETT proposed that those gentlemen be elected, remarking, however, that as they were not present to answer for themselves it would interesting to know whether there was any provision in the articles of association bearing on the point, so that in case the gentlemen mentioned could not act the Directors might fill the vacancies without calling another meeting.

The CHAIRMAN said if either of the gentlemen could not accept, then the vacancy would be a casual vacancy, and could be filled by the board.

Mr. MAGEE seconded Mr. Rickett's motion, which was carried.

This concluded the business.

Mr. ARNOULD proposed a vote of thanks to the Chairman and the board of directors for the manner in which they had discharged their duties during the past period. They had had a great deal of work and a considerable amount of anxiety and the shareholders were very grateful to them for their services.

The CHAIRMAN said in reply to the very generous vote of thanks it was a pleasure to the directors to feel that the shareholders viewed their best efforts in that way. The duties had been some what trying, for they had known for some time that more on less disappointment must follow. Their belief in the stability and the sucess of the Company had not wavered; they were as confident now as in the beginning, in spite of the depression. As he said before there were indications at the beginning of the year which assured them that when they had again the pleasure of meeting the shareholders, they would be able to lay before them accounts satisfactory to all.

## *YOKOHAMA GENERAL HOSPITAL.*

At a meeting of the Committee held on the 4th inst., the subjoined account for the year 1890 was submitted and accepted.

The account shows that the calls upon the Committee for charity and some small necessary expenses were small, but as the fund at the Committee's disposal is now exhausted, it was determined to appeal to the community for subscriptions to raise a few hundred dollars for the care of the indigent sick during the current year.

In accordance with this resolution, a list will be placed in the hands of Mr. F. G. Woodruff, who is authorized to collect subscriptions for the purpose named.

A. O. GAY,
Chairman of the Committee.

## *RURAL LIFE IN EAST ABERDEENSHIRE.*

IV.

Let us glance shortly at the various operations of the Agricultural year. A good deal of the ploughing and preparing of the ground has been accomplished in the Autumn, but no sowing is done until the month of March. As soon as frost is out of the ground ploughing and harrowing are proceeded with energetically. To this succeeds the sowing of the oats and barley and the planting of potatoes. In May comes the sowing of the turnips, a very important Crop in Aberdeenshire, where vast numbers of cattle are reared for the Southern market, and where stall feeding begins early in September, and the pasture is not ready before May.

Whitsun-day is the great term time when leases expire and farms change hands. Servants are engaged for the half year at the great Whitsun-day feeing markets, and there is altogether much bustle and excitement. Hardly has this subsided, and everybody got settled in their new places, when hoeing time comes on. This is a period of anxiety, as a few days' delay may bring disaster upon the turnips. Fresh hands from the villages are brought in, and a feverish excitement is observed until the future of the precious *neeps* seems secured. Even then all is not safe, for about the time of the second hoeing they are often attacked by the desease popularly kown as *fingers and toes*, which especially in a dry season, often works havoc among the crop.

Next succeeds the hay season, and *the peats*. Within the radius of a dozen miles there are at least three *mosses* or moors from which peat is procured. Each moor has its *moss-gréene* or overseer, who measures off a certain portion of the *layer* from which each householder has a right to dig turf, or, as we call it, *cast peats*. The *casting* or digging is performed with a peculiarly shaped spade, which cuts each peat exactly the same size and shape. The *casting* is always done by men, but the soft wet peats have to be carefully separated and laid on the ground to dry; this work is called *spreading* and is generally performed by women, as well as the next operation *setting*, which consists in building the half-dried peats into little heaps called *rickles*, in which way they get thoroughly dried by the sun and wind. After the *setting*, the mass looks like a city of liliputian huts, built up with black bricks. The heat on a peat moss is sometimes intense. Shade there is none, and the only water is that of the black peat *bogs*, dismal indeed to look upon. Everyone is glad when the last load has been carted home, and all built into a neat pile with gables and sloping roof, known as the *peat stack*.

Year by year the mosses are getting smaller, some indeed having disappeared altogether. More and more of the moor *is taken in, i.e.* brought under cultivation, and corn and turnips are taking the place of bog-cotton and ragged-robin. Turnips want rain, and hay and peats require sunshine, so no wonder that the farmer is never quite contented with the weather, but by the latter part of July, if all goes well, he begins to breathe freely, and feels able to enjoy *Aikie Fair*, the great summer festival.

In former times the fair lasted for three days, and there farmers' wives made their purchases for the year. Although shorn of much of its importance, *Aikie Fair* is still a large cattle and horse market. Here, too, servants engage for the harvest, men waiting to be hired are known by their wearing an ear of green corn struck in their bonnets, a trophy sometimes hard to come by in a late season.

Farm servants, tradesmen, cottagers, all make holiday on *Aikie Fair* day. The lads are supposed to treat the lasses, and altogether a good deal of roughness and licence is permitted.

*Aikie Brae*, where the fair is held, is named after an Early King of Scotland, who was killed on this spot by a fall from his horse, thus fulfilling a prophesy of Sir Thomas the Blymer :—

> Thomas the Liar thou callest me,
> A true tale I will tell to thee.—
> On Aikie side thy horse shall ride,
> It shall stumble, thou shalt fa'
> And mauger a' thy pin and thee,
> Thine own sword-belt thy bier shall be!

The King, so the story goes, was carried on an extemporised bier, formed of his own and his attendants' sword-belts, across the Ugie, to the neighbouring abbey, where his brother Drostane was Abbot, and there died.

As children we looked forward for months to *Aikie Fair*. Early in the morning we were sure to receive a visit from Sergeant Birnie, an old pensioner who had seen service in the Peninsular War, and who had faught at Waterloo. The old man was a great favourite, and we would hang about him open-mouthed, while he told us stories

Digitized by Google

of Salamanca, Badajoz, and Corunna. According to his own account, he was one of those who buried Sir John Moore,

The sod with their bayonets turning.

There was one terrible tale which we liked best of all, of the retreat before, or after, Corunna, which was it? when Sergeant Birnie had no opportunity of changing his clothes for six weeks, at the end of which time his boots had to be cut off his swollen feet. Those boots had a horrible fascination for us, and as for doubting the veracity of the story, we never thought of such a thing.

The Sergeant had taken to basket-making in his old age, and he never failed to bring us a pretty basket as a present, on the occasion of this his yearly visit. He lived in a distant parish, and doubtless disposed of some of his handiwork at the fair.

But not long did we linger indoors on *Aikie Fair* day. Our favourite post of observation was the garden, which only a grassy bank and hawthorn hedge separated from the high road. From early morning till midday the stream of fair-going travellers was constant; on foot, horseback, in gigs. A coach and four filled with Aberdeen butchers, heavy farm carts, made almost comfortable for the nonce by bolsters and pillows—the cry was, "Still they come." But what we liked best was the droves of sheep in charge of Highland shepherds who wore the kilt and plaid, and spoke Gaelic to their collies; the fine cattle from nearer home; and McBey, the Aberdeen horse *couper*, with his contingent of farm and carriage horses, and, best of all, little Shetland ponies. In early childhood I imagined a dim connection between Mr. McBey and a *bay* horse, of which fancy I have never been able fully to rid myself to the present hour. About two o'clock in the afternoon the tide began to turn, those who had gone to the fair on business only, usually returning early and sober. All through the Summer afternoon and long twilight would we watch the home-coming stream. Many a jolly red faced farmer would throw a box of sweeties or packet of gingerbread over the hedge, and the farm servants, if they chanced to raise their eyes and see us, would scramble up the bank, and hand a *fairin'* to the maids and children.

The one drop of bitterness in our cup was that we were strictly forbidden to go to the fair, or even beyond the garden on this day. The utmost we could obtain was permission for one of the servants to go and expend our savings for us. And oh! the rapture with which we greeted the maid's return, and the joy with which we received the *clagum* (a kind of stickly butter scotch), white wooden cups and plates and bowls, and above all little churns, each one with its conventional red rose, daubed on in a manner enough to drive a Japanese into a fit, but which we Philistines thought charming. A little cream was forthwith begged, or pilfered from the dairy, and who shall picture the delight when a few sickly looking crumbs of butter made their appearance, the reward of much patience and perseverence? I can taste the woody flavour of that butter in imagination at this moment.

After *Aikie Fair* comes a breathing space before the harvest, which hardly commences before September. Much of the work is now performed by reaping machines and other labour saving appliances, but, at the time we are speaking of, every stalk of corn was cut with the scythe. Two, three, or even four scythes, keeping regular time, each cutter followed closely by his gatherer, always a woman, whose work it is to gather the corn into sheaves, straightening her bent back every few minutes, as she stands up to make a band with two handfuls of the corn, rapidly but firmly knotted together. The sheaf placed on the band, she hurries on, leaving it to be fastened by the *bandster*. Next the *stooker* seizes a couple of sheaves, one under each arm, and set them up an end, the crops leaning against each other, the ends firmly planted on the stubble. Twelve sheaves form a *stook*.

Last of all comes the *raker*, who, with a big-toothed iron rake bound round his shoulder by a strap, gleans up the fallen ears, and binds them up into shapeless little bundles, known by the name of *brock*. In harvest time the quality of the food is improved, and the quantity increased. Bread and cheese and beer are brought out to the field twice a day, and if it be a distant one, dinner is also eaten on the spot. Working hours are from daylight to dark, and every effort is strained to complete the harvest while the fine weather lasts. What a day of rest is Sunday then! A veritable Sabbath, as they call it, and what a pleasant resting place is a sunny *stook* side!

The last sheaf is cut with great ceremony, being gathered and bound by the children of the household, or at any rate by some member of the family. It is called the *cliak* sheaf, and the conclusion of the corn cutting is spoken of as *taking cliak*. What the word means, or from whence derived I have no notion. The *cliak* sheaf is dressed up in old clothes, something after the manner of *Aunt Sally*, but unlike that long suffering individual is treated with marked respect, stands in a corner of the kitchen at the harvest supper, is played with by the children, and finally finds its way to the poultry yard, where its ripe ears are devoured by the cocks and hens.

A word about the harvest supper which is called the *meal and ale*, from the traditional dish which appears upon that occasion, and upon no other. I don't suppose it would appeal to English palates, but there are worse dishes than *meal and ale*. It is made of raw oatmeal mixed with strong ale, sugar or molasses and a little whiskey. The consistency is that of thick pea soup; it is mixed in a huge bowl or milk-pan, a ring or a sixpence hidden in its depths, and a pinch of powdered cinnamon sprinkled over all. The feast is held in the kitchen: friends and neighbours are invited. The farmer and his family lend their countenance for the first half-hour, but it is the servants' party, and they are soon left to conduct it according to their own taste. A few spoonfuls of the meal and ale only are eaten, each one dipping low in the dish with the hopes of fishing up the ring. When this has been accomplished amid a good deal of rough joking and horse play, the more substantial part of the supper follows. Then the table is cleared, the fiddles tune up, and reel and country dance succeed each other into the small hours of the morning.

## *LETTER FROM SAN FRANCISCO.*

(From our Special Correspondent.)

San Francisco, January 22nd.

I have to report the death of the only sovereign who ever breathed his last in San Francisco—King Kalakaua of the Hawaiian islands—who departed this life at 2.30 p.m. on the 20th. The King came here a month ago on a pleasure trip, as was stated at the time; but in fact he came to consult physicians, as his state of health had alarmed his friends. His symptoms indicated Bright's disease in the incipient stage. He appeared to be in excellent health, and heartily enjoyed the festivities to which he was invited. But on a trip to Santa Barbara, he developed a morbid tendency to somnolency, and one day at dinner, he had a paralytic stroke. From this he recovered, but his medical attendant insisted on his return to this city. He had hardly arrived here, when another stroke followed, and a few days afterward, he had a convulsion—marking the early close of his sufferings. He lay for a day or two at the Palace Hotel surrounded by friends, and tenderly nursed by a young Hawaian girl who never left him; but for a whole day prior to his decease, he was unconscious and equally unable to take food, or to hear the services of the episcopal church which were read by the Minister of Trinity. He passed away without a struggle.

Kalakaua was a genial kindly man, without much learning or much intellectual force. He was elected to the throne of Hawaii in 1874, on the death of the fifth and last of the Kamehamehas, and had been sixteen years on the throne. It may be questioned whether any man would have filled the position satisfactorily; certainly Kalakaua did not.

He is to be succeeded, according to an arrangement made in 1874, by the Princess Liliokolani, a lady of 53, who married an American or an Englishman. It is perhaps doubtful whether this arrangement can be carried out without trouble. A large proportion of the people of Hawaii, perhaps a majority, are in favour of a transfer of the Islands to this country and their recognition as a Territory of the United States; and through this scheme has never met with favour at Washington, the partition of the Pacific Islands between Great Britain, Germany, and France which is now going on, and the unconcealed purpose of Germany to snap up any unconsidered trifles which lie within range of her gunboats, may possibly induce the Administration to reconsider our traditional policy, and at least think on the subject. It is hardly likely that either England or France would protest very loudly against the annexation of the islands to this country when both Powers are diligently engaged in annexing other islands wherever they can find them.

The proceedings of Congress, since I last wrote, have been without interest. Hoar of Massachusetts continues to press his force bill in the senate. One day last week, he kept the senate in continuous session for thirty hours in the hope of getting a vote. But he was foiled at last. The bill, however, may pass before this letter gets out of the harbour. The silver men are wrestling with a proposition to require the Government to buy up all the loose silver in the country which is reckoned to amount to some $13,000,000: the idea being to relieve the speculators who bought silver on the passage of the bill of last year of a load which is mightily inconvenient to carry. It seems incredible that such a bill should have any chance of passing. But it has. In the House, Mr. Mills and the speaker have had another tilt, in which the gentleman from Texas informed the gentleman from Maine that he was a bald fraud, and the speaker received the rebuke in abashed silence. This is quite *fin de siècle*, is it not?

There is trouble in Chile. The telegraph wires are in the hands of the Government, and our information is consequently scanty. But it seems that the disturbance arises from the old cause; a desire of certain parties to overthrow Balmaceda, the present President, and that either by him or by his opponents, the nitrate ports have been closed by a blockade. Ships of war are steaming to Valparaiso from all parts of the world, and the old question whether a Power can blockade its own ports is likely to be revived.

Rumours of approaching war come from Gautemala. Purchases of arms of approved type and of horses are being made in the East by persons who are more or less clearly identified with the President of Guatemala, and the gossips say that when the coffee crop has been harvested in March, a quarrel will be picked with Salvador. This latter State has always been the chief impediment in the way of Central American Union. It is small, but it is rich, and its leading men have no notion of being absorbed by their larger neighbours. It was the treachery of San Salvador which defeated Barrios' well laid plan for a consolidation of the five States in 1887. It is quite likely that it will be necessary to extinguish the autonomy of Salvador as a preliminary to the establishment of the United States of Central America.

Nothing has thus far been developed by the Committee of Investigation on the alleged speculation of Congressmen in silver last year. Everybody knows that Congressmen and Senators did speculate, and did make money by the rise in silver caused by the passage of the Silver Bill; but it seems impossible to get evidence of the fact. The only man to whom actual purchases of silver have been traced is Senator Don Cameron of Pennsylvania, and he admits the fact, saying that he had as good a right to buy silver as to buy wheat or pork. As he has just been re-elected senator by the legislature of his state, it must be inferred that in his own home it is not considered that he did wrong.

The 1891 vacancies in the senate are being rapidly filled up to the present time; the only change of moment is the substitution of Governor Hill of New York, a Democrat, for Mr. Evarts, Republican. But in several other states, which have yet to elect, Democrats will be chosen over the present incumbents, who are Republicans. The control of the body will remain in Republican hands, but by a reduced majority.

A fresh complication with Germany has arisen. Within a few days, Secretary Blaine received a communication from the Imperial Government through the German Minister at Washington, complaining of an unprovoked and wanton assault by the police of Hoboken upon members of the crew of a German steamer lying at a wharf in that port. The secretary referred the missive to the Governor of New Jersey for investigation. Inquiry was instituted, and it turned out that the firemen of the German steamer had gone ashore, got drunk, and were making a row in the streets when a policeman endeavoured to induce them to return to their ship. Failing in that he attempted to arrest them, on which he was severely beaten, and knocked senseless; a subsequent attempt to effect the arrest by other policemen who boarded the steamer for the purpose led to their being pitched off the ship by the crew under the direction of the officers. On the following day, proceedings were renewed, and the captain ordered his men to submit to arrest. They were arraigned, and by the advice of their counsel, pleaded guilty, and were sentenced to terms of imprisonment. This, in the opinion of the German Minister constituted an outrage which calls for reparation. Mr. Blaine will be apt to give Chancellor von Caprivi a piece of his mind.

A curious murder case has just ended at New York. On 9th October last, one James McDougherty, a patient in the Flatbush Insane Asylum, escaped from custody, and shot dead Dr. Lloyd, one of the medical attendants. He was himself the chief witness for the defence. He said that he had escaped by picking the lock of the asylum door with a piece of wire. Having re-

Digitized by Google

covered his liberty, he resolved on revenge for real or imaginary handships to which he had been subjected in his confinement, and he consulted lawyers with a view to instituting prosecutions. The lawyers declining to take his case, he bought a pistol and resolved to execute vengeance himself. He determined, he said, to put to death an editor who had urged his incarceration as a lunatic, the cook, who had served him bad victuals, the barber who had shaved him carelessly, and Dr. Lloyd, who, he said, was a cool calculating fellow, who never laughed. It happened that the latter was the first of his victims whom he met, and he shot him coolly and deliberately. His review of the evidence was searching and evinced high reasoning power. He commented at great length on the expert testimony and gave high praise to one doctor who pronounced him insane. He then went into a scientific discourse on insanity, and showed that his knowledge of the disease was thorough. Thus far he had been convicting himself out of his own mouth. But something diverted his attention to the subject of cyclones, and then he began to rave like a typical maniac. If he had kept silent on his pet theory, he would probably have been hanged; but the cyclones saved him, and he may be found guilty of murder in the second degree, which in his case means imprisonment for life in a lunatic asylum. He is the man who fell in love with Mary Anderson the actress, and persecuted her till she feared for her life.

## *IN H.B.M COURT FOR JAPAN.*

Before N. J. HANNEN, Esq., Judge.—SATURDAY, February 7th, 1891.

JUDGMENT IN THE NUTTALL-ANGLIN CASE.

Judgment in this case was given to-day.

Messrs. Walford and Litchfield, and the plaintiff were in attendance, but the defendant did not appear. A considerable number of the public was present.

The Judge said—This case does not to my mind present any great legal difficulties. The plaintiff had entered into a contract by which he was serving as the editor of the *Japan Gazette*. In the agreement that paper is described as an evening paper with a morning edition. The defendant by his own action transferred that paper to a company, and the company appointed an editor. I think for the purposes of this case Mr. Litchfield's proposition in regard to the law is accurate enough. Where a person puts it out of his power to carry out an agreement, that is in itself a breach. In this case it seems to me that it is a question not of law but of fact—whether the defendant had put it out of his power to carry out his agreement. Inasmuch as he had transferred the whole of the paper to the company, and the company had appointed an editor, it seems to me plain that he had put it out of his power to carry out his agreement. There was, therefore, in my opinion, a breach. I do not think that the circumstances which were contemplated in the agreement by clause 5 have arisen, and I do not think that the liquidated damages which were provided by clause 5 should be in this case given. Therefore there is a contract and a breach, and the plaintiff is entitled to some damages for it. Then comes the really difficult question: what are the damages? The plaintiff complains that he was put in a different and worse position in several ways, but the two which I think of importance, and which really are sufficiently grave to be considered by a Court are that he was transferred to the service of the company instead of being the servant of a single person, and, secondly, that he was to be sub-editor instead of editor of the paper. From the evidence it appears that he might have obtained the sub-editorship of this journal upon terms which I think were substantially as good as, if not better than, those under which he was serving in accordance with this agreement. Had therefore the company offered him the editorship of the paper, and all the other conditions which were proved before me to have been offered to him, I think there would be no damage. But he was offered a different position, serving under different people, and I think that he was not bound to accept that. He is, therefore, in this position: that up to the present time he has not had any offer which I think he was bound to accept, and he is entitled to such damages as the Court thinks are fair under such circumstances. Now, he claims a certain amount, and he puts into it various claims which I have no doubt he thought himself at the moment entitled to. On the other hand, the defendant might say there were exaggerations. It is very difficult to determine what is really the damage, and I think the only fair way to determine what it is is to look at what the parties themselves contemplated when they were both calm, when they had no reason to exaggerate on the one side or depreciate on the other what the damage might be. They came to the conclusion that if at any time this agreement was to be terminated by the defendant certain damages were to be given. I therefore think that the fairest way will be to consider that stipulation—not because the circumstances provided for in Art. 5 have arisen but because that is the only fair way I can see of judging what the damages to be given to the plaintiff ought to be. I think the Court ought to follow the procedure suggested in clause 5 of the agreement. The plaintiff is therefore entitled to a week's notice from now, and entitled to three months' salary after that, and he is entitled to his passage home. My judgment therefore is for the plaintiff, for the sum of $1,082.50 and costs.

## *LATEST TELEGRAMS.*

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, February 8th.

Great difficulty is being experienced in the formation of the new Italian Cabinet.

London, February 9th.

Signor Rudini, a Conservative, has succeeded in forming a Coalition Cabinet in Italy.

The rebels in Chile have captured one of the new ironclads.

London, February 9th.

Count Schleiffen has been appointed to succeed General von Waldersee as Chief of the Staff of the German Army.

The Egyptian Administration troops have been ordered to Tokar to expel the Dervishes from that place.

London, February 10th.

The letter addressed by the Lord Mayor of London to the Emperor of Russia, enclosing a memorial in favour of the Jews, has now been returned by the Czar unanswered.

London, February 11th.

The Army Estimates show a decrease of £290,000.

The Deceased Wife's Sister Bill has passed the second reading by a majority of 47.

[FROM THE "SINGAPORE FREE PRESS."]

London, January 21st.

At a mass meeting held at Boston it was resolved that the Coinage Bill should not be accepted, and that an appeal be made to President Harrison to veto the bill if it passes.

London, January 22nd.

Mr. Furness, a Gladstonian, has been elected for Hartlepool.

Speaking at Cambridge, the Marquis of Salisbury said that a lesson had been learnt from the recent events in Ireland of the tremendous power of the priesthood, which, if Home Rule were granted to govern Ireland, would crush Ulster beneath its ruthless heel.

## *TIME TABLES AND STEAMERS.*

### TOKYO-YOKOHAMA RAILWAY.

DOWN TRAINS LEAVE SHIMBASHI Station at 6,* 7, 8.05, 9, 9.35,† 10.45, and 11.40‡ a.m., and 1.10, 2.20,† 3.35,‡ 4.45, 5.55, 6.50,† 8.30, 9.50,* and 11.15* p.m.

UP TRAINS LEAVE YOKOHAMA Station at 6.30, 7.45,* 8.20, 9.20,* 10.20, and 11.25* a.m., and 12.50, 1.50,* 2.55, 4.51,* 5.45, 7.05, 8, 8.58,† 10, and 11.05* p.m.

FARES—First-class, *sen* 60; second-class, *sen* 40; and third-class, *sen* 20.

Trains marked (*) run through without stopping at Omori, Kawasaki, and Tsurumi Stations. Those marked (†) run through without stopping at Omori and Tsurumi Stations. Those marked (‡) run through without stopping at Tsurumi Station.

### TOKAIDO RAILWAY.

TRAINS LEAVE YOKOHAMA (down) at 6.50, 9, and 10.25 a.m., and 12.30, 3.10, 4.30, 5.45, 7.40, and 10.40 p.m.; and KOZU (up) at 6.09, 7.30, 9.40, and 11.05 a.m., and 1.08, 3.13, 5.15, 7.17, and 9.43 p.m.

FARES—To Hodogaya, first-class *sen* 6, second-class *sen* 4, third-class *sen* 2; to Totsuka, *sen* 18, *sen* 12, *sen* 6; to Ofuna *sen* 36, *sen* 24, *sen* 12; to Fujisawa, *sen* 42, *sen* 28, *sen* 14; to Hiratsuka, *sen* 66, *sen* 44, *sen* 22; to Oiso, *sen* 75, *sen* 50, *sen* 25; and to Kozu, *sen* 93, *sen* 62, *sen* 31.

A tramway runs between Kozu and YUMOTO (distance 4 *ri*.) Jinrikisha may be hired between YUMOTO and MIYANOSHITA (distance 1½ *ri*)

### OFUNA-YOKOSUKA RAILWAY.

TRAINS LEAVE OFUNA (down) at 7.26 and 9.40 a.m., and 12.10, 3.50, 5.09, 6.25, and 8.20 p.m.; KAMAKURA (down) at 7.35 and 9.51 a.m., and 12.21, 4.01, 5.18, 6.36, and 8.31 p.m.; and DZUSHI (down) at 7.43 and 10 a.m., and 12.30, 4.10, 5.25, 6.45, and 8.40 p.m., YOKOSUKA (up) at 6.25, 8.02, and 11.20 a.m., and 3, 4.30, 5.45, and 7.35 p.m.; DZUSHI (up) at 6.41, 8.16, and 11.36 a.m., and 3.16, 4.46, 6, and 7.51 p.m.; and KAMAKURA (up) at 6.50, 8.25, and 11.46 a.m., and 3.26, 4.55, 6.08, and 8 p.m.

FARES—To Kamakura, first-class *sen* 9, second-class *sen* 6, third-class *sen* 3; to Zushimura *sen* 15, *sen* 10, *sen* 5; and to Yokosuka *sen* 30, *sen* 20, *sen* 10.

### OYAMA-MITO RAILWAY.

TRAINS LEAVE OYAMA (down) at 6.50 and 9.25 a.m., and 2.20 and 5.15 p.m.; and MITO (up) at 6.25 and 10.10 a.m., and 2.05 and 4.55 p.m.

FARES—First-class, *yen* 1.56; second-class, *yen* 1.04; third-class, *sen* 52.

### TOKYO-MAEBASHI RAILWAY.

TRAINS LEAVE Tôkyô (Ueno) (down) at 6, 6.35, 8.50, and 11.35 a.m., and 2.45 and 5.45 p.m.; and MAEBASHI (up) at 6, 8.50, and 11.45 a.m., and 2.40 and 5.45 p.m.

### SHINJIKU-HACHIOJI RAILWAY.

TRAINS LEAVE SHINJIKU, TOKYO, (down) at 6.55 and 9.55 a.m. and 12.52, 4, and 7 p.m; and HACHIOJI (up) at 5.25, 8.25, and 11.25 a.m. and 2.20 and 5.30 p.m.

FARES—First-class *sen* 90; second-class *sen* 60; third-class *sen* 30.

### UTSUNOMIYA-NIKKO RAILWAY.

TRAINS LEAVE UTSUNOMIYA (down) at 10.05 a.m., and 12.25* and 3.05 p.m.; and NIKKO (up) at 7.20 and 11.55 a.m., and 2.25 p.m.

* Through Trains to and from Uyeno.

FARES—First-class, 75 *sen*; second-class, 50 *sen*; third-class, 25 *sen*.

### TOKYO-SHIOGAMA RAILWAY.

TRAINS LEAVE URNO (down) at 6, 6.35, 8.50, and 11.35 a.m., and 2.45 and 5.45 p.m.; UTSUNOMIYA (down) at 9.57 a.m. and 3.04 and 6.11 p.m.; SHIRAKAWA (down) at 8 a.m. and 12.34 and 5.42 p.m.; KORIYAMA (down) at 9.24 a.m. and 1.53 and 7.01 p.m.; FUKUSHIMA (down) at 7.30 and 11.35 a.m. and 3.48 p.m.; and SENDAI (down) at 6.15 and 10.25 a.m. and 2.35 and 6.45 p.m.

TRAINS LEAVE SHIOGAMA (up) at 6.50 and 11 a.m., and 3.10 and 7.20 p.m.; SENDAI (up) at 7.30 and 11.40 a.m., and 3.50 p.m.; FUKUSHIMA (up) at 6.40 and 10.23 a.m. and 2.36 p.m.; KORIYAMA (up) at 8.28 a.m., and 12.15 and 4.26 p.m.; SHIRAKAWA (up) at 6.30 and 9.45 a.m., and 1.35 p.m.; and UTSUNOMIYA (up) at 6.15 and 9.3 a.m., and 12.20, 4.18 and 6.30 p.m.

FARES.—Ueno to Utsunomiya, first-class *yen* 2, second-class *yen* 1.32, third-class *sen* 66; to Koriyama *yen* 4.10, *yen* 2.74, *yen* 1.37; to Fukushima *yen* 5, *yen* 3.32, *yen* 1.66; to Sendai *yen* 6.45, *yen* 4.30, *yen* 2.15; to Shiogama *yen* 6.75, *yen* 4.50, *yen* 2.25.

### TAKETOYO-OFU RAILWAY.

### REPORTS.

The Japanese steamer *Kobe Maru*, Captain Haswell, reports:—Left Shanghai January 30th at 1.52 p.m.; weather dull with thick fog at times; passed Tungsha Light-ship at 6.15 p.m.; thence experienced moderate N.N.W. gale with heavy beam sea and cloudy weather. Arrived at Nagasaki February 1st at 9.17 a.m and left the 2nd at 5.10 p.m.; weather overcast and cloudy with moderate N.W. winds. Arrived at Shimonoseki the 3rd at 6.43 p.m. and left at 11.44 a.m.; experienced cloudy weather with fresh E.S.E. winds. Arrived at Kobe the 4th at 8.15 a.m. and left the 5th at 2.48 p.m.; experienced moderate N.E. gale and overcast weather and very heavy S.E. swell with rain at times; passed Oshima Light at 11.05 p.m., very heavy sea and moderate N.E. gale with thick rain; passed Omaisaki the 6th at 9.30 a.m.; wind hauled to east and blew furious gale, very heavy sea and thick weather with rain and fog; passed Rock Island at 12.45 a.m.; thence to port had strong N.E. gale and dirty-thick weather. Arrived at Yokohama February 6th at 6.45 p.m.

The British steamer *Belgic*, Captain W. H. Walker, reports:—Left Hongkong on February 3rd; moderate and variable winds and sea from Hongkong to Yokoshima, thence to port strong northerly winds and head sea. Passed a bark outside bound in. Arrived at Yokohama February 8th at 11.34 p.m. Passage time 5 days 7 hours and 33 minutes.

The British steamer *Oceanic*, Captain W. M. Smith, reports:—Left San Francisco January 22nd at 4.09 p.m.; crossed the Meridian on February 1st, in Lat. 31.51 N., passed Noshima 3.40 a.m. February 9th; had light to fresh variable winds, and moderate sea with fine weather all the way with the exception of a moderate gale from S.W. to N.W., which lasted 18 hours when about 600 miles off the Japanese coast. Passage time 16 days 21 hours and 28 minutes.

The Japanese steamer *Nagato Maru*, Captain Ekstrand, reports:—Left Kobe the 7th January at noon; had moderate light N.W. winds and fine clear weather; passed Oshima Light at 8.15 p.m. On the 8th at 4 a.m., moderate N.E. winds and passing rain showers, clearing after passing Rock Islands; moderate breeze and fine weather to port. Arrived at Yokohama the same day.

The Japanese steamer *Satsuma Maru*, Captain F. J. Brown, reports:—Left Hakodate February 7th at 2 p.m.; dense snow fall and strong N.E. winds; 6.30 p.m. rounded Shiriyasaki; midnight wind hauling to the N.W. with clear weather. Arrived at Oginohama the 8th at 1.03 p.m. and left the 9th at 6 a.m.; gentle southerly winds and cloudy weather changing to fresh northerly wind with snow and rain up to Inuboye, which was passed at 8 p.m.; thence strong to moderate northerly gale up to arrival. Arrived at Yokohama February 10th at 7 a.m.

The Japanese steamer *Omi Maru*, Captain Wynn, reports:—Left Kobe the 9th February at noon; had moderate N.W. winds to Oshima; thence strong N.W. winds with high N.W. sea to Rock Island and moderate N.E. winds to port. Arrived at Yokohama the 10th February at 6.30 p.m. Passed a foreign bark about 10 miles to N.E. of Rock Island.

The Japanese steamer *Wakanoura Maru*, Captain Kenderdine, reports:—Left Kobe the 11th February at noon; had moderate breeze from the N.W. and fine weather; passed Oshima at 9.27 p.m., wind moderate, breeze from the north and fine weather; on the 12th at 4 a.m., fresh winds from N.W. and cloudy, continuing to 11 a.m., wind falling light and shifting to the N.E.; passed Rock Island at 0.40 p.m.; at 2.30 p.m. passed an American barque to the westward of Vries Island signalising request to be towed; passed Cape Sagami at 5.15 p.m. Arrived at Yokohama the 12th February at 7.30 p.m.

The Japanese steamer *Yokohama Maru*, Captain Swain, reports:—Left Shanghai the 6th February at 8 a.m.; had strong N.W. winds with cloudy weather. Arrived at Nagasaki the 8th at 7 a.m. and left the 9th at 5 p.m.; had fresh N.E. gales with heavy snow and squalls. Arrived at Shimonoseki the 10th at 1 p.m. and left at 4.20 p.m.; had fine weather throughout Inland Sea. Arrived at Kobe the 11th at 3.45 p.m. and left the 12th at noon; had fresh N.E. winds with fine weather. Arrived at Yokohama the 13th February at 6 p.m.

| No. 16s, Bombay | 72.00 | to | 78.00 |
| Nos. 10/14, Bombay | | — | |

### METALS.

All lots are unchanged, but there is very little doing, and holders are trying to obtain some advance in rates to compensate for the lower exchange. But so far they seem to meet with no success, buyers being apparently unwilling to buy anything if they can help it.

| | | | |
|---|---|---|---|
| | PER PICUL. | | |
| Flat Bars, ½ inch | $2.60 | to | 2.65 |
| Flat Bars, ¼ inch | 2.70 | to | 2.75 |
| Round and square up to ½ inch | 2.60 | to | 2.75 |
| Nailrod, assorted | Nom. | | |
| Nailrod, small size | Nom. | | |
| Iron Plates, assorted | 2.70 | to | 2.80 |
| Sheet Iron | 3.00 | to | 3.40 |
| Galvanized Iron sheets | 5.80 | to | 6.00 |
| Wire Nails, assorted | 4.20 | to | 4.50 |
| Tin Plates, per box | 5.00 | to | 5.25 |
| Pig Iron, No. 3 | 1.20 | to | 1.30 |

### KEROSENE.

Sales consist principally of some damaged cargo ex recent arrivals. Prices are somewhat lower, but with a declining exchange; holders hope for some improvement in this respect. Small arrivals from New York per steamers *Bushmills* and *Gleneagles*, but these do not increase very materially the present stock. Deliveries are good and there is apparently a fair demand for Oil in the interior.

QUOTATIONS.

| | |
|---|---|
| Chester | $1.67½ to 1.70 |
| Comet | 1.65 to 1.67½ |
| Devoe | 1.62½ to 1.65 |
| Russian | 1.57½ to 1.60 |

### SUGAR.

White Refined has been sold to a good extent at higher prices, while Browns are quiet at about former quotations. There have been considerable arrivals and the total stock is about 100,000 piculs.

| | |
|---|---|
| | PER PICUL. |
| White Refined | 4.25 to 7.25 |
| Brown Takao | $3 80 to 3.85 |
| Brown Daitong | 3.10 to 3.75 |
| Brown Canton | 4.70 to 5.70 |
| Brown Java and Penang | 4.50 to 5.50 |

## EXPORTS.

### RAW SILK.

Our last issue was of the 6th inst., since which date settlements on this Market amount to 373 piculs, divided thus:—*Hanks*, 62; *Filatures*, 130; *Re-reels*, 123; *Kakeda*, 53; *Oshu*, 5. There have been no direct shipments during the week, so that the total business stands as above at 373 piculs.

Market has continued strong, sellers pushing prices up daily. Against this rise in dollar quotations, exchange has declined about 1½ per cent. but not nearly sufficient to compensate for the increased first cost of silk. The number of holders who refuse to sell at any price increases daily.

Telegraphic information from abroad does not seem to warrant this state of things, but holders and dealers here are apparently very confident that prices will rise yet further. During the week our Chinese New Year Holidays have practically made business a dead letter, and our quotations are in some instances, more or less, nominal with holders very strong indeed. In fact, if buyers should offer to take some silk at present quotations, sellers would immediately back out and ask higher figures.

In spite of the holidays, settlements have not ceased altogether, there being a few small purchases both for Europe and America. The situation is very difficult there are orders in town at 5 per cent. under present quotations, but there seems no chance at all of filling them or of buyers and sellers meeting half-way.

Arrivals from the interior are very light and the stock is down to 10,800 piculs.

There has only been one shipping opportunity during the week, the English mail steamer, *Verona*, on the 7th inst., taking 431 bales for France. The departure of this vessel brings the present export figures to 18,013 piculs against 32,950 piculs last year and 34,763 to the same date in 1889.

*Hanks.*—Only one transaction, a buyer taking about 100 native bales of *Shinshu Hanks*, good medium quality, at $495 per picul. Anything above No. 2½ in quality is held beyond all hope of business.

*Filatures.*—Some few small purchases at gradually advancing rates, No. 1 *Usen*, fine size, having notched $620; with *Mino*, Nos. 1-1½, at $605. The first sorting of *Turtle* Chop re-reels (so called Filatures) have been done at $600.

*Re-reels.*—These have advanced beyond all proportion, holders now asking $580 for silk equal to *Five Girl* chop. They sold a good sized parcel of *Turtle* chop at $577½, and are now refusing to go on at any price. Some *Bushu* re-reels, *Watarase* chop, have actually been done at $565.

*Kakeda.*—Small business in these, prices being forced up daily. *White Horse-head* was done on the 6th at $540 and has since been done in conjunction with *Daruma* at $560.

*Oshu.*—Several parcels have been sent to and fro, but very little has been weighed up. Prices are strong at last rates.

QUOTATIONS.

Export Raw Silk Tables to 12th Feb., 1891:—

| | | Season 1890-91. | 1889-90. | 1888-89. |
|---|---|---|---|---|
| | | Bales. | Bales. | Bales. |
| Europe | | 7,135 | 14,006 | 18,843 |
| America | | 10,430 | 18,535 | 15,715 |
| Total | Bales | 17,565 | 32,541 | 34,558 |
| | Piculs | 18,013 | 32,950 | 34,763 |
| | | Piculs. | Piculs. | Piculs. |
| Settlements and Direct Export from 1st July | | 20,000 | 34,300 | 34,700 |
| Stock, 12th February | | 10,800 | 2,700 | 6,300 |
| Available supplies to date | | 30,800 | 37,000 | 41,000 |

### WASTE SILK.

Small business; settlements are only 300 piculs, divided thus:—*Noshi*, 145; *Kibiso*, 145; and *Neri*, 10.

Buyers complain very loudly that they cannot find the qualities which they require, especially in *Noshi*. Some of them are turning their attention to *Kibiso*, but so far no very great sales are made. Quotations are unchanged, but more or less nominal in the absence of business. Buyers would gladly pay these prices if the quality were forthcoming.

The P. & O. steamer *Verona*, on the 7th instant, carried 236 bales for Europe, and the present export figures are now 22,033 piculs against 20,613 last year and 25,038 at the same date in 1889.

*Pierced Cocoons.*—No sales for export, and the Japanese are apparently beginning to use up the stock now of this market—50 piculs having been re-transferred to the interior for home consumption.

*Noshi.*—The business done has not been large for lack of the requisite quality. Some few parcels of *Oshu Tegara* have been taken at $120, a few bales of fine *Bushu* at $137 and a line of *Joshu* at $75. Beyond these transactions nothing has been done.

*Kibiso.*—A few small purchases in filatures at prices ranging from $100 to $115. In other kinds we note *Shinshu* at $55; *Mino* at $45 and *Joshu* at $32½.

*Mawata.*—No business at all; the quality on offer not being suitable for shipment.

*Neri.*—Only one transaction this week, a parcel having been done at $10, for the uncleaned stock.

QUOTATIONS.

| | | | |
|---|---|---|---|
| Pierced Cocoons—Good to Best | Nom. | — | |
| Noshi-ito—Filature, Best | | — | |
| Noshi-ito—Filature, Good | $135 | to | $140 |
| Noshi-ito—Filature, Medium | 125 | to | 130 |
| Noshi-ito—Oshiu, Good to Best | 130 | to | 145 |
| Noshi-ito—Shinshu, Best | | — | |
| Noshi-ito—Shinshu, Good | 100 | to | 110 |
| Noshi-ito—Shinshu, Medium | | — | |
| Noshi-ito—Bushu, Good to Best | 130 | to | 140 |
| Noshi-ito—Joshu, Best | 85 | to | 87½ |
| Noshi-ito—Joshu, Good | 77½ | to | 80 |
| Noshi-ito—Joshu, Ordinary | 70 | to | 75 |
| Kibiso—Filature, Best selected | 110 | to | 120 |
| Kibiso—Filature, Seconds | 100 | to | 105 |
| Kibiso—Oshu, Good to Best | | — | |
| Kibiso—Shinshu, Best | | — | |
| Kibiso—Shinshu, Seconds | 55 | to | 60 |
| Kibiso—Joshu, Good to Fair | 50 | to | 40 |
| Kibiso—Joshu, Middling to Common | 35 | to | 30 |
| Kibiso—Hachoji, Good | 45 | to | 40 |
| Kibiso—Hachoji, Medium to Low | 32½ | to | 27½ |
| Kibiso—Neri, Good to Common | 15 | to | 8 |
| Mawata—Good to Best | 180 | to | 190 |

Export Table Waste Silk to 12th Feb., 1891:—

| | Season 1890-91. | 1889-90. | 1888-89. |
|---|---|---|---|
| | Piculs. | Piculs. | Piculs. |
| Waste Silk | 20,746 | 18,423 | 22,560 |
| Pierced Cocoons | 1,287 | 2,190 | 2,478 |
| | 22,033 | 20,613 | 25,038 |
| | Piculs. | Piculs. | Piculs. |
| Settlements and Direct Export from 1st July | 24,750 | 22,300 | 27,100 |
| Stock, 12th February | 5,800 | 9,700 | 5,300 |
| Available supplies to date | 30,550 | 32,000 | 32,400 |

*Exchange* has declined in sympathy with the fall in silver at home. Present quotations are:—London, 4m/s. Credits, 3/4⅜; Documents, 3/4½; 6m/s. Credits, 3/4⅝; Documents, 3/4¾; New York, 30 d/s. U.S. $81½; 4 m/s. U.S. $82¼; Paris, 4m/s. fcs. 4.26; 6m/s. fcs. 4.28.

Estimated Silk Stock, 12th February, 1891:—

| Raw. | Piculs. | Waste. | Piculs. |
|---|---|---|---|
| Hanks | 230 | Cocoons | 350 |
| Filatures | 6,400 | Noshi-ito | 1,180 |
| Re-reels | 3,600 | Kibiso | 3,770 |
| Kakeda | 400 | Mawata | 170 |
| Oshu | 160 | Sundries | 330 |
| Taysaam Kinds | 10 | | |
| Total piculs | 10,800 | Total piculs | 5,800 |

### TEA.

A very small retail business in the lower grades, but the season is practically defunct. Stock now is reduced to less than 1,500 piculs; all undesirable leaf.

## EXCHANGE.

Exchange has fluctuated, and during the last few days has seen several successive falls.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).
LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." 1y. June 28, 1890.

KEATING'S COUGH LOZENGES.

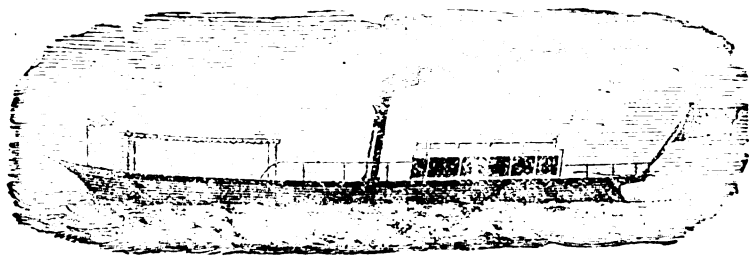
COUGHS, ASTHMA, BRONCHITIS, DIFFICULTY OF BREATHING are speedily cured by KEATING'S COUGH LOZENGES (recognised and recommended by the Medical Faculty). No other remedy is half so effective. One Lozenge alone gives relief. They contain no Opium, Morphia, nor any violent drug, and may be taken by the most delicate. One or two at bed-time ensure rest when troubled by the throat. Sold by all Chemists, in Small Tins. Dec. 27th, 1890.—21ins.

THE GREATEST WONDER OF MODERN TIMES.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."



SIMPLE, SAFE, AND CERTAIN!

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

MR. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

YARROW'S

SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

MACHINERY CONSTRUCTED FOR BOATS BUILT ABROAD.

YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition.

"FAIS CE QUE DOIS: ADVIENNE QUE POURRA!"

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, FEB. 21, 1891.

## *SUMMARY OF NEWS.*

MR. YOSHIKAWA, Minister of State for Education, suffers at present from influenza.

H.E. PRINCE SANJO, Lord Keeper of the Privy Seal, died of inflammation of the lungs, consequent on an attack of influenza, on the 18th instant.

IMPORTANT speeches were delivered in the House of Representatives on the 16th instant by the Minister President of State and the Minister of State for Finance.

THE Matsusaka Tramway Company, which has been established by residents of Matsusaka, Ise, proposes to construct a tramway between Matsusaka and Tsujihara (9 miles).

AN ordinary meeting of the Cabinet was held on the 17th instant, and attended by Counts Yamagata, Saigo, Oyama, Goto, and Matsukata, Viscount Kabayama, and Mr. Mutsu.

MR. TEKAO HISASHI, President of the Tokyo Physical School, has issued invitations to the graduation ceremony of the institution, which will take place on the 22nd instant.

THE new buildings of the Osaka Chamber of Commerce, which had been in course of construction at Hamadori, Nichome, Dogashima, Kitaku, Osaka, were completed on the 12th instant.

DURING the month of January last 1,198 applications for patents were made to the Patents Bureau, and 1,259 were granted, for which fees to the amount of *yen* 1,265.60 were received. The above shows a decrease of 326 applications, of 1,008 patents granted, and of *yen* 539.70 in fees as compared with the previous month.

MR. N. NABESHIMA, a son of Marquis Nabeshima, who intends to leave Japan shortly for England to prosecute his studies, was entertained by a number of his friends on the 15th instant at the Sanyen-tei, Shiba.

THE graduation ceremony of the Marine Products School will take place on the 22nd instant. His Imperial Highness Prince Komatsu Akihito, President of the Japan Marine Products Society, will, it is expected, attend the meeting.

THE work of constructing the new buildings of the Higher Commercial School, the contract for which was obtained by the Nippon Doboku Kaisha, the cost being *yen* 14,000, has been commenced at Hitotsubashi, Kanda.

EARLY in the morning of the 11th instant an outbreak of fire took place in a house at Amatsu-cho, Nagasagori, Awanokuni, Chiba Prefecture, and destroyed 136 houses, 3 houses being partly damaged before the flames could be got under control.

A MEETING of officials of the Sanitary Bureau in the Home Department was held on the 18th instant to discuss matters in reference to the compilation of regulations for the use of Dr. Koch's remedy, as samples of the lymph are expected to arrive in Japan shortly.

A MEETING of the Privy Council was held on the 17th instant, at which Counts Terashima, Yanagiwara, and Soyeshima, and Viscounts Sano, Yoshida, and Enomoto were present. The proceedings lasted from 11 in the forenoon till a little past 3 in the afternoon.

SUZUKI IKUZO and Shimizu Shinkichi, residing in Yokohama, who were arrested some time ago on a charge of having counterfeited 10 *sen* silver coins, were found guilty and sentenced on the 14th instant in the Tokyo District Court to thirteen years' imprisonment with hard labour.

FIRE broke out on the night of the 14th instant in the house of Sugiyama Heijiro, Haramachi, Suntogori, Suruga, destroying 36 houses, and 2 telegraph posts before the flames could be subdued. On the following night 29 houses and 2 telegraph posts were burned at Mishima-cho, Kimizawagori, Izu.

H.I.H. PRINCE KOMATSU AKIHITO and Princess Yoriko, who had been absent for some time on a tour through Shizuoka Prefecture, returned to the capital on the 16th instant. On the same day H.I.H. Prince Kitashirakawa Yoshihisa arrived in the capital from Atami, where he had been staying for some time.

MESSRS. KONISHI SHIRO and Konishi Goro, of Hamamatsucho, Shikichigori, and Takamori, of Tenomura, Nagakamigori, Shizuoka Prefecture, have found a gold vein among the hills of Shuchigori in that prefecture, and have applied to the Authorities for permission to make experimental essays in mining.

THE former Chinese Minister left the capital for home on the 14th instant, starting from the Shimbashi Station by the 10.45 a.m. train. A number of distinguished persons accompanied him to the station, among whom were Counts Yamagata, Matsukata, and Oyama, and Viscounts Aoki and Hijikata, Ministers of State, Counts Terashima, Soyeshima, and Yoshii, Privy Councillors, and several of the Foreign Representatives.

MESSRS. FUJITA, a Private Secretary of the Minister of State for Communications, and Indo Marumitsu, Assistant Director of the Postal Bureau in the Communications Department, who had been ordered to proceed to Austria to attend the Postal Congress to be held at Vienna in May next, will, it is expected, leave Japan about the end of next month.

A FAREWELL entertainment was given on the night of the 13th instant at the Sanomo, Otamachi, Yokohama, by Messrs. Asada, Governor of Kanagawa, Tamura, Secretary, and Mitsuhashi, Councillor of Kanagawa Prefecture, Arishima, Superintendent of the Yokohama Custom House, and several other officials of various Government offices in Yokohama, to Mr. Okamura, the former President of the Yokohama Law Courts.

FIRE broke out on the night of the 11th instant in the house of Oka Torakichi, No. 84, Sattemachi, Kita-katsushikagori, Saitama Prefecture, destroying 10 dwellings before the flames could be subdued. On the same night an outbreak of fire took place in the house of Hasegawa Heisaku, Fuchimura, Yenagori, Gifu Prefecture. The flames were confined to the buildings where they originated, but one man was burned to death.

A SHOCK of earthquake was experienced in the capital on the 13th instant, at 6h. 30m. a.m. The duration was 2 minutes and 50 seconds, and the direction from S.E. to N.W., the maximum horizontal motion being 0.5 milimètre in 1.4 second. The shock was a sharp one. A severe shock was felt at 6h. 56m. 20s. a.m. The duration was 2 minutes, and the direction was from S.E. to N.W., the maximum horizontal motion being 0.5 milimètre in 1.1 second.

AN ordinary meeting of the Cabinet was held on the afternoon of the 13th instant, and was attended by Counts Yamagata, Oyama, Yamada, Saigo, and Matsukata, Viscounts Kabayama and Aoki, and Mr. Mutsu. The proceedings lasted till a little past 5 p.m. Lieutenant-General Katsura, Vice-Minister of the War Department, Mr. Magaki, a Private Secretary of the Minister of State for Justice, and several other Secretaries of various Government Departments were also present at the meeting.

THERE is an improvement to note in the Import market. The total Yarn taken has been rather less than 500 bales, mostly English spinnings, and 5,000 pieces Shirtings and a few Italians have also been sold. The Metal trade is looking up a little, and there has been a fair amount of sales at better prices, with further enquiry at the close. Kerosene has been sold in considerable quantities, and prices tend upwards. There has been a continuation of the late demand for Sugar (Whites), and Browns will probably soon be in request. There has been some demand for Silk, and 1,000 piculs, not including a small direct shipment, is the business of the week. Prices have been somewhat irregular, but every opportunity has been taken by holders to push up values. The stock has been brought below 10,000 piculs. Waste Silk has been in better request, at full rates, but the assortment is showing signs of becoming impoverished, the stock being reduced to 5,000 piculs. Tea is now finished. Exchange has declined all the week till yesterday, when a slight recovery took place.

Digitized by Google

## *EDITORIAL NOTES.*

### EXISTENCE OR NON-EXISTENCE.

It is beginning to be possible to see daylight in the debates of the Lower House on the Budget. The House has practically reached to the end of the Expenditure side of the Budget. The Revenue side, however, remains to be debated, and there is some difficulty in predicting what that process may involve. The House has to determine what changes should be made in the Revenue to balance the sweeping reductions of Expenditure already voted. A month or two back, one might have expected tolerable unanimity in this matter. The talk at that time was all in favour of lightening the Land Tax. But public opinion has begun to think seriously about the Land Tax, and some valuable essays and articles recently published must have produced an effect inside the Diet as they certainly have outside. Possibly, therefore, an interesting and not unequal discussion may take place with reference to this important item of Revenue. Be this as it may, however, the debate on the Revenue side cannot possibly begin before the 22nd instant, and if the Budget reaches the House of Peers by the 25th or 26th, its last stages in the Lower House will have been much more rapid than its previous history justifies us in expecting. Arrived in the Upper House, it has to be submitted to a Committee, and we cannot expect that the Committee will finish the examination and compile a Report in less than seven days. This would bring us to March 5th. The Constitutional period of the Diet's session terminates, however, on March 1st (Sunday). It appears, therefore, that unless the session is prolonged there is not the least chance of the Budget's passing through the House of Peers. In other words, it will not come into existence, and the Government, according to the Constitution, will have to carry out the Budget of the preceding year. The general opinion at present is that there will be a prolongation. A week was lost owing to the burning of the parliamentary buildings, and a week's unexpected delay was entailed by the failure of the Budget Committee in the House of Representatives to prepare its Report within the prescribed period of fifteen days. Possibly the Government, taking both of these points into consideration, may agree to prolong the session for a fortnight, namely, until March 15th. In that case the House of Peers, supposing that its Committee reports by March 5th, would have eight days to debate and pass the whole Budget. Can it accomplish such a task? Possibly, Even if it does, however, there remains the difficulty that unless it accepts all the amendments of the Lower House without cavil, a conference of the Houses, a re-adjustment of the Budget, and finally its re-voting by each House will be necessary. On the whole, therefore, the chances seem to be entirely against the Budget's coming into existence. The Lower House has talked away its opportunity.

### DR. KOCH AND JAPAN.

Dr. Hamano Noboru, a Japanese physician of eminence, may congratulate himself on having been the first to obtain a grant of money from the House of Representatives. A man of decidedly progressive tendencies, the Doctor believes in keeping his country's medical science as far as possible abreast of Western research, and like everybody else he has doubtless been greatly struck by the wonderful discovery of Dr. Koch. Accordingly he asked the House to add a sum of ten thousand *yen* to the appropriation on account of medical students sent abroad by the Educational Department, in order that steps might be taken to obtain practical knowledge of the methods now creating so much excitement in Europe and America. The House agreed, and as there is not the least question that the Government, which really leads progress in Japan, will gladly endorse the recommendation, we may presume that three or four Japanese physicians will soon wend their way to Germany. Possibly some critics will say that Japan might well have rested on her oars for a season in this matter, since the Koch discovery can scarcely yet be said to have reached a really practical stage. But we can scarcely imagine any medical fraternity able to restrain its impatience in such a matter. Koch has sworn to hold his peace until he shall have put the finishing touches to his work, years hence, perhaps; but meanwhile men like Morell MacKenzie do not hesitate to write:—"Possibilities of the utmost benefit to humanity are in view, for after a time we may not only be able to cure consumption, but to prevent it in the way vaccination protects against small-pox. Dr. Koch has succeeded in making guinea-pigs invulnerable to tubercle, and this happy result may yet be attained by him in the case of man."

### JUDGE HANNEN.

The promotion that takes Judge Hannen to Shanghai will deprive Yokohama of a man whom this community has learned to regard with affection and respect In an official capacity Judge Hannen's record is worthy of the service to which he has the honour to belong, and as an individual he has made well deserved and firm friendships. That he leaves us to fill the highest judicial post attainable by an Englishman in his branch of the service, must be our consolation for the heavy loss that Yokohama society will suffer by his departure. It is to be regretted, however, that Her Majesty's Government should have chosen this occasion to carry out an economy of doubtful benefit, namely, the amalgamation of the duties of Chief Justice and Consul-General in Shanghai. The prizes attainable by members of the Consular Service in the East are few, and at the head of the list stood the Consul-Generalship in Shanghai. It may be that the duties attaching to the office were not of a very arduous nature, but in view of the peculiar position occupied by the municipality of Shanghai, and the nature of its relations with the Chinese Authorities, there can be little doubt as to the advantage of having a Consul-General to act as a channel of communication and as a representative generally. We may assume that the course adopted by the British Government in this instance is founded on precedents such as that of the Judge and Consul-General at Constantinople, and that the question of salary has also been affected by similar considerations. Under ordinary circumstances, when the duties of one office are added to those of another, an increase, not a reduction, of the emoluments attached to the latter might be expected. But whereas the salary of the Chief Justice in Shanghai has hitherto been £2,500 annually, and the salary of the Consul-General £1,500, the pay of the united posts is henceforth to be £2,000 only. A yearly saving of £2,000 is thus accomplished, but whether the loss in other directions will not outbalance the pecuniary gain is exceedingly problematical. At all events, the first occupant of the united positions is, in one sense, to be commiserated with, since the unpopularity of the economical measure by which he is no small sufferer, will probably extend in some slight degree to himself.

### THE TERRIBLE IDEOGRAPH.

An ideograph is a formidable looking affair to eyes not accustomed to such a species of caligraphy. It has an imposing as well as a convincing effect. A few ideographs scattered through a leading article in English, convey an excellent impression of the writer's scholarship, and exercise an awful influence on the minds of the uninitiated. But there are limits to the efficacy of the ideograph. It cannot, for example, cover the tracks of an editor who having for several days obediently copied the erroneous translation of a contemporary, tries to avoid the charge of plagiarism by going in for a mistranslation on his own account. It is a striking coincidence that so long as we made "Marquis Konoye" acting President of the House of Peers, our contemporary the *Japan Gazette* made him a Marquis also. And it is also a striking coincidence that so soon as we discovered our mistake and made him into a Prince, the *Japan Gazette* also abandoned the title of Marquis and adopted that of Duke. These, of course, are mere coincidences. But now comes the consummate strategy of the *Gazette*. Having converted the quondam Marquis into a Duke, it adds this footnote:—"(公爵) *Kôshaku*, not Prince, as the *Mail* has it.' Observe the subtlety of inserting the ideographs. Who will venture to deny that *Koshaku*, with these mystic hieroglyphs, can mean anything but Duke? Still there is one trouble about the scheme. No such title as "Duke" exists in the Japanese nobility. The Japanese Government decided years ago that 公 should be translated "Prince," and so it has been translated ever since. There are no Japanese "Dukes" outside the *Japan Gazette's* imagination, neither will this curious device obscure the force of the above coincidences. Sand is a poor covering for an ostrich's head, but in respect of shrouding capacities it beats an ideograph.

### THE NEW ADMIRAL.

Admiral Sir F. Richards, the successor of H.E. Sir Nowell Salmon in command of the China Squadron, arrived yesterday morning, says the *Singapore Free Press* of the 27th ult., per P. & O. steamer *Bengal* which came alongside the wharf at about 8 a.m. Sir Nowell Salmon was present to meet Sir F. Richards, and was attended by his flag-lieutenant and secretary. There were also in attendance on the wharf Capt. Massy, A.D.C., Capt. Clutterbuck, H.M.S. *Caroline*, Capt. Balfour, H.M.S. *Mercury*, Capt. Adair, H.M.S. *Alacrity*, and Commander Rason, H.M.S. *Plover*. Upon the gangway being placed in position Sir Nowell Salmon and the other naval officers proceeded on board to welcome the new Admiral. Sir F. Richards is accompanied by Lieut. Nicholson, his flag lieutenant, and his secretary, Mr. Carlisle. Yesterday was occupied by the usual ceremonies of the transfer of the China command; beginning with the hoisting of the flag of Sir F. Richards on board H.M.S. *Alacrity*. Sir Nowell Salmon hauled his flag down to-day at 8 A.M., from H.M.S. *Mercury*, that of the new Admiral aking its place. The usual salutes accompanied these proceedings.

### NEWSPAPER INTOLERANCE.

Some years ago we wrote an article showing how to gain notoriety and lose popularity in this quarter of the Orient. Summed up in a sentence, the method was to defend Japan's cause publicly, with whatever degree of unobtrusiveness. Mr. W. S. Liscomb has just furnished a practical verification of the soundness of our counsel. He ventured to write to the New York *Nation* showing that the celebrated anti-Revision meeting of last September was not quite so incontrovertibly convincing an affair as its promoters would have the world believe, and he was immediately assailed, on the one hand, with ferocious banter such as the *sans-culottes* were wont to address to the occupants of the tumbrils, and on the other by a display of clumsy insolence characteristic of a certain genus of writers when they believe themselves to be with the many against the one. Judged by its newspaper press, this Settlement would appear to be among the most tyrannically intolerant places under the sun. A man must either go with the crowd or be treated as a kind of moral pariah. How amusing it must all seem to the better class of residents, if they ever give themselves the trouble to think about the matter at all. For in point of fact there is no such intolerance. In social intercourse everybody is perfectly free to maintain his own opinions, and if he happens not to take his colour from the majority of his surroundings, he is neither reviled nor avoided. But the press would put him into the inquisition at once, and pelt him with all kinds of choice missiles until he abandons his independent attitude and slinks in among the multitude. There is no possibility of a man being anything but a simpleton or a knave in the eyes of our liberal and courteous local journals unless he echoes their own benevolent and gently-judging verdict about things and people Japanese. If he does echo it, however, let his

Digitized by Google

notes be ever so false in other respects, he is quoted and re-produced without a breath of criticism or a word of correction. Mr. Liscomb knows all about it now. He has run the gauntlet, and will be able to warn his friends against any similar exhibition of rashness.

### DIPLOMACY AS A MEANS OF NATIONAL DEFENCE.

THE *Kokumin-no-Tomo*, noting that the public opinion is tending more and more towards the augmentation of the Army and the Navy, observes that it is a grievous mistake to suppose, as some persons do, that military equipment is the only defence on which a country can rely for security from foreign invasion. So far as concerns an increase of the fighting power of the nation, the Tokyo journal would be the first to welcome such an undertaking, were the required funds forthcoming. There can be no doubt, it says, that the military equipment of a country is its last resort for defence. But such is the complexity of human affairs that it is not always necessary or even advisable to depend upon military equipment alone as a means of national defence. "Attention must be likewise paid to the pursuance of a wise policy in foreign intercourse; diplomacy and warlike preparations must always go hand in hand." Our contemporary illustrates the importance of diplomacy by referring to the interesting history of the so-called warlike ages in ancient China, and also to the history of the unification of modern Italy by the skilful foreign policy of Cavour. Turning to the modern annals of Japan, the *Kokumin* observes that the Tokugawa Government maintained exceptionally close relations with France, from which it took its military as well as naval models. After the Restoration, the new Government found itself for some years under the influence of the late Sir Harry S. Parkes, and England stepped into the position which had previously been occupied by France. In 1882, Count Ito visited Europe to collect materials for the compilation of a Constitution, and since then Germany has dislodged England from her leading position in Japan. The *Kokumin-no-Tomo* does not seem to think favourably of this last change in the foreign policy of the country. What, it asks, is the position of Germany in the East? "Her territory is not, like that of Russia, contiguous to Japan. She is not, like England, a great Power in Asia. Neither is she, like the United States, connected with this country by close relations of commerce and social intercourse. The only results of choosing her as a new ally have been to make England cold to Japan, to cause France to recall her officers from the service of the Japanese army as well as to shut the doors of her military academies against Japanese cadets, and to make America to lose much of her sympathy with this Empire." Further, the *Kokumin* fails to notice any definite plan in the foreign policy of the country during the past two decades. Want of consistency is especially notworthy, it avers, in the policy pursued by the *Meiji* Government towards China and Korea. Our contemporary then compares the daring and resolute manner in which Japan behaved in the Formosan, Ryukyu, and Korean questions, with her irresolute and timid attitude towards China and Korea. In conclusion the Tokyo journal observes that the blame is not to be laid wholly at the door of the Government, but that the people at large are also open to censure. They have hitherto attached too exclusive an importance to the question of Treaty Revision. The revision of the treaties is of course very important. but men ought not to forget that there are other equally important questions in the foreign affairs of the country. The *Kokumin* warns the Government and the people alike that, in order to settle these questions in a proper manner, a wise and sound policy in the diplomacy of the country is as important as military preparations.

### THE LAST SHUFFLE.

THAT the *Japan Gazette* would fail to establish any one of the statements advanced by it in support of its charge against the Minister of State for Foreign Affairs. was certain from the outset. Perhaps, too, experience should have prepared us for the course pursued by the *Gazette* at this final stage of the controversy. Still, we confess that we were sanguine enough to look for some slight evidence of straightforwardness; sanguine enough to expect that our contemporary would either honestly try to re-establish the discredited grounds of its accusation, or would confess that it had blundered. When a newspaper openly charges a man with double dealing and disloyalty; when, in support of the charge, it puts forward three pieces of testimony, every one of which is proved to be a misconception of its own, we know of no code of honesty, however rudimentary, which justifies it in allowing the matter to drop. Such a course could only be called evasive and pusillanimous. But when, not even possessing the decency to take refuge in silence, though leaving the original charges unretracted and their bases unestablished, it endeavours to re-habilitate its credit and thereby to obtain vicarious credence for its slanderous accusations, by diverting the issue to points which, whether established or refuted, in no wise affect the original question, its conduct seems to us to deserve epithets not often put upon paper. It may be, however, that the new *Japan Gazette's* methods are attributable to pure carelessness, or perhaps inability to retain any grasp of the threads of a discussion. We prefer to adopt the most lenient view. The *Japan Gazette* says:—"Are the readers of our contemporary simple enough to believe that when all the leading journals interpret Viscount Aoki's action one way and the *Mail* another that (*sic*) the *Mail* is likely to be right and the vernacular press wrong." We are compelled to say that a falser and more misleading assertion than this was never put upon paper. There can be no mistake about its object. It seeks to persuade the public that the *Japan Gazette's* account of the occurrences in the House of Representatives on the 17th of December is consistent with the accounts contained in all the leading vernacular journals, and that the *Japan Mail's* account is inconsistent. Now there is not one Japanese newspaper, not so much as one, great or small, among those published in Tokyo, that in the remotest degree substantiates the *Japan Gazette's* account. There is not so much as one Japanese journal, great or small, in the capital, which, in its report of the proceedings in the House of Representatives on December 17th, gives the most shadowy ground for any one of the four following assertions of the *Japan Gazette*, or for anything resembling them:—(1) that Viscount Aoki in his speech denied the existence of any connection between the Commercial Code and Treaty Revision; (2) that a commotion was produced in the House by this denial of Viscount Aoki's; (3) that a visitor, alluding to Viscount Aoki's denial, cried out "do not treat members with disrespect"; and (4) that "the Diet was certainly of opinion that the connection of the Commercial Code with Treaty Revision had been misrepresented by the Minister, and that a serious attempt to deceive the House had been perpetrated." Every one of these four assertions are absolute fictions, evolved by the *Japan Gazette* either by some extraordinary process of blundering, or out of its own imagination. Is it possible to put the matter more plainly? Here are the *Japan Gazette's* assertions. Instead of vaunting the scholarship of its editor; instead of falsely pretending that the *Japan Mail* has asserted the existence of "a wide discrepancy between the parliamentary reports of the *Kwampo* and those of the leading papers;" instead of taking refuge in the wretched subterfuge that the foreign public's general ignorance of Japanese affairs is being imposed on, cannot the *Japan Gazette* fairly and squarely meet the issue by translating, from the *Official Gazette* or any leading Japanese journal such portions of the report of the Diet's proceedings as bear out the above four statements? This discussion is unique in our journalistic experience—unique in the wonderful resolution of the *Japan Gazette* to shirk the responsibility of its own statements, to refrain from laying before the public the proofs of which it alleges the existence, and, by recourse to subterfuges and irrelevant issues, to hide from its readers the plain truth, namely that it has uttered a gross libel for which it cannot offer a shred of testimony.

### MR. THOMAS JACKSON.

LAST evening, says the *Hongkong Daily Press* of the 3rd instant, a farewell dinner was given at the Hongkong and Shanghai Bank by the staff to Mr. Thos. Jackson, who is about to leave for home. A number of guests were invited, covers being laid for fifty in all. The interior of the Bank had been tastefully decorated. At one end of the room appeared a huge monogram of the initials of the Bank, with the Bank flag in silk above it. Facing this at the opposite end were the initials "T. J." with the Irish flag, also of silk, above it, the whole being blue cloth. Each of the panels was decorated with a shamrock and a harp alternately. The embroidery work was done by the inmates of the Italian Convent, while the whole work of decorating was carried out by Mr. W. S. Marten, who was warmly congratulated by the staff on the pretty and effective display he made. The Band of the A. & S. Highlanders was in attendance, and played various selections throughout the evening.

### A PROOF.

SAYS the *Mainichi Shimbun* of on Wednesday: "We are really very sorry for the Electric Light Company, but on the 16th instant, when the architect, Mr. Yoshii, was inspecting the ground preparatory to the rebuilding of the Houses of Parliament, he took occasion to examine the warehouses, which were not destroyed by the fire. He found that the only change in the condition of the warehouses was in the part where the electric wire had passed, inside the plaster, and this was blackened and charred. It is perfectly plain that such a condition could not have been caused by anything but the heating of the electric wires." This is certainly not the least mysterious statement among the many published on the subject.

### THE DIET.

THE Report of the Budget Committee met with its first reverse on Saturday, in connection with the vote on the appropriations for the Educational Department. The Committee had recommended the complete withdrawal of State aid from the Upper Middle Schools, the Female Normal School and the School of Music, and a large reduction of the sum set down for the Deaf and Dumb School. Strong opposition was, however, raised by the Radical numbers themselves when the question came up for debate. No one, indeed, had a word to say in behalf of the Deaf and Dumb School, but several speeches were delivered in opposition to the recommendation as to other Schools. The Committee, in reply to questions addressed to it during the interrogatory stage of the Bill's passage, replied that no thought had been taken about the future of the schools in the event of State aid being withdrawn from them, and this admission of inconsiderate treatment probably influenced the House unfavourably. Accordingly, the Budget Committee's Report was rejected in respect of the clause of the Estimates including these appropriations, and, all the other amendments before the House having also been rejected, one might have expected, in the ordinary course of things, that the Budget itself would have been passed. But the majority in the House of Representatives, as at present disposed, will do anything rather than approve any portion of the Budget in its Government form. Accordingly, this portion of the Budget also was thrown out. In such an event, when both the orginal Bill and the amendments to it have been rejected, it is provided by law that if the House desires not to dismiss the question altogether, a Special Committee may be appointed to prepare another scheme. That course was accordingly adopted.

### SENTIMENTAL LEGISLATION.

THE temper of the House of Representatives towards the Government, and towards all measures emanating from the latter, was strikingly

Digitized by Google

illustrated on Tuesday. The business before the House was to debate the extraordinary expenditures of the various Departments of State. In almost every instance the Committee's Report suggested reductions, but in one section such was not the case. The President accordingly announced that he should take the sense of the House in respect of the Budget itself so far as concerned that section. But the majority would not hear of any such course. They were determined not to vote for the Budget in any shape or form, so they insisted on recording their opinion in favour of the Committee's Report, though it made no change whatever in the original figures. This would be veritable child's play if the House were really dealing with the question of finance in a financial spirit. But since it happens to have taken the Budget simply as a weapon to attack the Government, it is treating the estimates on the time-honoured principle that any stick will do to beat a dog. The figures are nothing as figures, but everything as a vehicle for exhibiting the Opposition's hostility to the powers that be. No intelligent discrimination has been shown in dealing with the appropriations. A signal proof of this was furnished when Mr. Noda, Delegate for the War Office, complained that the Committee had recommended a reduction of the construction expenditure of the Department, without asking any questions or even desiring to be shown the drawings and estimates of the buildings concerned. Such damning evidence of reckless reduction might have been expected to confound the Committee and convince the House. But no: a member of the Committee coolly explained that a general principle of cutting down construction expenses by twenty per cent. had been adopted by the Committee, and that the War Department had come in for its share of indiscriminate lopping in due turn. Such procedure merely puts the House in the wrong and the Government in the right.

### TREATY REVISION IN THE HOUSE OF REPRESENTATIVES.

THE following Representation to the Government by the House of Representatives has been handed in for debate, the mover being Mr. Kanmuchi Tomotsune, one of the members for Kyoto City:—"Whereas, the Treaties now in force, by which the authority of the Legislature and of the Executive cannot be put into operation without the concurrence of foreign Governments, violate the sovereign rights of the Empire and injure its fiscal administration and economic system in the most extreme degree; and whereas, having regard to the actual condition of national industry and financial administration, an increase of import duties is a measure of very urgent necessity; and whereas, the Treaties now in force, by which foreigners residing in the Empire are exempted from the operation of the national laws and permitted to have recourse to Consular Tribunals in civil suits, violate the sovereign rights of the Empire in the most extreme degree; and whereas, to admit foreigners to participation in the coastwise carrying trade would injure the development of the national mercantile marine in the most extreme degree: therefore, this House earnestly desires, with respect to the negotiations now actually in progress for Treaty Revision, that the Government will take steps for the immediate recovery of this Empire's sovereign power in relation to its legislative and executive exercise in Tariff affairs, and for the immediate imposition of such an increase of import duties as may be suited to the actual circumstances of the country's financial administration and industrial progress. Further, this House earnestly desires, with respect to the negotiations now actually in progress for Treaty Revision, that although, as explained by Viscount Aoki, Minister of State for Foreign Affairs, in his speech in this House, it may be unavoidably necessary, in pursuance of the idea of offering the various laws as guarantees to the peoples of Foreign States, to agree to a delay of some years in order to await the complete operation of those laws, the Government will make it an essential object that foreigners residing in this country shall be brought entirely under its jurisdiction, and that Consular Courts may be abolished. Further, this House earnestly desires, with respect to the negotiations now actually in progress for Treaty Revision, that the Government will arrange that there shall be no doubt whatsoever as to foreigners being forbidden to take any share in the coast-wise carrying trade. The above points, being of the gravest national importance, have been the objects of the people's ardent hope for many years. Believing that the Government will distinctly endorse the views of this House, the present Representation is made."

* * *

There can be little doubt, we imagine, that the House will adopt the above Representation. It has evidently been prepared with great care, and after full consultation among the members. We submit it to our readers, who will not fail to appreciate its importance, and we shall take an early opportunity of commenting on it.

### THE MINISTER PRESIDENT'S SPEECH IN THE HOUSE OF REPRESENTATIVES.

ON Monday was a noteworthy day in the history of the first Japanese House of Representatives. The whole Cabinet came down to the House at the commencement of the afternoon session, and Count Yamagata, Minister President, delivered the following speech, which we submit to our readers without comment:—

GENTLEMEN,—In the early days of your House's session, I had the honour to make a brief statement of the Government's domestic and Foreign policy, and subsequently I told you the view entertained by the Government with regard to the 67th and the 54th Articles of the Constitution. I now desire again to speak a few earnest words to you, begging that you will give them your thought and attention.

In what does the government of the country consist, and in the practical work of administration what objects must be kept in view? It is of these things that I would speak to you.

It may seem unnecessary to allude now to the fact that ever since the Centralization of the Government, a fixed and changeless programme has been followed in administering the affairs of the Empire. Since, however, the policy and aim of the Government have been directed in the past and will be directed in the future uniquely to giving practical effect to that programme, it is essential that you should be informed clearly as to the ends which the Government has in prospect.

Ever since the policy of opening the country was inaugurated in accordance with the Imperial Rescript at the Restoration, the aim of the administration has been to adopt the cardinal features of civilization, to develop military resources, to further education, to reform the various branches of the State polity, to correct the evil usages of other times, to increase the prosperity and happiness of the people at home, to cement friendly relations, and to place the Empire on terms of equal intercourse, with other countries. For the consummation of these, the true aims of the Administration, high and low have been unanimous in hoping.

Looking back to-day with profound respect at the various Rescripts issued by the Emperor since His Majesty ascended the Throne, from the Imperial Edict at the time of the Restoration down to the Message that convoked the Diet, numerous as they are it is found that, from first to last, they are permeated by the gracious purpose of securing peace and tranquillity to the people at home, and enhancing the reputation of the country abroad.

It being then the principle of His Majesty's wise rule thus to raise the national dignity and place the country on terms of equality with other States, and this being the fixed policy of the administration, our predecessors in the Government reverentially kept that purpose in view, and by painful efforts, sustained through the long course of over twenty years, succeeded in reaching fairly satisfactory results as to the various branches of domestic administration. But in respect of establishing the rights of the State in its foreign relations, unfortunately no appreciable success had yet been attained when my colleagues and myself came into office.

Profiting by and pursuing the work planned by our predecessors, we have not abandoned their cherished aim, but, encountering each difficulty with redoubled resolution, have made it our object to preserve inviolate and unchanged their administrative policy and to carry it towards achievement. The still incomplete condition of the national autonomy is, however, a heritage handed down to us from the treaties of the Bakufu, and to recover that autonomy in a day is a task beyond our power to accomplish. It must be attained by gradual steps along the right route, and we are fully persuaded that you, gentlemen, loyally and honestly share our sentiments in this matter.

If we look carefully at the conditions existing in the world, we find that a country can maintain its independence and autonomy among the nations only by the prosperity of its people and the power of its armaments. Without strength sufficient to preserve and assert the national rights, there can be no hope of enjoying friendly, close, and absolutely unsubmissive intercourse with foreign States. Turning from the immense armaments of the modern Occident to the condition of the Orient, we find nothing to warrant us in neglecting the development of our Army and Navy. If again we seek to place the country on an equal footing with civilized States, we must enter their comity and join them in the mutual preservation of rights; a task which requires that, equally with them, we must undertake the duties properly devolving on us. What are those duties? To obey a fixed policy of government; to perfect all the branches of the administration; to make ourselves worthy of the respect of other countries, and to maintain our prestige. If our policy of government is to be preserved, that these duties must be discharged is beyond dispute. Strength to maintain the country's rights must be nurtured, and sooner or later, as the opportunity presents itself, must be utilized.

Nearly eighty days have elapsed since the Diet was opened. You have been holding debates; you have attended many sittings; by your diligence business has made great progress; there are few subjects of domestic or foreign policy that have not come before you and elicited expressions of opinion. Reviewing the cardinal features of your debates up to the present, it appears that your thoughts have been chiefly fixed upon reducing the administrative expenditure. To effect economies in that direction has always been the Government's policy. Month by month and year by year all sorts of devices for retrenchment have been essayed. Even expenses that were not superfluous have been cut down. To the utmost limits compatible with efficiency economy has been carried. Hereafter also the Government will spare no effort to achieve that object. But when there is question of applying excessive reduction to expenditures absolutely needed, in accordance with a fixed administrative policy, for the purpose of asserting and fully establishing the national rights abroad; of continuing, in domestic affairs, to tread towards their goal the routes already opened; of nurturing strength to guard the prestige of the State, and of developing the prosperity of the people, my colleagues and I cannot but be pained by the thought of running counter to aims that have hitherto guided the practical administration of the State's affairs. Unfortunately, however, it seems as though the Budget were about to undergo such amendments at the hands of a majority of your House, as will leave only a sum plainly insufficient for administrative requirements. I need not enter into particulars; they will be given to you by the Minister of State for Finance. More especially, in the case of items which, according to the Constitution, cannot be touched without the Government's concurrence, the course pursued by your House in rejecting and reducing them according to your own decisions, cannot bear any fruit. These are points concerning which it is not possible for us to remain silent. That people who, by the virtue of a high mandate, have come to live under representative institutions, should, at the same time, simply for the sake of economising administrative expenses, turn back upon a fixed and changeless policy of government, adopt a course inimical to the development of the national resources at home, destructive of the country's prestige abroad, and opposed to the permanent interests of the State, is something to which we, the Government, cannot possibly consent. Gentlemen, you know the fixed policy of the administration, and are well acquainted with the necessity of establishing the country's rights. I trust that you will appreciate the unavoidable nature of the expenditure required for those purposes.

### COUNT MATSUKATA'S SPEECH.

THE following is a translation of Count Matsukata's speech in the House of Representatives on the 16th instant:—

GENTLEMEN,—At the commencement of your debate on the report of the Budget Committee, I told you that the Government could not concur in the recommendations of the Committee. Appearances indicate, however, that the Committee's Report is on the point of receiving the approval of a majority of the House. I would therefore beg

Digitized by Google

your attention to a few words which I have to say to you in the sequel of the Minister-President's speech. The Report applies to the Budget a total reduction of about eight million *yen*, the major part of which is in the item of salaries. The Committee has resorted to reforms of the administrative organization as the chief means of diminishing public expenditure, and has consequently embodied a draft of proposed reforms in its Report. Now the Budget represents the estimate formed by the Government of the expenditure and revenue of the next fiscal year, and that estimate, having obtained the consent of the Diet, becomes the fixed basis of financial administration. Upon the Government devolve the duties of preparing and carrying it out. The Diet occupies towards the Budget the position of an overseer. Under these circumstances, can it be said that to interfere directly with the administrative organization, and to settle that organization, falls properly within the functions of the Diet in connection with the Budget? Further the recommendations of the Report conflict in many respects with the provisions of laws now actually in force. For example, the proposed reduction of the salaries of the Presidents of the two Houses of the Diet, the inclusion in the general revenue of money raised for Consolidated Bonds, the transfer to special revenue of monies set apart for the Famine Relief Fund, and of the interest on deposits—all these are measures which, though voted by you, can have no practical effect unless the laws on which they are based be previously altered. Turning to the reductions of salaries recommended by the Committee, it appears that not only the pay of the Army and Navy has been cut down, but also the total emoluments of officials in the various Departments of State have undergone a reduction of over thirty per cent. If the salaries of officials be altered in the sense of the draft of organization reforms, they must be cut down to the extent of forty, fifty, or even sixty per cent. Can this be called anything but a violent alteration? With regard to office expenses, which have undergone the largest reduction after salaries, they depend obviously on the number of persons employed and the amount of business to be done, and unless both the staff and the duties can be summarily reduced, such a diminution of expenses as the Report recommends is impossible. Still, the Government's great aim being to cut off all superfluous expenditure, it would make every effort to endorse your decision within the limits of administrative efficiency. But inasmuch as the measures of retrenchment now debated by you involve reductions and rejections that exceed the bounds of moderation and propriety, they cannot receive the Government's approval. The 24th fiscal year is close at hand. It is perfectly plain that the time required to make full preparations for carrying out the suggestions of your Committee is not available.

Gentlemen, the Diet of this year is the first step in the establishment of constitutional institution in the Orient. The results of the opening of the Diet will greatly affect the Empire's fair fame. The Government sincerely hopes, with your due and earnest concurrence, to attain a complete and creditable issue. If by any chance an ill-advised Bill is adopted, it will be the unavoidable duty of the Government, as directed by the Constitution, to announce its dissent and adopt suitable measures in consequence. My colleagues and I, having regard to the national interests, view this conjuncture with the utmost concern.

### OTHERWISE OCCUPIED.

PREOCCUPATION is a dangerous thing for a newspaper editor when it obscures his perception of the most important events going on around him. We know how, unfortunately for himself, the editor of the new *Japan Gazette* happened to be otherwise occupied in 1889, so that all the long national disturbance about the Foreign-judges provision in Count Okuma's scheme of Treaty Revision completely escaped his attention. It appears now that his preoccupation lasted until the close of 1890 also, for he is actually ignorant of the circumstance which created so much amusement and provoked so much banter in connection with the celebrated anti-Revision meeting of last September. In a series of numerically tabulated indictments of Mr. Liscomb, who lately committed the crime of disagreeing with the action of the New York Chamber of Commerce, this preoccupied editor says:—"Mr. Liscomb speaks of representatives of the Chinese Settlement taking part in the Yokohama meeting. Will he kindly give his authority for this statement?" Evidently the editor never heard of Mr. Wong Yick Tong, who was among the thirty-seven gentlemen "unanimously chosen" to form a Committee which should "act as the representatives of the Yokohama Community in any and all questions incidental to or arising out of the resolutions" passed at the meeting. "Will Mr. Liscomb kindly give his authority for this statement?" Truly it is very entertaining. Why does not the preoccupied editor procure some back files of the *Japan Mail*, and read up the history of this Settlement? He will bury himself under a mountain of blunders unless he takes measures to procure a little information about the past.

### FESTIVITIES AT THE BRITISH LEGATION IN PEKING.

THE Poet's Corner in the *Chinese Times* has become one of the most welcome institutions of Eastern journalism. Tientsin—or should we not rather say Peking?—is happy just now in the possession of one or two bards who, to a wonderful facility for turning a neat rhyme, add a large fund of wit and sparkling good humour. Supplementing the excellent articles of the editor of the *Chinese Times*—articles as conspicuous for the polish of their style as for their deep insight into Chinese affairs—the efforts of these bards help to make the Tientsin journal a publication of which British residents in China may well be proud. In its latest issue to hand we find a clever dialogue in verse, which was spoken at the New Year's festivities at the British Legation in Peking. We wish that space permitted the re-publication of the dialogue in full. Here is the finale, a ditty sung by "Time," one of the *personæ*:—

TIME 1. A recent assignment has come to hand
To adorn H.M's Legation;
It's really hard to understand
How those good people, who saw them land,
Could write them down as a German band
On a journey of exploration.
They really are the last thing out
And all of them very clever,
Of that there is no possible doubt,
No probable possible shadow of doubt
No possible doubt whatever.

2. We're all a very contented lot
(Tho' some of you may not think so)
When we've nothing to do, we hatch a plot
To build a Club, but who cares a jot
Whether we get that Club or not?
(And then it might make us drink so)
So walls fall in and Committees fall out.
And our books get lost for ever,
Of that there is, etc., etc.

3. The fierce Influenza has come and picks
His various victims grimly
On many of those we want, he'll fix
To keep them in bed five days or six
And, like our Doctor, he plays *odd tricks*
That we only see through dimly
So play while you can till the lights go out
For these tricks are passing clever,
Of that, etc, etc.

4. Our next spring races will be they say,
Unlike those held in autumn,
For a serious stable is under weigh
That buys a griffin or two per day
And teaches 'em many a novel way
To win for the men that bought 'em.
But the men who win the most may shout,
While the Haikuan Cup stands ever,
Of that there is, etc., etc.

5. And so we're going the Palace to see
In the month that hares go mad in
Then, after the audience, there's going to be
A dinner and speeches and much "Esprit"
And won't it be fun for you and me
If we should be there, Aladdin!
How fine if we only could work Pears' soap
On China with one endeavour,
But of that there is no manner of hope,
No probable possible shadow of hope,
No possible hope whatever

6. Now Time is up, good Friends, I fear,
Our play must be ended shortly,
But ere we go we'll ask all here
To wish full many a glad New Year
To good Sir John and his lady dear
So kind and exceeding courtly.
And though we may roam the world about
They'll live in our memories ever!
Of that there is no possible doubt
No probable possible shadow of doubt,
No possible doubt whatever.

### THE OPIUM REVENUE OF INDIA.

THE report entitled "The Moral and Material Progress of India," which is annually laid before the British Parliament, and which sums up the general broad results of each year's administration, usually contains a large amount of information of a most interesting character. The volume, if it were anything but a blue-book, would be widely read. Being what it is, no one reads it. On the interesting subject of the opium revenue of India, the volume last issued says that the net Indian revenue from opium during the fical year 1888-89 was Rx. 5,964,000, as compared with Rx. 6,090,000 and Rx. 6,213,000 in the two previous years, and as compared with 8½ millions, the net revenue in the year 1880-81. The decrease in the revenue is due mainly to the fall of price in China, consequent on large extensions of opium cultivation in that country, and partly to the terms of the Chefoo Convention, under which the import duties on opium carried into China were increased. Nearly the whole of the opium revenue accrues on opium exported to China; in 1888-89 nearly three-fifths of the net opium revenue was raised in Bengal under the monopoly system, and a little less than two-fifths in Bombay by levying a pass duty. Under the monopoly system certain cultivators are licensed to grow opium in selected districts of the Bengal Presidency, and elsewhere the cultivation is strictly prohibited. All the crude opium grown by licensed cultivators, save a small quantity produced in the Punjab, is carried to two factories, where it is made into marketable opium, and whence it is sent to Calcutta. Opium from the stores is sold by auction once a month in quantities of which notice is published 15 months before. The area of opium cultivation in Bengal was 518,930 acres in the year 1888-89. Steps have now for two years been taken to reduce the area, because the good opium harvests of the past few years yielded more than was required to supply the monthly sales and keep up the reserve. The opium harvest of 1888-89 was very short; only 38,305 chests were made as compared with 69,500 chests in the preceding year, while 57,000 chests were exported to China. Bombay opium is produced in the Native States of Central India and Rajputana; and it pays a pass duty of Rx. 65 on each chest exported to China. The Native States have engaged so to manage their opium cultivation and production as to safeguard the British revenue; and in exchange for this service they receive either money compensation or other concessions. The amount of Bombay opium entering British territory from Native States during the year was 33,800 chests, or 4,662 less than in the previous year. The total number of chests of opium exported from India during the year was 90,096, of which 85 per cent. were consigned to China, 14 per cent. to the Straits Settlements, and 1 per cent. to other countries. Rx., it should be explained, means tens of rupees.

### CHINESE NEW YEAR.

THE Wuchang correspondent of the *North China Daily News* writes:—

The 23rd and the 24th of the last moon of the Chinese year are days of great import to Chinese home life. The kitchen god on one of these two days goes up to heaven with his report of the household conduct for the year. We are all familiar with the Chinese idea that the unseen world is a counterpart of the seen. In the various Temples of Horrors, the Buddhist hells are fitted with mandarins, yamên runners, lictors, and all the paraphernalia of earthly justice of the Chinese pattern; so the Milky Way is the heavenly stream from which runs the Yellow River, and each star has connection with some person, if only he be of any consequence on the globe.

From all this it follows that there must be a due hierarchy in the spiritual powers that rule the world corresponding to the degrees of dignity and duty on earth. The higher deities cannot be expected to know the details of everyday life, hence the necessity of lower intelligences to inform them. The Jewelled Emperor, who in little over a thousand years has been somehow promoted from his commonplace life on earth to a supremacy in the sky, receives at the end of the year from the kitchen god of each home a detailed account of what wrong each member has committed through the year.

In preparation for the day a printed form of a sort of "prayer of reconciliation" is left at each house in Wuchang by Taoist priests together with a paper horse for the god's journey and often a picture of the god. On the day itself the dust of a twelvemonth is wiped from the table above the hearth, which is adorned with red cloth; a banquet is also spread before the shrine to comfort the stomach of the traveller and put him in a good humour. One dish is a special broth of glutinous rice of which the god is specially fond, and which is likely to stick his teeth together so that he can't get

Digitized by Google

his mouth open to tell tales in the august presence to which he is going! He remains invisible making his report for ten days, when he is received home again with all ceremony to the neglect and cobwebs of another year.

So universal is this custom that highly intelligent Confucian scholars take their part in the ceremonies. Many of them, superior to crass idolatry, yet fall in with the old ideas from a vague expectation of harm through omission. Many others haven't the moral courage to give up a custom supposed by the greater part of their world to be of the essence of religion. Even the high officials join in sending their kitchen god on his journey with congratulations and good wishes. The mental position of one of these towards such observances must be very similar to that of a Roman official in the decadence of the empire; religion another name for superstition and the whole a convenient matter for statecraft. For instance this autumn the usual drought led to the usual prayer in this city for rain. The Viceroy with his attendant high officials went to the temple to bow down before the image of the Dragon King to pray for rain. For some days the weather remained as fine as ever, whereupon the Treasurer and Judge represented to him that it was undignified for a Viceroy to pray day after day without answer, offering themselves to bear the brunt of the indignity of the interval. After about a week there came a slight shower for half an hour. This was sufficinent, the fast from meat was ended, prayers ceased—and, as it proved, so did the rain. It was a sort of duel with heavenly powers in which the slightest scratch was sufficient and "honour was satisfied." When I asked how a man like Chang Chih-tung could bow down to an image and engage in the after farce for hoodwinking the deity, I was told that he knew the people would curse him for callousness to their interests if he refused to pray in the idol's temple—and, though of cour knowing the whole to be sheer nonsense, he went throngh the usual performance. And so we see it; the official is perforce the priest of the people. By training he is an agnostic; but, for statecraft, he goes through the degrading form, and smiles complacently in his sleeve as he is borne home by his eight bearers. What would be the effect if a high official were to arise with moral courage enough to declare that he wouldn't truckle to a people's superstition, nor play at a game of "saving face" with the unseen powers?

### BOYCOTTING.

We find the following in the *Mainichi Shimbun:*—"Trouble has arisen between the Yokohama Takifuji porcelain store, represented by Mr. Oumi Shinkichi, and the American firm known as the Tuska Shokai, of 194, Settlement. It appears that the porcelain folks undertook to manufacture and deliver certain wares, the contract price of which was 2,946 *yen*, to the American firm by the end of last October. A part of the ware was delivered and payment received, but when, the whole order being completed, delivery was sought and the balance of the money asked for, Messrs. Tuska and Company declined to receive the wares, alleging that their shapes and decoration did not accord with the terms of agreement. They were willing to take delivery of the porcelains at a reduction of some 35 per cent., but the other side, unable to agree to such terms, referred the matter to the Porcelain Guild. Representatives of the Guild held a meeting on the 3rd instant, and opened negotiations the following day with Messrs. Tuska and Company. The latter, however, replied in the same sense as before, namely, that the wares were not according to agreement, and further that the state of the home market was unfavourable. Renewed negotiations on the 6th instant, resulted in the same reply, and as no prospect of a compromise offered, an emergency meeting of porcelain manufacturers was held on the 11th instant. One hundred and thirty-nine representatives were present. Mr. Hoda Junichi presided, and having informed the meeting of the result of the negotiations, said that it was proposed to give up all dealing with the firm of Messrs. Tuska and Company. This course was unanimously approved. The resolution took effect from the 15th instant. Any associate of the Guild who violates the arrangement, makes himself liable to expulsion or a fine of from one to fifty *yen*, under the 32nd article of the Guild's rules."

* * *

There is small blame to the *Mainichi*, perhaps, for publishing the above, inasmuch as it doubtless represents the extent of that journal's information, but we (*Japan Mail*) have received a very different account of the affair. The facts are that a contract for certain goods of specified shapes and decoration was entered into last year between the parties, the work proceeding during the absence of the principal in the United States, and money being drawn by the manufacturer as portions of the order were executed and delivered. On the return of the principal of the Yokohama firm the goods were examined and found to be not made according to contract; old shapes that had been some time in stock "in white" had been decorated, instead of the new shapes as agreed upon, these old shapes being unsuitable for the market for which the order was intended. Moreover, the decoration was in many respects faulty and not according to contract, and the goods were consequently worth considerably less than they would have been had the contract been properly carried out. Large advances having been made by the Yokohama firm, there was no other course, if the goods were to be accepted, than that the manufacturers should submit to a reduction. This they declined to do, and with scant ceremony placed the matter in the hands of the Guild. A committee of the Guild waited on the Yokohama firm, and, after discussing the matter, admitted that the goods were not according to contract, and that certain misrepresentations had been made to the Guild by the complaining firm of potters, but nevertheless said that, as the matter had been referred to the Guild, the foreign firm would have to make some better offer than they had done or put up with "boycotting." The *Mainichi Shimbun* is entirely incorrect in saying that the "state of the home market" which is described as "unfavourable" had anything whatever to do with the matter, which was one purely of agreement as to shapes and decoration.

* * *

This affair appears to afford food for comment to more than one vernacular journal. The *Tokyo Shimpo* of yesterday has the following paragraph about it:—"With reference to the cessation of business with Messrs. Tuska and Company, of No. 194, Settlement, Yokohama, Messrs. Fraser, Lowder, and other gentlemen of Yokohama, known in connection with anti-Revision, held a consultative meeting at the Drug Company's Council-room (*Shogaku Kaigisho*), for the purpose of inquiring into the circumstances of the dispute. It being debated whether the Drug Company should or should not propose an amicable settlement, Mr. Fraser said that as the affair was closely connected with the part taken by himself and the rest in respect of Treaty Revision, it was essential that the facts of the affair should be examined into, and its rights publicly established. If it were found that the Takifuji firm was in the wrong, the truth should be openly announced. With that understanding they separated, intending to hold another meeting in the afternoon of the 17th instant."

* * *

It will be seen that the story is getting into a delightful tangle. The part attributed to Messrs. Fraser and Lowder is, we take it, one of those "items" which Tokyo newsmongers sell by measure. One thing is certain, namely, that if the Potters' Guild has really resorted to the device of "boycotting" (*torihiki kyozetsu*) for the purpose of forcing unjust terms upon a foreign firm, the foreign buyers ought to take prompt retaliatory measures. A boycott from the seller's side would be regarded as a huge joke, we imagine, anywhere but in this Settlement.

### THE AMERICAN TREATY OF 1878.

In the House of Peers on the 13th instant, the Minister of State for Foreign Affairs answered a question propounded some time previously by Viscount Tani, in due accordance with the rules of procedure. Viscount Tani's enquiry related to the treaty concluded by Japan with America in 1878. The Foreign Minister, alluding to that Treaty in his historical retrospect, spoken in the Lower House on the 17th of December, used language which led Viscount Tani to suppose that the Treaty was no longer in existence. Hence the question. The Minister, in reply, explained very clearly that the Treaty is emphatically in existence, having been duly ratified by both the High Contracting Parties, but that, owing to the peculiar provision contained in its tenth clause, it possesses no operative value. The most superficial student of Japan's foreign relations knows all about that celebrated tenth clause, the subject of so much discussion and misrepresentation. Viscount Tani expressed himself quite satisfied with the answer of the Foreign Minister, as he might well be. The whole matter was plain and above-board, the question direct, and the answer unequivocal. Yet the *Japan Gazette's* comment on the incident is this:—"The speech and the reply to it bearing the plainest marks of their artificiality, they have deceived no one. There is one thing in which the Japanese show great keenness, and that is in detecting the absence of reality in speech or action." Where on earth the artificiality came in we are perplexed to perceive. Some ignorant people, imagining that Viscount Tani intended to raise a debate in connection with the Minister's reply, or to put further questions, and being disappointed in their expectation of a scene, may feel vaguely indignant. But neither Viscount Tani nor the Minister for Foreign Affairs is bound to cater to the entertainment of the ignorant public. As for the *Japan Gazette*, it reminds us forcibly of the old woman who readily swallowed all the marvellous incidents of her grandson's travels except the flying fish. The beldam's credulity stopped short at an *exocœtus*. Natural history was a sealed book to her, just as the annals of Japanese treaty-making and Japanese treaty revision are evidently a sealed book to the *Japan Gazette*. No sooner does anything crop up which lies outside the sphere of our contemporary's very limited knowledge, than it fancies itself confronted by some awful mystery, some flying fish, that wily folks are trying to palm off on it. Yet its doubts ought not to be so stubborn, for if there ever was a fish out of water it is the present editor of the *Gazette* when he essays to soar into the Treaty-Revision element.

### NEW TUG FOR THE CANADIAN PACIFIC LINE.

The Yokohama Engineering and Iron Works have all but finished work on a very fine new tug built to the order of Messrs. Frazar & Co., the local agents of the Canadian Pacific Steamship Co. The extension of the business falling to be transacted in connection with the steamers, and the anticipated impulse which that business will receive when the new ships are placed on the line, necessitated arrangements of a very different nature from those which have hitherto sufficed. Three large freight barges are being built, and with the new tug the agents will be in a position to deal with cargo in a method alike expeditious and effective. The *Spindrift*, as the new vessel is to be named, is 70 feet in length on the keel and 74 feet over all; 14 feet beam, and 7 feet 3 in. depth of hold. She has hard wood frames throughout; her stem and rudder-posts, garboard strakes, sheer strakes, and covering boards being of *keyaki;* her kelson of teak; her deck frames of angle-iron, with planking of teak, of which material also her deck houses are constructed. She is fitted with twin compound surface-condensing engines, driving two propellers, which measure four feet in diameter, and which along with their brackets are of gun metal, the shafting being 3½ in. Steam is supplied to the engines by a double-flued steel boiler 8 feet by 8; which will work at a pressure of 110 lbs. Independent of the engines are air and circulating pumps; while, as a special feature designed to increase the usefulness of the steamer for the particular work in which she is to be engaged, there is also provided an independent Dean's direct acting pump of 4 in. delivery, for salvage work and for pumping fresh water in the steamers. The cylinders of her engines are 8 in. by 16 in., with 10 in. stroke. With her engines in, the *Spindrift* draws 5 ft. 9 in. aft and 4 feet 9 in. forward; so that she may go alongside such landing stages or piers of shallow berthage as may be necessary. Forward of the boilers are situated the saloon and pilot-house; the latter sufficiently elevated to afford facilities for steering, while aft of the engine-room is another

Digitized by Google

cabin 8ft. in width. The saloon is to be upholstered in a manner consonant with the superior character of the other fittings. The houses, with the exception of the pilot-house, are 5 feet above the deck, giving a total height of 6 feet 4 in above their floors. In every respect the *Spindrift* is a model of skilful designing and of careful and painstaking workmanship, constituting indeed a capital illustration of the capacities of the works that have turned her out. We believe it is the intention of Messrs. Frazar and Company to fit up the electric light on the *Spindrift*. The installation has already arrived, and consists of an Edison plant of a capacity of eighteen 16-candle power lights, with which the cabins and engine room will be lighted, the side-lights also being electric; while there are two 100-candle power lights to be used on occasions when it is necessary to load or discharge cargo by night-time. At her trial, which will take place in about a week, the new steamer is expected to attain a speed of about 10½ knots, so that with twin screws she will be not less fast than handy.

### "BURNING THE RECORDS."

A CORRESPONDENT suggests that the theory propounded by us on this subject, is insufficient to account for all the contradictions in the *Gazette*. Our correspondent would substitute mastication in place of incineration, and the office cat in place of the "impish denizen" as the active agent. He says:—"The burning-of-the-record-theory might account for diurnal contradictions, but not for repugnancy in the same article. For instance: the *Gazette* in its issue of the 17th inst. first declares that the report given by the *Jiji* and *Mainichi*, on which its assertions were founded, were *absolutely identical* [the italics are not mine] in every particular with that of the *Kwampo*. A little further on your contemporary drops from the *absolutely-identical*-in-italics, to the important-particular-in-roman stage, and finally lands on the wide-discrepancy platform. First, the reports are absolutely identical in every particular; secondly, they do not differ in a single important particular, and, thirdly, the *Mail* cannot prove any wide discrepancy between them. I might point out that on this one question alone, the *Gazette* takes just as many different positions as it has kinds of honesty, but the thought will doubtless occur to you, and besides it is not pertinent to the main question. Now the burning of the record theory might, as I have before remarked, account for the inconsistencies pointed out by you, but it would not satisfactorily explain those I have referred to, because sentence-by-sentence cremation would deprive the printer of copy. My idea is that the honest office cat gobbles up the honest sentences, as they fall from the honest pen of the honest editor of the honest *Gazette*, and passes them on to the honest printer. This theory I admit, has one serious defect, but I maintain that it is good, and ought not to be discarded merely because it has holes in it. My difficulty is to discover how it happens—assuming the cat to be the channel through which copy is conveyed to the composing room—that any sense whatever can be made out of the editorial fulminations of your contemporary. But, after all, that is only 'a minor point.'"

### THE HOUSE OF PEERS.

PUBLIC opinion becomes daily more excited about the course which the House of Peers is likely to adopt in respect of the Budget. Plainly there are three eventualities in sight: first, the Peers may take the Budget as sent up to them, debate it, and adopt the amendments of the Lower House *in toto*, or with a few minor exceptions; secondly, they may refuse to accept the Budget on the ground that it reaches them in an unconstitutional form; and thirdly, they may accept it, but proceed to amend it on constitutional lines and intelligent principles. The general idea appears to be in favour of the third course, and a majority of the Peers themselves are said to approve it, their belief being that the Upper House should stand between the Lower and the Government, and should exhaust its good offices to effect a peaceful adjustment of disputes. In the event of this forecast being verified, the Budget has still a long route to travel before it reaches the Government. The amendments made by the Peers would have to be discussed by a Conference Committee of the two Houses, and the results of the compromise thus effected would then have to be brought before each House separately. All that could not be accomplished within any time likely to be at the disposal of the Diet. We believe that the Budget is doomed, and that the Representatives will have to carry to their constituents the news of a big fiasco.

### A PARALLEL ON A LARGE SCALE.

FOR the comfort of the gentlemen who found the police at Nagoya too forbearing, we re-produce the following account of a meeting in the United Kingdom, where the police remained calmly indifferent amid a scene of far greater violence than was witnessed at Nagoya. Two wrongs do not make a right, but it is more or less reassuring to know that the conduct of the police at Nagoya is not without parallel in the "vanguard of civilization." It will be observed, too, that the two cases have another feature in common, namely open inciting to violence by a Roman Catholic clergyman, and secret inciting—as is supposed—by Buddhist Priests:—

The anti-Parnellite meeting at Tipperary on Sunday December 13th, gave rise to several exciting scenes. It was anticipated that either Mr. Healy or Mr. Sexton would attend, but at the last moment an intimation was received that the presence of those gentlemen was required elsewhere, and the only members who put in an appearance were Mr. Condon, M.P., and Mr. J. O'Brien. A meeting was held at half-past two in an open space outside New Tipperary arcade. Canon Cahill was elected to the chair, but as soon as the reverend gentleman attempted to speak, two young men, named Hurley and Dalton, on the platform, called for cheers for Mr. Parnell. Great disorder prevailed The crowd was divided into faction, who glared at one another, and brandished sticks. Canon Ryan (says *The Times* correspondent at Tipperary) advanced to the platform and roared, "We will walk on the Hurleys and the paid cut-throats of our country. Clear them away; crush them down." Both Dalton and Hurley were torn from the platplatform by the rabble beneath. Several policemen were present, but they did not interfere. A table on the platform was broken and thrown to the crowd, and some sturdy fellows armed themseves with the shattered pieces to belabour their opponents. The Parnellites attacked the other side, to be driven back some distance. Disorder reigned supreme, and both parties struggled for the mastery. Canon Ryan addressed the anti-Parnellites, telling them they were worthless and cowards, as they could not clear off the scruff and dirt of Tipperary, and he called on the horsemen on the outskirts of the crowd to come in and trample the hirelings down; but the command met with no response. Some speeches having been delivered amid constant interruptions, Canon Ryan asked, "Why does not our side beat out the rascals or kick out the blackguards?" A man on the platform cheered for Parnell, and an effort was made by the anti-Parnellites to pull him down. His friends rushed to his rescue to resist the attack, and were freely beaten with sticks and swept away some distance from the platform. Outnumbered and overpowered they changed their line of attack and discharged a volley of stones at their opponents. Both sides ranged themselves into lines and fought in this style for some time. The peaceful spectators fled in all directions and left the field to the fighting men. Every one was driven from the platform by the fusillade of stones, and several people were hurt. Canon Ryan and Father Humphreys, wielding umbrellas, rushed amid their supporters, and, calling on them to follow, charged upon the other side. A fierce conflict ensued for several moments, during which the stone-throwing continued, but at last the Parnellites yielded and fled in all directions; a few who took shelter in an open building were attacked with stones and driven away. A priest on the platform then gave directions, when the Parnellites returned, that they should station "Groups of ten or twenty on the outskirts of the crowd prepared to beat out the brains of any one who interrupts." The meeting from this time proceeded with some show of order. The number of persons present in all is variously estimated from 400 to 2,000. Not more than 200 men were engaged in the fighting.

### THE CASE OF RASPE AND CO. V. ENOMOTO SHUZO.

THE report of the above case recently published in these columns has evoked criticism that does not appear to have been preceded by full consideration of the details. The *Hyogo News*, for example, draws from the case this conclusion:—"To the Oriental legal mind it seems that for a man to fill a bottle with a vile decoction and to label it with the name of another firm, is so far from being an offence that five or six Courts in succession refuse to convict an offender caught in the act." Now, in the first place, this statement contains an exaggeration. Not "five or six courts" but two, refused to convict Enomoto Shuzo. The Supreme Court never showed any doubt at all in the matter. It sent the case back twice for re-examination, and finally Enomoto got a portion at least of his deserts. In the second place, if the *Hyogo News* had read our report with care, it would have perceived that the point which perplexed the two Judges was whether the evidence sufficed to furnish proof of fraudulent intent. The purchaser of the beer had bought it willingly. He knew it to be a spurious compound, and consequently was not deceived. On the other hand, there appears to have been no attempt, if indeed there was any necessity, to prove that Enomoto Shuzo was not aware of the character of his customer as a representative of Messrs. Raspe and Company. The two Judges argued, therefore, that, so far as the testimony laid before them was concerned, the case did not fall within the legal definition of "selling *for fraudulent purposes*." There is a radical and easily appreciated difference between the import of this judgment and the sweeping inference that the fraudulent sale of a vile and spurious decoction does not constitute an offence in Japanese eyes. It does most distinctly constitute an offence. The fact that Enomoto was finally sent to prison ought to have prevented such an unjust assertion. The crux of the whole matter was whether fraudulent intent had been sufficiently established. It did not suffice to tell the Court, as a matter of common report, that Enomoto Shuzo had been in the habit of selling his bad beer to the public at large. Evidence of sale had to be adduced, and in the only instance concerning which testimony was furnished, fraudulent intent did not, in the Court's opinion, appear to be established. We cannot ourselves appreciate such a subtlety, but still less are we able to accept the conclusion based on it by our Kobe contemporary. The judgment of the two Courts showed, not that there is any question in Japan as to the culpability of selling bad wares under a spurious title, but that the Judges required more explicit proof of fraudulent intent than plain practical folks would think of asking for. The Criminal Code, which has been in force since January 1st, 1882, contains provisions dealing distinctly with acts of fraud such as that perpetrated by Enomoto Shuzo, and convictions under these provisions have, we are informed, been obtained. But the case in question presented a peculiar feature of which the *Hyogo News* does not appear to have taken any notice. There may be a tendency on the part of a certain school of Japanese lawyers to think that Courts of Law should concern themselves about vice rather than about crime, and to forget that "hearts are outside the jurisdiction of legislatures and magistrates, who have to do only with men's actions." Certainly in the case of Enomoto Shuzo, a distinct failure of justice might have resulted had not the Supreme Court overruled a subtlety that ought to have possessed no practical weight.

### THE SPEECHES OF THE MINISTERS.

THE great importance of the speech delivered by Count Yamagata in the House of Representatives on the 16th instant, induces us to refer to a matter which we should otherwise have left unnoticed, namely, the very misleading nature of the translation published by the *Japan Herald*. We know well the difficulty of finding any Japanese competent to interpret such speeches in English. It would, indeed, be too much to expect renderings faithful to the polished diction and terse style of the original. But surely something better could be accomplished than the jumble of inconsequential phrases and confused thoughts attributed to the unfortunate Minister President by the *Japan Herald*. The speech, instead of being as it really was, a dignified, eloquent, and closely reasoned statement, becomes in the *Japan Herald's* columns a farrago of bathos. Happily the construction of the sentences and their coördination are so flagrantly bad that discerning readers will at once acquit Count Yamagata of having uttered such rubbish. Take, for example, this sentence:—"Since the accession of the present Emperor to the Throne, there have been many speeches delivered by His Imperial Majesty—from the subjugation of the rebellion to the one made at the opening of the Diet." Fancy Count Yamagata alluding to "the subjugation of a rebellion" as a speech from the Throne! One

Digitized by Google

is obliged to conceive the Japanese Sovereign a second and greater Jupiter *fulminans*, hurling from his lips treason-quelling thunderbolts. Of course Count Yamagata never said anything of the kind, and equally of course he never spoke of subduing a rebellion. However, our purpose is not general criticism, for that would necessarily extend to every sentence of the wonderful hotch-potch attributed to the Minister President by the *Herald*. It is on account of one portion only that we allude to the matter. The *Japan Herald* makes Count Yamagata say :—

I think it will be difficult to remedy at once the long standing abuses which grew out of the treaties contracted with foreign Powers at the time of the old *regime*, nor will circumstances permit of it. Therefore I believe that you, who are thoughtful and faithful representatives, will feel as I do, not only that treaty revision cannot be effected without proper reasons, but that the question should be effected on legal grounds.

These, certainly, are striking and singular statements. First, that "circumstances will not permit of remedying at once the abuses growing out of the Treaties with Foreign Powers," secondly that "Treaty Revision cannot be effected without proper reasons," and thirdly that it "should be effected on legal grounds." The Minister President did not say anything of the kind. Here are the words really used by him :—

The still incomplete condition of the national autonomy, is, however, a heritage handed down to us from the treaties of the Bakufu, and to recover that autonomy in a day is a task beyond our power to accomplish. It must be attained by gradual steps along the right route, and we are fully persuaded that you, gentlemen, loyally and honestly share our sentiments in this matter.

It may be well to refer also to a clause in Count Matsukata's speech, which, as translated by the *Herald*, commits the Government to a remarkable declaration. The translation of our contemporary makes the Minister of Finance say :—

In case the amended Budget comes into existence, the Government will declare its dissent in accordance with the provision of the Constitution, and will be obliged to take proper measures to carry out and enforce its will.

We need scarcely point out that Count Matsukata did not attribute to the Government any resolve "to carry out and enforce its own will." Such an arbitrary announcement would be more than strange. What Count Matsukata said was :—

If by any chance an ill-advised Bill is adopted, it will be the unavoidable duty of the Government, as directed by the Constitution, to announce its dissent, and adopt suitable measures in consequence.

We call attention to these points on account of their significance, not for any purpose of mere criticism or fault-finding. It is desirable that there should be no misunderstanding in respect of matters of so much moment.

### BLUNDERING AGAIN.

"THE only reports that have appeared in any European language on Japanese Courts, as far as we are aware," says the *Japan Gazette*, "are those of Mr. Masujima, short extracts from which have been published in the *Japan Mail* from time to time." We should like to know where these "reports by Mr. Masujima in a European language have appeared." They are spoken of as "reports on Japanese courts," but as nothing of that kind has ever been published, we presume that the meaning concealed in this peculiar phraseology is "reports of cases tried in Japanese Law Courts." Where then, we ask, have such reports been printed or compiled by any Japanese barrister in a European language? We have never heard of them, and no extracts from them have ever appeared in the columns of the *Japan Mail*. There is published in Tokyo a legal periodical called the *Saiban Suishi*. It contains, *inter alia*, short reports of interesting cases tried by Japanese Law Courts within the past few years. Knowing that ignorance of the ways of Japanese tribunals lies at the root of much of the distrust which foreigners feel towards them, and thinking that it falls distinctly within the province of an English local journal to supply information in such an important matter, we have taken the pains to translate some of these reports, and lay them before our readers. All this we explained fully when the series of translations was commenced in our columns, yet we are now told that we have been merely publishing short extracts from reports prepared by Mr. Masujima in a European language. How long it will take the *Japan Gazette* to bury itself under a mountain of its own blunders, is becoming a curious problem. Does it imagine that the *Saiban Suishi* is printed in a foreign tongue? Or does it know anything whatever about the existence of such a periodical?

* * *

It is a case of Pelion upon Ossa. We imagined that the *Japan Gazette* must have climbed pretty nearly to the pinnacle of blundering; but no, its agility continues. It made a great point, as it imagined, against a correspondent of the New York *Nation*, by denying that there were any Chinese present at the anti-Revision meeting of September last. This simply showed that it knew nothing at all about the meeting, because not only were Chinese present, and not only was a Chinaman elected to serve on the Representative Committee, but the fact was generally commented on by the press at the time, and created no little merriment. Convicted of blundering, the *Gazette* had to confess itself mistaken about a fact perfectly familiar to ninety-nine out of every hundred residents of Yokohama. Coming on the top of all its previous blunders, this escapade might have sufficed for a time. But the *Gazette* resembles the youth at the auction, bidding against himself. It essays to cap its own performances, and this time we frankly admit that it has succeeded. Here is what it says about the Chinese incident :—

We find that we were mistaken on the point of the presence of Chinamen at the meeting of September 11th. There were Chinamen present, but we have yet to learn that the dignity of the meeting was lessened thereby, any more than the dignity of the Treaty Revision conferences held in Tōkiō, when Count Inouye was Foreign Minister, was lowered by the presence of the Chinese Minister at such conferences.

Now this becomes absurd enough in view of the fact that no Chinese Minister ever attended a Treaty Revision conference in Tokyo. If that were all, however, the curiosity of the thing would be less marked, especially since we might credit the *Japan Gazette* with having obeyed some hasty impulse of retributive justice by inserting a Chinese Minister at the Tokyo Conference to balance the Chinese merchant excluded from the Yokohama Representative Committee. In the abstract, it is not a bigger blunder to assert that no Chinaman was present at the meeting than to say that a Chinaman was present at the Conference, for both allegations are equally false. But the new blunder involves infinitely more than the old one. It involves ignorance of the important fact that China's Treaty with Japan is on a special footing, quite distinct from that of Japan's Treaties with the other Foreign Powers, and that, consequently, China has never been invited to take part in any of the Revision conferences. It involves ignorance of the fact that Viscount Enomoto, Mr. Shioda, and Mr. Otori, Japan's Representatives in Peking, were supposed to have been instructed, one after the other, to open separate negotiations with China in view of the seemingly imminent conclusion of Treaty Revision with Western Powers. It involves ignorance of the fact that China's probable attitude in the event of Western States agreeing to the imposition of increased tariff rates by Japan, has been speculated upon by diplomatists, and discussed by every foreign and vernacular journal in Japan for the past five years. It involves ignorance of the fact, repeatedly commented on, that owing to the special nature of her Treaty with China, Japan is happily in the position of being able to withhold from the Chinese the privilege of mixed residence while granting it to other aliens. In short, it involves ignorance of one of the most important, the most perplexing, and the most widely debated phases of the Treaty Revision problem. We have not the smallest desire to comment on the strange mistakes of our contemporary. That function of journalism is particularly distasteful to us in the present case. But the *Japan Gazette* is now the representative of a company of prominent residents of Yokohama, and the avowed object of its proprietors was to establish an organ which should place the Treaty Revision question before the public in a just and correct light. It has interested us, therefore, to follow the *Gazette's* course during the seven weeks of its existence up to the present, and to determine how much credit its utterances deserve. But we promise our readers that the task shall not occupy much more space in these columns.

### A NEW FINANCIAL RESOURCE.

THE *Keizai Zasshi* offers for the consideration of the Representatives of the people a new and hitherto neglected source of the public revenue. The Bank of Japan has the right of issuing convertible notes to the amount of 85 million *yen* in excess of the specie reserve in its vaults. According to the official returns for the week ending January 10th, the total amount of convertible notes issued was, at that time, 102,953,364 *yen*, of which the amount in actual circulation was 74,977,522 *yen*, while the reserve of specie amounted to 44,244,011 *yen*. The difference between the last two sums, namely 30,733,511 *yen*, represents the amount for which the Bank has no reserve in its vaults. Our contemporary thinks that the profit resulting from this issue of notes ought not to be enjoyed solely by the *Nippon Ginko* as is now the case. The profit reaches, on the basis of 5 per cent., 1,536,675 *yen*, and will steadily increase in proportion to the quantity of convertible notes issued by the Bank. Supposing that the maximum limit (85,000,000 *yen*) be reached, the Bank would then be compelled, according to its charter, to advance to the Government a sum of 22 million *yen* without any interest, so that the actual amount at the Bank's disposal would be 63,000,000 *yen*, and the profit accruing on the use of the latter sum would be 3,150,000 *yen*, at the rate of 5 per cent. The *Keizai Zasshi* admits that the Bank is entitled to a certain amount of compensation for the trouble it takes in the issue of the convertible notes, but strongly protests against the appropriation of the whole profit arising from the transaction. In the case of the various subsidies to companies now engaging the attention of the Representatives, contracts bind the Government to pay the subsidies. But no contract exists in the case of the Bank of Japan. The Government can, therefore, take from the Bank without any injustice a portion of the profit now accruing from the circulation of convertible notes in excess of the specie reserve. Our contemporary recommends the members of the Diet to bring this question up for discussion before the close of the present session. With regard to the use of the new income thus derived, the Tokyo journal proposes to employ it as a means of abolishing the tax on confectionary and on exports.

### "ROUND THE WORLD FOR THREE YEN AND A HALF."

THIS is the title of a book just published in Tokyo by a young traveller named Yorimitsu Hôsei, a native of Tosa. As usual the book contains laudatory prefaces from the pens of several distinguished politicians and authors, including Counts Itagaki and Katsu, and Messrs. Shimada Saburo, Nakae Tokusuke, Ueki Emori, members of the Lower House, and Tokutomi Iichiro, editor of the *Kokumin-no-Tomo*. A poor student of English, Mr. Yorimitsu left Nagasaki in the spring of 1885 on board an American ship bound to Hongkong. Having only three *yen* and a half in his pocket, he had to work as a deck boy. He then spent ten months in visiting some of the open ports of China and also some cities of Siam and Burmah, always earning his passage as a cabin boy or a cook. Some time in the spring of 1886 we find him sailing from Singapore to New York on board an American merchant ship, the captain of which is described as being a man of chivalrous spirit and very kindly disposition. He worked as a steward. In the course of this voyage, he touched at Colombo, Bombay, and Cape Town. Everywhere the young adventurer seems to have devoted all his spare time and what money he had to making himself acquainted with the modes of life and customs of

Digitized by Google

the place. After reaching New York, he worked in various capacities, and mingled with all sorts of people, high and low, especially the latter. Some Americans took such interest in him that they offered to send him to a college, but he declined, and after staying there for about six months, sailed for Europe in a merchant vessel, though in what capacity we are not told. He first went to Belgium, then to France, and lastly to England, everywhere engaging in manual labour of some kind and, as soon as he had earned a little money, putting on gentleman's costume and mixing in society. He made the acquaintance of several distinguished men; principal among them being M. Clemenceau, Mr. Gladstone, and the late John Bright. To the last-named gentleman he had brought a letter of introduction from one of his American friends in New York. He returned to Japan by way of Australia in the spring of 1889, thus having spent four complete years abroad. Such is the general outline of his wanderings. He certainly deserves to be congratulated on the good fortune that attended him in his novel travels. But we are disappointed by the contents of his book. He occupies himself chiefly with recording, not his personal experiences, which could not fail to be various and interesting, but his not very favourable impressions of the life and manners of Occidental nations. His work is on that account comparatively uninteresting. Like his more brilliant predecessor, Mr. Shiga Shigetaka, editor of the *Nipponjin*, he seems to have been impressed, as the result of what he observed abroad, with the importance of a grand alliance among the nations of the Orient, especially Japan and China, against the steadily growing power of European races in this part of the world. Further, he recommends his countrymen to devote their energies to the development of their national resources by extending commerce with the outer world, a trite piece of counsel. According to one of the prefaces to his book, he is going soon to China as a commercial explorer, and since he is still young and evidently a man of considerable energy and pluck, we expect to hear more about him by and by.

### THE DIET AND PETTY TRADESMEN.

THE petty tradesmen of Tokyo expected that the assembling of the members of the Diet would bring them an exceptionally brisk and profitable season. But they have been entirely deceived, and are giving backhanded blessings to the very persons whose presence in the capital they so gladly anticipated. The Diet's clamour for the reduction of the number aud salaries of Government officials, has, it seems, exercised a strong economical influence on the whole official class, whose patronage is so vital to the petty tradesmen of the capital. It has hitherto been customary with officials to give entertainments at the end and beginning of each year. Toward the close of the last month in every year, the resources of the tea houses used to be taxed to their utmost to accomodate these jovial parties, celebrating what they termed *bo-nen kwai*, or ringing the old year out. The first half of January was wont to be similarly enlivened by *shin-nen enkwai* (New year's feasts). But last December, as well as last January, these social gatherings were few and far between. The tea houses, with the exception of those in the very first rank, all complain bitterly that the season has been ruinous. Equally unfortunate have been shoe-makers, tailors, and so forth, who regularly go round the various Departments and Bureaux to take orders on two or three months' credit. Higher class officials are of course able to pay their bills at any time, but those in receipt of medium and small emoluments give their orders, in most cases, on the basis of monthly instalments. Of late, however, petty officials are thinking more of their future prospects than of ordering new clothes and new shoes. The effect of the panic, for it is scarcely less, among the official class generally, is also discernible in other directions. The wives of officials, alarmed by the reported attempt of the Diet to cut down their husbands' salaries, and economical always, have become so extremely careful of *sen* and *rin*, that dealers in *katsuwo*, eggs, beef, fish, fruit, and all other articles of daily consumption, complain bitterly of the hard times, and there are even cases of utter ruin among small merchants. These circumstances have contributed to produce general distress among the poorer classes in Tokyo. The only persons that have profited by the meeting of the Diet are a few hotel keepers and the *soshi*.

### A PETITION.

MR. HIKIDA YEIKICHI, of the *Yomiuri Shimbun*, has presented to the House of Representatives a petition urging the abolition of *jinrikisha*. He assigns seven reasons for getting rid of these useful vehicles. First, the men who draw them are practically slaves; secondly, by sanctioning such a trade, the number of persons available to develop the resources of the country is reduced; thirdly, by sanctioning such a trade, the number of the poor is increased; fourthly, by sanctioning such a trade, the number of criminals is increased; fifthly, by sanctioning such a trade, the number of early deaths is increased; sixthly, *jinrikisha* have the effect of developing luxurious habits; and, seventhly, *jinrikisha* disfigure the aspect of the city. If this petition should come up for discussion in the House, the debate will probably be interesting.

### SILK-WORMS' EGGS.

THERE is apparently some trouble between the sericulturists of Miyagi and Fukushima Prefectures. The former are in the habit of obtaining their supply of eggs from the latter, their annual purchases amounting to some sixty thousand cards. The quality of the eggs, however, having given rise to complaints, a guild was formed, and it was decided that a board of examination should subject the cards to expert inspection before delivery was taken. The immediate consequence was that 3,300 cards were pronounced bad and returned to the producers, who expressed themselves much dissatisfied, and clamoured for a revision of the rules of inspection. The vernacular press says that the matter is difficult to adjust.

### OPIUM AND INDIAN FINANCE.

"THE Moral and Material Progress of India" is the title of a Blue-book annually laid before the British Parliament, which is so full of interesting matter that if it were published in any other shape it would command a large circulation. As it is, no one reads it, although it is, in fact, an account of the broad features and results of each successive year's administration in India, and of the methods adopted for dealing with current political questions in that vast and interesting region. The last of these reports has recently been laid before Parliament and has some interesting remarks on the opium trade and its bearing on Indian finance, of which the following is a summary. The opium revenue is raised partly by a monopoly of opium in Bengal, and partly by the levy of a duty on all opium exported from Native States. Though the poppy grows freely in most parts of India, its cultivation in Britain territory is permitted, as a Government monopoly, only in a tract 600 by 200 miles in extent in the Ganges Valley. The cultivator receives advances to enable him to prepare the land for the crop, and he is required to deliver the whole of the produce at a fixed price to opium agents, by whom it is despatched to the Government factories at Patna and Ghazipur to be refined for the China market. The chests of manufactured opium are sold by auction at monthly sales which take place in Calcutta; and in order to prevent speculation and to steady prices, the quantity to be sold during each year, is notified in the previous year. A sufficient reserve is retained to supply the deficiencies of bad seasons; and a small quantity is retained for the use of the Indian excise departments. In 1861 the average price of opium sold by auction for the China market was as high as Rx. 185 per chest of 140 lbs. weight, but since that year it has fallen. In 1886-87 the average was Rx. 112; in 1887-88 it was Rx. 106; and in 1888-89 it was Rx. 112. (Rx. means tens of rupees, and may be taken roughly as equivalent to pounds sterling.) Opium is grown in many Native States of Central India and Rajputana. These states have agreed to assimilate their internal opium arrangements to the British exise system, and to prevent contraband dealings. They levy heavy dues from opium exported from their territories for the China market, and such opium pays to the Indian Treasury a duty of Rx. 65 per chest on exportation. The yield of the opium revenue for the past two years has been :—

| | 1887-88. Rx. | 1888-89. Rx. |
|---|---|---|
| Auction sales of monopoly opium | 6,037,967 | 6,383,948 |
| Duty on Bombay or Malwa opium | 2,267,493 | 1,964,497 |
| Issues of opium to the Excise Department | 210,002 | 213,864 |
| Total | 8,515,462 | 8,562,309 |
| Opium expenditure chiefly in Bengal | 2,424,575 | 2,597,905 |
| Net opium Revenue | 6,090,887 | 5,964,414 |

The number of chests of Bengal opium sold in each of these two years was 57,000; the number of chests of Bombay opium paying duty was 34,884 in 1887-88, and 30,222 in 1888-9. The quantity of opium issued to the excise departments of the Bengal Presidency was 6,078 maunds in the latter year; and the receipts shown above are outside the provincial opium duties of Rx. 761,660, shown in the excise section of this statement. The net revenue from opium is now considerably below what it was in previous years; thus :—

| Net Opium Revenue in Rx. | | Net Opium Revenue in Rx. | |
|---|---|---|---|
| 1872-73 | 6,870,423 | 1880-81 | 8,451,276 |
| 1875-76 | 6,250,660 | 1883-84 | 7,701,518 |
| 1878-79 | 7,700,671 | 1886-87 | 6,213,913 |
| 1879-80 | 8,251,670 | 1888-89 | 5,964,414 |

The fall in the Indian opium revenue is due to the increased quantity, and the improved quality of the opium produced in China. The Chinese production of opium has been variously estimated at from three to ten times the Indian importations. Consular reports from China show that in the northern and inland provinces Chinese opium is taking the place of the Indian drug. It is probable that the increased duties, imposed under the Chefoo Convention on foreign opium entering China, have operated in favour of the consumption of the native drug. In pursuance of the policy of reducing the opium area, the land actually cultivated with opium in the Ganges valley was reduced to 518,930 acres, or 3 per cent. below the area of 1887-88, and 7½ per cent. below the opium area of 1886-87. The contraction of the opium area caused some dissatisfaction among the ryots, among whom opium cultivation with its accompaning cash advances at a critical season of the year is popular. The number of chests of opium paying duty at Bombay was less by 4,662, or 13 per cent., than in the preceding year. The decrease is attributed partly to the increased poppy cultivation in China, and the cheapness of the native drug there, and partly to the dearness of Bombay opium, caused by the partial failure of the rainfall in 1886 and 1887. Of the Malwa supply, one chest was exported fo London, 18½ chests to Zanzibar, and 75 chests to Cochin and Allepey; while 118 chests were supplied to Native Chiefs in Guzerat and Kathiawar, and 1,090 chests were issued to opium farmers or to Native States. The licensed consumption of opium in British districts of the Bombay presidency was 148,511 lbs., as compared with 140,527, and 150,657 lbs., in the two previous years.

### SINGULAR RECOVERY OF A RING.

A RING which its owner, one of the officers of the *Omaha*, might well have despaired of recovering, has found its way back to him under somewhat peculiar circumstances. The ring was dropped, while the *Omaha* was last here, in the harbour in seven fathoms of water, a depth which, in view of the muddy bottom, made recovery a very problematical matter.

Digitized by Google

A reward was offered, however, and on the return of the ship it now appears that the ring was recovered by a *sendo* who carried it to the Yokohama Police Station, whence it has found its way back to its owner. It appears that the finder used a net or dredge of the kind known as *keta* provided with iron spikes in which the ring caught, and was brought to the surface.

### THE INFLUENCE OF LAND OWNERS IN JAPAN.

THE movement against the proposed reduction of the land-tax is steadily gaining ground. The *Keizai Zasshi*, as already stated, is one of the most important strongholds of the opposition. In its issue of the 14th instant, it again recurs to the subject, and draws attention to the fact that the influence of landowners is already dangerously great in the politics of the country. From the Diet down to the communal assemblies, the basis of the franchise is in every case almost limited to possession in land. It is the landowners who elect and are elected to these assemblies, and the inevitable result is that the interest of the landed class is taken care of before that of every other class. Our contemporary substantiates this assertion by figures showing the amounts of local taxes in each City on Prefecture that are legally leviable, and those that are actually levied. From these statistics, it appears that in no locality is land taxed up to the legal limits. The local tax on land is fixed by law at a maximum of one-third of the national tax (*chiso*). But the practice and principle differ widely. To take an extreme case:—The legal limit of the local tax on land in Saitama Prefecture amounts to 516,628 *yen*; but the amount actually voted by the Local Assembly is only 231,305 *yen*; in other words less than one-half of the legal limit. This is the worst case, but there are many others almost equally bad. In proportion as the farmer's local liabilities are thus lightened, the merchant, the mechanic, and the manufacturer are compelled to bear correspondingly heavy burdens. Thus the *Keizai Zasshi* truly observes that the landed class, with its voice almost exclusively dominant in politics, already menaces the interests of all other classes of the people. Our contemporary deems it of vital importance for the welfare of the country to put restraints upon the self aggrandizing spirit of the dominant class. Otherwise "a dangerous type of socialists may, in no long time, make their appearance in our midst."

### PRINCE SANJO'S FUNERAL.

THE *Official Gazette* contains an Imperial Rescript, ordering that a State Funeral be given to the late Prince Sanjo. The cortége, as announced in our columns yesterday, will leave the residence of the deceased statesman in Ichibei-machi at 9 a.m. on the 25th instant, and will proceed to the temple of Gokoku, in Otowa. It was at this temple that the late Prince Arisugawa was buried in 1886. The funeral will be a magnificent affair. Preparations on a large scale have been commenced, the house formerly occupied by Mr. F. T. Piggott having been appropriated to serve as an office for the officials engaged. The cortége will pass by the following route:—down Reinan-zaka; to the right, down Yenoki-zaka, keeping the Naval Department on the left; past the front gate of the Naval Department; along the moat, and thence over Atarashi-bashi; by Uchisaiwaicho; past the front gate of the Rokumeikan; along the Moat; past Hibiya Gate, on the left; along the Moat; by Kijibashi to Iida-machi; over Iida-bashi; to the right, and over Funakawa-bashi by Yedogawa-cho, Suido-cho, and Otowa-cho to Gokokuji.

### KATO SOGORO AGAINST R. A. WILLIE.

THIS case, which is a claim for about $590 alleged to be due on a building contract, came up on Saturday in Chambers before Judge Hannen, on an order served on the defendant at the instance of the plaintiff requiring the former to show cause why the plaintiff should not receive permission to sue *in forma pauperis*. The plaintiff produced certificates attesting his poverty, and also a legal opinion to the effect that his case was, *prima facie*, one for relief. After reading the certificates and hearing Counsel (Mr. Litchfield) for the defendant, and the statement of the plaintiff in reply, His Honour granted permission to sue as requested, and directed an answer to be filed within eight days.

### MR. PARNELL AND GUTTER SPARROWS.

". . . . The miserable gutter-sparrows who were once my comrades."—Mr. PARNELL at Freshford.

Ah, yes! that the sparrows, late perched on the gutter,
No more are your "comrades" is painfully true.
'Twas a sudden vibration that set them a-flutter—
The waterspout shook and they flew,
At present their alienation is utter;
But does a complaint of their holding aloof,
Come with quite a good grace (they may possibly mutter),
From *you*—the tom-cat on the roof?

*St. James's Budget.*

### MR. T. B. CLARKE-THORNHILL.

MR. T. B. CLARKE-THORNHILL, Second Secretary of Her Britannic Majesty's Legation in Tokyo, has been appointed to the Embassy in Paris. Mr. Clarke-Thornhill is to be sincerely congratulated on this transfer to the most important among the European Embassies. His departure from Japan will take place at the end of next month, to the great regret of his many friends in this quarter of the world.

### A NOVEL OFFENCE.

FIVE leading members of the *Rikken-Jiyu-to*, Messrs. Tanaka Kaido, Kataoka Kenkichi, Shigeno Kenjiro, Ishizaki Juhei, and Ishizaka Masataka, were yesterday arraigned before a Local Court in Tokyo and fined *2 yen* each for violating the Law of Political Societies. Their offence was the act of enrolling in their Society a youth, Yoshida Yoshinosuke, whose age is below that prescribed by the Law.

### THE "TOKYO MARU."

THE *Tokyo Maru* has been successfully towed into Yokosuka harbour. What amount of damage she has suffered it is difficult, as yet, to tell, but on the whole her condition is said to be much better than could reasonably have been expected under the circumstances. Her cabin fittings will probably prove the most costly item in her repairs.

### RIDICULOUS!

"THE Government is dignified and slow like the Chinese in very ancient times." Such is the sentiment attributed to the *Mainichi Shimbun* by a local English exponent of Japanese ideas. The present Government of Japan is "dignified and slow like the Chinese in very ancient times." Is it possible to write anything more ridiculous?

### LECTURE AT THE UNIVERSITY.

PROFESSOR DR. EGGERT'S lecture, the second in the series recently announced by the German Scientific Society, will be delivered on Monday evening in the Lecture Hall of the Imperial University at 6 o'clock punctually. The subject is "The Vital Stages of Economic Development."

### JUDGE HANNEN.

WE learn that Judge Hannen has been offered and has accepted the joint offices of Chief Justice for China and Japan and Consul-General at Shanghai. It is not expected that Mr. Hannen will leave Yokohama before the close of summer.

### THE "HALCYON."

WE learn that a telegram has been received stating that the schooner *Halcyon*, which dragged her anchors and went ashore in Tateyama Bay, is "all right." This assurance probably refers to the vessel's having been floated.

### WHICH?

WE were rebuked recently by a local savant for translating Prince Konoye's title of nobility by "Prince." Our honest critic said, in *ex cathedrâ* style, "Duke, not Prince," and to silence all question, added the ideographs. Now, will this honest critic be so kind as to say why he renders the same ideographs "Prince," in the case of the late Lord Keeper of the Privy Seal. Why should it be right to say "Prince Sanjo" and wrong to say "Prince Konoye," when the Japanese title of both is precisely the same?

## *THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.*

The question of the Budget has been more than ever the absorbing topic of discussion in the columns of the vernacular press during the week. A rumour, for some time prevalent, as to the intention of the Government to dissolve the Diet, received confirmation from the speeches of Counts Yamagata and Matsukata on the 16th instant. In certain quarters, this rumour is held worthy of entire belief. The *Kokkwai* writes on the consequences of a dissolution as though that measure had been actually determined upon by the Ministry. According to those who place confidence in this rumour, the Government will order the dissolution of the Diet as soon as the debates on the Budget have been brought to a close in the House of Representatives. Another section of the public is entirely sceptical, as to the notion of dissolution. It is stated by these persons that, although a number of the Cabinet Ministers—notably Counts Goto and Matsukata, and Viscount Aoki and Mr. Mutsu—are strong advocates of dissolution, the Minister President is firmly opposed to such a course, and that he will not change his mind, unless things assume a totally new aspect. The latter of these two rumours now seems to represent the general opinion of men usually well informed about current politics. But that a considerable portion of the public seriously apprehends the dissolution of the Diet, is shown by the earnestness with which papers like the *Nichi Nichi Shimbun*, the *Yomiuri Shimbun*, and others, endeavour to persuade the Government of the unwisdom of appealing to the nation on the question of the estimates. A new House of Representatives, say these journals, would be more radical than the present one, and the Government would have either to yield to the new House or to dissolve it once more, thus engaging in a serious conflict with the nation. These papers have strong personal motives for disliking a dissolution, as their editors are members of the Diet. But still their opinions as to the effects of the measure are shared by intelligent observers of current politics.

* * *

What reception will the decision of the Lower House on the Budget meet with in the House of Peers? This is the question now eagerly asked by every one. As stated in our last weekly summary, it is generally believed that the members of the Upper House, who represent the fifteen highest tax payers in the respective localities—about 45 in number—are united in their determination to make common cause with the extremists in the House of Representatives. The latest report is to the effect that most of "the ex-Senator Members" and a considerable number of the titled members are also inclined to respect the decision of the Lower House. Yet another rumour states that Viscount Tani and a few others purpose mediating between the Government and the Representatives, and trying to induce the latter to be contended with a reduction of a few million *yen*. But this report is scarcely credible in view of the general belief that Viscount Tani is among the most radical reformers in financial questions. The general opinion thus seems to be that the Peers will show themselves favourably disposed to the reductions proposed by the Lower House. But, as some papers justly say, it is premature to attempt any definite forecast as to the ultimate attitude of the Upper House, because those who intend to oppose the decision of the Representatives are naturally slow to declare themselves.

* * *

The *Jiji Shimpo*, which usually abstains from discussing the political questions of the

Digitized by Google

day, has devoted during the present week a number of articles to the consideration of the Budget question. The object constantly kept in view by our contemporary in all these articles, is to counsel moderation to both the Government and the Representatives. Speaking of the causes of action now open to the Ministry, the *Jiji* observes that the latter may either dissolve the Diet, or refuse to give its concurrence to the reductions voted and carry out the estimates of the current year. But in order to take the first course, the Cabinet must be prepared to resign in case the new Diet is opposed to its Budget. The adoption of the second course would lead to a similar result; for, if the Government should continue year after year to reject the reductions proposed by the Representatives, it would soon find itself in an embarrassing situation. The *Jiji* further tells the Ministers of State that their ostentatious and expensive policy in the past is received by the nation with no goodwill, and that, consequently, the best course open to them at the present juncture is to yield a step to the Representatives, and at the same time to become more conciliatory in their attitude to those outside officialdom, and more simple and moderate in the exercise of their immense powers. Writing of the unwisdom of the course of policy now pursued by the House of Representatives, the *Jiji* remarks that the blunders of the Lower House are attributable to the absence of men of experience in it. There are a number of distinguished men both within and without the Government who are in every respect superior to the present members of the popular branch of the Legislature; but these men have been disqualified for presenting themselves as candidates for the Lower House by their elevation to the peerage. Had they been in the Lower House, our contemporary thinks that both the Diet and the Government would have been saved much of the present unpleasantuess and difficulty. Thus the original cause of the conflict between the Executive and the Legislature is to be attributed to the mistaken policy of the Government in "reviving the antiquated orders of nobility." In another place, the *Jiji* states that, according to its private information, the Ministry has it in contemplation to submit a revised Budget to the Diet when the present Budget comes before a conference of the two branches of the Legislature, and heartily applauds such a course of policy on the part of the Authorities. The Tokyo journal advises the members of the Diet to receive the revised Budget in a conciliatory spirit, should it be submitted to them.

* * *

The speeches delivered by Counts Yamagata and Matsukata in the House of Representatives on the 16th instant, have elicited various comments from the vernacular press. On this matter, as in every other question connected with the Budget, the papers are divided into two distinct groups. The *Kaishin-to* and the *Rikken Jiyu-to* organs, that is to say, those in favour of "the extremists" in the Lower House, criticize the speeches in no appreciative tone; while the papers that sympathize with "the moderates" either applaud the speeches or turn them into weapons for attacking the unconstitutional and impolitic course of action adopted by "the extremists." The *Hochi Shimbun* and the *Jiji Shimpo* are conspicuous for careful avoidance of any words capable of being construed into either approval or censure. This is the fourth time that the Ministry has declared its dissent from the conduct of the Representatives in relation to the Budget. By Count Matsukata's speech of January 9th, the Government told the members of the Lower House that it could not approve their proposed reductions, on account of their great amount. On February 5th Count Matsukata, and on Febrtiary 10th Count Yamagata, declared their disapproval of these reductions from constitutional points of view. On the 16th instant the Minister President and the Minister of Finance announced the Government's opposition to the procedure of the House of Representatives, on account alike of the amount and of constitutional reasons. The native papers, notwithstanding their difference of view on minor points, all agree in regretting that things have come to their present pass.

* * *

The *Jiyu Shimbun*, writing on Count Yamagata's speech, observes that it is entirely at one with the Minister President of State so far as his ideas of the national policy are concerned, but that it can by no means endorse his notions of what is required to carry out that policy. The maintenance of the prestige of the country, our contemporary admits, is very important, but the people are groaning under heavy burdens, and a reduction of 8 millions *yen* or thereabouts is a measure of urgent necessity. The Ministry says that with such a large reduction, it would be impossible to carry on the administration, but the Constitutional Liberal organ replies that, with proper economy, there should be no impossibility. The *Mainichi Shimbun*, an organ of the *Kaishin-to*, writes in a similar strain, and maintains that the reduction of the number and salaries of Government officials cannot have any effect on the prestige of the country in its relations with other nations. As to the constitutional side of the question, the *Mainichi* maintains that to vote reductions of the expenditures mentioned in the 67th article of the Constitution is not illegal, as alleged by the Government. For, in the first place, the Diet is certainly empowered by the Constitution (Articles 38 and 40) to propose amendments of laws and ordinances, and secondly, the Representatives, while voting reductions of the expenditure specified in the 67th article, do nothing more than make representations to the Government in the sense of changes of organization demanded by those reductions.

* * *

The *Nichi Nichi Shimbun*, the *Kokkwai* and the *Tokyo Shimpo* maintain the constitutionality of the views taken by the Cabinet as to the 67th Article of the Constitution. The last mentioned paper, which is generally well informed on legal matters, condemns the course taken by the extremists as unconstitutional, and observes that the maintenance of the country's prestige abroad would be seriously interfered with by the adoption of the reductions voted by the Representatives, for those reductions involve important expenditures for the completion of the military equipment of the country. The *Kokkwai*, the *Nichi Nichi Shimbun*, and others deplore the collision between the Government and the Diet, and complain that all this has been brought about by the short-sighted and unconstitutional policy of the extremists in the House of Representatives.

* * *

The untimely death of Prince Sanjo, Lord Keeper of the Privy Seal, has deprived Japan of one of the most loyal and patriotic statesman of the present era. The noble antiquity of his house, the romantic beginnings of his public life, the distinguished services rendered by him to the State, and his genial and disinterested nature, combined to endear him to all classes of the people, above other statesmen of modern times. The whole press of the country unites in paying high tributes to the singularly pure and loyal character of the great *kuge*.

* * *

There is a rumour that the *Taisei-kwai*, whose members constitute the back-bone of the moderates in the House of Representatives, will become a political party. Hitherto, the association has abstained from adopting any party programme, its object being to remain strictly independent of all existing parties. Lately, however, the members have held a series of meetings, for the purpose says rumour, of arranging matters with a view to the formal organization of a political party having a distinct platform. The principal promoters of the movement are said to be Messrs. Suyematsu Kencho, Watanabe Osamu, editor of the *Choya Shimbun*, Tanaka Gentaro, and Okada Ryoichiro. Their supposed object is not only to turn the *Taisei kwai* into a party, but to induce all the moderates to join it. Rumour further states that the new party will follow the lead of Count Ito, and in support of this assertion, we are referred to the frequent visits paid to the Count by his son-in-law, Mr. Suyematsu, the principal promoter of the scheme. That Count Ito will consent to become the leader of the party, seems scarcely worth considering, but it is quite possible that the *Taisei-kwai* members of the Diet may form themselves into a political association. The *Yomiuri Shimbun* alluding to this rumour, recommends the members of the *Taisei-kwai* to openly acknowledge themselves supporters of the present Cabinet. They are at great pains to maintain their independence of existing parties, yet in everything but name they are partisans of the statesmen in power. Their past history as well as their conduct on the question of the Budget prove this. As for the Government, the *Yomiuri* advises it to organize a political party which will support it against the opposition of the progressive parties, the implication being that it should acknowledge its connection with the *Taisei-kwai*.

* * *

The votes of the House of Representatives for the reduction or abolition of subsidies to different companies, have produced an evil effect in the financial world, the shares of those companies having fallen considerably. Business men are greatly excited, and loud complaints are uttered about the partiality of the Representatives in favour of the landed interest as opposed to the interest of the commercial class. In relation to this question the members of the Lower House are censured by the majority of the native papers. The *Hochi Shimbun*, while reproving the short-sighted policy of the House, at the same time reproves men of business for their notorious indifference to politics. Many of them might have easily procured election to the House of Representatives, had they but presented themselves as candidates. But they generally kept aloof, and are now paying dear for their habitual indifference. Thus they have only themselves to blame for the present disastrous disturbance of the financial world. They are recommended to pay more attention in future to the politics of the country.

* * *

The prolongation of the session of the Diet engages the attention of several newspapers. Two contradictory rumours are current. According to one, the session will not be prolonged under any circumstances; while according to the other, it will be extended by two or three weeks, certainly one week. The latter rumour seems to be the more credible. Meanwhile, the Metropolitan papers have written one after another urging upon the Government the importance of prolonging the session. They plead that due allowance should be made for the inexperience of the first Diet, and for the loss of time caused by the burning down of the Parliamentary buildings.

* * *

The *Kokumin Shimbun* protests against the undue importance given by the teachers of primary schools to the study of metaphysics and allied subjects. These persons are said to pore over the translation of Bain's Mental Science from year's end to year's end. They are advised to abandon impossible attempts to master the principles of a science which baffles the lifelong attacks of even born philosophers. They had better pay their attention to history and biography. A writer in the *Jiyu Shimbun* advocates the abolition of export duties. Mr. Uyeki Emori urges in the same paper the establishment of a local assembly in Hokkaido, for which a petition has been presented to the Diet by the inhabitants of the island. The *Jiji Shimpo* continues its articles on the condition of the mercantile class. Merchants occupy an inferior position in society, but greatly as our contemporary deplores such a state of things, it admits that the merchants themselves are principally to blame for the scanty respect shown to them. They are at present little better than usurers. Our contemporary recommends them to become more self-respecting and enterprising.

## *DEATH OF PRINCE SANJO.*

HIS EXCELLENCY PRINCE SANJO, Lord Keeper of the Privy Seal, expired on Wednesday night at his residence in Ichibei-machi, Azabu, Tokyo. The Prince was attacked by influenza at the commencement of the month, and by the 14th instant the malady had developed grave symptoms, inflammation of the lungs supervening, and the temperature rising to over 40°. Doctors ITO, HASHIMOTO, and BAELZ were in constant attendance, but medical skill could do nothing for the sufferer. His temperature, indeed, fell, but he gradually grew weaker, and at 4 o'clock in the afternoon of the 17th it was evident that his condition threatened to become critical. Shortly before daylight in the morning of the 18th the physicians announced that the end must come after a few hours. Intelligence was immediately despatched to the Palace, and at half-past eleven the EMPEROR repaired to the dying statesman's residence, and, entering his chamber, conferred on him the highest rank attainable by a Japanese subject (*Sho-ichi-i*)—a rank not possessed by anyone in this empire since the eleventh century, when it was held by FUJIWARA TAKECHIMARU. The EMPEROR, whose keen pain at the loss of his loved and well tried servant, was strongly betrayed by his broken voice and trembling hand, said, as he conferred the rank :—

> In the early years of my reign, while I was yet a youth, you were my chief aid. It was you who, not shrinking from a post of weighty responsibility, lent me assistance so constant, so steady, and so true that you were to me as a teacher and a parent. Never from first to last did you falter or fail in the discharge of your large trust. Your services are a model for all subjects of our time. In recognition of your noble fidelity, I confer on you the First Class of the First Rank.

The document containing these gracious words was laid beside the dying man's pillow. Prince SANJO, though so weak that all movement of his limbs had for some time back seemed impossible, deeply touched by this signal mark of his Imperial master's favour, raised his head and joined his hands in token of gratitude. Chamberlains were also sent on behalf of the EMPRESS and the EMPRESS DOWAGER, and from morning until night the stream of inquirers never ceased, Ministers of State, nobles, all the dignitaries of the Government and all the leading residents of Tokyo hastening to pay their respects to a man whom the whole nation honours. Shortly after eleven o'clock in the forenoon intelligence of the Prince's critical condition was conveyed to the House of Peers, and the House rose forthwith. The Prince lingered throughout the day in a semi-conscious condition, and breathed his last at 7.15 p.m.

Prince SANJO was born in February, 1837, and had therefore just completed his fifty-fourth year when death overtook him. The second son of SANJO SANEKAZU, Second Minister of State (*Udaijin*) in the reign of the Emperor NINKO, he belonged to the *Kuge* class, and was thus a direct descendant of one of the former occupants of the Imperial Throne. From his earliest childhood the deceased statesman breathed the atmosphere of reactionary conservatism that for years had been permeating the intellect and colouring the fancy of his country's greatest men. It was a reaction against the indolent luxury begotten of three centuries of peace; against the gradual disappearance of the pure and simple old creed under the magnificence and pageantry of Buddhism; and above all, against the subtle despotism of the TOKUGAWA institutions which, while securing national tranquillity, held the necks of the *Samurai* in a yoke of iron, and destroyed every opportunity of individual distinction. The young noble was only sixteen when PERRY'S four ships cast anchor off Uraga. If anything were needed to inflame his conservative ardour, it was this event, for while, by the EMPEROR'S express command, the Priests of the Imperial Shrines at Ise were offering prayers to heaven for the expulsion of the barbarians, the SHOGUN'S Ministers in Yedo concluded a treaty of commerce and amity with the new comers. The empire was stirred from end to end by this act. Everywhere men began to prepare for battle. Forts were erected, cannon cast, and the leaders of the reactionary movement loudly proclaimed their belief that the TOKUGAWA Regent had betrayed the national cause, and bartered the safety of the country for his own quiet tenure of power. It was at this time that six men, destined to live in the pages of Japanese history, began to be recognised as working in a common cause. They were SANJO, IWAKURA, KIDO, SAIGO, ITAGAKI, and SHIMAZU SABURO. Their object was to overthrow the TOKUGAWA dynasty, and to restore the executive power to the EMPEROR. Strongly supported by the feudal barons of Echizen, Uwajima, and Tosa, as well as by the whole body of the Court nobles, their design would probably have matured at an earlier date had not the reins of authority in the Yedo Court fallen into the hands of the astute and uncompromising II KAMON, who became Prime Minister during the minority of TOKUGAWA IYEMOCHI. II shrunk from no exercise of abitrary power to crush the disaffection that he detected growing up against his Prince, but he fell under the sword of the assassin in 1861, and the conservative party renewed its strength. In 1863, the EMPEROR'S advisers judged that the time had come for an open effort. SANJO, then only 26 years of age, and ANE-NO-KOJO, were sent as envoys from the Court in Kyoto to the Court in Yedo. The message they conveyed was that the administration must be thoroughly reformed; that active steps must be taken to restore tranquillity to the public mind, and that preparations for the expulsion of foreigners must be set on foot. The SHOGUN himself was required to repair to Kyoto within a few months, in order to lay an account of his government before the Throne. This message amounted to an ultimatum, and was construed in that sense by the Bakufu rulers. They put forth their whole strength, and by various measures, too long to be recounted here, succeeded in recovering a part of their influence in Kyoto. Many nobles, still uncertain as to the issue of the conservative movement, and still, perhaps, only lukewarm in their sympathy, were induced to join a pro-Tokugawa coalition in Kyoto. Once more the counsels of the Imperial Court acknowledged the direction of the Shôgunate, and the Emperor, KOMEI, was induced to order the condign punishment of SANJO and six others, recognised heads of the Restoration policy in that city. Care was taken, however, to warn the seven of their peril, and they fled to Chôshiu, remaining there for two years in seclusion, when they were obliged to take refuge in Chikuzen. Not until 1866, when the death of the Emperor KOMEI placed the present Sovereign on the Throne, were SANJO and his friends able to emerge from their concealment, and to resume openly the efforts which they had never ceased to carry on secretly in the conservative cause. It is not necessary to describe here the now familiar events of the following two momentous years. SANJO took a leading part in the Councils of State, and at the fall of the Shogunate and the restoration of peace, was chosen to superintend the affairs of the eastern portion of the empire and was also nominated Captain of the left wing of the Imperial Guards. In 1868 his skilful discharge of mediatory offices when the adherents of the TOKUGAWA assumed a threatening attitude, won for him fresh renown, as well as appointment to the high post of Second Minister of State (*Udaijin*). Shortly afterwards the EMPEROR named him First Minister (*Sadaijin*), and in 1870 he became Prime

Digitized by Google

Minister (*Daijo Daijin*), which office he held until succeeded by Count ITO in 1886. It is not easy to say at what stage of his career Prince SANJO exchanged the anti-foreign feeling of his early years for the strong liberality of his policy in office. Like all the prominent Japanese with whom he shared the former sentiment in pre-Restoration days, he doubtless recognised, at a very early period, that the traditions of bygone centuries had become utterly untenable under the altered conditions of modern international intercourse, and that the way to preserve Japan's independence was not by isolation, but by intelligent progress and friendly comity. Certainly, from the time of the Restoration no one more ardently encouraged the spirit of wholesome liberalism than did the deceased statesman. A man of singularly sweet manners in society, he nevertheless knew how to maintain on all occasions the dignity of the old Court noble and the imperturbable calm of the *Samurai*. On his resignation of the post of Prime Minister in 1886, he became Lord Keeper of the Privy Seal, an office involving no active share in administrative affairs. His advice, however, continued to be valued by the EMPEROR and sought by his former colleagues as much as ever, and the confidence felt in his sagacity was again demonstrated in 1889, when, by special desire of his Sovereign, he consented once more to assume the temporary leadership of the Cabinet at a season of much political perplexity. The loss of such a man in this critical era of the nation's history will be keenly felt and universally mourned. The foundation stone of constitutional government was laid by Prince SANJO and his intrepid fellow-thinkers a quarter of a century ago, and it is sad that he, the most renowned survivor of the illustrious band, should have died at a moment when the smooth working of the new system had not yet come in sight. In the West, a statesman has seldom passed the threshold of his career at the age of fifty-four, but in the Japan of Prince SANJO'S prime, stirring events crowded so rapidly upon each other's heels that men could not await the wisdom of ripe years before playing for lasting fame or signal failure. Prince SANJO was only thirty-three when he attained the highest administrative post in the Empire, and during the first fifteen years of the *Meiji* era, fifteen years demanding such an exercise of constructive statesmanship as had never been called for at any epoch in the history of any other nation, he directed his country's affairs with wonderful sagacity and judgment. No honour that Japanese can bestow on his memory will be in excess of his merits.

## *SELF-ELECTION.*

THE discussion in the Upper House on the 12th and 13th was of an interesting and novel character. In the House of Peers sit forty-six members representing the Cities and Prefectures into which the empire is divided. These members are elected, one in each City and Prefecture, "from among and by the fifteen male inhabitants thereof"—we quote from the Imperial Ordinance relating to the House of Peers—"of above the age of full thirty years, paying therein the highest amount of direct national taxes on land, industry, or trade." Last year, when the election of a representative for Wakayama Prefecture was held under this law, it was found that the two candidates at the head of the list had received 7 and 6 votes respectively. Among the ballots cast for the recipient of 7 votes, Mr. MAYEDA KENSUKE, one bore his own signature, so that, had he not voted for himself, his opponent, Mr. NAKANISHI KOSABURO, would have tied with him. A protest was immediately lodged by the latter, but the election authorities decided that since Mr. MAYEDA had already been declared duly elected, the only course for his opponent was to present a petition to the House of Peers as provided by law. This was accordingly done. The petition reached the House, and being received by the Qualifications Committee, was fully examined, together with the answer put in by Mr. MAYEDA. The Report of the Committee, submitted to the House on the 12th instant, became the subject of debate on that and a portion of the following day. The point chiefly relied on by the complainant was that the ideograph *go*, employed in the compound *gosen* (election from among and by), embodies the signification of "mutual," and that, since to vote for oneself is obviously opposed to every notion of mutuality, such a proceeding could not have been contemplated by the law. The Qualifications Committee, however, took a different view. They contended, in the first place, that no provision of law could be cited explicitly prohibitory of balloting for oneself, and that if the framers of the law had intended to interdict such a practice, they would certainly not have failed to include a distinct provision to that effect. This view evidently included one of the chief points taken by Mr. MAYEDA in his defence, namely, that whereas the law ordained that the election should be made by fifteen men in each City and Prefecture, the number voting would really be only fourteen if each member were forbidden to ballot for himself. The Committee further held that the right of voting is absolutely unrestricted, so long as the person voted for is duly qualified, and that if a man believes himself to be the most suitable candidate, the act of giving effect to his conviction by voting for himself does not, in principle, differ from the act of offering himself for election. The Committee's report to the House, and Mr. HOZUMI'S accompanying explanation, were specimens of close and careful reasoning. But Mr. KATO HIROYUKI made a powerful speech in opposition. He prefaced his arguments on the special point at issue by asserting that the tendency of the time was to rely too much on the letter of the law—a tendency which Japan had received from her intercourse with the West, inasmuch as her own laws in former times were by no means of a minute character, and had to be largely supplemented by moral principles. He did not, of course, condemn exactness of legal phraseology or strict interpretation of it, but he pleaded that the spirit ought not to be sacrificed to the letter, and by a subtle chain of reasoning he demonstrated that a man who votes for himself violates both the spirit of the law and the doctrines of morality, since his return to Parliament ought to be decided entirely by his constituents, whereas by voting for himself he encroaches upon their domain. The question certainly lends itself to debate, but for our own part we fail to see how the Qualifications Committee could have decided in any other sense. Delicate points of morality such as Mr. KATO raised, have not yet been brought within the sphere of practical legislation. Laws, as he truly put it, are framed so as to accord, as closely as possible, with the principle of securing to every one the full enjoyment of his own rights within the limit of non-interference with equally full exercise of corresponding rights by others. But to assert that because a man votes for himself he impairs the absolute right of choice vested in his brother-electors from a legal point of view, is a proposition exceedingly difficult to admit. Certainly it may be argued with force on the other side that unless a man loses his vote by becoming a candidate for election, he is perfectly entitled to cast it for himself. He possesses the right of candidature, and he possesses also the right of voting. But by the act of becoming a candidate he publicly declares his conviction that he is better fitted for election than any one else, and he must therefore vote either for himself in obedience to that conviction, or for some one else in defiance of his conviction, or abstain from voting altogether. After all, however, such a problem is not to be finally solved by the rules of logic. It must be appealed to the tribunal of morality, where the inevitable verdict is that, even though the written law be silent, the unwritten law forbids a man to cast a vote in his own favour. The Qualifications Committee, guided solely by written law, was in a manner compelled to reject the ground of Mr. NAKANISHI's demurrer, but the House of Peers, free to base its judgment on higher considerations, did not hesitate to adopt the view of the President of the University (Mr. KATO). Its decision was

Digitized by Google

that the ballot cast by Mr. MAYEDA for himself could not be counted. Thus the two candidates were brought to the position of having received an equal number of votes, a contingency clearly provided for by the Law of Election, where it is laid down that in such a case the elder of the two shall be declared elected. Mr. MAYEDA, having the advantage by nine years, accordingly took his seat in the House. The incident is very interesting. We are not aware that such a question has ever before been raised and publicly discussed.

## *THE VERNACULAR PRESS ON COUNT YAMAGATA'S SPEECH.*

THE Tokyo press of on Tuesday does not discuss Count YAMAGATA'S speech in the House of Representatives with such earnestness as might have been expected in view of the gravity of the situation. More than one leading journal alludes to the manner in which the speech was delivered. Count YAMAGATA'S voice is not well suited for oratorical purposes, and the novelty of addressing a large audience seems to disturb his self-possession. When he spoke in the House on the 10th instant, he depended on his memory to reproduce statements doubtless seriously considered beforehand, but unfortunately he was compelled to have recourse to manuscript in the middle of his speech. Of course the effect was bad. Moreover, it afforded an opportunity to some bathos-loving folks to assert that the Minister, appreciating the gravity of the struggle in which the Government was about to engage—a struggle which they described as despotism against freedom—trembled as he would not have done in the face of bullets and bayonets! Taught by previous experience, Count YAMAGATA did not attempt, on the 16th inst., to speak from memory. Indeed it is not likely that he would have made the attempt under any circumstances, for every word of his speech possessed value on its own account no less than on account of its context, and the Minister President knew well that what he said would be accepted by the nation as a declaration of the deepest import. Accordingly he read the speech from first to last, and though, by that means, he was able to avoid every symptom of embarrassment, he did not succeed in making himself heard throughout the House. There was keen anxiety not to lose a word. One member took the precaution of begging the Minister to speak as loud as possible, and many of those in the back of the House crowded forward into more convenient positions, but still the difficulty of catching what was said proved very painful. The highly scholarly nature of the language employed, abounding as it did in words of classical flavour, made strong and distinct elocution particularly desirable, and without that adjunct the speech failed to move the audience as it would certainly have done otherwise. The *Hochi Shimbun* notes this with regret, and says that the noble thoughts and earnest purpose of the address deserved to elicit greater sympathy. Count MATSUKATA, on the other hand, read out his declaration in a sonorous, clear voice, and every syllable he uttered was audible even in the galleries. As for the attitude indicated by the speeches, there does not appear to be any disposition on the part of the vernacular press, thus far, to challenge its correctness. It is acknowledged (*Nichi Nichi Shimbun*) that the Government is master of the situation, and that if it rejects the reductions voted by the House, the latter will be without recourse, while if it dissolves the Diet on the ground of unconstitutional procedure, the country cannot complain. A suggestion is made, indeed, that the Government may have connived at the unconstitutional issue, but there is no question that the responsibility of bringing about such an issue rests with the House. The whole conduct of the latter does not escape severe criticism (*Tokyo Shimpo*). It is alleged that the Opposition has led the Representatives open-eyed into a situation where they trample under their feet the Constitution and the Law, and treat the charter of national liberty as so much waste paper. At the same time, two points of congratulation are noted. The first is (*Choya Shimbun*) that the country now finds itself at length in a position to receive from Ministers of State distinct announcements of their policy. Never since the Restoration had any such explicit statement been made of the programme pursued by the Government as that laid before the House of Representatives on the 16th instant by Count YAMAGATA. This is justly regarded as a conclusive proof that the old barriers between rulers and ruled have been broken down, and that the people are now definitely admitted to a share in the Government. The second point is (*Hochi Shimbun*) that a square and unequivocal attitude has finally been assumed by the Cabinet towards the financial problem. At the earlier stages of the House's radical procedure, the Government appeared disposed to take its stand on the Constitutional pedestal only, and the public was perplexed to discover whether a disposition existed to oppose or to countenance economies of magnitude if proposed in legal form. Now, however, all doubt is at end. The Government has come out openly on the question of amount as well as on that of legality, and has declared that it can never consent to such reductions as those proposed by the Budget Committee. With regard to Count MATSUKATA'S speech the point which seems (*Mainichi Shimbun*) to excite most curiosity is his statement that, if the amended Budget be adopted by the House, the Government will be compelled to take suitable measures in accordance with the Constitution. There are many Constitutional methods of procedure in the premises, but the course thought most likely is an appeal to the EMPEROR.

## *THE BUDGET COMMITTEE'S REPORT.*

THE House of Representatives having now pledged itself finally to the scheme of financial reform recommended by the Budget Committee, it becomes a matter of great interest to know exactly what that scheme is, and how far its elaboration falls within the legal province of the House. We therefore print, elsewhere, a translation of the Committee's Report. By consulting the tables accompanying the Report, which were published in these columns on the 7th instant, our readers will already have gathered what is the arithmetical extent of the reductions advocated by the Committee. The question, however, has ceased to be one of amount and become one of principle, and to understand the latter point of view it is necessary to consult the explanatory document now presented. From this it will be seen that, beginning with the Cabinet itself and proceeding downwards, the Committee has materially changed the organization of every Department of State, the Army and Navy excepted, and has further taken upon itself to alter the whole scale of salaries of civil servants, from the salary of the Minister-President of State to the salary of tenth-class *hannin* officials. The changes of organization involve not only offices and bureaux but also officials, and extend even to the abolition of the Metropolitan Police Bureau. Against the expediency of the latter abolition we have ventured to express a very strong opinion, but with regard to the proposed redistributions and reductions of bureaux and diminutions of *personnel*, we cannot, as outsiders, advance any definite view. Speaking generally, an excessive staff is the bane of all Japanese organization, whether official or private, and we strongly sympathise with every earnest endeavour to lessen the number of officials engaged in carrying on the administration of the empire. But when we look at the scale of salaries recommended by the Committee, it is quite impossible to avoid the conviction that this advice comes from men whose absorbing anxiety to effect economies has blinded them to every sound theory of Government. That the Prime Minister of an empire like that of Japan should only be allowed one thousand sterling annually, and the Cabinet Ministers eight hundred, is parsimonious enough, but may possibly be defended as part of a system which aims at securing for the State the services of men of independent means. The heads of the administration in Great Britain do not, in every case, attach much importance to the question of emolument, nor are their salaries sufficiently large to support the state they keep. It is for the Japanese themselves to determine whether they will make the experiment of cutting down the pay of their Ministers of State to pittances which even a country like Hawaii would

Digitized by Google

deem too small. When, however, we come to consider the salaries proposed for the Judiciary, we understand how reckless has been the method of the Committee. The Bar is a profession which men embrace primarily as a means of earning a livelihood, rather than with the hope of gaining distinction. No profession requires greater talent and perseverance for its successful pursuit, and to no profession should it be more earnestly sought to attract men of the highest qualifications. The Bench is the goal of the Bar. The State which seeks to secure for its people the first desideratum of civilization, namely, a thoroughly efficient and incorrupt administration of Justice, will be careful to invest a seat on the Bench with every element of distinction and emolument that can attract expert ability and encourage patient industry. Such is the principle followed in Great Britain, and its results may be soberly pointed to as incontrovertible evidence of its soundness. But it is not the principle followed in Japan. The miserable salaries of Japanese Judges, their comparatively low official rank and the consequent scantiness of the consideration in which they are held, deter really able men, and convert the Bench from a goal of high ambition into an asylum for mediocrity. What we should have expected of the House of Representatives, so soon as it approached the question of the Judiciary, was reform in the sense of raising the status of the Bench and increasing the wretchedly low salaries of the Judges and Magistrates. But the House of Representatives has proceeded on precisely the opposite tack. It has cut down the salary of the President of the Supreme Court—the Lord Chief Justice of Japan—to £650, and it has proposed a scale of emoluments according to which the pay of the eight ranks of Judges would vary from £85 to £400 annually. To an official receiving a salary of 41.66 *yen* monthly the House of Representatives would entrust the duty of deciding questions that concern the persons and properties of Japanese subjects. The strange nature of this schedule becomes even more apparent when we observe that the President of the Administrative Court would stand on the same level, in respect of emoluments, with the Chief of a Section in the Audit Bureau, and that a Judge of the Seventh Rank would receive less pay than the Second Superintendent of a Police Station. It is impossible to reconcile such a system with any admitted principles of sound administration. If Japanese legislators imagine that their Judiciary deserves no more respect or consideration than it has received at the hands of the Budget Committee, they proclaim to the world their own incapacity to appreciate the vital tenets of civilized society. This alone is enough, and more than enough, in our opinion, to condemn the whole Report of the Committee, without noting that the Report proposes to give the same salary (1,500 *yen* annually), to Engineers of third rank as to Privy Councillors, who, in the words of the Constitution, are, with the Ministers of State, "the EMPEROR'S most eminent assistants," and that it proposes to give to a Judge presiding over a Division of the Supreme Court, less pay than to a Secretary in a Prefectural Office.

As to the legality of the changes recommended by the Report, there is nothing to be said. Being recommendations only, they evidently fall within the legitimate scope of the Committee's functions. Their adoption by the Diet is, of course an entirely different matter, for although the law imposes no manner of restriction on the advice tendered by a Committee to either House, it does very distinctly prescribe the limits within which the legislative authority of the Houses shall be exercised. With that question, however, we are not immediately concerned. Our object is merely to show our readers what kind of counsel the House of Representatives received from its Budget Committee, and in what kind of spirit these economists approached the problem of financial reform. It will be recognised hereafter, we are persuaded, that the work of the first Japanese Diet was in no sense serious legislation. Not upon making laws are the present representatives of the people bent, but upon re-making the Government. No fault is to be found with them for that. The struggle has been inevitable for years. An oligarchical Government cannot exist side by side with representative institutions. Sooner or later Japanese Cabinets must come to rest upon a party basis. But the means resorted to by the House of Representative to effect this great political change confirm the often repeated assertion that, whether the present Government derives its mandate from the clans or from the nation, it represents an abler and safer administrative machine than anything which the parties in opposition seem capable of furnishing.

## *THE TROUBLE BETWEEN ENGLAND AND AMERICA.*

IT is inevitable that misconceptions should grow up in the public mind with regard to an international controversy extending over a number of years and conducted with the usual privacy of diplomatic etiquette. On the other hand, nothing can be more essential than to keep the original issues clearly in view during the late stages of such a discussion, when prejudice and obstinacy, engendered by the mere fact of long argument, inter fere to obscure the truth. The dispute which recently threatened to develop an acute tendency between the United States and Great Britain. illustrates these general principles. A great majority of the public seem to be to-day persuaded that the claim advanced on America's side is the right to close the Behring Sea, and that the position taken by Great Britain is a denial of that right. But in point of fact the United States Government never advanced such a claim. Without examining step by step the history of the discussion, we need only refer to the official declaration of the American Secretary of State in 1889 which, in explicit terms, "denies that the United States ever claimed Behring Sea to be a closed sea." From the White Books containing the whole correspondence which began in October 1866 and is still going on, we learn that the United States has never disputed the time-honoured precept of international law, namely, that the limit of territorial waters extends only to a distance of one maritime league seaward. It is true that the rule offers a striking and almost laughable example of the tenacity of conservatism. Founded on a calculation of the utmost range of great guns such as the world possessed in remote centuries, it is still revered, though the security it affords against modern ordnance is absolutely *nil*. Nevertheless, we cannot find that the Washington Government ever questioned this old-fashioned law. The sole claim advanced has been that every law must have exceptions, and that special considerations indicate a part of the Behring Sea as fitly constituting an exception. What are the considerations?

In the south-eastern quarter of the Behring Sea lie two small islands, Saint Paul and Saint George. Acquired by the United States in 1867, they are and have been for long years the favourite haunt of immense quantities of fur seals. The animals live on the islands from spring to early autumn. There the cow seals come to drop and rear their young, and there the bull seals congregate for breeding purposes. The killing of seals on these islands is permitted within certain limits, namely, that no female seal nor any seal less than one year old shall be taken; that no seal must be taken in the waters adjacent; and that, during a fixed space of years, not more than seventy-five thousand shall be annually killed at Saint Paul and twenty-five thousand at Saint George. It is in consequence of the application of the second of these rules that the dispute between England and America has arisen, and the rule itself is founded upon a principle which, according to the view of the United States Government excludes the south-easterly portion of the Bering Sea from the scope of the one-league provision of international law. Stated broadly, that principle is that seals can be killed profitably on land alone and that all killing of them at sea is destructive. When hunted on land, the greatest care is exercised to kill only young bulls. These are found in groups segregated from the rookery, and being driven inland, are killed with clubs. But when hunted in the water, males cannot be distinguished from females, or pregnant females from those

Digitized by Google

that are not so, and further, a percentage of the fatally wounded animals are lost. In order, therefore, to avert extermination of the seals—a result now said to be actually in prospect—it becomes essential to prevent their slaughter at sea. They are found at sea under well known circumstances: first, when *en route* for their breeding grounds, and secondly, when seeking for food in waters adjacent to their breeding grounds. It is not known exactly in what places the animals spend the winter, but it is known that in the spring and early summer they migrate northward to the rookeries spoken of above, and that on their way they pass through various narrow straits in the Aleutian Islands, where they can be pursued without great difficulty. The rookeries reached, the males remain constantly on or near the shore, the females alone making cruises to obtain food for their young. In either case hunting at sea is claimed to be fatal to their preservation. Accordingly, the United States Government asserts that the necessity of preserving a property valuable to the whole world constitutes a sound reason for exempting the islands of Saint Paul and Saint George from the operation of the ordinary one-league rule of international law. Precedents for such exemption are not wanting. Thus, when NAPOLEON was confined at Saint Helena, Great Britain extended the territorial waters of the island to a distance of eight marine leagues from the shore in all directions; control over parts of the ocean 600 miles wide is exercised by Australia; and for the protection of the Pearl Fisheries of Ceylon, no limit whatsoever is respected. It is, in fact, abundantly evident that the hard-and-fast application of the one-league limit has not been, and is not, admitted by Great Britain herself in practice, and, according to America's contention, its application in the south-easterly portion of Behring Sea would surely entail the ultimate extermination of the seal-fishery in that region.

These considerations were fully set forth in the correspondence that followed the original acts against which England protested; namely, the seizure of Canadian fishing schooners in the waters adjacent to the seal islands. America made the seizures on the authority of her treaty with Russia in 1867, by which she acquired Alaska together with, as she claimed, a stretch of water including a considerable portion of Behring Sea. In reply to England's protests, the Government at Washington urged the question of preserving the fisheries, and after long negotiation, Lord SALISBURY, acting in conjunction with the Russian Representative in London, agreed, in 1888, "to establish by mutual arrangement between the Governments interested a close time for fur seals between April 15th and November 1st in each year, and between 160° of longitude west, and 170° of longitude east, in the Behring Sea." The necessary provisions were to be embodied in a convention, and an Act of Parliament was to be introduced so as to give power to the British Authorities to observe the convention. Lord SALISBURY, however, made the conclusion of the convention depend on Canada's acquiescence, and Canada declined to acquiesce. Her grounds were that the views of the United States Government as to the precautions necessary for preserving the seal fisheries were greatly exaggerated; that no such drastic measures need be adopted; that no prospect of the fisheries becoming extinct was discernible; that the destruction of seals caused by pelagic sealing was insignificant in comparison with that caused by their natural enemies; that the United States possessed and could prove no right of property in seals found at a considerable distance from shore, and that the waters over which America claimed jurisdiction had not really been converted into territorial waters by her treaty with Russia. With regard to the last two points, no serious discussion was raised at this stage. The problem of America's treaty rights and rights of fishery in the disputed waters had been tacitly set aside, and it was recognised by both sides that "the sole object of the negotiations was the preservation of the fur-seal species for the benefit of mankind, and that no consideration of advantage to any particular nation, or of benefit to any private interest should enter into the question." But when the chances of a settlement looked thus hopeful, the British Government, finding that the Canadian experts differed materially from the American with regard to the resolutions on pelagic sealing necessary for the protection of the species, and that, unless the American view could be proved, the people of Canada and British Columbia would stoutly protest against being excluded from a valuable occupation, had no resource but to suspend judgment. The possible correctness of America's position was not denied, but Sir JULIAN PAUNCEFOTE was instructed, last spring, to urge that the only way to satisfy public opinion was to submit the questions of pelagic sealing and preservation to full inquiry by a commission of experts. Pending the result of such inquiry, an arrangement was proposed by England for the protection of the seals, the chief provisions being that, within limits defined but of ample width, all killing of seals was to be forbidden during nine months of the year, and that, during the remaining three months, sealing vessels were to be interdicted from approaching the islands within a range of ten miles. The report of the Commission was to be prepared and presented within two years from the time of the Commission's convention; on receipt of the report, the High Contracting Parties were to proceed to determine international regulations in respect of seal fisheries; and in the event of failure to agree about such regulations, arbitration was to be resorted to. This proposal the American Government rejected as embodying a system of protection wholly insufficient in the view of that Government. Mr. BLAINE'S words are worth quoting:—

> It is perfectly clear that if your claim for British vessels to kill seals within 10 miles of the Pribylov Islands, directly after the mothers are delivered of their young, should be granted, the Behring Sea would swarm with vessels engaged in sealing—not forty or fifty, as now, but many hundreds, through the summer months. If that privilege should be given to Canadian vessels, it must, of course, be conceded at once to American vessels. If the rookeries are to be thrown open to Canadians, they would certainly, as matter of common right, be thrown open to citizens of the United States. The seal mothers, which require an area of from 40 to 50 miles from the islands, on all sides, to secure food for their young, would be slaughtered by hundreds of thousands, and in a brief space of time there would be no seals in Behring Sea. Similar causes have uniformly produced similar effects. Seal rookeries in all parts of the world have been destroyed in that way. The present course of Great Britain will produce the same effect on the only seal rookery of any value left in the waters of the oceans and seas of the globe. The United States have leased the privilege of sealing because only in that way can the rookeries be preserved, and only in that way can this Government derive a revenue from the Pribylov Islands. Great Britain would perhaps gain something for a few years, but it would be at the expense of destroying a valuable interest belonging to a friendly nation—an interest which the civilized world desires to have preserved.

On the other hand, America asked whether," in order to promote a friendly solution of the question, "Great Britain would make for a single season the regulations which Lord SALISBURY in 1888, consented to make permanently," on condition of Canada's agreement. Lord SALISBURY replied that "it was entirely beyond the power of HER MAJESTY'S Government to exclude British or Canadian ships from any portion of the high seas even for an hour, without legislative sanction." This reply of course drew from the American Government a denial of the accuracy of the term "high seas" as applied to the waters in question, and so the discussion reverted once more to the rights possessed by America in the Behring Sea. Meanwhile, it should be added, the United States Government had refused to restrain its cruisers from seizing British sealing vessels within the disputed limits, and the refusal had led to a formal and solemn protest (June, 1890) that "HER BRITANNIC MAJESTY'S Government must hold the Government of the United States responsible for the consequences that might ensue from acts which were contrary to the established principles of international law." It was at this stage that Lord SALISBURY proposed arbitration, and received from the United States, not a general refusal, but a reply that the bases of arbitration must be fully considered and conferred upon by the two Governments, and could not be summarily laid down as they had been by Lord SALISBURY.

Our information as to the accurate course of the negotiations extends no farther. The four points, however, which the above *resumé* makes clear are:—that America has never sought to close Behring Sea; that an agreement satisfactory to all parties

Digitized by Google

would undoubtedly have been concluded in 1888, had not Canada dissented; that the grounds of America's contention represent a principle endorsed by the tendency of modern civilization, namely, the principle that nations should render each other every possible assistance to preserve and develop properties valuable not to one country alone, but to the whole world; and finally that Great Britain, while fully endorsing that principle, is uncertain as to the measures necessary for putting it into practice in this particular case, and hesitates to pledge herself to a programme which, according to her own experts, errs on the side of excessive caution, and thus excludes her subjects from harmless participation in a lucrative pursuit. It is inconceivable that where so much is clear and simple, a peaceful adjustment can be delayed much longer.

Meanwhile, another tribunal has been invoked to pronounce upon the legality of the seizure and confiscation of British sealing schooners outside the one-league limit in Behring Sea. An appeal has been made by the owners of one of the confiscated vessels, from the Territorial Court in Sitka to the Supreme Court of the United States, and public interest is strongly excited by the prospect of an international discussion of five years' standing coming before a bench of Judges whose verdict the whole world would respect. We fear, however, that public expectation will be disappointed in this matter. The strong probability is that the Supreme Court will decline to assume jurisdiction within territory forming the subject of international dispute. This is not the first occasion on which the United States Supreme Court has been required to consider a case falling within such territory. Some years ago a suit, brought to recover a tract of land in a portion of Alabama concerning the title to which international discussion was in progress, came before the Supreme Court on a writ of error. The Judgment rendered by the Supreme Court was as follows:—

> In a controversy between two nations concerning national boundary it is scarcely possible that the courts of either should refuse to abide by the measures adopted by its own Government. There being no common tribunal to decide between them, each determines for itself on its own rights, and if they cannot adjust their differences peaceably, the right remains with the strongest. The judiciary is not that department of the Government to which the assertion of its interests against foreign Powers is confided; and its duty commonly, is to decide upon individual rights according to those principles which the political departments of the nation have established. If the course of the nation has been a plain one, its courts would hesitate to pronounce it erroneous.
>
> We think, then, however individual judges might construe the treaty of St. Ildefonso, it is the province of the court to conform its decisions to the will of the legislature, if that will has been clearly expressed.

After referring to the several Acts of Congress in reference to the disputed territory, the judgment continues:—

> After these Acts of sovereign power over the territory in dispute, asserting the American construction of the treaty by which the Government claims, to maintain the opposite construction in its own courts would certainly be an anomaly in the history and practice of nations. If those departments which are entrusted with the foreign intercourse of the nation, which assert and maintain its interests against foreign Powers, have unequivocally asserted its rights of dominion over a country of which it is in possession, and which it claims under a treaty; if the legislature has acted on the construction thus asserted, it is not in its own courts that this construction is to be denied. A question like this respecting boundaries of nations, is, as has been truly said, more a political than a legal question; and in its discussion, the courts must respect the pronounced will of the legislature."

## *BEER.*

WITHIN the past few days two accounts have been laid before the public by Brewing Companies. The first is the Account of the "Yebisu" Beer Company, submitted to the shareholders at the half-yearly meeting on the 8th instant. This Account showed that the beer brewed during the second half of last year amounted to 19,604 gallons, and that the beer in stock on June 30th was 59,800 gallons. The sales during the half year aggregated 36,600 gallons, so that the Company commenced operations on January 1st with a stock of 42,564 gallons. The other figures laid before the meeting were these:—

Dr.

| | |
|---|---|
| Shares | Yen 450,000.00 |
| Payments in advance | 1,777.31 |
| Monies owing | 3,017.42 |
| Temporary Loan | 22,255.00 |
| Written off towards preliminary expenses | 1,400.00 |
| Reserve Fund | 934.00 |
| | Yen 479.383.73 |

Cr.

| | |
|---|---|
| Unpaid Shares | Yen 282,420.00 |
| Buildings, Plant, Machinery | 124,949.27 |
| Preliminary Expenses | 12,853.49 |
| Cash on deposit | 522.96 |
| Cash lent | 200.00 |
| Cash in hand | 840.22 |
| Bills to collect | 4,244.73 |
| Beer in Stock | 21,340.82 |
| Stores, bottles, &c. | 20,853.49 |
| Loss | 11,324.48 |
| | Yen 479,549.46 |

In the Report the Directors say, amongst other things:—"From general appearances in June and July of 1890 there was good hope of a large sale, but owing to mercantile depression caused by the prevalence of cholera, the high price of rice, tight money and so forth, unexpectedly bad results have been produced." In consequence, a call is made on the shareholders, accompanied by the following statement:—"In commencing operations in 1890 the annual sales were estimated at about 10,000 *koku* (400,000 gallons approximately) and arrangements were made on that basis of calculation. Malt, hops and bottles had to be purchased from Europe, and to provide for any accidents that might befal shipments *en route*, and especially to have an ample supply of bottles, as well as to obtain a reduction in price by making large purchases, these various articles were ordered in considerable quantities, in accordance with the estimate of brewing 400,000 gallons of beer annually. But encountering such bad results as to sales—only 70,000 gallons were sold during the months March to December, 1890—the working expenses have begun to eat into the capital. Further, the amount paid up on shares (168,000 *yen*) was absorbed in the cost of buildings, machinery and preliminary expenses, so that a sum of only 30,000 *yen*, approximately, remained as working fund. This having proved insufficient, an advance had to be obtained from the Bank. Under such circumstances, it is plain that a call on the shareholders must be made."

The other Report is that of the Japan Brewery Company, Limited. It covers the same period, and shows a very different result, namely, a profit of 16,000 *yen*, in round numbers, out of which, after making due deductions on account of depreciation of buildings, machinery and plant, and after placing a substantial sum to the reserve fund, a dividend of 6 per cent. for the half year was declared, making the total dividend for the year 11 per cent. The contrast between the two Reports is very striking. We refer to them in detail because of the general interest which the beer question has for persons in the Yokohama Community. Last year the contest between the "Kirin" and the "Yebisu" Beers seemed likely to be very acute. Opinion was divided as to their relative superiority, and for a moment the "Yebisu" Beer found a coterie of strong supporters. But public opinion gradually pronounced a distinct verdict, as was proved in the first place by the fact that the "Kirin" Beer received not only the highest medal in its section at the Industrial Exhibition, but also the *Fiji Shimpo's* gold medal, and in the second, by the share market reports; for whereas the "Yebisu" stock went down from 50 per cent. premium to 33 per cent. discount, the "Kirin" remained steady at 30 per cent. premium. The Report just published by the "Yebisu" Directors would seem to fully confirm the share quotation for the stock of that company, and the accounts of the "Kirin" Company are even more eloquent in the other direction. The conclusion we draw from these comparative results is that no room exists in Japan for two first-class beer-breweries at present. The brewing of cheap beer is carried on too largely. The future of the "Yebisu" beer looked gloomy enough when its Report was published a week ago, and its fate seems fairly sealed now that the Report of its competitor proclaims such a signal victory for the latter. It has to be remembered that the same adverse circumstances operated to the disadvantage of both alike during the half year under review, and that they both appeal to the same clients; yet while the sales of the one returned a net profit of sixteen thousand *yen*, those of the other involved a loss of eleven thousand, a total difference of twenty-seven thousand *yen* in six months.

## *THE OSAKA WATERWORKS QUESTION.*

IT is impossible to help sympathising with the unfortunate people of Osaka, in the absurd position to which they have been brought by lending a too ready ear to the clamour of certain local agitators, in the matter of the projected waterworks for the city. It will be remembered that in September last, when cholera had slain several thousands of the inhabitants, and when a calamitous fire had destroyed some 630,000 dollars worth of property, the people once again cried out to their rulers for the waterworks which, if Governor TATENO'S wise counsel had been followed in 1887, would long ere this have been in full operation. Thereupon, Governor NISHIMURA started in haste for the capital, and, after an incredibly short absence, returned with the glad tidings that the Imperial Government had consented to the granting of a subsidy equal in amount to one-third of the whole estimated cost of the waterworks. It might have been supposed that this splendid and prompt success would have been followed up by vigorous action. But not a bit of it. The very next thing the public heard was that the opinions and proposed methods of the Governor and his advisers were being questioned and disputed in the council-chamber of the city government. Weeks upon weeks were wasted in wrangling about such ridiculous questions as whether earthenware or wood might be substituted for iron as the material of the water-pipes, and in futile amateur prying into other matters of detail which had been fully investigated and reported on, years before, by professional experts. The whole time up to the New Year was thus muddled away without anything being done. Now, when the question has been reapproached, it appears that the earthenware-pipe agitators are again to the front, and that their noisy representations have betrayed a large section of the public into an attitude of opposition to the very Governor who has proved himself their best friend, and whose vigorous and successful action at the outset ought to have ensured to him the lasting gratitude and confidence of the whole community. It appears that the impostors who have thus beguiled their fellow-citizens into listening to one of the stupidest proposals ever put before intelligent men rest their case upon the assertions that earthenware pipes are only about one-third as costly as iron pipes and are at least as well able to resist bursting pressures; that there is an obvious advantage in preferring home-made to imported products; that earthenware pipes are more durable than those of iron; and, lastly, that they are better for the health of the consumers. There is just enough flavour of truth about these plausible statements to catch the ear of a public wholly uninformed on such matters. But that they are in reality rotten and misleading can be made evident by a few explanations which even a schoolboy may understand.

As to the question of cost, for example, it may be true enough that, if it were practicable—which it is not—to use earthenware distributing-mains in a high-pressure town-supply, the first cost of iron pipes would be much greater than that of earthenware pipes. But this is not the way to look at the matter, seeing that the only true basis of comparison is, obviously, the cost of the pipes after being laid in their positions underground, ready for work, with full provision for the numberless connections and attachments that are necessary parts of a city supply. Thus considered, the case has a very different aspect. The precautions which, even in places where earthenware pipes *can* be used as water conduits, have to be taken, in order to protect the brittle material against shocks of all kinds, unequal settlement, surface traffic, pressure of superincumbent matter, and so on, greatly exceed in cost those which suffice where iron is used. Again, the joints are fully four times as numerous, and need to be made with extraordinary care. In short, the above and other details would, in the case of a town reticulation, eat up so much money that, even if other considerations did not forbid the substitution of earthenware for iron, it is certain that practice would prove the economical theories of the Osaka pretenders to be more imaginary than real, and the saving of cost to be but a fraction of what is claimed. The statement, secondly, that the Owari factories can turn out, at any reasonable cost, earthenware water-mains of from four to twenty-four inches diameter, of such perfect form, freedom from cracks and flaws, and high tensile strengths, as to be able to bear the tests that are necessary in a high-pressure system, hardly deserves serious notice. It is contradicted by the experience of the world and by the commonsense of every intelligent person. Even could the manufacturing difficulties be overcome, the cost, instead of being one-third that of iron, would probably equal if not exceed it, while the further expense of laying would show a clear difference in favour of iron. Thirdly, with respect to the advantage that is claimed for the use of home-made instead of imported materials, while the principle thus advocated is admirable enough, its extension to this case of earthenware versus iron would be distinctly wicked. For the reasons above given, and for others to be named presently, any such course could only end in disaster, failure, and a sinful waste of public money. The claim of durability has to be next dealt with, bearing in mind that the durability of a pipe must be measured by its power to resist conditions tending to bring about cracking or fracture, as well as by the lasting character of the material of which it is made. As far as the former quality is concerned, it almost goes without saying that earthenware is "not in it." At any of the strains and shocks to which water-mains and pumping-mains in a town are always liable, the cracks and breaks of earthenware pipes would be twentyfold the number in the easc of iron, while at every little earthquake-shock the streets would be flooded with water. As to imperishability of material, the claim on behalf of earthenware might have been worth listening to some three or four decades ago. But the modern system of coating iron pipes with a pitchy varnish, scientifically applied, protects them so effectually from impairment by oxidation that pipes which have been thus coated are found to be, practically, in as good a condition as ever, both inside and outside, twenty years after being laid underground, and to be destined apparently to last for a further indefinite period. The varnish is even found to be proof against the destructive properties of peaty water. Another great protection against rust is the adoption of the "constant" system, rapidly becoming universal, under which the mains are always kept full of water, instead of being, as formerly, exposed alternately to moisture and air. Lastly, the argument that earthenware is to be preferred to iron on sanitary grounds depends for its validity on the answer to the question whether internal incrustation of a harmful kind is to be apprehended in the case of iron. But the only incrustations to be considered are those produced by oxidation, or by the deposits of carbonates and sulphates of lime and magnesia which prevail where the water of the supply is a hard water; and, although deposits of either class are in certain ways inconvenient and objectionable, it can hardly be maintained that they are actually unwholesome. Moreover, the extreme softness of the water which is to be supplied to Osaka disposes of all risk of incrustations due to earthy salts, while, as to oxidation, we have already shown that danger in that line is nowadays virtually eliminated by varnished pipes and a constant service.

To the above analysis, showing the fallacy of every claim advanced by the advocates of earthenware for the Osaka water-pipes, it is well to add two fatal objections which finally dispose of the question. One of these is the practical impossibility of making joints for earthenware pipes which will stand and remain watertight under the high pressures and other conditions that prevail in a town supply. The other is the unsuitability of earthenware pipes for the countless connections to valves, hydrants, &c., as well as for the far more numerous attachments of service-pipes to houses and premises, all of which are necessary in a system of water-distribution in a city. It is occasionally found practicable and advantageous to use earthenware for pipe-con-

Digitized by Google

duits bringing water from a source to a town, provided there is a constant fall, without pressure. But the absurd notion of extending their employment to high-pressure town-mains had never, we believe, been seriously entertained until it was put forward last autumn by the quacks of Osaka.

It is really painful and discreditable that a great sanitary work, so closely affecting the health, lives, and properties of the inhabitants of the second city in the empire, should be obstructed by the crass ignorance and selfish motives of a few agitators whose title to be heard on the subject is about as great as would be that of a jinrikisha-coolie on vivisection or double-stars. If the advantages of decentralization and local autonomy were to be measured by the effects of the new system in the case of the Osaka Waterworks—effects which have already caused the loss of four precious months, and the creation of a ridiculous position of which all intelligent Japanese must be heartily ashamed—it would be hard indeed to say anything in favour of the change. It is difficult, however, to believe that, when the truth comes to be known, as sooner or later it must be, the good sense of the citizens will fail to assert itself. If the people of Osaka are alive to their real interests in the matter, they will lose not an hour in hooting out of the city, or at least consigning to silence and obscurity, the false prophets who, in the guise of public benefactors and economists, are seeking to make fools of the community and a fiasco of the waterworks, merely that they may satisfy their own personal greed. No condemnation can be too strong for such trickery. The great question is, are the machinations of a few impostors, setting at naught all the experience of generations, to be allowed to stave off yet longer, if not to defeat altogether, the proper carrying out of a great public work aimed at bestowing the blessing of substantial protection from pestilence and fire on some half-million of their fellow citizens? We shall be surprised if the good folks of Osaka do not soon answer that question, in a very decided way.

## *GENERAL BOOTH'S PHILANTHROPIC SCHEME.*

TO those who have been accustomed to hear the Salvation Army referred to only in terms of disdain as a body of rather ill-behaved fanatics, it must have appeared passing strange that their leader should obtain the alliance and support, in his new scheme, of princes, dukes, bishops, and lords. But such is the news that successive mails bring out to us; that the Prince of WALES has intimated his great interest; that the Duke of FIFE has subscribed a large sum; that Cardinal MANNING is warmly sympathetic; that Canon FARRAR is active in support and help. A careful study of the scheme itself will explain much of this phenomenal success. It is drafted by a capable and clear-headed organizer, who has surveyed life from every side, and who, to ardent personal conviction, joins an openness to advice and to new light, which will help him to avoid many a quicksand. The reader rises from its perusal glowing with enthusiasm and anxious to aid, with hands or purse, the great strategist who thus outlines his proposed campaign against the forces of Sin and Despair. If the war is to be carried on successfully at all, it must be on lines such as are sketched by BOOTH in his "In Darkest England, and the Way Out." As the fraction of a tenth has long been in use to denote the uppermost ring of society, so now it is the lowest ring, the submerged tenth, who are to be dealt with. The problem is how to rescue these from the slough of despond in which they are sinking, and to give them firm footing again on solid ground. To aid them from time to time with food and clothing, so as to stave off starvation, is a useless and even harmful proceeding: something must be done to restore their self-respect, interest them in life, and get them enlisted on their own behalf in the struggle against idleness and vice. General BOOTH has devised a threefold solution of the enigma; he proposes to found a Poor Man's Métropôle, such as has been developing for many years in his slum shelters. To this would be allied a Home Colony at the mouth of the Thames; and, capping all, a Colony Beyond Seas. In this last the nineteenth century would see, what it has been accustomed to admire as a phenomenon of the remote past, a colony founded on a religious-industrial basis, with "Work and Pray" as its motto. The classes which General BOOTH seeks to educate into religious and industrial habits are (1) "those who in a month would all be dead from sheer starvation were they exclusively dependent upon the money earned by their own work, or which they receive as interest or profit upon their capital or their property, and (2) those who by their utmost exertions are unable to attain the minimum allowance of food which the law prescribes as indispensable even for the worst criminals in our gaols." In all, a multitude of three million human beings, paupers, habitual criminals, prostitutes, the homeless and the out-of-work, who are now a festering sore in the midst of our civilization. The time has come, he warns us, to lay aside the complacent indifference of an inhuman mechanical political economy, and to work ardently for the social salvation of these unfortunates exactly as the crew of a lifeboat works for the rescue of the shipwrecked.

General BOOTH mentions several essentials of any scheme that would be successful. It must change a man, if he fell by his own fault; it must change his circumstances if these proved too severe a strain upon him; it must be as big as the evil with which it has to cope; it must be immediately practicable; it must be permanent; it must not demoralize those whom it seeks to benefit; nor must it benefit one class at the expense of another. The great panacea on which he relies is the wholesome medicine of work. All these poor outcasts are to be admitted on the simple condition that they are willing to work and will conform to discipline. The meat and drink which the new scheme is to provide for all comers will not be given as charity; but will be the recompense of honest work. When a man enters one of the shelters and is provided with a warm supper, a comfortable bed, and a good breakfast, he must not leave until he has done some honest work which shall be a fair return for the food and shelter he has received. At Whitechapel, a labour factory based on these principles and now for some time in operation, has been a distinct success. Its seventy or eighty inmates, who have been received into it from the streets, have almost invariably behaved with diligence and propriety, and have shown themselves civil, willing, and satisfied. It is the purpose of the scheme to extend this organization indefinitely, until every populous centre shall have its Captain of Industry, an officer specially charged with the duty of supervising unorganised labour, and utilizing the waste human material in his district.

A corps of communication will be necessary to keep the staff fully acquainted with the needs of each district. Accordingly a Household Salvage Corps is to be created from the numbers of the unemployed, members of which, in uniform, and under strict discipline, will undertake a house-to-house visitation, with the purpose of collecting broken victuals, old clothes, and all the useless material that housekeepers are glad to get rid of. A body of two thousand men would be thus called into existence, who, besides their function as refuse-collectors, would also constitute an agency for the distribution of parcels and newspapers, and for the employment of labour. Glaziers, chimney-sweeps, carpenters, and other jobbers could be engaged from the workshops through this convenient medium, which would act in conjunction with the Labour Bureau. After a period of service in the Salvation Factory or Labour Yard, a limited number of picked workers would be sent down to the Farm Colony. Here as builders and bricklayers they would erect their own shanties, and set up for themselves just as if they were emigrants in a new country. Supplied with spades, seeds, and roots, they would grow fruit and vegetables; would raise poultry and bees, and breed rabbits and pigs. For a certain time new arrivals would receive no wages in money, only lodgings and rations; and, if they proved themselves indifferent or lazy, they would continue to be merely fed and clothed. But those

Digitized by Google

who showed capacity and diligence would in time receive a small extra allowance, and become eligible for promotion to the rank of petty officers. The whole scheme would be a benevolent despotism; from the time a man entered he must obey or leave. Recreation would not be neglected, both indoor and outdoor. All sorts of field sports —cricket, football, quoits, and bowls— would be encouraged, and a reading-room and library would be established, with a recreation hall. No drinking saloons would be permitted within the bounds of the colony, and no Sunday work; while attendance on religious services, though encouraged, would not be compulsory.

This Farm Colony would thus be a great hive of industry for training men to work efficiently. From cobbling or "translating," as it is technically called, and refitting old clothes, up to paper-making, dairy-farming, and horse-breeding, almost every useful industry would be represented. After passing a period of probation in the Farm Colony, workers would have the option of embarking on board the Salvation Ship, and emigrating to a foreign land, possibly South Africa. Here everything being prepared for their arrival, they would have ample opportunity, in a few years, of clearing off the initial debt they had incurred in receiving, not only a free passage, but a house, stock, and land, and food for several months. Thus the hardships of a first settlement in a strange new land would be smoothed down, the emigrant would be shielded from temptation, and every chance would be given him of making a new man of himself before the world. Truly a grandly worked-out scheme, practical in details, and Utopian only in its vastness. No wonder that it has fascinated so many leading London philanthropists.

There are other subsidiary schemes to be worked in conjunction with this: Homes for discharged prisoners; City and Country Homes for the proper treatment of inebriates; Rescue Homes for women; Children's Crèches, where children whose parents are out at work may be cared for; a Seaside Health Resort; and a Poor Man's Bank to supersede the costly pawn-broker who battens upon the poor man's needs. Generally speaking, indeed, General BOOTH seeks to restore in our large cities that social organization to be seen in village communities, where every man's character and personal needs are known to his neighbours high and low. The whole grand scheme involves an initial outlay of one hundred thousand pounds sterling, and an assured annual income of thirty thousand pounds; in fact, about a million sterling of capital. It is a great venture, but, considering the promoter and all the wonders that he and his fellow-workers have wrought in the past, few will be bold enough to predict failure as the certain issue. The possibilities of a holy enthusiasm, conjoined to a faculty for organization, are illimitable.

## *IMPERIAL PARLIAMENT.*

HOUSE OF PEERS.—FEBRUARY 13TH.

The House met at 10.50 a.m. under the presidency of Prince Konoye. The President announced that as certain documents requisitioned from the Cabinet had not yet arrived, the debate on the Qualifications Committee's Report *re* Mayeda Kensuke must be postponed for the moment. Meanwhile, the Minister of State for Foreign Affairs would address the House as previously notified, in answer to questions put on the 20th of December by Viscount Tani and others. The questions referred to the speech delivered by Viscount Aoki in the House of Representatives on the 17th of December, when he was understood to have said that Treaty concluded between Japan and the United States of America in 1879 had been "as fruitless as foam upon water." It was enquired by what process the Treaty had become fruitless, and whether it had ceased to have any practical existence. Viscount Aoki explained that reference to the stenographic report of his speech would show that he had alluded only to the Treaty's failure to go into operation. Unfortunately the Treaty had not been entirely satisfactory. One of its articles, the 10th, had provided that the Treaty should not become effective until Japan's Treaties with the other Western Powers were revised in a similar sense. That is to say, in order that the Treaty should have practical effect, Japan must revise her Treaties with other States, and the revision must be of the same character as that embodied in the American Treaty. It was on this account that the Treaty had borne no fruit in practice, but he had not intended to imply that it had ceased to exist. It had in fact, been duly ratified by both sides, and therefore its continued existence was a matter of course. He trusted that this explanation would be clearly understood. Viscount Tani said that his question had been dictated by considerations arising out of the motion proposed by him in the House with regard to the recovery of the Empire's Tariff Autonomy. In making that motion he had relied on the existence of the Treaty with America. Otherwise the motion would have been idle. It was very satisfactory to learn that the Treaty still existed. He had not desired to put any embarrassing question to the Minister of State for Foreign Affairs, and he thanked Viscount Aoki for his explanation. The House then proceeded to debate the motion of Mr. Obata Yoshiine for a Representation to the Government, urging the advisability of appointing a Committee to revise the Civil and Commercial Code. Mr. Obata said that the leading merchants of Tokyo had presented a petition setting forth various points of conflict between the provisions of the Commercial Code and Japanese customs. He quoted some of the points, and argued that owing to the time assigned for revision having been insufficient, the Codes required further examination before enforcement. He therefore moved that the Government be asked to submit the Codes once more to a Revising Committee. Mr. Watari Masamoto opposed the motion. He had been a member of the Revision Committee. It was true that the work of revision had been expedited for a special purpose. But the Committee had carefully collected information as to the customs existing throughout the country, and had endeavoured as far as possible to bring the new laws into conformity with them. Owing, however, to the mutual segregation of the various fiefs in feudal times, local customs differed considerably, and no laws could be framed so as to satisfy the whole nation in this respect. The discrepancies still observable between the provisions of the Codes and the old customs of the country, were inevitable results of national progress. The operation of the Commercial Code had been postponed for three reasons: first, that to enforce it before the Civil Code would be inconvenient; secondly, that the interval between its promulgation and the proposed date of enforcement was not sufficient; and thirdly, that its phraseology was difficult to understand. Now, however, they were asked to vote a Representation claiming that the purpose of postponing the Commercial Code had been its revision. He wished to ask the mover of the proposition and its supporters whether they imagined that the work of revising the 3,000 and odd articles of the Civil and Commercial Code could be accomplished between the present time and January 1st, 1893, so as to allow a sufficient interval between the promulgation of the revised laws and their enforcement. He went on to deal at considerable length with Mr. Obata's speech and the terms of the proposed Representation. After the mid-day recess Mr. Obata Yoshiine again spoke, denying the correctness of the reasons alleged by Mr. Watari for the postponement of the Commercial Code. He himself (Mr. Obata), during the debate on the question of postponement, argued against the conflict between Japanese established customs and the provisions of the Code. As to the assertion that two years would not suffice for purposes of revision, he retorted that the Revision Committee, of which Mr. Watari was a member, had gone through 15 articles a day, and if a similar Committee were now elected, the work of revision could be completed in a few months. Mr. Murata Tomotsu supported the motion. He had always been opposed to certain provisions of the Codes, and he welcomed the opportunity to revise them. He contended that they disturbed Japanese customs, and in support of this contention he pointed out that, under these Codes, a child might sue its parent or a wife her husband. He adduced ten reasons for revision. Mr. Komatsu Fukimasa having spoken in support of the motion, the closure was voted. Mr. Obata's motion was then put and carried. The President then informed the House that the documents relating to Mr. Mayeda Kensuke having been received, it appeared that his age was 55 years, whereas Mr. Nakanishi Kozaburo —the petitioner—was only 46. Unless, therefore, an objection was raised, Mr. Mayeda, as the elder, should be considered elected. The House voted in that sense, and rose at 2.10 p.m.

FEBRUARY 14TH.

The House met at 10.50 a.m. under the presidency of Count Higashi-Kuze. The business before the House was a memorial from Osaka Confectioners praying for a reduction of the confectionary tax. Mr. Wakao Ippei supported the memorial. He explained that Japanese confectioners, as a class, were very poor. Of the total number (207,000 approximately), about two hundred thousand conducted their business on too small a scale to have a single employé, and of the remaining seven or eight thousand very few were in a position to maintain more than two or three assistants. To impose a heavy tax on persons living thus from hand to mouth seemed a faulty policy. A discussion arose as to the advisability of postponing the debate so that members might have leisure to examine the memorial carefully, and consider the subject to which it related. Objection being raised that printed copies of the document had been distributed some time previously, it was answered that owing to the large number of the memorials thus distributed, there had not been time to investigate them all. Mr. Ozawa Takeo urged the advisability of forwarding the memorial as speedily as possible, and quoted from Count Ito's Commentary on the Constitution in support of that view. Mr. Miura Yasu objected to such a quotation, and alleged that Count Ito's commentary merely embodied the views of an individual. He thought that any precipitancy on the part of the House would have the effect of detracting from the authority that ought to attach to its endorsement of a memorial. The House was something more than a mere channel of communication between the people and the Government. Viscount Tani had not anticipated that so much discussion would arise in connection with this matter, or that any question as to the construction of the Constitution would be raised. Under the circumstances, he felt called on to say a word. The House was doubtless aware that one result of the Confectionary Tax has been to bring punishment on a number of defaulters, but surely the object of taxation was to raise money, not to produce law-breakers. When this memorial

Digitized by Google

was sent up, its fate had become the theme of a popular song:—

Karaku tomo
Imasara nanto
Shô-yuya
Umaku tôsu ga
Koie ga okwashii.

They might gather from this the suffering caused by the tax. Marquis Hachisuka objected strongly to the notion of the House making any alterations in the memorial. He thought it should be forwarded as it was, or not at all. The House voted against postponing the debate, and decided that the memorial should be forwarded to the Government without any change in its form. The House rose at 2.30 p.m.

FEBRUARY 16TH.

The House met at 10.50 a.m. under the presidency of Count Higashi-Kuze. Marquis Hachisuka, President of the Memorials Committee, made several announcements with regard to memorials of which copies had been circulated among the members. The House then proceeded to debate a motion by Baron Ozawa for a representation to the Government in connection with the subject of the national survey. Baron Ozawa explained his proposal in a long and able speech. He said that the absence of proper maps of the country was accounted for by the mutual isolation of the various fiefs in feudal times, and the care exercised by each clan to prevent other clans from obtaining a knowledge of its topography. Not until 12 years ago had any effective scheme of survey been inaugurated, and it was understood that, at the present rate of procedure, seventy years must elapse before the nation could hope to possess accurate maps. He then entered into a comparative examination of the different scales adopted by cartographists in Europe, and showed that whereas a survey on a scale of $\frac{1}{20000}$ costs 560 *yen* per square mile, a scale of $\frac{1}{5}\frac{1}{000}$ costs only 368 *yen*. He thought that the latter would suffice in Japan's case. After dwelling on the absolute necessity of an accurate and trustworthy survey, he proposed that the Government be moved to increase the present appropriation for surveying purposes from 200,000 to 300,000 *yen* annually, by which means the work might be completed in about 40 years. He was well aware that, in view of the public desire to effect economies in the expenditure of the State, his proposal might meet with opposition, but he thought that a sum of a hundred thousand *yen* might be employed for such a purpose without much difficulty, and he explained that it should be left to the Treasury to make the appropriation from whatever year seemed most convenient. Viscount Kano Hisanobu opposed the measure. He did not deny the advantages of having an accurate map of the country, but he thought that there had been too great a tendency of late years to accelerate progress at dangerous speed. There were before their eyes in Tokyo many matters which called far more loudly for immediate action than the question of a national survey. The fires which annually laid hundred of houses in ruins indicated that they needed a new style of building, and the bad water supply, which encouraged and intensified epidemics, taught them how much they wanted water works. Most desirable would it be to spend great sums at once on these urgent necessities, but they had to proceed steadily and with due regard to their resources. For his own part, nothing would please him more than to vote an ample appropriation on account of the survey, but he felt that they must accurately balance the weights of their needs, and divide their financial strength accordingly. Mr. Furuichi Kintake supported the proposal. He dwelt in detail on the advantages of having accurate maps, and on the inconveniences resulting from their absence. Several members spoke to the motion, and the House finally adopted it by 49 to 46. The House rose at 3 p.m.

FEBRUARY 18TH.

The House met at 10.45 a.m. under the presidency of Count Higashi-Kuze, and proceeded to consider a Representation founded on petitions for the reduction of the *Saké* tax. Viscount Matsudaira opposed the Representation, urging that the tax on *Saké* was a special impost of ancient standing, and that it differed radically from the tax on confectionary, a petition for the reduction of which the House had already forwarded. The debate had continued a short time when the President announced that news had just been received to the effect that Prince Sanjo was at the point of death. The House therefore rose (11.20 a.m.) at once.

FEBRUARY 19TH.

THE House met at 11.50 under the presidency of Count Higashi-Kuze. The President announced that Prince Sanjo had died the preceding evening at 7.15 p.m. The Chief Secretary, Mr. Kaneko, read the following message of condolence, which it was proposed to send in the name of the House:—"This House deeply regrets the decease of its member, Prince Sanjo, Lord Keeper of the Privy Seal, First-class of First Rank, Grand Order of Merit, and reverentially offers its condolences." The House voted the message and agreed to suspend further business as a token of respect for the memory of the illustrious deceased.

HOUSE OF REPRESENTATIVES.—FEB. 13TH.

The House met at 10.30 a.m. Mr. Mutsu, Minister of State for Agriculture and Commerce, addressed the House in reply to questions put by Mr. Takahashi and others with reference to the subsidy to the Tea Company and the future policy of the Government in respect of aid to industry. Mr. Mutsu said that he had been for many days prevented by illness from attending. Tea and Silk were Japan's principal staples of export. The trade in both had grown rapidly during the Meiji era. Rice fields had been converted into tea-gardens, and a multitude of persons had devoted themselves to the industry. America was Japan's chief customer for tea. Unfortunately the tea-growers, obeying a short-sighted policy, had developed great carelessness in their methods of production, and in consequence the reputation of Japanese tea had suffered materially. This had led to the passing of a law by America interdicting trade in tea of inferior quality, and Japanese producers, not a little alarmed, had corrected their methods more or less. Finding, however, that individual exertions did not suffice to effect a thorough reform, the producers had petitioned the Government, the result being the issue of regulations under which guilds were formed, and inspection offices established at Yokohama, Kobe, and at the Central Guild's head-quarters. Experts had also been sent by the Guilds to China and India, and by the Government to Europe and America, to obtain information of a useful character. The immediate consequence of the improvements thus effected had been a marked increase in the volume of exported tea. Owing, however, to difficulties connected with exchange, the trade had been seriously affected in 1887, and no less than three million catties of tea had been stored up awaiting export. Great losses had been incurred by the producers, and it became evident that some active measures must be adopted. Accordingly, a general meeting of representatives from the various tea-producing districts had been held last year, when it was decided to prepare black tea and brick tea for export to America and Russia, and introduce reforms in the method of preparing green tea. In order to carry out these projects it was necessary to form a company, but owing to the heavy losses incurred in recent years, the projectors were unable to grapple with the financial part of the scheme. They had applied to the Government for three hundred thousand *yen*, and their application had been endorsed by nearly all the Prefects of the districts concerned, who urged in strong terms the advisability of lending a helping hand to the embarassed industry. The Government, fully informed by its inquiries that distress existed, and moved by these appeals, had decided to grant the new Company a sum of two hundred thousand *yen*, accompanying the grant with a charter. This charter, the petitions of the producers, and the memorials of the Pretects, had been laid before the House. Speaking briefly, the object of the Government had been on the one hand, to open a new route for the sale of Japanese tea in Russia, and on the other, to develop by direct export the routes already opened in America. With regard to the second question, namely, the future policy of the Government in respect of grants-in-aid, it was easy to lay down many principles of political economy applying to the general problem, but no hard-and-fast statement could be made as to the cases in which aid would hereafter be granted, and those in which it would be withheld. The rule of the Government would be only to devote the public money to purposes urgently calling for assistance in the interests of national prosperity. There were two methods of giving aid to industries, the direct and the indirect methods. The direct method was to make grants of money and to reduce taxes. The indirect method was to increase import duties so as to preclude the competition of foreign products. The indirect method seemed to be chiefly in vogue in Western States, but the direct was also resorted to. Japan had never employed the indirect, nor, indeed, was she in a position to do so while her present Treaties remained in force. Whether it would be to her advantage to do so, was a grave question demanding the fullest investigation. On the other hand, she had freely used the direct method. In some cases excellent results had been visibly attained; in others results were not yet apparent. Instances of the former were the maritime carrying trade and the railways. The principle of devoting the proceeds of taxes paid by the people at large to the development of industries by which individuals profited, was of such doubtful propriety that the Government desired, as far as possible, to leave trade and industry entirely independent. Its general and fixed rule would therefore be to abstain from all assistance, except in very special cases where strong reasons existed indicating the public utility of official aid. In conclusion, he reminded the House that whatever may have been the case in the days of Bureaucratic Government, grants-in-aid of industry could no longer be made in accordance with the opinion of an individual Minister or a group of Ministers. The Imperial Diet would have to be consulted and to consult about the expediency of such grants. The policy approved by the Government ceased, consequently, to be a matter of paramount importance. In answer to further questions he explained that the Company, not having yet raised the funds prescribed by its charter, had not commenced business. The two hundred thousand *yen* granted by the State was still lying untouched in the Bank of Japan, and the Government possessed supervisory power in respect of its disbursement. The company was endeavouring to obtaining subscribers from as many districts as possible, but owing to the straitened circumstances of the tea-producers and the bad times, it was difficult to achieve that object. There was not the least apprehension of the contingency suggested by Mr. Inugai, namely, that the subsidy would be divided up among the promoters before the company came into actual existence. The Government had frequently pressed the promoters to use expedition, and it was understood that the first instalment of the subscription money would be completely paid up during the present month. After various minor questions had been put and answered, the House rose for the mid-day recess, and re-assembled at 1.05, under the presidency of Mr. Tsuda. Viscount Katsura, Vice-Minister for War, and Paymaster Noda entered into an exhaustive analysis of the various items in the War Department Budget, showing that the reductions, proposed by the Budget Committee were wholly impossible in practice. During the latter part of Mr. Noda's speech more than one member of the opposition attempted to interrupt him on the ground that his explanations were superfluous. But he insisted upon leaving nothing unexplained that might save the House from pursuing the fatal policy of wholesale reduction. Mr. Hayakawa Riyosuke, as an urgency motion, proposed that a special Committee be appointed to re-

Digitized by Google

examine the Army Section of the Budget. The House refused to grant urgency. Mr. Inouye Kakugoro then delivered a long and eloquent speech urging the House to pause before it applied crippling reductions to the Army of the Empire, His Majesty's guards, the nation's protectors, and an indispensable weapon in the fight of Treaty Revision. The speech was listened to with close attention and evident pleasure, but while admiring its eloquence and loftiness of idea, the Opposition plainly remained uninfluenced by its arguments. Mr. Shiota Okuzo followed in behalf of the Budget Committee's Report, after which the closure was moved and carried. It was then proposed, and after a short discussion agreed, that the voting should be by the usual method of standing, instead of by ballot. The amendments of Messrs. Sasada and Suge were put and lost, and the Budget Committee's Report was voted by a large majority. The House then proceeded to the Naval Department Section. Captain Honjuku, Government Delegate for that Department, spoke in opposition to the various reductions proposed, explaining that every possible *sen* had already been economised in the Naval Department, and that further reductions would be fatal to its efficiency. The debate on this section of the Budget had lasted only 25 minutes when the closure was voted, and the amendments of Messrs. Sasada and Suge having been rejected, the Budget Committee's Report was adopted. The House rose at 3.50 p.m.

FEBRUARY 14TH.

The House met at 10.45 a.m., and proceeded to debate the Judicial Department Section of the Budget. The Government Delegate, Mr. Mitsukuri, said that, judging from the previous votes given by the House, it was evident that the Report of the Budget Committee would be adopted in the case of the Judicial Department also. He would not, therefore enter into a long explanation, but merely confine himself to pointing out the necessity of not interfering with some of the appropriations which the Committee proposed to reduce. He then entered into an examination of various items, as travelling expenses, allowance to law students studying abroad, grants in aid of private law schools and so forth. Two speeches were then delivered in support of the Committee's Report, but several members whose names had been given in as desiring to speak on the other side were found to be absent, and the debate languished. Finally, the amendments of Messrs. Sasada and Suge having been put and lost, the House adopted the Budget Committee's Report, and then passed to the Educational Department Section. Mr. Tsuji, Vice-Minister of Education, asked the House to pause before adopting the Committee's Report on this section of the Budget. The reductions suggested would entail the closing of several important schools, and he did not think that they could consider the people sufficiently educated as yet to profit thoroughly by representative institutions. The Female Normal School, which they proposed to eliminate from the estimates, seemed to him an essential institution for educating the mothers of the Japanese nation. He dwelt also on the advantages of the Upper Middle Schools and the School of Music, and said that if the support of the Government were withdrawn, these schools would certainly cease to exist, and the 4,925 pupils now receiving instruction there would be suddenly deprived of the means of learning. The House took a recess at 12 o'clock, and re-assembled at 1.30 p.m. Mr. Hamano Noboru spoke in support of an amendment proposed by him that the appropriation for students travelling abroad should be increased by ten thousand *yen*, in order to defray the expenses of students specially despatched to examine and obtain instruction in the new curative methods invented by Dr. Koch of Berlin. He said that ten thousand lives were lost by phthisis every year in Japan, and that the evil effects of this terrible disease, as well as of others which Dr. Koch's methods were intended to deal with, descended from parent to child. He ridiculed the idea advanced by some that Dr. Koch was a mere theorist, and he referred to the difficulty and danger of allowing uninstructed practitioners to employ his methods. Mr. Amano Tameyuki opposed the portion of the Committee's Report relating to the schools. He severely criticised the fact that the Committee had taken no thought for the consequences of this measure while recommending it. Mr. Tachiiri Kiichi spoke in the same sense. Mr. Utsunomiya Heiichi supported the Report, and alleged that to withdraw State assistance from the schools in question would help to develop independent educational enterprise. The closure was here put and lost. Mr. Takata Sanai, though approving the Committee's Report in general, condemned it in the particular of the schools. The closure was then voted. Mr. Hamano Noboru's amendment was put and carried. The various sections of the Educational Department were then separately put to the vote, with the result that the Report of the Budget Committee was adopted in every case, except that of the Female Normal School, the Music School, and the Upper Middle Schools. With regard to these schools the House rejected both the Budget itself and the Committee's Report, and after some discussion decided to refer the question for further examination by a Special Committee. The House rose at 4.10 p.m.

FEBRUARY 16TH.

The House met 10.35 a.m. The President announced that two Bills had been sent down from the Government, embodying additional appropriations to the Naval Department and to the Finance Department. The House then proceeded to debate the section of the Budget relating to the Department of Agriculture and Commerce. Mr. Mutsu, Minister of State for that Department, made a brief speech, explaining that, in view of the evident resolve of the House not to pass the Budget as submitted to it, he should refrain from any lengthy comments. He could not, however, keep silence altogether, as such a course might be construed to mean approval of reductions in contemplation, whereas, in truth, he was distinctly opposed to them. Mr. Kondo Jumpei asked the House to reject all the amendments as well as the Original Budget relating to the Department of Agriculture and Commerce, and to vote for the abolition of the Department as a separate institution, and its amalgamation with the Bureau of General Business in the Home Department. Mr. Makino Kozo supported the Committee's Report. Mr. Yamada Buho also supported it. He said that they found themselves in a field without an enemy, and he should therefore refrain from setting forth the merits of the Report. But he wished to say a word about the relations between the Government and the House. There could be no concealing that their relations had become very much strained—strained bevond all expectation. The House had hoped that Mr. Mutsu, being at once a member and a Cabinet Minister, would have helped to smooth matters. But this hope had been disappointed. The Government had long been in the habit of crushing parties formed by the people, and its course had begotten the present opposition Still the Government seemed to retain its old traditions. One of two plans only now seemed open to the Government, either to dissolve the Diet or to accept the Budget Committee's Report. In such a conjuncture they might well look for some assistance from Mr. Mutsu, who was their member as well as a Minister of State. The closure was then put and carried, and the House, having rejected the amendments of Messrs. Sasada and Suge, voted the Budget Committee's Report. The debate on the Communications Department then commenced. Mr. Takagi Masatoshi wished to ask the Government Delegate whether it was true that, in making purchases, the Department accepted the tenders which approximated most closely to the sums fixed by the Budget, and rejected lower tenders. Mr. Mayejima, the Delegate, said that, in respect of small articles, such was not the case, but that in respect of large and important purchases there were reasons for adopting that course. Mr. Takagi said that such a vague answer left him in perplexity as to how he should vote. Mr. Mayejima said that Mr. Takagi might have perfect confidence in what he had been told. Mr. Koma Shiku supported the Budget Committee's Report. Mr. Tanaka Shozo said that he had understood from the newspapers that Count Goto was to be present in the House, but he did not see him. Count Goto was a flagrant offender against the laws. The President called Mr. Tanaka to order, but the latter insisted that Count Goto had abused a member of the House, and that he should not be permitted to enter its precincts. Mr. Mayejima spoke a few words merely by way of showing his disapproval of the Budget Committee's Report. The House then rejected the amendments of Messrs. Sasada and Suge, and passed the Budget Committee's Report. The House took a recess at 11.25 a.m. and reassembled at 12.50 p.m. The President announced the names of the Special Committee elected to examine the question of appropriations to the Female Normal School, the Upper Middle Schools, and the School of Music. He also stated that Count Yamagata, the Minister-President of State, desired to address the House, and further, that the remarks made by Mr. Tanaka Shozo in the forenoon as to Count Goto being a flagrant offender, had been erased from the record, Count Yamagata then spoke at some length, and was followed by Count Matsukata, Minister of State for Finance. Mr. Sugita Teiichi asserted that no evidences of the careful administration claimed by the Minister President of State could be seen. He dwelt on the imperfect state of the national defences, and on the weakness of the Navy. He complained that the public money was wasted for the sake of sending officials and favoured individuals to Europe and America, and that the only apparent aim pursued in the foreign intercourse of the State was to curry favour with Western peoples. Mr. Suzuki Shoji said that it had been impossible for those at the back of the House to hear the remarks of the Minister President. He proposed that all debate on the speech should be postponed until the next day, when members would have had an opportunity of consulting the stenographic report. Count Yamagata, in reply to Mr. Sugita, asked that questions as to the Army and Navy should be addressed according to the prescribed procedure. Mr. Iwazaki Manjuro said that the House should be grateful for the full explanations offered by the Minister President and the Minister of Finance. After some further desultory discussion, the Ministers of State were about to leave the House, when Mr. Tanaka Shozo excited much merriment by calling out loudly to the President that Count Goto was going away. The House then proceeded to debate the Extraordinary Expenditures of the various Departments, beginning with the Foreign Office. The Government Delegate having given some explanations, the Budget Committee's Report was adopted. On proceeding to debate the Home Department, Mr. Ebashi Ko moved that the subsidy to the Hokkaido Coal Railway Company be abolished. He understood that the Company had acquired for 240,000 *yen* a railway which had cost the Government 1,200,000 *yen* and for 100,000 *yen* a coal mine upon which 380,000 *yen* had been spent. A member having claimed that the silence of the Government Delegate must be taken as endorsing the truth of these statements, the Delegate said that he did not speak because the expenditure in question fell within the scope of Article 67 of the Constitution. Mr. Inugai opposed Mr. Ebashi's motion, not because he approved of the subsidy, but because it could not be abolished without injustice to the present holders of the Company's stock. After some further debate, the House voted in favour of Mr. Ebashi's amendment, and also in favour of the Budget Committee's Report for the remaining items of the Home Department. In the Department of Finance, Mr. Takatsu Nakajiro moved that the subsidy to the Japan Railway Company be reduced to 300,000 *yen*, on the ground that the interest received by the Company exceeded the present market rates. Mr. Watanabe Osamu strongly opposed any

Digitized by Google

interference with the affairs of a company whose stock was largely held by the public on the faith of a Government guarantee. After some further debate the closure was voted, and Mr. Takatsu's amendment was negatived by 84 to 77. Mr. Kozaka Zennosuke, ascending the tribune, was about to speak in opposition to the Budget Committee's Report when Mr. Yamada Toji objected, claiming that the closure had been voted. The President said that the closure had related only to the debate on Mr. Takatsu's amendment. Mr. Koma Shiku took strong exception to this ruling, and on being desired by the President to resume his seat, refused to do so. The President thereupon ordered him to be removed, and the Sergeants were about to carry out this order when the House fell into great confusion. The President suspended the execution of his order until the House should decide the import of the vote on the closure. The House decided that the closure had related to the whole debate on the Department of Home Affairs. Votes were then taken, and the Budget Committee's Report was adopted. The House rose at 4.45 p.m.

FEBRUARY 17TH.

The House met at 10.50 a.m. Several members urged that the Special Committee on the question of the appropriation to the Female Normal and other Schools be directed to send in its report with all possible expedition. The House proceeded to discuss the extraordinary expenditure of the War Department. Mr. Noda, one of the Delegates for the Department, complained that the reductions applied in this section had not been explained, and seemed to have been recommended without due consideration. Mr. Ishiwara Hanyemon replied, on behalf of the Committee, that all the building operations of the Government had been deemed extravagant, and a general reduction of twenty per cent. had been applied. Hence the reduction in this section of the War Office. Mr. Noda pointed out the great inconveniences of such a method, and urged that the building designs of the Department be examined by the Committee. Mr. Okada Riyoichiro said that it was just as much the duty of the Delegates to offer explanations to the Budget Committee as it was for the Budget Committee to seek them. The Committee's debates had been public, and it was too late now for the Delegate to complain that its investigations had been incomplete. Mr. Noda said that the Government Delegates could not divine what reductions the Committee contemplated. He entered into an explanation of the buildings—chiefly forts—affected by the reduction, and showed that the works were all in progress and must be continued. He warned the House that it was voting measures calculated to check the completion of the national defences. An amendment of Mr. Kato Katsuya to increase the appropriation for the building of forts, led to some discussion, and was finally rejected. The House then voted the Budget Committee's Report relating to this section, and, proceeding to the Naval Department, voted the Budget Committee's Report in relation to its extraordinary expenditure also. The Judicial Department now came up for discussion. Mr. Mitsukuri, Delegate for the Department, spoke strongly against the reduction of appropriations for the building of Judicial officers' houses, and for the aid of the private Law Schools. Mr. Yamada Taizo opposed the reductions. He said that the chief objection raised by foreigners to coming under Japanese jurisdiction, and therefore the chief obstacle to the accomplishment of the hope of Treaty Revision entertained for so many years by forty millions of people, was incompleteness of the laws and incompetence of the Judges who administer them. He also dwelt upon the vital importance of good laws and good judges from an independent point of view. The House then voted the Committee's Report. The same was the case with the Educational Department and the Department of Agriculture and Commerce. In connection with the Department of Communications, an amendment by Mr. Koma Shiku for reducing the subsidy of the Japan Mail S.S. Company from 880,000 to 500,000 *yen* annually, came up for discussion. Mr. Koma supported the motion in a long speech, the gist of which was that the fixed subsidy gave the company a much larger income than it would have received under the original agreement, which made the Treasury's payments depend on the Company's earnings. Mr. Takagi Masatoshi supported the motion on the ground that though a subsidy had been necessary at the outset, its continuance had the effect of deterring competition. Mr. Ayai Takeo opposed the motion. The House voted in favour of it, and also adopted the Committee's Report on the section of extraordinary expenditures of the Communications Department. The House rose at 3.55 p.m.

FEBRUARY 18TH.

The House met at 11 a.m. and proceeded to consider the extraordinary expenditures of a section of the Home Department—namely, the construction expenses of the Yokogawa-Karuizawa Railway. The Government Delegate explained the object of the appropriation; also that the line was projected because it had now been found possible to negotiate the difficulties of the Usui Pass. The amount asked for—1½ million *yen*—added to the half million previously appropriated, would suffice for the construction. He added, in reply to questions, that the total length of lines already constructed was 1,300 miles, and that provisional charters had been granted for the construction of another thousand miles, but it was not yet possible to say exactly in what order new lines contemplated by the Government would be undertaken. The House voted the appropriation, and then passed to the grant for the Naoyetsu-Kashiwazaki line. This led to considerable debate, in the course of which Mr. Inouye Kakugoro asserted that many complaints were made about the treatment given by the Chief of the Railway Bureau to applications for railway charters. It was said that without bribery no charters could be obtained. The Government Delegate refused to discuss such a subject. The House then voted the Sasada amendment, rejecting the appropriation for the line in question. In the afternoon session the Report of the Special Committee on Schools was read. The Committee recommended a grant of 87,685 *yen* for the First Upper Middle School, and the withdrawal of all grants of public money to the 5th, 6th, 7th, and 8th Upper Middle Schools, as well as to the Female Normal and Music Schools. It was announced that three members of the Committee had objected to this decision and submitted a written statement of their reasons. The House then passed the extraordinary expenditures of the Naval Department and the Communications Department, as well as of portions of the Departments of Education, Agriculture and Commerce, and Communications, adopting the Committee's Report in every case where it suggested reductions.

FEBRUARY 19TH.

The House met at 10.35 a.m. and proceeded to consider the Report of the Special Committee on the appropriations for the Upper Middle, Female Normal and Music Schools. Mr. Iwazaki Manjuro, on behalf of the Committee, explained that in recommending an appropriation of 80,819 *yen* (not 87,685 *yen* as erroneously announced the preceding day) for the First Upper Middle School, and cutting off the appropriations for the Upper Middle Schools in the provinces, the Committee's idea was to assemble the pupils of the latter at the former. Mr. Tsuji, Vice-Minister of Education, pointed out strong objections to the course recommended, and asked how it could possibly be expected that such a sweeping change as would be necessary in the organization of the Schools referred to could be accomplished before the beginning of the next fiscal year, a month hence. He also urged the expediency of supporting the Female Normal School and the School of Music, which certainly could not be maintained without Government support, and were of the greatest service for educational purposes. In the debate which ensued, many members claimed that the Committee had exceeded its competence in submitting such a Report, inasmuch as the object of its appointment had been to obtain a recommendation different from those already rejected by the House. Finally the President put it to the House to decide whether the Committee had exceeded its functions, when 123 "ayes" and 86 "noes" were recorded. On the motion of Mr. Inouye Kakugoro it was decided, instead of appointing a new Committee, to take the Report separately furnished by a minority of the Committee—namely, Mr. Amano and two others—as a subject of debate. The House rose for the midday recess at 12.20 p.m., and on re-assembling at 1.30 p.m., the President announced that the sad intelligence had been received of the decease of the Lord Keeper of the Privy Seal, Prince Sanjo. The House decided to suspend its session, and authorized the President to forward, in its name, a message of condolence.

## *CORRESPONDENCE.*

### A QUESTION FOR MR. DOOMAN.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Please allow me to ask Mr. Isaac Dooman, through your columns, to give the world *one* single instance of "Nature's laws" "being" altered by "human will." With your permission, I would also ask him to make careful choice of *this one* instance, and as I note he is bountifully supplied, to be quite sure he has a thorough knowledge of the "*law*," so altered.

Thanking you in anticipation for your kindness, I am, Sir, yours truly, TRUTH.

Tokyo, February 14th, 1891.

### A VISIT TO THE TEMPORARY HOUSE OF PEERS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The other day I had the privilege of visiting the Upper House in its temporary quarters. My card of admission was of a scarlet hue, about the size of a lady's visiting card. It was altogether in Japanese, and when translated read somewhat to this effect:—

Name of member who introduces visitor.
Name of visitor.
Card of Admission to listen to the Diet.
Date.
House of Peers.
Visitors to bear the following in mind:
On the front of the card of admission the introducing member's name and surname must be written, also the name and address of the visitor.
The visitor must show this card to the proper official, and sit where he is told by him.
The visitor cannot on any pretence whatever enter the member's part of the Auditory Arena.
The visitor during his visit must keep the following rules:
1st, to be dressed either in *haori* and *hakama*, or foreign clothing.
2nd, must not wear hat or overcoat.
3rd, must not carry stick or umbrella.
4th, must not eat, drink, or smoke.
5th, must not show assent or dissent to a member's speech.
6th, must not interfere with the sitting by making a noise. Perhaps visitors may not be allowed to enter after the House has been in session an hour.
If the visitor loses his card of admission he must leave the building.
This card is for this day only."

On the south-eastern side of the Imperial Hotel is a notice to the effect that this is the visitor's gate. On passing through this gate you see a wooden shed marked "Visitors' Entrance," or to speak more correctly "Auditor's Entrance," as the words *Bocho-nin*, which I have rendered "visitor," are written with the three Chinese characters, "near," "listen," and "man." At this shed I showed my card of admission to an official dressed in a similar style to those seen at the palace gates. He asked me for my visiting card, and told me that as the regular rooms for visitors were full he would take me to the place set apart for visiting officials. This I found to be the band-room of the hotel, overlooking the ball-room. The front of this room was fitted up for visitors by placing a platform of two steps, facing the ball-room. On this were placed two rows of chairs, the front being lower than the back row. The chairs were all occupied, but three or four of us were able to see by standing on the platform, behind the back row of chairs. When I entered Viscount Aoki was speaking relative to Treaty Revision, and he was followed by Viscount Tani on the same subject. This latter gentleman, and about one third of the members were dressed in Japanese style of clothing. During my stay four members spoke, and while I was there only the President and

Digitized by Google

speakers spoke aloud. Everything was carried on in a very decorous way, the only other sounds being coughing and the opening and shutting of doors. The ball-room of the hotel is used as the Auditory Hall, temporary verandahs having been run up to make passages and the rooms for the reporters and visitors. A dais has been built for the President, secretaries, etc., at the far end of the room. The members are seated in chairs, with green coloured desks in front of them. These desks are arranged with a slight curve, and have passage-ways at either end and down the centre. The speakers in leaving the body of the hall to go to the dais, go down this centre passage, and as it is rather narrow they have to walk slightly sideways, which, in conjunction with the steps of the tiers, makes one at first think, by their gait, that the speakers must be lame. Where I was in the band-room, it was difficult, for a foreigner at least, to make much out of the speeches, as only now and then a sentence could be caught. On going out I was told I could go out either by the front or side entrance. The attendants are very obliging and polite to visitors; one of them spoke English quite well. On entering, the card is clipped like a railway ticket, and it is given back to an official on leaving the building.

Yours truly, F. B. S.

## RABBIT-HUNTING IN SENDAI.

To the Editor of the "Japan Mail."

Sir,—In common with other great organisers of educational systems, Viscount Mori saw the importance of physical training on the future welfare of the nation. Very wisely he made provision in his plan of education for a course of instruction in bodily development. This course is largely supplemented in many schools by the encouragement given to spontaneous exercise on the part of the students, in the shape of football, baseball, tennis, rowing, fencing, running, and friendly athletic contests at stated seasons. Here in Sendai it is easily possible to add another interesting form of exercise to the above—rabbit hunting.

The town lies at the very base of the last tier of hills as they melt into the broad plain of Sendai, that stretches away to the Pacific some eight or ten miles distant. These elevations behind the city are sharp and steep. The hard crust of rock is thinly covered with soil. The native growth of trees was removed many years since, and now a thick growth of weeds, grass and small shrubbery in places covers all the abrupt slopes, keen ridges and pointed angles. The country is entirely unfit for agriculture, and is not used for pasturage. It is uninhabited, though bordering on the town, except in a few sheltered valleys where a little level land is found at the bottom for the cultivation of rice. It is the chosen home of rabbits, large, long-legged, and big-eared. It is a favourite amusement with the students of some of the schools in Sendai to go out with nets and snare some of these animals. Of course they could be much more easily killed with the gun, but not one-half of the exercise or one hundredth of the fun would be furnished by that method. The authorities of the school encourage the students to go out with nets, and tramp all day, as many a muscle is drawn out to its best in toiling up these sudden ascents. Very often a special holiday is given in order to induce a voluntary tramp.

A few days since, just before the last national holiday, nearly all the members of one of the largest schools here turned out for an all-day hunt after rabbits. The matter was arranged the day before, and promptly at seven the next morning we were all at school. After a few minutes in necessary preparation we were off. Some had on rubber boots and shoes, but the most went with pantaloons turned up above the knee, splashers around the calf of the leg, and straw sandals on the feet. It was snapping cold, but bright and clear. We had been having heavy snows for two weeks past, and a mean disagreeable crust had formed on top, strong enough to look inviting and weak enough to prove treacherous when we trod on it. Up we went through the main street of the place, over hard beaten snow. Just at the edge of the town we turned off, and immediately were in the country, wild, scrubby and desolate. Hills, hills, all around. Far off towards the west rose a slender conical peak above its neighbours, a kind of pet with the people around, who have fondly dubbed it little mount Fuji, as it bears a resemblance to that world-famous mountain. There was a very abrupt break from the thickly settled town to the uninhabited country. The line of houses stopped short off at the foot of the hills, and not a house was at once visible beyond. The great backbone of Japan rose up in the west with its articulated joints shrouded in white. Not a level space about us large enough for a bucket of water to rest on. Looking the other way we saw the busy bomes nestling at our feet, and afar off the mild Pacific gleaming and shining under the morning sun.

We now divided into two squads of more than a hunded each, the small boys on one side of the road, the big boys on the other. About half a dozen in each party carried small square red flags at the end of a twenty foot bamboo pole. Our leaders had chosen the very comb of a long narrow ridge as the first site to plant the nets upon. The colour bearers went ahead and hoisted their standards at convenient distances along this ridge. About twenty net keepers followed, carrying some eight or ten nets, each twenty feet long and three feet wide, made of small hemp cord, with meshes about two inches square. In the years past a narrow path had, very conveniently for us, been worn along the turnings and windings of these ridges as the men and animals carried off the wood. The net man at the extreme end of the line that it was decided to ambush for the rabbits stretched out his net, the lower edge in the bottom of the path, and the upper loosely hung on the weeds and bushes along the path, thus forming a net barrier twenty feet long by three feet high; his neighbour rapidly made connection and extended the barrier, and so on until all the line was fortified. At certain points the bottom of the net was fastened down by a forked stick. Then the net keepers and flag men quietly squatted down in the grass to wait for the enemy.

The rest of us make a wide detour and string ourselves out in a long straggling line at the bottom of the valley on one side of the net. By signals from a leader at the top of the ridge we arrange in storming column, in a crescent with the points towards the ends of the net-barrier above us. There we stand waiting facing the heights, and fixing our eyes on the goal far above indicated by the flags. When all is ready a half dozen brass horns begin to toot and blare, and we all set up a mighty shout, and in all this din and noise gradually climb the steep ascent. It is very likely that many of us take "the line of least resistance" as one old veteran remarked, showing his acquaintance with Herbert Spencer. But in spite of this gentle shirking of duty it is a toilsome road up to the top. We crunch and crush through the patches of snow, and slip and roll in the bare places. Where the snow has melted the ground has thawed and is tricky. Away we go shouting and raising pandemonium generally. The boys dart into thickets, beat the bushss and tear through the densest spots of mud. Unless he is a very bold rabbit he will surely leap up and scud away when he hears the advance of this roaring, yelling army. There had been a light fall of snow the night before, and we could easily see where our foe had scampered about in search of breakfast. We were keen to bag him, though we caught no sight of him. On we charged, waking up the echoes, and plunging through a grave-yard, stumbling over the stones and tramping on a cross. Finally with a mighty rush, panting and puffing, and not a few of us considerably "blowed," we dashed up to the nets, but as one of the students of English observed, "the rabbit was absent that roll-call."

After holding a council of war it was decided to drive from the valley on the opposite side of the bridge. Again we made a wide circle in order not to alarm the unsuspecting enemy, and got to the foot of the hills; there we plunged into rice fields, but fortunately they were frozen over solid with several inches of loose snow on top. Occasionally we broke through and several of us slipped and rolled and tumbled about. The heavy ones sank through the crust of snow at every step, and were not only left, but were "winded" as well. Our line was again formed at the foot of the slope, and we charged up the hill again, but again an absence at roll call.

There was nothing left but to move to another point. We joined the small boys, but they had met with no better luck. A cutting wind blew right down from the glittering back-bone, and at times it seemed a gale. It would almost blow us over the edge of some high, precipitous peak. But we were not cold after charging up to the nets. We were hot and perspiring.

The third effort we were all together, and though we beat up the steepest ridge, with the deepest snow drifts, and the worst tangled masses of weeds and bushes, we were unsuccessful.

The fourth time we went off some distance from the highway, and crossed a deep gully with a rapid stream at the bottom, and drew up on the other side, and nerved ourselves for the race up the hill to the red flags away above. One poor wretch was enveloped in our line and driven into the snare, and was caught. He was tangled in the meshes of the net, and though in his wild fright he tore nearly all the fur from his side, yet the keepers pounced down on him and nabbed him fast.

This was great glory, and we though it best to take stock of our rations. Back we went to the highway. There the servants had built large fires right in the snow and the tea was all ready for us. Coarse matting was spread on the ground and down we sat about the fire, and our sharp appetites soon despatched the food. It was now past twelve o'clock, and we had been actively moving since half-past seven. But we did not delay very long. After a small battle with snow balls by the younger soldiers, we all advanced after our leaders. This time we slid and stumbled down a sharp hill into another contracted rice field and across that, to the bottom of a steep hill side. Up we went again, but again no fortune. At some distance farther on we met with better luck, and another prize was put into the big cage slung on a long pole between two coolies. The hunt was now declared off at three o'clock, and in a long disjointed column we made our way home, tired and hungry, many wet, and not a few bruised, all having exercised more in a day than they had done in a week before.

Sendai, February 14th, 1891. C. M.

## "BURNING THE RECORDS."

To the Editor of the "Japan Mail."

Sir,—It is all very well for your correspondent to cry "*voilà*" to your. "*eureka*." But there are more holes in your theories than a Texas Coroner's Jury could find in a man who had refused to take a drink with a friend. The Printer's Devil may do what you claim for him as a record destroyer; the office cat may be capable of the cussedness your correspondent attributes to him; but whence come those mischievous mistakes; those voluble vagaries; those strange conceits of your honest contemporary? Who suggested to him that "honest" meant "deceitful?" Who coined for him the word "deceitlessness?" Who put the idea into his head that Viscount Aoki's speech in the House of Peers on the 12th inst. had reference to anything more mysterious than the published American Treaty of 1878, or that any disagreeable or awkward questions could be asked the present Minister for Foreign Affairs concerning that thirteen years old compact? As man to man I put it to you. Is it within the bounds of human belief that the P.D. or the O.C. was responsible for these things? My honest conviction is that the Office Parrot has been getting in his work. For the sake of peace I will admit that the P.D. and the O.C. may be in the combine against your editorial friend, but the fine Italian hand of the O.P. is apparent.

Yours truly, MINOR POINT.

Tokyo, February 18th, 1891.

P.S.—On account of his superior digestive qualities, I would like to substitute the Office Goat in place of the Office Cat, but I will not insist. Any way, behold the harmonies of my theory:

The P.D. as the burner of the records.

The O.G. and/or the O.C. as the masticator of sentences.

The O.P. as the hypnotizer or the suggester of evil.

M. P.

## RECENT MARINE DISASTERS.

To the Editor of the "Japan Mail."

Sir,—Can you inform me if any public enquiry has been made into the loss of the steamship *Kii Maru* and the strandings of the *Harima Maru* and *Suruga Maru*, and if so, with what results? Also of what nationality were the masters?

February 18th, 1891. H.

## *CHRIST CHURCH.*

The annual meeting of seat-holders and subscribers of Christ Church was held on the 13th inst. in the Chamber of Commerce Rooms. Mr. J. Rickett presided, and there were also present, Messrs. J. A. Fraser, E. Whittall, Jas. Walter, D. S. Brearley, A. J. Wilkin, T. H. Box, E. J. Moss, &c.

The Chairman, after expressing his regret to find so small an attendance, but remarking that as meeting in Yokohama were not usually well attended, said he supposed the minutes last of meeting would be taken as read.

On the motion of Mr. Jas. Walter, seconded by Mr. Brearley, the minutes were taken as read.

The Chairman then read the report of the committee, and the accounts for the year. The report and accounts were as follow:—

The Committee of Christ Church in placing their annual report and accounts before the subscribers and

Digitized by Google

seat-holders have to state that for the year 1890 although there is a small debit balance, the total results are really more satisfactory than for the previous year, as several items of expenditure occurring at the close of 1889 were not payable until the succeeding year, and this fact, together with the unusually large sum spent in repairs makes the outlay for 1890 very large indeed, but the proceeds of the bazaar held in last June were sufficient to meet these expenses.

Pew-rents are in advance of last year by about $130, whilst offertories show a decrease of rather more than that sum owing no doubt to contributors to that collection not thinking a large sum necessary, and also to other causes, such as the closing of the church for several Sundays while repairs were being effected, and the diminished number of visitors.

The collection of the first Sunday in the month is employed by the chaplain to meet pressing calls from needy persons, and in this cold, inclement season greatly lessens want and suffering.

The Committee offer their hearty and emphatic thanks to the ladies who so energetically assisted them at the summer bazaar, as also to the gentlemen who bought so liberally, and are also much indebted to the organists, Miss Leach and Mr. Chope, and the late organist, Mr. Griffin; to the ladies and gentlemen who assist in the choir, and to those kind friends who annually give donations to the Church Fund.

Since the repairs the church itself is in a better condition than it has been for along time past, and it is hoped no repairs will be necessary during the current year.

The opinions that have been expressed to the Committee in regard to the alterations in the entrance and compound show that the improvements made there are generally appreciated.

The Committee earnestly solicit the continued cooperation and assistance of seat holders and the public for the maintenance of the church.

(Signed) J. Rickett.
D. S. Brearley.
J. A. Fraser.
James Walter.
E. J. Moss.

Honorary Treasurer, Christ Church, Yokohama, in Account with Trustees, 1890.

| | |
|---|---|
| To Balance in hand | $ 3.41 |
| To Pew Rents | 2,721.00 |
| To Offertories | 412.20 |
| To Fancy Fair, June, netted | 1,037.58 |
| To Donations to Christ Church | 110.00 |
| To Bonuses Returned | 65.67 |
| To Pew Rents and small items in January for 1890 | 58.49 |
| To Balance | 57.20 |
| | $4,465.55 |
| By Chaplain's stipend | $2,400.00 |
| By Coal and Lighting account | 60.25 |
| By Momban's wages and account | 130.00 |
| By Ground Rent | 180 19 |
| By Fire Insurance | 182.50 |
| By Repairs to Church and Parsonage | 1,114.85 |
| By Decorations Easter and Christmas | 42.59 |
| By Interest on Loan | 120.00 |
| By Title Deeds, rearranging | 90.00 |
| By Advertising and stationery | 23.00 |
| By Sundries | 121.57 |
| | $4,465.55 |
| Balance | $ 57.20 |

D. S. Brearley, Hon. Treasurer.

Examined by vouchers and found correct.
Yokohama, February 11th, 1891. J. Rickett.

The Chairman explained with regard to the fancy bazaar, that the total proceeds amounted to something like $1,200, of which a certain amount went to S. Hilda's Hospital, leaving a balance of $937.58, to which there fell to be added donations from Bishop Bickersteth of $50 and from Mr. Dodds of $50, making a total of $1,037.58. Donations received towards the Church during the year were :—

| | | | |
|---|---|---|---|
| Mr. Aitchison | $ 5 | Mr. A. C. Read | $ 5 |
| Mr. Anglin | 5 | Mr. Shand | 10 |
| Mr. Bisset | 25 | Mr. Whittall | 10 |
| Mr. Gibbens | 10 | Mr. Wyllie | 10 |
| Mr. A. J. Macpherson | 20 | | |
| Mr. Noyes | 10 | | 110 |

The Chairman, proceeding to review the accounts, said that the repairs came to $1,114.85, which as would be seen was covered by the bazaar amount. The amount paid for changing the title deeds and the trustees' names in accordance with the resolution arrived at last meeting, was $90.

Mr. Wilkin suggested that this fee was rather heavy.

Mr. Fraser explained that a good deal of work required to be done in reference to the matter, correspondence heing necessary as well as the drawing up of the new deed. In that light, the fee was not a heavy one.

Mr. Brearley expressed the hope that pew-renters would, in giving up their seats, communicate with the Honorary Treasurer to avoid misunderstanding.

On the motion of Mr. Wilkin, seconded by Mr. Whittall, the report and accounts were adopted.

The next business was the election of the Committee.

The Chairman said he might mention that Mr. Dodds, who was for a long time connected with the Church Committee, was on his way out, and he would strongly recommend that the meeting elect Mr. Dodds, who had by his energy materially assisted the work of the Committee.

Mr. Box proposed and Mr. Wilkin seconded the election of the old Committee, including Mr. Dodds.

The Committee, consisting of Messrs. Dodds, J. A. Fraser, Brearley, Jas. Walter, E. J. Moss, and Rickett, were then unanimously re-elected.

On the motion of Mr. Wilkin, the thanks of the meeting were accorded to the Committee for their services, especially to the Chairman and Treasurer for their labour.

The Chairman, in reply, commended in high terms the work of the Treasurer.

The meeting then terminated.

## *THE BUDGET COMMITTEE'S REPORT TO THE HOUSE OF REPRESENTATIVES.*

### GENERAL EXPLANATION.

The estimated ordinary revenue for the 24th year of Meiji is set down at *yen* 79,443,864.870, and the estimated extraordinary revenue at *yen* 1,233,128.551, their total being thus *yen* 80,676,993.421. The Committee have decided to fix the ordinary revenue at *yen* 77,972,994.615, and the extraordinary revenue at *yen* 15,969,678.551, their total being *yen* 93,942,673.166, showing an increase on the Budget estimate of *yen* 13,265,679.745. The reason will be plain when taken in connection with receipts.

The estimated ordinary expenditure for the year is *yen* 70,800,311.519, and the extraordinary expenditure is *yen* 23,204,082.970, the total being *yen* 94,004,394.489. The sums decided by the Committee are, ordinary expenditure *yen* 63,512,108.864; and extraordinary expenditure *yen* 22,611,551.211, or a total of *yen* 86,123,660.075, which shows a decrease as compared with the estimate of *yen* 7,880,734.414. This decrease has been resolved on because the Committee find that there are many items of expenditure which may be reduced, and further because the Committee are desirous of encouraging and fostering the energies of the people.

In examining the financial estimates and bringing out yearly acccounts in a proper manner, it is impossible to avoid considering also the organization of the Departments (*Kwansei*) and the salaries of officials. The Budget Committee have therefore minutely gone into the actual state of affairs in every Department and office, and decided on certain reductions of expenditure within such limits as will permit of official business being conducted without inconvenience. In reference, however, to the cost of works (*jigyo-hi*) generally no reduction has been effected on the items set down by the Authorities.

It is a natural course, and one which has been in existence in this country for a long time, to regulate the amount of salaries by the press of business and the responsibility attaching to the different offices. As a matter of fact the salaries of officials seem very high in proportion to the wealth of the nation. Salaries, therefore, instead of depending on the rank of officials, are made in this Report to be dependent on the nature of the offices (*shoku-kyu*); the salaries and other disbursements being examined with the object of effecting proper reductions in salaries and the number of officials.

Detailed information will be found in the annexed documents (*sanko-sho*). It may, however, he said briefly that the Accountants Bureaux in the Cabinet and in all Departments have been abolished, and offices to discharge their functions attached to Boards of General Administration; the Metropolitan Police Board is incorporated in the Tokyo City Government Office; Councillors are abolished in all the Departments; the number of Secretaries has been reduced; the staff of *hannin* officials has been reduced in each Department by one-fourth; and the average monthly salary of *hannin* officials has been fixed at *yen* 25.

Salaries to officials on the *hishoku* list are stopped, it being against the principle of paying for work done to pay those who do not perform any duties.

Travelling expenses are reduced in accordance with the table appended; the impossibility of bringing them all under one standard appearing in connection with each Department.

Reductions of from 10 to 30 per cent. have been made on cost of repairs, miscellaneous payments, and expenses according to the actual state of each office and board.

Allowances for entertaining to Vice-Ministers, Private Secretaries, Governors, Presidents of Law Courts and others have been abolished.

As no necessity existed for providing official residences, the construction of such buildings is suspended; those now existing being included as official property, for which proper rent should be paid.

Expenses for the keep of horses have been abolished in all Departments and offices.

These have been the main points that guided us in examining and deciding on the estimates so as to bring out the annual accounts properly. We do not say, however, that the Government must amend the official organization and take such other steps as are indicated in the appended documents. The Government may adopt any other scheme if it has one. The essence of our report is that the Government shall deal with the national affairs on the basis of the amounts herein recommended.

We hope the revenue balance resulting from the above scheme will be applied to the reduction of the land tax and the repayment of public loans of high interest.

It is essential, to maintain the effeciency and carry out the purpose of the Budget, that specific articles and paragraphs should not be applied to different purposes, so that, it will be seen, the arrangement, existence and abolition of articles and paragraphs are matters of considerable importance. In the present Budget, however, not a few changes in the use and application of certain articles and paragraphs have been made; and as a result comparison with the preceding Budget has been a matter of very great inconvenience. Many amendments and changes, therefore, which are now made, aim entirely at maintaining the efficiency and proper use of the Budget.

I submit the above in accordance with the decision of the Budget Committee.

Dated Dec. 27th, 1890.

Oye Taku,
Chairman of the Budget Committee.

To Mr. Nakajima Nobuyuki,
President of the House of Representatives.

### SALARIES.

yen. Officials of "Shinnin" Rank.

6,000—The Minister-President of State.
5,000—Ministers of State.
4,000—President of the Supreme Court.
3,500—Chief of the Bureau for Examination of Accounts.
2,500—President of the Privy Council; President of the Decorations Board.
2,000—Vice President of the Privy Council.
1,500—Privy Councillors.

Officials of "Chokunin" Rank.

3,500—Vice-Ministers; Chief of Hokkaido Administration Board; Governor of Tokyo.
3,000—Governors of Kyoto, Osaka, Kanagawa, and Hyogo; Chief of Railway Bureau.
2,500—Chiefs of Sections in Bureau for Examination of Accounts; *Chiji* (governors) of Prefectures; Engineers of 1st rank; Chief Secretary of the Cabinet.
2,000—Chief Secretaries of Houses of Peers and Representatives.

Officials of "Sonin" Rank.

2,000—Chiefs (1st rank) of Bureaux; Chief of Metropolitan Police Board; Secretary of Tokyo City Government; Chief of 1st Division Hokkaido Administration Board; Engineers of 2nd rank.
1,700—Chiefs (2nd rank) of Bureaux; Secretaries of Osaka, Hyogo, Kanagawa, and Kyoto City Government; Chief of 2nd Division, Hokkaido Administration Board.
1,500—First Secretaries, Auditors (1st rank); Judges (*Shimbankan*); Engineers of 3rd rank.
1,200—Second Secretaries; Superintendents of Police; Secretaries of Prefectures; Chief of Osaka City Police; Engineers of 4th rank; Chief of 3rd Division, Hokkaido Administration Board; Examiners of 1st rank; Prison Superintendents of 1st rank.
1,000—Third Secretaries; Auditors of 2nd rank; Superintendent of Tsushima; Chief Tax Collector of Tokyo; Engineers of 5th rank; Prison Superintendents of 2nd rank; Examiners of 2nd rank; Chief Police Surgeons.
800—Fourth Secretaries; Auditors of 3rd rank; Chief Tax Collectors of Cities and Prefectures; Chiefs of Hakodate and Sapporo, Hokkaido Administration Board; Engineers of 6th rank; Prison Superintendents of 3rd rank; Chiefs of Fire Brigades; Police Superintendents of Cities and Prefectures; Superintendents of Oshima and two other islands.
700—Superintendents of Police Stations; Chiefs of rural districts.
600—Second Superintendents of Police Stations; Auditors of 4th rank; Chiefs of Hokkaido rural districts; Engineers of 7th rank; Prison Superintendents of 4th rank; Chiefs of rural districts.
500—First Probationers; Chiefs of rural districts.
400—Second Probationers.

### Officials of "Hannin" Rank.

1st class *yen* 60 per month; 2nd class *yen* 50; 3rd class *yen* 45; 4th class *yen* 40; 5th class *yen* 35; 6th class *yen* 30; 7th class *yen* 25; 8th class *yen* 20; 9th class *yen* 15; 10th class *yen* 12.

## PROPOSED REORGANIZATION OF BUREAUX AND DISTRIBUTION OF OFFICIALS.

### Cabinet.

Present Organization—Minister President; Confidential Secretaries; Councillors; Secretaries; Decorations Board; Legislative Bureau; Pensions Bureau; Bureau of Archives; Bureau of Statistics; *Official Gazette* Bureau; Bureau of Accounts; Probationers; *soku*; Engineers.

Amended Organization—Minister President; 2 Secretaries of 2nd rank in Minister's Chamber, 8 Secretaries of 1st rank and 2 of 2nd rank; 2 Secretaries of 2nd rank, and 15 Honorary Councillors in Decorations Board; the Legislative, Pensions, Archives, *Official Gazette*, and Accounts Bureaux are abolished, their functions devolving on the Minister's Chamber; the Bureau of Statistics transferred to the Home Office; 8 probationers; *soku* and Engineers reduced by one-fourth in number.

### Privy Council.

Present Organization—President; Vice-President; Councillors; Chief Secretary; Secretaries, *Zoku*.

Amended Organization—25 Councillors; Chief Secretary abolished; 2 Secretaries of 2nd rank, and 1 of 4th rank; *Zoku* reduced one-fourth in number; other offices remain as before.

### Board for Examination of Accounts.

Present Organization—Chief; Chiefs of Sections; Auditors; Secretaries; Assistant Auditors; Probationers; *soku*.

Amended Organization.—All offices remain as before. Auditors to be 3 Secretaries of 1st rank, 3 of second rank, and 5 of 3rd rank; Secretary, one of 3rd rank; 24 assistant auditors; 3 Chiefs of Sections; 3 probationers; *soku* reduced one fourth in number.

### Educational Department.

Present Organization—Minister; Vice-Minister; Confidential Secretary; Secretaries; Councillors; School Inspectors; General Administration Bureau; Special School Affairs Bureau; General School Affairs Bureau; Accountants' Bureau; Engineers; Probationers; *Zoku*; *Gishu*; Engineer Probationers.

Amended Organization—Minister and Vice-Minister the same; 1 Secretary of 2nd rank; Secretaries attached to Bureaux; Councillors abolished; School Inspectors' duties conducted by Secretaries; 2 Secretaries of 1st rank in General Administration Bureau; 1 Secretary of 2nd rank in Special School Affairs Bureau; 3 Secretaries of 2nd rank in General School Affairs Bureau; Accountants' Bureau incorporated in Bureau of General Administration; Engineers, abolished; 2 probationers; *soku* reduced in number by one-fourth; *gishu* and Engineer Probationers abolished.

### Foreign Office.

Present Organization—Minister; Vice-Minister; Confidential Secretaries; Councillors; Bureau of General Administration; Bureau of Trade; Law Examination Bureau; Translation Bureau, Accountants Bureau, Probationers; *soku*.

Amended Organization—Minister and Vice-Minister unaltered; Secretaries of Minister's Chamber (2 of 2nd rank); Councillors, abolished; Bureau of General Administration (1 Secretary of 1st rank); Trade Bureau (1 Secretary of 1st rank); Law Examination Bureau (2 Secretaries of 2nd rank); Translation (incorporated in Bureau of General Administration) and Accountants Bureaux, abolished; 4 Probationers; *Zoku* reduced in number by one-fourth.

### Home Office.

Present Organization—Minister; Vice-Minister; Confidential Secretaries; Councillors; Secretaries, Bureau of General Administration; Bureau for Management of Prefectures; Police Bureau; Civil Engineering Bureau; Sanitary Bureau; Geographical Bureau; Ecclesiastical Bureau; Library Bureau; Accountants Bureau; Railway Bureau; Probationers; Engineers; Engineer Probationers; *zoku; gishu*.

Amended Organization—Minister and Vice-Minister unaltered; Secretaries of Minister's Chamber (2 of 2nd rank); Councillors abolished; Secretaries of 1st rank, 5 in General Administration, and 1 each in Prefectures, Police, and Civil Engineering Bureaux; Sanitary Bureau incorporated in General Administration Bureau; Geographical Bureau, functions and property handed over to Meteorological Bureau in Agricultural and Commercial Department and General Administration Bureau of Finance Department; Ecclesiastical Bureau, incorporated in Bureau for Management of Prefectures; Library and Accountants' Bureau incorporated in General Administration Bureau; Railway Bureau (2 Secretaries of 1st rank); Probationers 4, Engineers 2; Engineer Probationers 2; *gishu* 2; *soku* reduced in number by one-fourth.

### Finance Department.

Present Organization—Minister; Vice-Minister; Confidential Secretaries; Councillors; Secretaries; General Administration Bureau; Accountants' Bureau; Revenue, Customs, Treasury, National Debt, Bank Superintendence, Disbursement, and Deposits Bureaux; Probationers; *soku*.

Amended Organization—Minister and Vice-Minister unaltered; Secretaries of Minister's Chamber (2 of 2nd rank); Councillors, abolished; Secretaries, 3 of 1st rank in General Administration Bureau; 2 of 1st and 2 of 2nd rank in Accountants Bureau; 2 of 1st and 3 of 2nd rank in Revenue Bureau; Customs Bureau, incorporated in Revenue Bureau; Treasury Bureau, 1 Secretary of 1st rank; National Debt Bureau, 2 Secretaries of 1st rank; Bank Superintendence Bureau, incorporated in National Debt Bureau; Disbursement Bureau, incorporated in General Administration Bureau; Deposits Bureau, 1 Secretary of 2nd rank; Probationers, 4; *zoku* reduced in number by one-fourth.

### Communications Department.

Present Organization—Minister; Vice-Minister; Confidential Secretaries; Telegraph Bureau; Lighthouse Bureau; Shipping Bureau; Accountants Bureau; Money Order and Savings Bureau; Probationers; Engineers; *gishu*; *soku*.

Amended Organization—Minister and Vice-Minister unaltered; Secretary of Minister's Chamber (1 of 2nd rank); of Bureau of General Administration (2 of 1st rank); of Postal Bureau (2 of 2nd rank); of Telegraph Bureau (1 of 2nd rank); of Shipping Bureau (1 of 2nd rank); Accountants Bureau, incorporated in Bureau of General Administration; Money Order and Savings Bureau (1 Secretary of 2nd rank): Probationers 2; Engineers, *gishu* and *soku*, a certain number (*jakkan*).

### Judicial Department.

Present Organization—Minister; Vice-Minister; Confidential Secretaries; Councillors; Secretaries; General Administration, Civil, Criminal, and Accountants Bureaux; Probationers; *zoku*.

Amended Organization—Minister and Vice-Minister unaltered; Secretaries of Minister's Chamber (2 of 2nd rank); Councillors abolished; Bureau of General Administration, 2 Secretaries of 1st rank; Civil, Criminal, Accountants (incorporated in Bureau of General Administration) Bureaux abolished; Probationers 2; *Zoku* reduced in number by one-fourth.

### Agricultural and Commercial Department.

Present Organization—Minister; Vice-Minister; Bureau of General Administration; Councillors; Confidential Secretaries; Secretaries; Agricultural and Commercial Bureau; Bureau of Industries and Manufactures; Forestry, Mining, Patents, and Accountants Bureaux; Judges; Engineers; Probationers; Engineer Probationers; *zoku; gishu;* Assistant Judges.

Amended Organization—Minister and Vice-Minister unaltered; Bureau of General Administration, 2 Secretaries of 1st rank; Councillors abolished; 1 Secretary of 2nd rank in Minister's Chamber; Agricultural and Commercial, and Industries and Manufactures Bureaux, 2 Secretaries of 1st rank each; Forestry and Mining Bureaux 1 Secretary of 2nd rank each; Patents and Accountants Bureaux incorporated in Industries and Manufactures and General Administration Bureaux respectively; Judges 3; Engineers 8; Probationers 5; Engineer Probationers 6; *soku*; *gishu* and Assistant Judges each reduced in number by one fourth.

### City and Prefectural Officials.

Present Organization—Governors (46); Secretaries (46); Chiefs of Police (45); Chief Tax Collectors (46); Superintendents of Islands (5); Councillors; Chiefs of rural districts; Engineers; Prison Superintendents (47); *soku*; Clerks of Island Offices; Police Officers (*keibu*); Prison Clerks; Prison Inspectors; *soku* (Tax Collection).

Amended Organization—No alteration except that Chiefs of rural districts are fixed at a certain number (*jakkan*); the number of Engineers is unsettled, their salaries to be paid from the appropriation on account of *zoku*; and in the case of *zoku* and all offices following that class in the preceding list the number of officials is reduced by one-fourth—with the exception of Prison Inspectors and Assistant Inspectors.

### Tokyo City Government Office.

The following additional officials are to be appointed:—Chief Superintendent of Police (1); Superintendents of Police (3); Chiefs of Police Stations, (13); Sub-Chiefs of Police Stations (7); *soku* (91); Police officers, *Keibu*, (235); Assistant Police officers (128); Chief Police Surgeon (1); Police Surgeons (12); Chief of Fire Brigade (2); sub-Chief and other officers of Fire Brigade (45).

### Officials and Salaries in the Administrative Court.

yen.
2,500—President (*shinnin* rank).
2,000—Councillors (2) of 1st rank (*chokunin* rank).
1,500—Councillors (2) of 2nd rank (*sonin* rank).
——— —Clerks (3) of *hannin* rank.

### Salaries of Judicial Officials.—"Chokunin" Rank.

3,500—Procurator-General of Supreme Court.
3,000—Presidents of Divisions in Supreme Court; Presidents of Appeal Courts.
2,500—Judges of 1st rank; Chief Procurators of Appeal Courts.
2,000—Judges of 2nd rank; Presidents of District Courts in Tokyo and Osaka; Presidents of Divisions in Appeal Courts of Tokyo and Osaka; Procurators of 1st rank.
1,500—Judges of 3rd rank; Chief Procurators of District Courts in Tokyo and Osaka; Presidents of District Courts of Nagasaki, Hakodate, Nagoya, Miyagi, and Hiroshima; Presidents of Divisions in Appeal Courts; Procurators of 2nd rank.
1,200—Judges of 4th rank; Chief Procurators of Nagasaki, Hakodate, Nagoya, Miyagi, and Hiroshima; Presidents of District Courts; Procurators of 3rd rank.
1,000—Judges of 5th rank; Chief Procurators of District Courts; Presidents (1st rank) of Divisions in District Courts; Procurators of 4th rank.
800—Judges of 6th rank; Presidents of Local Courts; Presidents (2nd rank) of Divisions in District Courts; Procurators of 5th rank.
600—Judges of 7th rank; Procurators of Local Courts; Procurators of 6th rank.
500—Judges of 8th rank; Procurators of 7th rank; Probationers of 1st rank.
400—Probationers of 2nd rank.

Note—The amendments in the above list are under the present Law for the Organization of Courts of Law. Any changes in the Law will of course involve alterations in the list as amended above.

### Travelling Expenses.

Railway expenses per mile.—Officials of *shinnin* and *chokunin* ranks, *sen* 10; officials and probationers of *sonin* rank, salaries above *yen* 1,000, *sen* 6; above *yen* 300, *sen* 5; officials and probationers of *hannin* rank, salaries above *yen* 360, *sen* 4, under *yen* 360, *sen* 8.

Steamship expenses per nautical mile—Exactly the same allowances as in the above list per railway mile.

Allowance for travel by horse or carriage outside jurisdiction (*kangwai*) per mile.—Officials of *shinnin* and *chokunin* rank, *sen* 30; Officials and probationers of *sonin* rank, salaries above *yen* 1,000, *sen* 20, above *yen* 300, *sen* 15; officials and probationers of *hannin* rank, salaries above *yen* 360, *sen* 10; under *yen* 360, *sen* 8.

Allowance for travelling by horse or carriage, within jurisdiction (*kan-nai*) per mile.—Officials of *shinnin* and *chokunin* ranks, *sen* 20; officials and probationers of *sonin* rank, salaries above *yen* 1,000, *sen* 12; above *yen* 300, *sen* 10; officials and probationers of *hannin* rank, salaries above *yen* 360, *sen* 8, under *yen* 360, *sen* 6.

Daily allowance (*nitto*) inside and outside jurisdiction.—Officials of *shinnin* and *chokunin* ranks, outside, *yen* 2.50, inside, *yen* 2.00; officials and probationers of *sonin* rank (salaries above *yen* 1,000) outside, *yen* 1.50, inside, *yen* 1.00; (above *yen* 300) outside, *yen* 1.30, inside, *sen* 80; officials and probationers of *hannin* ranks (salaries above *yen* 360) outside *sen* 80, inside *sen* 60 (under *yen* 360) outside, *sen* 70, inside, *sen* 50.

FOR CHRONIC DYSPEPSIA USE HORSFORD'S ACID PHOSPHATE.

DR. EDWIN MORRIS, F.R.C.S., and L.S.A., 8 High-street, Spalding, Lincolnshire, says: "Of all the remedial agents, I have never met with one o efficacious in chronic dyspepsia. I speak from personal experience of its excellent qualities, and as a nervine tonic I cannot too highly recommend it."

## *THE PHOTOGRAPHIC SOCIETY OF JAPAN.*

A meeting of the above mentioned Society was held in the rooms of the Geographical Society, Nishikonyacho, Tokyo, on the evening of Friday, 13th inst, Mr. Edmond R. Holmes in the chair. There was a large attendance.

A paper was read by Mr. T. Ichioka on a certain developer that had fallen into his hands. This developer was sold commercially in the form of a bright red solution, needing nothing but dilution with water. It was exceedingly active, and could be used over and over again. It contained a large quantity of sulphite of soda, and some caustic soda, but Mr. Ichioka did not know what was the actual developer.

MR. C. D. WEST thought that the actual developer was probably hydrokinone. Either pyro, or eikonogen would be detected by the colour, in spite of the fact that some dye, probably an aniline colour, had evidently been added to the solution, to make it more difficult to guess what it might be made up of.

Mr. W. K. BURTON demonstrated the washing of eikonogen that had turned quite black. By the particular method of washing adopted the loss of eikonogen was a mere trifle.

Mr. B. MUNSTER showed some tubes of the new eikonogen developing powder. This powder was found to be quite white, and, when dissolved in water gave a colourless solution. Mr. Munster said that it needed no addition of any kind, and was a most active developer.

A portfolio of prints that had been sent to the Society some time ago by Dr. H. P. Emerson, as examples of "Naturalistic Photography," were handed round for criticism.

Mr. K. OGAWA said that when he was in America, he had taken every opportunity of studying reproductions of the work of the French artist Millet, whose pictures he admired greatly. It was evident that Emerson was trying to imitate his work photographically, and, although Emerson's work was far from faultless, it was, Mr. Ogawa considered, a great deal better than what was commonly turned out by photographers, who might study Emerson's work with advantage.

Mr. C. D. WEST said he thought the greater part of Emerson's work was too black and sooty to be natural.

Mr. J. MILNE recognised great artistic merit in Emerson's work but, speaking not particularly of the specimens shown just now, but of Emerson's work in general, he could not see that it was necessary for a "naturalistic" effect to select, for photography, only such phenomenally hideous figures as were generally to be seen in Emerson's photography. At least half of them would be arrested on suspicion only on account of their faces if they were seen by daylight. He proposed a vote of thanks to Dr. Emerson, which was seconded by Mr. A. J. Hare, and carried unanimously.

Mr. I. ISAWA showed some excellent micro-photographs, and gave a short description of the means of producing them.

Mr. KAJIMA SEBI photographed the meeting by flash light.

The proceedings ended with a vote of thanks to the Chairman.

During the evening prints made from negatives exposed on the occasion of the flash-light at Kaga Yashiki, by Messrs. Kajima, West and Burton were exhibited.

## *A COMPARISON BETWEEN ELIZABETHAN & VICTORIAN POETRY.*

An Opening Address, delivered in the University Hall, Kanda, Tokyo, on Saturday, 31st January, to the members of the National English Language Association, by Professor Dixon of the Imperial University.

It is a somewhat odd destiny that has attached a Queen's name to the three most notable epochs of English literature. The age of Elizabeth is followed after the lapse of a century by the age of Queen Anne. Another century brings us to the present era, whose jubilee was celebrated only four years ago. In comparison with the first and the last outbursts of literary fertility the so-called Augustan era of Queen Anne sinks into comparative insignificance, whether we consider its mere duration of years or the splendour and variety of genius in the men who made it famous. Queen Elizabeth, a woman of twenty-five when she ascended the throne, ruled England for nearly half a century and died a childless old woman. Anne occupied the throne for only a dozen years. Queen Victoria has already reigned for nearly ten years longer than the long reign of Queen Elizabeth. But the literary epoch known as the Elizabethan is made to cover a much longer period than the forty-five years of the Virgin Queen's reign. Commencing with Wyatt and Surrey, both of whom died while she was still a child, it embraces the first portion of Milton's literary activity, and ends with the death of Ben Johnson in 1637. The Victorian era is generally understood to cover the splendid efflorescence of English genius that began with the century, Wordsworth, Scott, and Byron being the leaders of the new romantic movement. Some one has remarked that it takes a great deal of history to make but a little literature. The forces, then, which have operated in the production of such luxuriant literary harvests as have been garnered in England in the sixteenth and the nineteenth centuries must necessarily be powerful and far-reaching. Every literature worthy of the name is the product of a national life, that has asserted itself against destructive influences from without and from within, and longs to find expression in "winged words." One frequently hears in general conversation an utterance given to the language of a spurious cosmopolitanism. The sooner, say these philosophers, we do away with national boundaries and national peculiarities, with differences of institutions, with differences of dress, with differences of manner, nay even with differences of language, the nearer shall we arrive at an ideal state of civilization. The student of literature has a far different tale to tell. His studies disclose to him the fact that an exuberant national life, the result of many sacrifices, the outcome of a history which includes much tragedy, is necessary to the production of any stable and lasting literature. Without Marathon or Salamis Athens would not have produced her wonderful drama, and Æschylus, who was prouder of his prowess at Marathon than of his literary fame, and Sophocles, who served as an Athenian general, would never have been heard of. The triumphant spirit of Imperial Rome breathes through the sonorous pages of Virgil:—

Tu regere imperio populos, Romane, memento.[1]

The greatness of the republics of mediæval Italy, the centre and focus of European civilization until that wonderful country handed over the torch to fresher and more virile nations, lends its mighty spirit to the intense utterances of Dante, himself an eager politician, who fought and suffered for his city and party. An historical explanation must therefore precede any attempt to estimate the two great periods of our national literature. The high quality of the poetry of Sidney, Spenser, and Shakespeare, of Wordsworth, Tennyson, and Browning has its roots in a long past of noble deeds and chivalrous prowess, in much courageous action, endurance, and suffering on behalf of national ideas and national institutions. The men of Elizabeth's reign were themselves partakers in the national affairs. Spenser, who sustains the poetic flight more steadily than almost any other of the world's poets, was a keen politician, a zealous patriot, and a man of action. Sidney was a diplomatist, the hero of the tournament, a soldier who fell gloriously on the field of battle. Ben Jonson was also a bold and determined soldier. And Shakespeare, if fate denied him a like scope for his activities, was yet an excellent business man and a sound lawyer. The literature of the period is full of the energy of active men, and does not smell of the lamp. To use the magnificent words of Milton, it is "the utterance of a noble and puissant nation rousing herself like a strong man after sleep, and shaking her invincible locks. . . . like an eagle muing her mighty youth, and kindling her undazzled eyes at the full midday beam." The dream of a world-republic whose annual subject of interest would be the discussion of a world-budget, is a fatuous illusion. "How is it," asks a recent contributor to one of our magazines, "how is it that in poetry and romance practical business-like England bears away the bell? In music, painting, and sculpture we have been surpassed by other nations, but this makes the matter still more inexplicable, poetry being the highest of the arts." The question has to be answered by an examination of the causes which made Elizabethan England what it was.

England was the only country whom the various troubles of the sixteenth century allowed to retain and to develop her national institutions without loss, through civil war, of the national life-blood. The sixteenth century was for Germany a period of retrogression in almost every department. She began the century with quite as fair prospects of development as her insular neighbour, whom she influenced deeply both from the religious and intellectual sides, being the mother-country of the Reformation, and the seat of literary accomplishments and civic splendour. At the close of the century England reigned supreme in literature, in foreign enterprise, in political development, even in the size and importance of her cities. Germany had become to her, instead of a bounteous mother of arts, a mere barbaric realm of sorcery and fantastic tales. France, torn in pieces by civil discord, the results of that fatal spirit of no-compromise which drove Calvin, one of its chief expounders, to Geneva, had to wait till the next century for the development of her literature. The persecutions of the Duke of Alva in the Netherlands served to enrich England with educated and high principled refugees, who were thus lost to their own native land. In Spain a cold, punctilious, and arrogant sovereign, who, however, merely reflected the spirit of an excessively exclusive and overbearing aristocracy, had repressed the exuberant new literary spirit, which had shown no little promise in the development of a romantic drama. In Italy there was no national spirit whatever, Spain having parcelled out the peninsula into dependencies; and the pettiness of the life at the various Italian courts and capitals was reflected in the literature. Besides, the great factor of morality which, after all, as a profound thinker has remarked, *is the nature of things*, was singularly absent from Italian life. As a class the Italian humanists (or expounders of the new learning), have been described as at once frivolous and pedantic, servile and vicious. Italy was regarded by the stricter peoples of the North as the home of treason, lying, poisoning, and every form of swinish debauchery. "An Italianate Englishman," it was said, "is a devil incarnate." Ascham in his *Scholemaster* advised such of his countrymen as travelled there, to behave like Ulysses when he passed the enchanted isles; he stopped his ears with wax, and bound himself fast to the mast of his vessel.

When Elizabeth in 1558 ascended the English throne, the nation, as a corporate unit, was feeble and divided; she left it powerful and united. Her mother's history made the young queen of necessity a Protestant, and the breach with Rome which had been consummated in 1540 by the excommunication of her father Henry, and was in no wise soldered up by the short four years of her elder sister's reign, was now rendered complete and final. England, therefore, which no foreign army has invaded since the days of King John, sprang now into unfettered and complete independence under a spirited, prudent, and able sovereign. All the conditions were such as to brace and exhilarate the national life. The wonderfully vigorous manhood of the era, freed from the bondage of an iron ecclesiasticism, and strengthened intellectually by the absorption of the unequalled literature of Greece and Rome—a rich feast after the meagre diet of mediæval logic and theology—found in England particularly favourable conditions for symmetrical expansion. It is difficult to account for the appearance of individual geniuses, and sometimes we seem to see in different lands at different crises of history splendid opportunities for the development of such, when nature proves sterile and refuses to provide the needed man. This much, however, must be conceded. As the soil requires long and careful attention before perfection in flower or plant is attained, so must a great poet, and especially a great dramatist, live in an age of great deeds, and be borne aloft on the crest of a mighty wave of national enthusiasm or excitement. He demands surroundings which stimulate his nascent powers, and an audience responsive to his stirring appeals. Every man is the product of his age, and an individual, however great his genius, cannot rise to the summit of greatness without the assistance of his age and of a suitable environment. One might as well expect the great gilt ball that tops the dome of St. Peter's at Rome to poise itself in the air without support.

The leading characteristic of Elizabethan literature is its wonderful drama, which remains a heritage for all time. In this respect it affords a striking contrast to Victorian literature, which, while it has given us perhaps a score of dramas that are worth studying in a quiet nook of a library, has been almost altogether barren in the field of the living drama. And yet London is perhaps more of a theatre-going place in these days of ours than it ever was; but the plays are mere wonders of upholstery with a frivolous, shallow, and almost childish dialogue. The drama in Shakespeare's time fought against serious obstacles, and gained energy in the struggle. Stage-managers found great difficulty in obtaining for their theatres convenient sites within the city walls, and had to be content with inconvenient and, in summer, roofless structures. The subject for disputation given in the year 1593 to Oxford condidates for the degree of M.A. seems to us a strange one—Are players infamous? And, stranger still, the decision was

[1] Æneid, VI, 851.

Digitized by Google

affirmative. The drama, despised by the learned of the time, has since become the wonder and delight of scholars, and no such decision would be returned now. And yet the two eras are remarkably alike in most essential respects. Novels have superseded the drama in all its more serious and educative functions. Both periods are notable for the singular beauty and varied melody of their lyric poetry. Both periods also are remarkable for the great influence which Italian thought and art have had upon their leading spirits. Among our moderns, Byron, who chanced to die in Greece, Shelley, Landor, and the two Brownings, not to mention others, made Italy their home. Keats's grave is in the imperial city, a meet place for so appreciative a strudent of Italian poetry, "an Elizabethan born out of due time." Our modern literature is redolent of Italian art, is stocked with Italian themes. Ours is the third period of direct Italian influence. The first came through Chaucer. When poetry had degenerated in England from the masterly heroics of the great fourteenth century poet into the smart doggerel of Hawes and Skelton and the dull inartisticness of Berkeley's *Ship of Fools*, Wyatt and Surrey relit the lamp of artistic poetry from Italy, where they, like other Englishmen of fashion, had travelled. Most of the stories on which Shakespeare builds his dramas are taken directly from Italian sources. In matters of versification the Italians had reached a standard of high elaboration and perfection which made it necessary for the poets of other less cultured races to become, for a time at least, mere pupils and imitators. Sir Philip Sidney's first poetical efforts were in a certain sense little more than exercises in an attempt to naturalize all sorts of Italian and classic metres, hexameters, elegiacs, sapphics, terza rima, ottava rima, sestines, and madrigals. Many of these forms never took root, and have not been heard of since. Others have tried to struggle back into life in these latter days. The immense mass of new material which had to be assimilated by English scholars and readers at this epoch led to no little pedantry and affectation, which Shakespeare makes sport of in one of his early comedies.[2] But the more capacious minds were able to assimilate without intellectual harm the rich and stimulating diet, and to make use of it in the creation of a new, fresh, and vigorous literature. That prince of literary men, Erasmus, who in Henry VIII.'s reign filled two important chairs at Cambridge University, used Latin in a free fashion which caused conservative scholars to look aghast. He actually employed phrases which had not received the sanction of Cicero! Breaking away from the cramping fatters which restricted him to a vocabulary belonging to a distant age, he framed new words as he required them. In the same way Shakespeare and his brother dramatists of the romantic school, rejecting the so-called unities of time, place, and action as needless restrictions to the free development of their art, were enabled to create a drama worthy of the age and instinct with new life. And it is Spenser's unique glory that he invented a stanza the most perfect for a particular purpose ever framed by poet, intricate and elaborate, yet perfectly under his mastery. As a versifier Spenser stands supreme; in the realm of pure poetry many critics place him only second to Shakespeare. His *Faerie Queene* is a marvel of tireless poetic flight.

Let us now turn for a moment to consider the historical position of Englishmen at the beginning of the present century. The insular and independent position of the Kingdom had once more been brought into startling prominence by an intended invasion, and by a magnificent naval victory which frustrated the chances of invasion once and for all. The repulsion seven hundred years ago of the Mongol Tartars from the shores of Japan by the warriors of Kiushiu still remains a favourite subject with your artists and engravers, as being an event on whose depiction the patriotic eye may rest with pride. England has two such events in her history. The defeat of the Armada in 1588 and the victory in 1805 at Trafalgar enabled her to remain mistress inviolate within her own domains, the heiress of unravished heirlooms:

> They melt into the mass of waves, which mar
> Alike the Armada's pride or spoils of Trafalgar.

Wordsworth, who is in many respects the distinctive poet of the century, wrote sonnet after sonnet to stimulate the patriotic zeal of his countrymen in the great struggle against the modern Ghengis Khan. The complete success which crowned the British arms left the nation free to work out its own problems in its own way and in a variety of different forms. The national spirit had been neither embittered nor enfeebled by the struggle, and its literature was consequently marked by a peculiar spontaneity and freshness. The literary spirit of the time at once harked back to the period in English history with which it had most affinity.

[2] Love's Labour Lost.

Coleridge, the poet who in all his moods was always a poet, Lamb, Hazlitt, and others, began to interpret to their contemporaries the great productions of the early dramatists. The sonnet became a power again in the hands of Wordsworth, Leigh Hunt, Keats, and Rosetti. Shelley soared into a region of pure imagination that no spirit had dared to approach since Spenser died. And a body of lyric poetry was produced, unrivalled for richness and variety. In perfect abandon and native flavour, the productions of the earlier era may be allowed to be superior; there is a more immediate appeal in them, perhaps, from tongue to ear. Most of these earlier poets "sang but as the linnet sings," a description of his own poetry by Tennyson which scarcely hits the mark. His productions are the elaborate and intricate work of the deliberate and conscious artist. Mr. J. Addington Symonds, in an article contributed to the *Fortnightly Review* of December, 1888, relates how he once asked an eminent musician, the late Madame Goldschmidt, why Shelley's lyrics were ill-adapted to music. She made him read aloud to her the "Hymn of Pan," and those lovely lines, "To Night,"

> Swiftly walk o'er the western wave,
> Spirit of Night!

Then she pointed out how the verbal melody seemed intended to be self-sufficing in these lyrics, how full of complicated thoughts and changeful images the verse is, how packed with consonants the words are, how the tone of emotion alters, and how no one melodic phrase could be found to fit the daedal woof of the poetic emotion:

> Wrap thy form in a mantle grey,
> Star in-wrought!
> Blind with thine hair the eyes of day
> Kiss her until she be wearied out. . . .

How different, she remarked, it is from the *largo* of Milton,—

> Let the bright seraphim in burning row,
> Their loud uplifted angel-trumpets blow.

It is a curious commentary on this remark, that the exquisite lyric in Browning's *A Blot in the Scutcheon*, a lyric characterized by Archdeacon Farrar as the most beautiful song to a woman in the English tongue, had to be omitted from the acted play. Instead of summing up the action in a burst of melody, as Shakespeare's lyrics do, it delayed and embarrassed the dramatic situation:

> SONG TO MILDRED.
>
> There's a woman like a dewdrop, she's so purer than the purest;
> And her noble heart's the noblest, yes, and her sure faith's the surest;
> And her eyes are dark and humid, like the depth on depth of lustre,
> Hid i' the harebell, while her tresses, sunnier than the wild-grape cluster,
> Gush in golden-tinted plenty down her neck's rose-misted marble;
> Then her voice's music—call it the well's bubbling, the bird's warble!
> And this woman says, "My days were sunless and my nights were moonless,
> Parched the pleasant April herbage, and the lark's heart's outbreak tuneless,
> If you loved me not!" And I who—ah, for words of flame!—adore her,
> Who am mad to lay my spirit prostrate palpably before her—
> I may enter at her portal soon, as now her lattice takes me,
> And by noontide as by night make her mine, as hers she makes me!

The perfect freedom and wild-rose unconventionality of the Elizabethan poets, which the master spirits of the time suffered but seldom to lapse into license, proved a snare to their degenerate successors. The wave had spent itself. Law was a necessity in the department of literature as well as in society. The poetgarden had become a mass of weeds. A reign of strict conventionality now set in, repulsive and intolerable to us in many of its aspects, but distinctly beneficial. It kept poetry within due limits, and in its social aspect it deepened and strengthened the individual character. Beauty and pleasure had for the time to be subordinated to principle and duty. The chivalrous spirit which still lingered on at Elizabeth's court, and graces so much of the poetry, notably the *Faerie Queene*, died a natural death under the false Stuarts. Shakespeare touches the whole gamut of human life except one chord, the chord of religion; and it is this chord which Milton in his later work, which is distinctly un-Elizabethan, strikes with consummate mastery. The sonnet on his blindness is a striking exemplification of the change which he—and the poet was a type of the age—had undergone since he wrote his first dainty lyrics:—

> ON HIS BLINDNESS.
>
> When I consider how my light is spent
> Ere half my days, in this dark world and wide,
> And that one talent which is death to hide,
> Lodg'd with me useless, though my soul more bent
> To serve therewith my Maker, and present
> My true account, lest he returning chide;
> "Doth God exact day-labour, light denied ä"
> I fondly ask: But Patience, to prevent
> That murmur, soon replies, "God doth not need
> Either man's work, or his own gifts; who best
> Bear his mild yoke, they serve him best; his state
> Is kingly; thousands at his bidding speed,
> And post o'er land and ocean without rest;
> They also serve who only stand and wait."

The mighty scientific movement set on foot by the discoveries of Copernicus and Sir Isaac Newton, has also given poetry a new outlook, and a fresh field. Man, no longer able to consider the universe as made for him and his, or the earth as the centre of all things,—which is the Elizabethan conception—has studied nature reverently for herself and at first hand. The divine beauty of nature, of rocks, mountains, and cataracts, has come to this age as a revelation. A race of poets has sprung up who have taught us to separate the picture in nature from the mechanical law. In this new departure Wordsworth led the way, and others have pressed on after him, till the whole mass of society is now leavened. Wordsworth, the high priest of nature, the lone pedestrian among the mountains "far from the madding crowd," would have been considered a lunatic in the times of Elizabeth. It is seldom that mountains are even named by Shakespeare and his contemporaries; to this age of ours they are specially dear. Who does not love Shelley's inimitable lines?

> And multitudes of dense white fleecy clouds
> Were wandering in thick flocks along the mountains
> Shepherded by the slow, unwilling wind.[3]

But it is in the following passage from Wordsworth that this new and important departure in poetry finds completest expression. The individual—largely a product of Puritanism, which deepened and braced and purified the national character—has discovered a personal bond between Nature and himself, and is least solitary when alone:—

> And I have felt
> A presence that disturbs me with the joy
> Of elevated thoughts; a sense sublime,
> Of something far more deeply interfused,
> Whose dwelling is the light of setting suns,
> And the round ocean and the living air,
> And the blue sky, and in the mind of man:
> A motion and a spirit, that impels
> All thinking things, all objects of all thought,
> And rolls through all things. Therefore am I still
> A lover of the meadows and the woods
> And mountains; and of all that we behold
> From this green earth; of all the mighty world
> Of eye and ear, both what they half create
> And what perceive; well pleased to recognize
> In Nature and the language of the sense
> The anchor of my purest thoughts, the nurse,
> The guide, the guardian of my heart, and soul
> Of all my moral being.[4]

While the Elizabethans lived a social life, at the court or about the taverns and playhouses, the life of the thinkers and workers of the present age is largely a solitary one. Numbers of our literary men spend most of their waking hours in the quiet of their study, or in lone walks or rides through the woodlands and on the hills. Such a life in its perfect abandon and freedom, was for several reasons an impossibility three centuries ago. The lonely colonist—the squatter, the rancher—is not seldom a man of keen literary instinct. For the quiet of the hut or the study, or of the sea-shore, the mountains and the plains, a verse is demanded that is not for singing but for crooning, varied and musical, but with a subdued music, as in the inimitable "Rugby Chapel" of Matthew Arnold:—

> See! In the rocks of the world
> Marches the host of mankind,
> A feeble, wavering line.
> Where are they tending?—A God
> Marshalled them, gave them their goal.—
> Ah, but the way is so long!
> Years they have been in the wild!
> Sore thirst plagues them, the rocks,
> Rising all round, overawe;
> Factions divide them, their host
> Threatens to break, to dissolve.—
> Ah, keep, keep them combined!
> Else of the myriads who fill
> That army not one shall arrive;
> Sole they shall stray; on the rocks
> Batter for ever in vain,
> Die one by one in the waste.

We might go on to further parallels, for the subject is an eminently rich one. Perhaps it is not fair to leave out the singularly intellectual breeding of the English ladies of the sixteenth century. Selden[5] tells us how Henry VIII.'s permission to his people to read the Scriptures in the vernacular was denied to servants and to all women, except ladies and gentleman, who had leisure and might ask somebody the meaning. Every student of English literature knows the famous passage in Ascham where he describes his interview with Lady Jane Grey, poor victim of an intriguing father-in-law's ambition. The young girl of fifteen was busily engaged in reading Plato's *Phaedo* in the original Greek, a language which she could write with ease. In the fifth year of Elizabeth's reign, we find that clever woman and able sovereign spending her afternoons in reading *Demosthenes*, and we know that she composed sonnets. These incidents indicate the high culture which was allowed to the gentlewomen of the period. Sir Philip Sidney's mother was a type of all that is brightest and best in womanhood. His sister, the Countess of Pembroke, mother of the most accomplished nobleman of his time, was not only his sister in blood, but his sister in soul, with no mean intellectual abilities, and these well-developed. She is the author

[3] *Prometheus Unbound.*
[4] Lines composed a few miles above Tintern Abbey
[5] Table Talk.

Digitized by Google

of a pathetic elegy on her brother, incorporated in Spenser's *Astrophel*, one verse of which we will give:—

What cruel hand of curséd foe unknown
Hath cropped the stock which bore so fair a flower?
Untimely cropped, before it well were grown,
And clean defacéd in untimely hour!
Great loss to all that ever him did see,
Great loss to all, but greatest loss to me!

The Elizabethan age was not an impure age, though in this respect little comparable to our own, so punctilious in all such matters. There is much that is coarse and evil-smelling in the dramas of that time, which we could willingly dispense with. But it was in the main too great and noble an age to delight in mere prurience and obscenity, that "blasphemy against the divine beauty of life."[6] The distinctions of right and wrong, of holy and unholy, are not blurred. Though Elizabeth's court was not altogether free from scandal, it ranked morally far above the Southern courts. The Virgin Queen exercised a strict supervision over her servants, and, on the whole, esablished excellent traditions which lasted, though somewhat feebly, into the two following reigns. The moral tone of the *Faerie Queene* is high pitched; Sidney's *Astrophel and Stella*, a series of love songs addressed to a married woman, keeps always within the limits of propriety, and ends with dignified self-repression. The age was manly and the moral tone was sound; we have become more sensitive since, but not necessarily in all respects more radically healthy or more essentially pure.

We are far more self-conscious and reflective than out forefathers; life is more of a problem and an enigma to us. The circle of knowledge and the sciences has so widened itself that we can know portions of it only by name, and most of the remainder in but shallow fashion. There is an infinite variety in our life, as compared with the life of these earlier, simpler days. The grand tour for budding statesmen has extended twenty-fold, and now includes a complete circumnavigation of the globe. Negroes and Indians, besides a score of races then unknown, are visited in their own haunts, not only by the voyager but by the everyday traveller. Such is the later aspect of our era, since steam and electricity have been developed in all their mighty power. At present these influences have not had time to produce a fresh poetry of a high order, nor is a literary expansion likely to take place until a succeeding generation. Tennyson in his *Locksley Hall*, a curious medley of melancholy and optimism, gives expression to the fond dreams of the men of 1851, who saw in the Exhibition of that year the pacification of the world, the commencement of a reign of plenty and prosperity:

Till the war-drum throbbed no longer, and the battle-flags were furled
In the Parliament of man, the Federation of the world.
These the common sense of most shall hold a fretful world in awe,
And the kindly earth shall slumber, lapt in universal law.

But society has changed more in the last thirty years than in many a century. Never has a social revolution been more radical. Our aged poet-laureate has given up his early dreams, and almost despairs of the present state of society:

Forward, then, but still remember how the course of time will swerve,
Crook and turn up on itself in many a backward streaming curve.[7]

The 'still sad music of humanity' threatens to deepen into a mighty roar. But the questions of 1891 are hardly within the limits of our survey. When Lord Tennyson dies, the Victorian era will have ceased; he is the last of the heroes, and who is qualified to succeed him? [8]Even now he feels himself out of touch with his contemporaries. Eighty years have left "the dog too lame to follow with the cry."

The age of industrial optimism may be said to be over; it is that which inspired the earlier utterances of Browning and Tennyson. Their predecessors, Wordsworth and Shelley, disciples of Rousseau, were enthusiasts in the allied cause of the brotherhood of man, although the older poet turned sheer round, and became in this later days a staunch conservative. The Victorian era, already a completed book, can be regarded by us with the critical coolness of outsiders. One of its movements has not yet seen its perfect development, but is still in process,—the national movement, which has been altering the map of Europe during the century and threatens still further to alter it. This is the theme which stirred Byron's blood, and inspired him to write his finest passages, and to it we may look as a fruitful fount of inspiration in the future. Poetry, whether Elizabethan or Victorian or of any-first-class quality, is ever intensely national and patriotic in its sources and sympathies. The poet is the sociologist of his own age and country.

To sum up, then. Prodigality of genius is perhaps the outstanding characteristic of the Elizabethan writers, a careless prodigality which poured forth the treasures of imagination and expression with little or no thought of a reading public or of future generations. On almost all the work of this century the idea of value is firmly stamped, value in the market, as a money return or in the coin of fame. It is scarcely possible to conceive greater carelessness than was shown, for instance, by Shakespeare in the publication of his dramas; they came before the reading-public in the most haphazard way, leaving a legacy of interminable investigation and discussion to the race of commentators. It is doubtful whether Sir Philip Sidney meant that any of his compositions should be published, and his works are all posthumous. The noblemen and Court gentlemen of that day were were very far from pluming themselves greatly on their literary pursuits, preferring the rôle of a Macaenas to the humbler position of a bard. Spenser was the Court poet, whose hope of preferment lay in his pen, and long and weary waiting he was often subjected to before his modest hopes were realized. It was Ben Jonson who first took the bold step of giving forth to the world, early in the seventeenth century, a complete edition of his "Works,"—a step which his contemporaries did not fail to satirize. We live now under far different conditions. An indisposition to publish is is not a foible of our poets. Along with this willingness to appear in print, goes an excessive attention to the distinction of *meum* and *tuum*, which the Elizabethans did in nowise show. Authors have grown to be very careful of the fruits of their brain. When a master-poet like Tennyson is paid at the rate of a dollar a word for a lyric, it is evident that fine phrases and fine images will not be recklessly wasted. Rather will the oposite characteristic be displayed, a cloying and surfeiting of sweet things, thought beaten out to a fineness that makes the whole effect rather thin. It is not that our poets of the nineteenth century are more essentially melancholy or retrospective than their predecessars. The race is still youthful, hopeful, and vigorous, planting colonies all over the globe and ruling empires. Browning, the distinctive poet of the age, is a thorough-going optimist. Wordsworth's poetry is a solace for the solitary, a continually increasing source of delight to the thoughtful man as he advances in life. None but the minor bards affect the tone of deep melancholy and give utterance to a cry of despair. A melancholy ballad or sonnet is a piquant sauce to the every day happiness and jollity of life. For the class to which our poets address themselves is a comfortable, well-to-do, amusement-loving community, revelling in all the simpler joys of life, earning freely and spending freely, serious and moral too, and every now and then undergoing a pessimistic panic of some sort or other. We can scarcely yet be described as a generation which is 'sicklied o'er with the pale cast of thought,' though less boisterous, no doubt, and less high-spirited than the Elizabethans. We drink deep in pleasure and often overtax ourselves with work, but we are not a down-hearted or an unhappy race. The time is not yet come when, in the words of Christina Rossetti,

Evermore men shall go fearfully,
Bending beneath their weight of heaviness.

It is the dominant religious spirit which has saved us; without the hold which our best characters, our leading minds, have kept on the unseen, life and poetry, the criticism of life, must have turned into

Apples on the Dea Sea shore
All ashes to the taste.

But our best men have expelled fear and faint-heartedness by a brightly-burning faith and hope, which finds expression in Browning's song:—

The lark's on the wing;
The snail's on the thorn;
God's in his heaven,
All's right with the world.

Or to turn to the thoughtful sonnet of Matthew Arnold, written after a walk in East London, surely the least inspiriting source for a cheerful utterance:—

O human soul! as long as thou canst so
Set up a mark of everlasting light,
Above the howling senses' ebb and glow,
To cheer thee and to right thee if thou roam,
Not with lost toil thou labourest through the night,
Thou mak'st the heaven thou hop'st indeed thy home.

## *LATEST TELEGRAMS.*

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, February 16th.

The New York Board of Trade is opposed to the free coinage of silver.

Later.

It is again stated that President Harrison will veto the Silver Bill if passed.

General Sherman is dead.

London, February 17th.

The Right Hon. John Morley has proposed a vote of censure on the administration in Ireland. The Right Hon. W. E. Gladstone supported the motion, and the debate is proceeding.

London, February 19th.

Mr. John Morley's motion of censure on the administration in Ireland has been rejected by a majority of 75.

Large sales of silver have taken place in New York.

Later.

Increasing tension exists between the Emperor William and Prince Bismarck, owing to the latter's constant criticisms of the Imperial policy.

(FROM THE "SINGAPORE FREE PRESS.")

London, February 2nd.

Four hundred of the garrison at Oporto revolted in favour of a Republic, and entrenched themselves in the Town Hall, where they were bombarded by the loyal portion of the troops. The revolters submitted owing to lack of ammunition. There were fifty killed on both sides. Order has since been restored.

[FROM TONKIN PAPERS.]

Paris, February 2nd.

Sardou's drama "Thermidor," which was being played at the Comedie Française, has been interdicted after the third performance in consequence of disorderly manifestations.

Henri Fonquier and Renach, deputies, questioned the Government on the subject on the 29th, asking what measures were to be taken at once to assure public order and liberty for dramatic art. A stormy debate was closed by the order of the day pure and simple voted on the demand of the Government by 315 to 192.

The Italian Cabinet has resigned in consequence of the rejection of the Bill establishing an additional tax on alcohol. The fall of Crispi is greatly commented on by the French and foreign press. Italian rentes have risen 55 centimes on the Paris Bourse.

The painter Meissonier died on Saturday.

[SHERMAN, Gen. William Tecumseh, was born at Lancaster, Ohio, Feb. 18. 1820. He graduated at the Military Academy at West Point in 1840, served in the Florida War, in the war with Mexico, and elsewhere, until 1853, when he resigned his commission. During the next four years he was a banker in San Francisco; and for the succeeding two years a lawyer at Leavenworth, Kansas. In 1859 he was appointed Superintendent of the Louisiana Military Academy, but resigned in Jan. 1861, when the State seceded from the Union. When the civil war broke out, he was commissioned as Colonel of a regiment of infantry, and commanded a brigade of volunteers at the Battle of Bull Run, and was made Brigadier-General of Volunteers. He received his commission as Brigadier-General in the regular army in July, 1863. In Oct. 1863, he succeeded General Grant as commander of the department of the Tennessee. In March, 1864, when Grant was made Lieutenant General, Sherman succeeded him as commander of the military division of the Mississippi, and organized an effective army of 100,000 men to operate against Gen. J. Johnston. On May 2, 1864, simultaneously with the advance of Gen. Grant in the East, Sherman entered on the invasion of Georgia, and after a number of battles, received the capitulation of Atlanta, Sept. 2, 1864. On Nov. 14. having sent abont two-fifths of his force, under General Thomas, to repel General Hood's movement in Tennessee, he marched southward to the sea, with a force of 60,000 men, in less than a month passing over about 300 miles with his army, without any resistance, till he reached Fort McAllister, below Savannah, which he captured after a brief action, Dec. 13, Savannah surrendering Dec. 21, 1864. He fought two battles in North Carolina, March 16 and 20-21, 1865, occupied Goldsboro', March 22, captured Raleigh, April 13, and received General Johnston's surrender, April 26, 1865, upon the same terms as had been accorded to the army under General Lee. The surrender virtually included all the Confederate forces in the field, and brought the war of secession to a close. General Sherman had been made a Major-General in the United States Army, Aug. 12, 1864, for his Atlanta campaign, and after the close of the war continued in command of the Military Division of the Mississippi for more than a year. On July 25, 1866, General Grant having been promoted to be General of the Army, General Sherman was advanced to be Lieutenant-General, and assigned to the command of the Military Division of the Mississippi. In March, 1869, General Grant having been elected President, resigned the position of General of the Army, and Sherman was raised to that rank. In 1871 and 1872 he travelled in Europe and the East, and returning to America made his headquarters at Washington, but in 1874 removed them to St. Louis. He has published a full "Narrative of his Military Operations," 1876.—*Men of the Time.*]

*Clan Buchanan*, British ship, 2,072, Geo. Harris, 21st February,—Hakodate, Sulphur and Ballast.—Jardine, Matheson & Co.

### PASSENGERS.

ARRIVED.

Per British steamer *Batavia*, from Hongkong:—For Vancouver: Mr. W. S. Smith in cabin; and 68 Chinese in steerage.

Per British steamer *Ancona*, from Hongkong viâ ports:—Mrs. Suthon, Mrs. Bass, Messrs. R. B. Smith, Cryon, Sheridan, Mixon, S. Kurino, Mr. and Mrs. Brokenshire, Mr. and Mrs. Silke, Mr. and Mrs. Silke, Jun., and Mr. J. C. Peter. Disembarked at Kobe—Messrs. E. Dodge, J. J. W. Ford (2), M. M. Fukui, Densmore, Mrs. McKennan, Miss Ferguson, Miss Mott, Miss Beacher, Dr. and Mrs. Potter, Mr. and Mrs. Harder, Messrs. W. S. Flack, W. Bolton, and J. Schlosser in cabin.

Per British steamer *Abyssinia*, from Vancouver, B.C.:—Messrs. Munn, Johnstone, H. W. Frost, Miss L. J. Kay, Mr. F. G. Saunders, Miss M. Riggs, Miss Bee, Miss Hanzlik, Miss Collier, Miss M. Wilson, and Mr. Matsuke in cabin; 69 passengers in steerage.

Per Japanese steamer *Nagato Maru*, from Kobe:—Mrs. M. Chiya, Miss de Hamoveise, Mr. and Mrs. Morel, and Mr. Macondray in cabin; and 31 passengers in steerage.

Per Japanese steamer *Omi Maru*, from Hakodate:—Miss Palmer, Mrs. Longford, Mr. R. Kobayashi, and Mr. S. Tokito in cabin; Messrs. T. Miyasaki, S. Kawashima, T. Harada, M. Nishiyama, S. Nishida, K. Soida, Mrs. S. Tokito, and Miss M. Tokito in second class, and 50 passengers in steerage.

Per Japanese steamer *Niigata Maru*, from Kobe:—Mr. R. M. Scott, Miss Cushing, Mr. Carames, and Mr. S. Thompson in cabin.

Per American steamer *City of Peking*, from Hongkong:—Miss J. Carr, Dr. J. Dudley, R.N., Miss L. Chamberlin and servant, Mr. A. Edgar Beard, Hon. Edward Bedole, Mrs. C. R. Churchill, and Mrs. M. B. Drallard and child in cabin; 4 Europeans in steerage. For San Francisco: Captain Macdonough, R.A., and Mr. and Mrs. Molineux in cabin.

Per Japanese steamer *Wakanoura Maru*, from Hakodate:—Mr. J. Mada in cabin; 2 passengers in second class, and 11 passengers in steerage.

DEPARTED.

Per French steamer *Calédonien*, for Shanghai viâ Kobe:—Messrs. S. Erskine, E. Oppenheimer, A. Meier, Chas. von Heydebrand, Mr. and Mrs. D. B. Taylor and servant, Messrs. Alfred Bueschel, H. H. Jacobs, Mr. and Mrs. James Valentine, Mr. and Mrs. Henry Baos, Messrs. Marty, G. Constant, Saga, K. Yamazaki, A. Okka, S. Yamazaki, Courtin, Mr. and Mrs. Guedon and 2 children, Miss J. Morinot, Messrs. Shuffry, G. Komaki, and Fennelle in cabin.

Per British steamer *Batavia*, for Vancouver, B.C.:—Messrs. Wm. Smith and Frank Fellows in cabin.

Per Japanese steamer *Sagami Maru*, for Shanghai and ports:—Messrs. Tanaka and Watanabe in cabin; Mr. and Mrs. Ishigoro, Messrs. Staffa, Hidano, Okuyama, and Hashimoto in second class, and 38 passengers in steerage.

Per British steamer *Ancona*, for Hongkong viâ ports:—Mr. and Mrs. Silke, Mr. Silke, Jun., Mr. Chandos Pole, Miss Chandos Pole, Capt. Lewis, Messrs. Walter Leslie, R. Howie, Nuttall, C. W. Arnould, Ah Chew, Wong Mow, Lo Wan, and Chun Ming Wong in cabin; 5 Chinese in steerage.

### CARGOES.

Per French steamer *Calédonien*, for Shanghai viâ Kobe:—Raw Silk for France, 608 bales; Waste Silk for France, 142 bales; Treasure for Singapore, $150,000; for Shanghai, $10,500.

Per British steamer *Batavia*, for Vancouver, B.C.:—

| Nos. 28/32, Medium | 29.00 | to | 30.00 |
| Nos. 28/32, Good to Best | 31.00 | to | 32.00 |
| Nos. 38/42, Medium to Best | 35.50 | to | 36.50 |
| No. 32s, Two-fold | 34.50 | to | 36.00 |
| No. 42s, Two-fold | 35.00 | to | 38.00 |
| | PER BALE. | | |
| No. 20s, Bombay | 70.00 | to | 78.00 |
| No. 16s, Bombay | 72.00 | to | 78.00 |
| Nos. 10/14, Bombay | | — | |

#### METALS.

More enquiry and some fair sales have been made at rather higher prices. Holders complain, however, that the rise is not sufficient to compensate them for the fall in silver and in exchange.

| | | | |
|---|---|---|---|
| | PER PICUL. | | |
| Flat Bars, ¼ inch | $2.65 | to | 2.70 |
| Flat Bars, ½ inch | 2.75 | to | 2.80 |
| Round and square up to ¾ inch | 2.65 | to | 2.80 |
| Nailrod, assorted | Nom. | | |
| Nailrod, small size | Nom. | | |
| Iron Plates, assorted | 2.70 | to | 2.80 |
| Sheet Iron | 3.00 | to | 3.40 |
| Galvanized Iron sheets | 5.80 | to | 6.00 |
| Wire Nails, assorted | 4.20 | to | 4.50 |
| Tin Plates, per box | 5.10 | to | 5.40 |
| Pig Iron, No. 3 | 1.30 | to | 1.35 |

#### KEROSENE.

Considerable sales reported, and prices are said to be better in Tokyo market. We leave quotations unchanged but strong, tending upwards. Fresh arrivals have again increased the stock on hand.

QUOTATIONS.

| | | | |
|---|---|---|---|
| Chester | $1.67½ | to | 1.70 |
| Comet | 1.65 | to | 1.67½ |
| Devoe | 1.62½ | to | 1.65 |
| Russian | 1.57½ | to | 1.60 |

#### SUGAR.

Some business continues in White Refined as last advised. Fresh arrivals of Brown are looked for from Takao by early opportunities.

| | | | |
|---|---|---|---|
| | PER PICUL. | | |
| White Refined | 4.25 | to | 7.25 |
| Brown Takao | $3.80 | to | 3.85 |
| Brown Daitong | 3.10 | to | 3.75 |
| Brown Canton | 4.70 | to | 5.70 |
| Brown Java and Penang | 4.50 | to | 5.50 |

### EXPORTS.

#### RAW SILK.

Our last issue was of the 12th inst; since that date settlements in this Market have been 1,007 piculs divided thus: *Hanks*, 24; *Filatures*, 611; *Rereels*, 288; *Kakeda*, 63; *Oshu*, 21. In addition to these figures direct shipments by Japanese are 164 bales, thus making the total export trade for the eight days equal to 1,180 piculs.

Market has continued active and strong, sellers holding off and raising quotations daily. Exchange has declined rapidly, but not so fast as dollar prices have advanced. Holders are wonderfully strong, and many of them still persist in keeping their silk off sale. Others will only consent to operate with a very small portion of their holdings at present prices, fully believing in better rates later on. Japanese producers generally are of the opinion that the exceptionally hard winter in Europe will damage the mulberry trees there, and diminish the new crop accordingly. In consequence they believe that Japan silks must be in demand before very long at much more remunerative prices than those at present ruling.

Arrivals from the interior are now small, and the stock list shows a reduction of nearly 1,000 piculs on the week. The Exchange problem is still very difficult; native holders are strongly of opinion that it will go down yet more, and are inclined to keep back their silks in consequence.

Quotations given below are in many cases nominal, and although there are considerable orders in hand both for Europe and America, buyers and sellers do not meet very frequently.

There have been three shipping opportunities since we last wrote: the *Belgic*, on the 13th, took 691 bales for the New York trade; the *Calédonien* (French Mail), on the 15th inst, had 608 bales and the Canadian steamer *Batavia*, on the 17th, took 461 bales. These departures bring the present export figures up to 19,782 piculs, against 33,342 piculs last year and 35,422 to the same date in 1889.

*Hanks.*—Small business; ordinary *Shinshu Hanks* were done at the beginning of the week at $495; they are now held for an advance of four per cent. on these figures without finding buyers.

*Filatures.*—The principal trade has been in this class, buyers for both Europe and America operating freely whenever they can find sellers. $640 has been paid for *Shinshu* of extra quality, with $630 for No. 1; while true fine size of the best quality is held for $650. Good No. 1 *Shinshu* filatures of full size cannot be bought under $625, and in very many instances holders will not sell at all or at any price. This is especially the case with *Tokosha, Shunmeisha* and many others.

*Re-reels.*—These are held strong at quotations, and very little business has in consequence been done. Medium grades of good character are hard to find. The best chops are held very strong at over $600, and the lower qualities look very dear at present quotations. One parcel of *Katsuyama* has been done at the high figure of $640.

*Kakeda.*—Small business in this class, holders asking too much. *White Horsehead* was done at $570 some days ago, and is now held for $590. There being no buyers at this figure the owner is actually consigning some bales on his own account.

*Oshu.*—A few small sales of *Hamatsuki* at $512½.

#### WASTE SILK.

More business in this department, and settlements for the week are 1,050 piculs divided thus: *Noshi*, 300; *Kibiso*, 550; *Mawata*, 50; *Neri*, 150.

Demand for Europe seems to hold good. Our stock is nearly depleted of good qualities, especially in *Noshi*, and buyers are running more upon *Kibiso*. Holders think that they should obtain somewhat higher prices now that exchange is down to low figures once again. As matters stand our quotations give a good idea of present values, with the reservation that for special qualities buyers would have to pay considerably more.

The Messageries steamer *Calédonien*, on the 15th inst, carried 142 bales of various waste, and the present export figures in this department are 22,472 piculs against 21,553 last year and 25,108 to the same date in 1889.

*Pierced Cocoons.*—These are apparently a dead letter, there being no business whatever.

*Noshi.*—A fair amount of daily purchases in the medium and lower grades: *Filatures* at $135; *Oshu* $130; *Joshu* $75; *Shinshu* $110.

*Kibiso.*—Some large lines have been booked, including *Mino* at $77½; *Joshu* at $49; *Shinshu* $55 with low cuilies at $30. Very little done in Filature wastes.

*Mawata.*—About 50 piculs of rather poor assortment are noted at $177.

*Sundries.*—Considerable business has transpired in *Neri* and *Boseki*; the former in common qualities at from $9 to $12; the latter bringing $35 a picul, with some inferior quality at $21.

In other sorts no business.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).
LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. Arthur Wadham, proprietor of *The Machinery Market and Exporter* (illustrated) — the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." 1y. June 28, 1890.

KEATING'S COUGH LOZENGES.

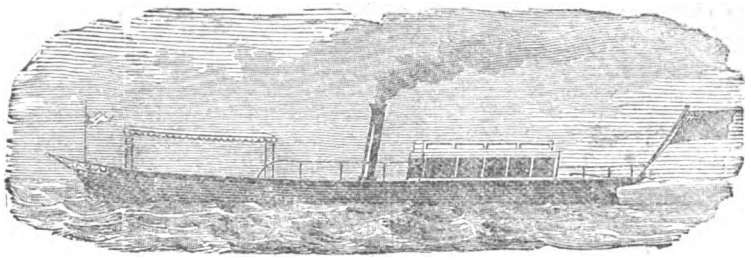
COUGHS, ASTHMA, BRONCHITIS, DIFFICULTY OF BREATHING are speedily cured by KEATING'S COUGH LOZENGES (recognised and recommended by the Medical Faculty). No other remedy is half so effective. One Lozenge alone gives relief. They contain no Opium, Morphia, nor any violent drug, and may be taken by the most delicate. One or two at bed-time ensure rest when troubled by the throat. Sold by all Chemists, in Small Tins. Dec. 27th, 1890.—21ins.

THE GREATEST WONDER OF MODERN TIMES.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir Samuel Baker, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."



SIMPLE, SAFE, AND CERTAIN!

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

Mr. J. T. Cooper, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

YARROW'S

SMALL STEAMERS AND STEAM LAUNCHES.

Screw Steamers with speeds ranging up to 30 miles an hour.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

Machinery constructed for Boats built abroad.

YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, FEB. 28, 1891.

DEATHS.

At No. 66, Main Street, February 23rd, at 20 minutes past 7 o'clock, in her 44th year, MARGARET RUTH, beloved wife of Edward A. Bird.

On the 15th instant, suddenly, at Foochow, aged 24, FREDERICK JAMES DIVERS, Chinese Customs Service, only son of Edward Divers, M.D., F.R.S., Imperial University, Tokyo.

## *SUMMARY OF NEWS.*

PRINCESS SANJO is at present a sufferer from influenza.

MR. OTANI, of Yokohama, has been appointed President of the Japan Tea Export Company.

THE Japanese war-vessels *Kongo Kan* and *Hiyei Kan* arrived at Port Said on the 22nd instant.

MR. KONDO MASUKI, formerly *Chargé d'Affairs* at Sōul, returned to the capital on the 24th inst.

THE Cabinet and other Government Offices were closed on the 25th instant, the day of Prince Sanjo's funeral.

HER IMPERIAL HIGHNESS PRINCESS YAMASHINA arrived in Tokyo on the morning of the 20th instant from the western capital.

THE section between Tokagawa and Kurozaki (over 5 miles) of the Kyushu Railway Company will be opened about the 24th instant.

MARQUIS HACHISUKA SHIGEAKI and Viscount Matsudaira Tadanari have been oppointed managers of the Red Cross Society of Japan.

SEVERAL merchants of Sendai have decided to establish a Chamber of Commerce in that city, and have elected Messrs Kato Hikoshiro, Ise Saisuke, and Ito Seijiro to form a Committee for the purpose of carrying out the preliminary arrangements of the Chamber.

ABOUT a hundred residents of the Yejiri, Hokkaido, presented on the 24th instant a petition to the Diet asking that a local assembly for Hokkaido should be established.

FIRE occurred on the night of the 19th instant in a house at Neribe-cho, Shitaya, Tokyo, destroying 23 buildings, 8 buildings being partly damaged before the flames could be subdued.

HIS IMPERIAL HIGHNESS PRINCE KITASHIRAKAWA YOSHIHISA, who had been absent for some time in Saitama Prefecture on official business, returned to the capital on the 20th inst.

H.I.H. PRINCE KOMATSU AKIHITO, who had been absent for some time in Shizuoka Prefecture on official business, returned to the capital on the 24th instant to attended the funeral of Prince Sanjo.

HIS IMPERIAL MAJESTY THE EMPEROR despatched on the 24th instant Viscount Tominokoji, a Chamberlain, with a message of condolence and a present to the family of the late Prince Sanjo.

A SPECIAL general meeting of shareholders of the Yokohama Union Electric Light Company was held on the 21st instant. The profits of the company for the last half-year were *yen* 800.845.

MR. SASAKI and several officers of the Naval Department, who were ordered some time ago to proceed to France to take charge of the *Chishima Kan*, left the capital on the 22nd instant to discharge their mission.

MR. YUZAWA TADASUKE and four other residents of Otaru, Hokkaido, have applied to the Authorities asking for permission to lay a tramway between Temiyacho and the Sumiyoshicho Station (distance about 5 miles).

IN consequence of a heavy snow-fall on the 18th instant the roof of the Nunobe Primary School, Nunobemura, Iwafunegori, Niigata Prefecture, fell in, killing three, severely injuring two, and slightly injuring three of the scholars.

A COMMERCIAL lecture meeting was held on the night of the 20th instant, at the Machigai-sho, Honchodori, Yokohama, at which over eight hundred persons were present. Messrs. Shimada Saburo and Asakusa Tomotetsu delivered speeches.

A MEETING of the Obstetric Society was held on the afternoon of the 22nd instant in the Honjo Hospital, Yokoami-cho, Honjo, Tokyo, at which Messrs. Sasaki and Kuge, of the College of Medicine in the Imperial University, delivered lectures.

ON the 24th instant Mr. N. Hayashi, Master of Services to H.I.M. the Empress Dowager, Mr. Y. Sannomiya, Master of Services to H.I.M. the Empress, and Viscount Kageyukoji, a Chamberlain, proceeded to the residence of the late Prince Sanjo bearing presents to the family.

AN extraordinary meeting of the Cabinet was held on the 21st instant at the official residence of Count Yamagata, at which all the Ministers of State were present, and matters in connection with the Budget were discussed. The Vice-Ministers of various Departments also attended the meeting.

AN ordinary meeting of the Cabinet was held on the 24th instant, at which Counts Yamagata, Oyama, Yamada, Saigo, and Goto, Viscounts Aoki and Kabayama, and Messrs. Mutsu and Yoshikawa were present. The proceedings lasted from 10 in the forenoon till a little past 2 in the afternoon.

MESSRS. KAWASE HIDEHHRU, Director of the Fuji Paper Factory, Tani Keizo, Manager of the Oji Paper Factory, Nakano Seiyei, President of the Yuko Paper Factory, Komuro Nobuo, of the Senju Paper Manufacturing Company, and Nakai Saburobei, Director of the Yokkaichi Paper Manufacturing Company, have presented a petition to the Imperial Diet asking that the duty on imported paper should be increased.

DURING the month of December last the quantities of coals that arrived at Shanghai were as follows:—Cardiff coal, 1,258 tons; American anthracite coal, 256 tons; Keelung coal (lump) 1,520 tons; Takashima coal (lump), 880 tons; Takashima coal (dust), 4,868 tons; Miike coal (lump), 10,222 tons; Miike coal (dust), 325 tons; miscellaneous Kiushu coal, 9,281 tons; making a total of 28,570 tons, of which 25,576 tons were Japanese coal.

THE graduation ceremony of the Meiji Female School was held on the 21st inst. The ceremony was opened by the reading of the reports of the school for the last year by Mr. Iwamoto Yoshiharu, head-master of the institution. A number of ladies and gentlemen were present, who were addressed by Mr. Shimada Saburo. Twenty-eight students graduated, of whom 13 were graduates of the academical course, 6 were of the English elective course, and 9 of the shorthand class.

AN extraordinary meeting of the Cabinet was held on the 23rd instant, at which all the Ministers of State with the exception of Count Goto and Viscount Kabayama were present. The meeting discussed the Budget, the proceedings lasting till late in the evening. Messrs. Watanabe, Vice-Minister of the Financial Department, Katsura, Vice-Minister of the War Department, and Tsuji, Vice-Minister of the Educational Department, were also present at the meeting.

ACCORDING to returns compiled by the Financial Department, the amount of Government paper currency and bank notes in circulation on the 1st instant was *yen* 58,892,599.60, of which *yen* 25,132,740.00 represented Government notes above 1 *yen* face value, and *yen* 8,065,252.10 Government notes under 40 *sen* face value, and *yen* 25,694,598.50 represented bank notes. As compared with the previous month the above shows a decrease of *yen* 74,713.50 in Government paper and *yen* 116,122.00 in bank notes.

ALTHOUGH the Import trade is quiet, there has been a further slight improvement in certain directions, notably in Yarns, the sales having amounted to 600 bales English and 200 bales Bombays, both at better rates. Shirtings to the amount of 3,500 pieces have also been sold, but not much else has transpired in Piece-goods. The Metal market is steady, buyers closely watching exchange. After considerable transactions in Kerosene, the market is quiet. Deliveries continue good, but recent arrivals have raised the stock to 700,000 piculs. Not much doing in Sugar. The Silk trade has been fairly active from day to day, the total business of the week amounting to 1,200 piculs, but prices, being ruled largely by exchange, are just as irregular as the value of the dollar. There has also been a good demand for Waste Silk at full rates. Exchange has fluctuated, and is not at all steady at the close.

## *EDITORIAL NOTES.*

### THE HOUSE OF REPRESENTATIVES UNITED.

SATURDAY'S session in the House of Representatives was remarkable in one respect. It witnessed the first absolutely unanimous adoption of a Government Bill by either House of the Japanese Legislature. Our readers will probably remember that the Budget for next year contains an item of 7,890,000 *yen*, extraordinary expenditure, of which 5¼ millions are to be spent, during the next five years, on adding to the Navy, 2½ millions during the next two years on railway construction, and the remainder on telegraph extension. The funds to meet this extraordinary expenditure are furnished by surpluses of revenue over expenditure in 1888 and 1889. These surpluses ought, according to the Financial Regulations, to be included in the ordinary revenue of next year. In order, therefore, to devote them to special purposes, a law has to be passed, and it was a draft of this law that the House was asked to consider, as a matter of urgency, on Saturday. The Minister President, in submitting the Bill, added a request that the appointment of a Special Committee to examine it might be dispensed with, and that one reading should suffice. The House, without debate, voted the Bill unanimously. This action of the Representatives is significant. It shows that they are not only willing, but even eager, to devote every available *yen* to the development of their country's military capacity. Very truculent and very wicked on the part of the Representatives. But they sin in good company. All the States of Europe adopt precisely the same programme, and though some goody-goody journalists many raise hands of horror over this squandering of the nation's scanty income, Japan will probably go on doing as the rest of the world does without feeling that she is greatly to blame. When her disinterested critics teach her some way of securing her safety other than by means of battalions and ironclads, their anti-armament homilies will acquire practical value. Meanwhile, they are as idle as verses of the Koran read to a congregation of Presbyterians.

### SPLIT IN THE RADICAL PARTY.

THE result of the debate on the 20th instant when the Moderates won an unexpected victory, and the House of Representatives placed itself once more in touch with the Constitution, has been a serious split in the ranks of the Radical Party. In the afternoon of the 24th inst., at 1 o'clock, twenty-nine members of the Lower House presented themselves at the office of the party, and handed in a document on which were inscribed their signatures and seals below a curt statement that as they saw no prospect of the Constitutional Radical party working in unison hereafter, they desired to give notice of their withdrawal *en masse* from its ranks. The form of speech used in making the announcement indicated that the twenty-nine seceders reverted to the state of an independent party, but as this implied that the Radical party had been originally constituted by a junction of different parties—a procedure interdicted by law—the document was handed back for amendment, and having been subsequently altered to the sense of secession by individuals, was accepted. Among these twenty-nine are to be found some of the most distinguished members of the Radical Party—as Messrs. Kataoka Kenkichi, Hayashi Yuzo, Misaki Kamenosuke, Kato Heishiro, Makino Junzo, Uyeki Yemori, Amano Saburo, Hamano Noboru, Yebashi Ko, Tateishi Ki, and so forth. These are the close followers of Count Itagaki, and after their resignation had been accepted, they repaired to his residence and had a long interview with him. It does not appear, however, that Count Itagaki had counselled their withdrawal. On the contrary, holding himself bound by the spirit of reconciliation in which he had consented, a short time previously, to reconsider his own retirement, he is said to have spared no effort to avert disunion. A split was inevitable, however. We explained, when describing the details of Count Itagaki's re-union with the party last month, that the elements of dissension, though stilled for the moment, were destined to break out soon again. The forecast has now been verified. Already the ranks of the Radicals had been weakened by the withdrawal of such men as Messrs. Inouye Kakugoro, Oye Taku, Suyehiro, and Hasegawa Tai, and this last secession will greatly impair the strength of the party. Still, it was not to be expected that an association founded on the simple principle of opposition to the Government would maintain its cohesion unimpaired in the heat of parliamentary debate, and the evolution of practical political doctrines. What has happened now was inevitable from the outset, and if it helps to consolidate the Radical Party, there will be nothing to regret. The national interests demand the existence of such a party, and what we really desire is that it should attain sufficient strength to be able to undertake the Administrative duties at any time. Count Itagaki is reported to have announced his intention of retiring from politics altogether, but every one must hope that he will reconsider that resolve.

### THE BUDGET AND THE GOVERNMENT

IT will be seen from our report of the proceedings on Monday in the House of Representatives, that the method adopted by the President in pursuance of the decision recorded on the 20th instant, is to forward to the Government the whole Budget as amended by the House at the second reading, instead of forwarding only the portions requiring Governmental concurrence under the provisions of the 67th Article of the Constitution. It may be assumed, however, that the Government, at this stage of the Bill's progress though the Diet, will confine its expression of concurrence or dissent to such items as belong to the so-called "fixed expenditures." The President's course elicited some expressions of disapproval, but on the whole it seems the most natural and logical, for as the Government itself, in submitting the Budget to the House made no attempt to distinguish between the parts which the Representatives might deal with independently and those over which they had only a power of suggestion, there seems to be no reason why the House should make the division now.

### PRINCE SANJO'S MORTUARY TABLET.

IT is the custom in Japan not only to erect a monument over the grave of a distinguished or wealthy person, but also to bury in the ground, above the coffin, a tablet having inscribed on it the name of the deceased and other particulars. This is usually of stone, but in consequence of the superior qualities of bronze for this particular purpose, it has been decided to employ that material in the case of Prince Sanjo's tablet. The *Kokka Shimbun* says that the tablet will be three feet by two, and that its thickness will be more than three inches.

### OUT OF THINE OWN MOUTH.

MR. W. S. LISCOMB, whose letter to the New York *Nation*, on the subject of the anti-Treaty-Revision meeting, evoked such animated criticism from a portion of the local foreign press, has thought it advisable to address a long reply to his principal assailant, the *Japan Gazette*. It is an able reply, and it elicits a peculiar response. The *Gazette* fills more than two columns with a verbiose onslaught on Mr. Liscomb's defence, but instead of confining itself to what Mr. Liscomb writes, it devotes the bulk of its space to abuse of the *Japan Mail*—fierce, angry abuse, suggesting that the honest person who conducts the new anti-Revision organ has lost his temper badly and is in imminent danger of becoming as thoroughly "be-Mailed" as formerly was his less reckless though not more scrupulous rival in Herald Alley. We ought, perhaps, to regard it as a subtle compliment that the horizon of our journalistic opponents' vision becomes filled with *Japan Mail* to the exclusion of everything else, but why they should imagine that men like Mr. Liscomb must necessarily be tormented by a similar nightmare, is not quite clear. The pretty part of this particular case is that Mr. Liscomb answers each one of the *Japan Gazette's* attacks by referring it to its own columns. Indeed, one need never travel beyond the pages of that honest journal to find ample refutation of its most vehement assertions. Thus, one of the points at issue between Mr. Liscomb and the *Gazette* is whether or no the foreign residents of Japan were "a unit" in respect of the anti-Revision feeling displayed by the Yokohama meeting; in other words, whether the meeting and the manifesto that grew out of it are to be taken as absolutely representative of foreign opinion in Japan. The *Gazette* says "yes" in one breath, and in the next declares that "there were numbers of foreigners who for private reasons of their own did not sign the resolutions," and that "the *Gazette* is subscribed for by a large number of people who did not take part in the Yokohama meeting, and who do not altogether sympathise with it." Where then is the unity so justly denied by Mr. Liscomb? Unfortunate anti-Revision cause, damned by its champions and brought into ridicule by its organs, the one thing to be said in its favour is that some breath still remains in its body after so many suicides.

### DESTRUCTIVE FIRE IN YOKOHAMA.

FIRE broke out about half-past eleven o'clock on Saturday evening in a bathhouse in Motomachi, Shichome, in that part of Homura village which is situated immediately under the Van Schaick Hall. A considerable breeze was blowing at the time, and under the influence of the eddies which prevailed close under the Bluff, the flames were rapidly communicated to the surrounding structures, mostly small shanties, spreading mainly, however, towards the Hundred Steps. Mr. Morgin and his hose-reel men were forward from the Fire Brigade Station very soon after the alarm was given, and a couple of standpipes were quickly attached to hydrants and in operation. The "Relief" steamer also proceeded to the Creek and taking up a position on the Settlement side near Nishi-no-hashi, pumped through 1,500 feet of hose to the scene of the fire. The usual attempts in addition to the use of water, were made, by pulling down houses, to check the spread of the flames, but these were only attended by partial success, the conflagration making its way across the street leading to the Shiwokumi-zaka, right up to the bluff below Mr. St. John's house. Among the places consumed was the stock of a fire wood merchant, the burning of which naturally augmented the strength of the flames. Though actual danger to foreign houses from proximity was hardly present, except in the case of Mr. St. John's residence, towards which the flames ran some distance up the bank, the clouds of sparks which were carried over the Victoria School and adjoining houses involved considerable risk. Including those of the Japanese Fire Brigades, there were in all nearly a dozen standpipes in use. About one o'clock the fire was under full control. The number of houses destroyed is estimated at two hundred.

### RABBITS IN SENDAI.

OUR Sendai correspondent's account of the "rabbit" hunting engaged in there by students has provoked some criticism. He is informed that if "rabbits" exist at all in Sendai they must be Ostend rabbits, and that bunny lives in a hole in the winter, and is not to be found overground. The critics seem to be a little off the track in this instance. In the first place, Ostend rabbits do not burrow. That is their peculiarity. They are large lollopy rodents which have their habitat in "forms," and bear a close resemblance to hares. In the second place, snowy weather is just the time to shoot or catch rabbits without the aid of ferrets. Every English sportsman knows that bunny does not lie in his hole to be snowed up, but comes out and lodges for the moment in bushes and other convenient places. Many an excellent day's sport he has furnished at such a season. In the third place, our Sendai correspondent is an American, and in America the distinction between hares and rabbits is not, as a rule, recognised. The animals

Digitized by Google

described in his letter would probably have been called "hares" by an Englishman. But even supposing them to have been veritable bunnies, the critics are quite out of it.

### STATE FUNERALS IN JAPAN.

THERE have been, the *Mainichi Shimbun* recalls, but three State funerals since the Restoration: the first was that of H.E. Okubo, Second Minister of State; the second that of Prince Iwakura, Prime Minister; and the third that of Prince Shimadzu, First Minister of State. Kido, not a smaller man than any of these, would have enjoyed a similar honour had his life been prolonged a little longer. When H.E. Okubo died, the rules relating to ceremonials under the new regimen were not yet accurately drawn up, and the funeral lacked much of the display that would otherwise have been attained. Prince Shimadzu was buried in Kagoshima, a battalion of troops being sent from Kumamoto to take part in the ceremony. Thus incomparably the grandest funeral witnessed in Tokyo during the past twenty-five years was that of Prince Iwakura, but it is expected that the obsequies of Prince Sanjo will be on a still more magnificent scale.

### COUNT YAMAGATA'S SPEECH.

IT is only fair to notice that the *Japan Herald*, when commenting upon Count Yamagata's speech in the Diet, has, of its own accord, taken no notice of the incorrect translation which appeared in its columns, but has adopted our translation throughout. It does not appear to us, however, that the *Herald* has put a fair construction upon Count Yamagata's remarks. The most conclusive way to demonstrate the injustice of the criticism is to place the critic's words side by side with the matter criticised:—

| COUNT YAMAGATA'S REMARKS. | THE CRITIC'S REMARKS. |
|---|---|
| If we look carefully at the conditions existing in the world, we find that a country can maintain its independence and autonomy among the nations only by the prosperity of its people and the power of its armaments. Without strength sufficient to preserve and assert the national rights, there can be no hope of enjoying friendly, close, and absolutely unsubmissive intercourse with foreign States. Turning from the immense armaments of the modern Occident to the condition of the Orient, we find nothing to warrant us in neglecting the development of our Army and Navy. If again we seek to place the country on an equal footing with civilized States, we must enter their comity and join them in the mutual preservation of rights; a task which requires that, equally with them, we must undertake the duties properly devolving on us. What are those duties? To obey a fixed policy of government; to perfect all the branches of the Administration; to make ourselves worthy of the respect of other countries, and to maintain our prestige. If our policy of government is to be preserved, that these duties must be discharged is beyond dispute. Strength to maintain the country's rights must be nurtured, and sooner or later, as the opportunity presents itself, must be utilized. | One of the least satisfactory parts of Count Yamagata's address, is that portion in which he dwells upon the power of a country's armaments as essential, in addition to the prosperity of its people, to promote its well-being. Without strength, he goes on to say, to preserve and assert national rights, there can be no hope of enjoying friendly, close, and unsubmissive entercourse with foreign States. This seems to us to contain a threat, though veiled, that unless the Powers will surrender to Japanese demands for autonomy, the treaties will be denounced, and Japan will not be averse to a resort to arms, to recover and maintain her prestige. This, it must be confessed, is rather tall talk, and lacks somewhat of wisdom. That there shall be no mistakes about this, he says farther that strength to maintain the country's rights must be nurtured, and sooner or later, as the opportunity presents itself, must be utilized. No surer method could be taken to impair the friendly regard of foreign Powers than the assumption by the rulers of Japan, of a threatening attitude, and at the same time to be urging the granting of concessions of an unwarrantable character. |

It cannot be supposed that Foreign Powers will commit the obvious mistake of construing the Minister President's words to signify "the assumption of a threatening attitude." The speech bears no such meaning. The whole of the portion referring to armaments is eminently pacific in tone, though the speaker recognises and emphasizes the absurdity of supposing that Japan, alone among all nations in the civilized world, is to lay down her arms and trust to the benevolence of other Powers to respect her rights and warrant her integrity. We cannot but repeat what we have often said before, that the attitude of certain local critics towards Japan is cruelly unfair. In this particular instance when Count Yamagata speaks about "nurturing strength to maintain the country's rights," and about the possible necessity of "utilizing it sooner or later" he uses language which, in the mouth of any Western statesman, would not evoke the slightest protest or be held to justify the most remote inference of bellicose menance. It is folly to pretend that Japan must lie down like a lamb and beg the world to have pity on her unprotected innocence. History enables her to guage precisely the result of such confiding behaviour in the case of an Oriental nation. Besides, she has before her eyes the example of Western States. If they consider it essential to arm to the teeth in order to be at peace with their highly civilized neighbours, surely Japan need not be blamed for following their example at a distance. We cannot pretend to understand the silly cant which chides Japan for doing what every other country does, and accuses her of "assuming a threatening attitude" because her Prime Minister tells the Diet that in order to be respected a State must be strong.

### THE LAY OF THE GIDDY "GAZETTE."

Now when he assumed the Editor's chair
His projects grew rather tall,
He would do whatever was right and fair,
Would hunt with the hounds and run with the hare,
But—they didn't come off, after all!

Lo! this year's birds are in last year's nest,
The call is the cuckoo's call,
And honesty first is to be the test,
With honesty second, for that pays best,
And honesty last of all.

But, behold! when it spelt "deceitfulness,"
And Humpty had his first fall,
He cried that the word was "deceitlessness"
And pray'd to his Webster in his distress,
But the word wasn't there, after all!

And then he turned with a grunt to the Code,
And prudence went to the wall,
For he pointed out a regular load
Of grave mistakes in this shocking bad Code,
And—they weren't there, after all!

So he wandered off to the Treaty theme,
To the meeting in the fall,
No Celestial being was in that scheme,
Wrote the sapient scribe.—But now it would seem
That there *were* some, after all!

Then he straightway ratted, and cried: "Why not?
For, when in the conference hall,
His Chinese Excellency had a lot
In revising something—the deuce knows what!"
But *he* wasn't there, after all!

Oh, twinkle then, somewhat ponderous star!
Among the prophets—Saul!
Oh! show your adorers what you are,
And speed back the wit that has wandered far,
If it be there, after all!

HARRY STARCHUS.

### THE LAND REVENUE OF INDIA.

AN interesting subject connected with the British administration of India is the degree and mode in which the land contributes to the general expenses of government. In India the State, or the monarch, has always enjoyed a share in the rent or profits from the land. This revenue is levied according to an assessment fixed on estates or holdings. The assessment was fixed permanently about 100 years ago on certain tracts paying about Rx. 4,311,000 a year; and it is fixed periodically, for terms of 12 to 35 years, over the rest of India. On large estates, ranging from a few hundred to many thousand acres each, the assessment is a share, generally about one-half of the rental enjoyed by the proprietors; on small estates cultivated by peasant proprietors, the assessment is levied on the cultivated area at a rate per acre fixed with reference to the productiveness of the land, and representing about one half of the estimated letting value. The permanently settled tracts, says the last report on Indian administration, comprise the greater part of Bengal, about one-fourth of Madras and certain southern districts of the North West Provinces. Of the temporarily settled tracts, the North West Provinces, the Punjab, Oudh, the Central Provinces and Orissa mainly contain estates held by proprietary brotherhoods or large proprietors; while in Bombay, Burma, Assam, and Bear, and in the greater part of Madras, the land is held and tilled by petty proprietors. In the permanently settled tracts the land revenue is about two-thirds of a rupee per acre of cultivated land, and represents on an average about one-fifth of the rental, or perhaps one-twenty-fourth of the gross value of the produce. The average advantages of soil and climate are on the whole greater, and the prevailing rates of rent are no the whole higher, in the permanently settled than in the temporarily settled tracts. In the latter tracts the land revenue averages about 1½ rupee per acre of cultivated land, representing something less than one-half of the actual estimated rental, and is probably about one-tenth of the gross value of the produce. Rates of rent and revenue vary greatly according to the productive power of the land, according to the advantages of climate and rainfall, and according to the facilities for carrying produce to markets or to the sea-board. Payment for water, supplied by State canals or reservoirs for purposes of irrigation, is made according to the area irrigated or according to the quantity of water used: but the State demand on any land is not enhanced on account of increased productiveness due to improvements made by the proprietors or occupiers themselves. The total land revenue of the year 1888-89, shows a small decrease of Rx. 173,000 as compared with the previous year; but this is unusual and due to diversities of season and other special circumstances. On the whole the tendency of the land revenue is to increase gradually and slowly, partly from periodical revisions of the assessment rates after a period of advancing prices, and partly to extensions of cultivation. The increase of the land revenue of India during the last six quinquennial terms may be thus showm:—

| Period of five years from | Average yearly land revenue receipts of Rx. |
|---|---|
| 1861-65 | 19,931,000 |
| 1866-70 | 19,990,000 |
| 1871-75 | 20,965,060 |
| 1876-80 | 21,114,000 |
| 1881-85 | 22,122,000 |
| 1886-90 | 23,294,000 |

### SUDDEN CELEBRITY.

MR. AMANO JAKUYEN, the mover of the urgency proposal by which the Extremists were defeated in the House of Representatives on the 20th instant, finds that he has suddenly sprung into celebrity. A priest in former times, he did not abandon the tonsure although ceasing to occupy himself with sacerdotal duties, and it is said that he only suffered his hair to grow in order to become a candidate for election to Parliament. He disclaims the least connection with any political party, and according to the report current in the capital, he made no attempt to obtain support for his motion before introducing it. He did, however, observe certain indications which led him to think that the House would not be unwilling to escape from the difficult and unpractical position into which it had thrust itself, and on the strength of these observations he ventured to bring forward his proposition. The success that attended it was, however, quite beyond his expectation, and he is disposed to think, being, as we have said, a devout man and a true believer, that Providence, or Hotoke, had a large share in shaping the result.

### THE PROLONGATION OF THE DIET'S SESSION.

THE original recommendation of the Committee appointed to investigate the subject of prolonging the session of the Diet, was that the President should ask to be received in audience so as to submit verbally to the Emperor the facts making for an extension of the session. But on consulting the Constitution and the Law of the Houses, this course was found to have no sanction. The Constitution goes no further than to prescribe that "both Houses of the Imperial Diet may respectively present addresses to the Emperor," and the Law of the Houses explicitly provides that, though the President of either House may be directed, as the representative of the House, to ask an audience of the Emperor, he must carry with him and present to His Majesty a written statement of the subject of representation. On Tuesday, therefore, the Committee amended its recommendation, and submitted a form of written representation which received the approval of the House. It was a very simple and brief document, setting forth the facts that the House, being new to its work and to the rules of procedure, had made slow progress with its business; that it had further suffered considerable interruption owing to the burning of the Diet, and that many important measures still awaited discussion. In view of these facts the Emperor was prayed to grant such a prolongation as His Majesty might deem expedient.

* * *

His Majesty the Emperor has issued a Rescript sanctioning the prolongation of the session of

Digitized by Google

the Diet until March the 7th, that is to say, until this week. The Rescript runs thus:—"We order the prolongation of the Imperial Diets' session for an interval of nine days, from the 27th day of the second month until the 7th day of the third month." According to a cursory reckoning, the extension is for eight days only; but the 27th is evidently included in this case. The Diet's official opening took place on the last day but one (29th) of November, and its fixed session of three months should therefore extend to the last day but one (27th) of February. We do not clearly perceive, therefore, how the extension can be called "an interval of nine days." However, the main point is that His Majesty has taken count only of the time lost owing to the burning of the Houses, and has not deemed it expedient to consider the plea advanced as to the inexperience of the members in parliamentary procedure. This might have been anticipated, we imagine, for the inexperience of the members in their first session was always inevitable, and if no allowance was made for it originally when fixing the length of the session, we fail to see why any allowance should be made for it now. It is not likely that much legislation will be accomplished during the remaining eight days of the Diet's life.

### DR. HOWARD AT THE CENTRAL TABERNACLE.

On Thursday, February 19th, a large and appreciative audience assembled in Dr. Eby's Central Tabernacle, Hongo, Tōkyō, to hear Professor Howard, M.D., F.R.C.S.E., lecture on "The Christ—judged by Scientific Methods." Such lectures are intended to be a feature of the work carried on at the Tabernacle, and Dr. Eby is to be congratulated on the success attending this first of a projected series. He was fortunate in securing a layman of undoubted professional eminence, while the audience attracted was just the kind that was desired. It consisted largely of students, amongst whom University men with their lettered collars were conspicuous. The hall was filled to its utmost. The lecturer was followed with unflagging attention. He was welcomed by hearty applause; and the still heartier applause at the close testified with what appreciation his words had been listened to. For the benefit of such of the audience as were unable to understand English, a Japanese translation of the lecture was given immediately after Dr. Howard had uttered his closing sentence. To judge from the numbers who then left, it was evident that nearly half of the audience had been able to follow the English intelligently. It was obvious from the outset that Dr. Howard well understood the character of the audience he was addressing. By way of introduction he said that his lecture was in effect the substance of much that he had spoken in familiar conversation with Japanese friends and acquaintances. From these conversations he had gathered that in Japan scientific men ignored all religions; that to know nothing of religion counted in favour of a man's superiority in science; and that religion was best left to women and children. This attitude he showed was essentially unscientific. The scientific man had to deal with causes and effects; and religion formed one of the most potent factors in the historic development of all races. So far as known, no nation ever did exist or does exist without its religion; and, so far as known, no nation ever lived above its religion, but every nation has lived below it. Consequently he who ignores religion may be a pedant; but he is neither a scientific man nor a philosopher. And again, he who pronounces against any religion without having investigated it, must be merely repeating the dictum of another man who may be in error, and is therefore a victim of authority, a child of superstition. If to this a man adds empty and unasked enthusiasm and championship, he will find that the dictionary terms him a fanatic. An interesting point noted by Dr. Howard was as to eminent scientific authorities referred to by his Japanese friends. There were only three; and a study of their biographies showed that, marvellously clever though they were as thinkers and writers, they had not made a single discovery, they had not added one fact to the sum of human knowledge. He then proceeded to quote from two of these; and he found that Spencer has said, "True Science is essentially religious," and that Huxley has said, "True Science and true Religion are twin sisters, and to separate the one from the other is sure to prove the death of both." With this unqualified support from the camp of the enemy, so to speak, Dr. Howard proceeded to his task of subjecting Christianity to scientific tests. It will suffice to indicate briefly his method of treatment. First, Josephus, Tacitus, Suetonius, and other profane writers whose accuracy had never been seriously questioned, were quoted from to prove that one Jesus did live in Judea at the time supposed, did wonderful works, and died by crucifixion. Conjoined to this coroboration of many of the facts narrated by the sacred writers is the wonderful accuracy of topographical detail contained in the New Testament. Places can be recognised to this day, so that it may safely be said that there is no other person so far back in history the accuracy of whose biography could receive corresponding corroboration. Then the Christian inscriptions in the catacombs of Rome, the growth of the Church in spite of the fiercest persecutions in the early centuries, the perfect historic continuity of the Eucharist, the great memorial of the death of Christ, and other facts, were referred to as strong evidence that the Christ was at least a man who lived and died at the time and in the manner that the sacred historians record. Dr. Howard then proceeded to appeal to these sacred writers for further information, and compared Christ as a teacher with other great teachers of men. The historic development of Christianity was then touched on; and finally the personal phenomena, subjective and objective, in evidence of the living Christ. In conclusion, he asked his audience to take the undoubted facts of Christ's life, to consider the spirit of his teaching—and, having done so patiently and conscientiously, to give some satisfactory explanation of them. The very bitterness of the anti-Christian spirit is something quite peculiar. It was predicted by Christ himself; but no explanation of it can be found apart from the *personal* Christ. The lecture was delivered in a quiet but earnest manner; it was not marred by any display of hostility or bitterness; it aimed at showing what the anti-Christian has to disprove rather than what the so-called apologist has to prove; and it indicated very clearly the lines along which a candid and truth-seeking mind should approach the study of the religion of the progressive nations of the world. In short, it seemed admirably fitted to awaken an apathetic listener to an interest in the subject; and to suggest broad lines of enquiry to the sympathetic hearer, already disposed to view Christianity favourably.

### THEATRICALS IN TOKYO.

It is in contemplation, we understand, to give a theatrical performance in Tokyo for the benefit of the Girls' Orphanage in Kanda, which is under the charge of the French Sisters of Charity. Their Excellencies M. and Madame Sienkiewicz are interesting themselves actively in the matter. The best available amateur talent of Tokyo has been kindly promised, by both ladies and gentlemen, and two pieces will be put upon the stage, one French and the other English. The 21st of March is the day fixed for the performance and the place will be the Rokumeikan, but as programmes have not yet been issued we are unable to furnish accurate particulars. Those who remember the admirable acting witnessed at private theatricals in Tokyo during recent years, will understand that a great treat may be looked forward to on the present occasion.

### ELECTRIC LIGHTS FOR THE STREETS OF TOKYO

The question of replacing the gas-lamps now used in the streets of Tokyo by electric lights is said (*Chōya Shimbun*) to be under discussion by the City Improvements Committee. The calculation is that a saving of some five thousand *yen* annually would be effected by the change. There are at present 471 gas lamps in the interval between Kanasugi, Uyeno, and Asakusa. It is claimed by the Electric Light Company that one electric light of 1,200 candle power is more than equal to ten gas-lamps. Consequently, it would suffice to replace the 471 gas-lamps by 48 electric lights, the Company undertaking to erect, at its own expense, special lamps in positions lying beyond the range of the ordinary lights. Each lamp would cost 17 *yen* monthly, allowing for wear and tear, so that the expense of the 48 would be only 9,792 *yen* per annum, or 5,028 *yen* less than the sum yearly paid to the Gas Company. The figures ought to be conclusive, especially when taken in conjunction with the fact that the electric system has many other points of superiority over gas. The Committee, however, is said to be hesitating, in order to give the gas folks an opportunity of making a lower tender, as they are expected to do in competition.

### DOINGS IN THE DIET.

Some of the proceedings in the House of Representatives partake of a comical character. Mr. Inouye Kakugoro's objection to the dress of Mr. Saito Shuichiro, during Monday's session, belongs to this category. Mr. Saito is habitually one of the best dressed Japanese in Tokyo—we speak of foreign costume of course. His long residence in America in former years, and his subsequent sojourn in all the great capitals of Europe have thoroughly familiarized him with Western costume, and he wears about as well cut a coat and pair of unwhisperables as are to be found this side of Bond Street. The Rules of the House require Japanese dress with *haori* and *hakama*, or foreign costume with either frock or morning coat. The latter gives a wide enough margin. Mr. Saito ought not to have had any difficulty in keeping within it, and we strongly suspect that the amusement with which he received Mr. Inouye's remonstrance had its origin in a sense of the unmerited character of the rebuke.

* * *

Mr. Inouye Kakugoro himself wears an immaculately fitting frock coat, and is altogether irreproachable as to costume. Undoubtedly he is one of the men of the future. A Socratic type of face, ample in proportions, and scarred and pitted by small-pox, a large massive head, and a correspondingly stalwart frame, his appearance is conspicuously striking and conspicuously unattractive. But when he has occupied the rostrum for a few minutes his hearers forget everything but his wonderful command of language and the fire and verve of his oratory. One of the very few Japanese who employ gesticulation freely, his limbs are seldom still for a moment. He punctuates his utterances with strong physical action, now walking rapidly from side to side of the platform; anon hurling imaginary javelins at his audience; at one time battering his own bosom and at another using his manuscript like a fuller's mallet. One could scarcely conceive a greater contrast to the glacial calm generally supposed to represent the standard of correct Japanese demeanour; the calm illustrated, for example, by Paymaster Noda who, in an address lasting over an hour, and not uninterrupted by impatient members, never once altered the values of his commas and colons, and never once took his hands from his pockets except to turn over his manuscript. Yet Mr. Inouye is an immense favourite with the House. His eloquence fairly sweeps away opposition. He possesses also, in a highly developed degree, the eminently Japanese attribute of passing suddenly from the sternest and gravest earnestness to almost childish gaiety. Thus, when the House recently came to discuss the War Office Section of the Budget, Mr. Inouye, having made one of the best speeches of the session—a speech inspired by strong patriotism—might have been seen five minutes afterwards standing in his place, and gleefully proclaiming that the Budget Committee's Report had been out-voted, because the President having challenged its supporters in an almost inaudible voice, only two or three particularly quick-eared members had risen in their places. So, again, when the Committee's Report happened to propose no amendments

Digitized by Google

whatever in a particular section, and Mr. Inouye was consequently enabled to vote for it, he emphasised the singular event by springing to his feet and crying out, with noisy exultation, that now for the first time had he cast his ballot in favour of the Committee's Report—on which occasion a witty stenographer compared his aspect to that of a demon making amiable eyes at his victims.

* * *

Mr. Inouye's punctilio about sumptuary regulations stands certainly on a higher parliamentary plane than the remonstrance addressed by another member, Mr. Noguchi Kei, to the Government Representative for the Finance Department. The latter, Mr. Soné Shizuo, has a weak voice and finds difficulty in making himself audible throughout the House—especially the present House, which is a species of canvas box. Two or three protests from members having elicited a retort from the President that it did not lie within his competence to endow a speaker with strength to project his voice to a distance, Mr. Noguchi Kei rose and undertook to prove that the Delegate was not really exerting himself to speak loudly. "When men strain their vocal chords to the limit of capacity," said Mr. Noguchi, "their faces become red and their veins swollen. Neither of these indications are observable in Mr. Soné's case. His complexion is rather pale than florid and his veins remain invisible as usual." It is true that few things are more exasperating to an anxious listener than a speaker who persistently declines to raise his voice above a feeble murmur, but Mr. Noguchi's diagnosis will scarcely be elevated to the rank of a parliamentary precedent.

### MADAME PATEY AT THE PUBLIC HALL.

MADAME PATEY and the company which she has collected round her made their first appearance on Wednesday evening in the Public Hall. Despite the prediction that the tariff of prices established would make a small house, there was a very fair, almost a large, attendance. It would be idle to descant on the great contralto's merits; her praises have been so often written that that would be a work of supererogation. Her name was set down for three numbers on the programme, in the first part Gluck's aria "Che faro," and in the second Knight's "She wore a wreath of roses," and Moore's "The Minstrel Boy." Recalled as a matter of course, she sang after the first "On the banks of Allan Water," after the second, with as it seemed the perfection of expression, "My boy Tammy," and followed up the last song on the programme with "For the sake o' somebody." She was listened to in each case with the most absorbed attention; the marvellous qualities of a voice such as few are privileged to hear awakening in all present the deepest interest and pleasure. Of Miss Rossow much might be said. She is beyond doubt a vocalist of an exceedingly high order, and since she came out about a year ago in Australia has achieved a measure of popular repute and favour which augurs well for her future career. A countrywoman of Miss Amy Sherwin's, she possesses, like that lady, a most charming voice, and may with confidence anticipate at least such success as Miss Sherwin has attained. Her first song was that "Sing Sweet Bird," of Ganz's, which Miss Sherwin rendered so exquisitely, and listeners were not slow to recall the exquisite effect produced by the conjunction of voice and flute, and to make allowance for the deficiency of the latter in the present case. Not indeed that allowance was needed, for Miss Rossow fairly revelled in the birdlike variations of the song. Pinsuti's "Three wishes" was her next essay, and as an encore she gave "Coming thro' the Rye." It is impossible to exaggerate the grace and success with which both ladies rendered their Scotch songs. Miss Rossow's "Coming thro' the Rye" was a charming effort, a scarcely noticeable peculiarity of articulation adding indescribable archness to her singing. Denza's fine ballad "Call me back" was followed as an encore by "I dreamt that I dwelt in marble halls," and finally Miss Rossow appeared with Mr. Patey in the "La ci darem" duet of Mozart. Mr. Patey had his share of the programme, and certainly cannot complain of non-appreciation. His "Off to Philadelphia" took the fancy of his listeners immensely and provoked an enthusiastic recall, but the evening being yet very young Mr. Patey discreetly refrained from returning. In the comic aria of Rossini's, "Largo al factotum" he raised the popular estimate of his fine vocal powers and, having responded to an encore, confirmed it in the final duet with Miss Rossow. Probably Mr. Lemmone may be taken next as the subject, not of criticism, but of commendation—for, differing in this respect from many "stars" Madame Patey has gathered round her a company of "stars," and not foils to display her own talents—and it need only be said that the audience gave him a hearty welcome back to Yokohama, and an ample assurance that they are still able to appreciate such powers as he has shown himself to possess. In the first part of the programme Mr. Lemmone gave Terschak's "Italian Rhapsody," and subsequently a "Rustic Dance" by Roe, his only other performance being a Fantasia by Bucher on an air by Paganini. All three were gems, and regret was felt that the accomplished flautist could not be heard in accompaniment. Mr. Hermann Morris, the pianist of the company, claims more than incidental mention. His solos were masterpieces, characterised by much brilliance of execution and exceeding taste and expression, while his accompaniments were played with care and appreciation. Generally it may be said the concert was a most pronounced success. The magnificent organ of Madame Patey was listened to with infinite pleasure, her selection of songs affording the audience a good means of realising, though in a faint way, its marvellous capabilities. As a contrast to the contralto's presence and vocal quality Miss Rossow created the deepest interest by her petite appearance, the charming simplicity of her methods, and the power and sweetness of her voice. The evening's entertainment, while distinctively Scotch in character, was very largely of a popular kind, and formed a musical treat of the very highest order.

* * *

We trust we are right in assuming that the beggarly array of empty benches on Thursday evening at the Public Hall is to be accounted for by reason of the Community's reserving itself for Saturday night. On no other hypothesis can we imagine an artiste of the calibre of Madame Patey failing to attract more than a hundred for an audience. Though the distinguished English contralto is alone worth a journey to hear, Madame Patey is well supported by a small but excellent company, and we hope to see an audience on Saturday night which shall in point of numbers be worthy of the highly gifted lady who on that occasion will make her last appearance in Yokohama. We remember Miss Whytock, and were equally surprised and delighted on Thursday to hear how well preserved is that magnificent organ we knew so well long years ago. Notwithstanding the scanty audience, several repeats were given, though the aspect of the house from the footlights might well be supposed to have had a most depressing effect upon the performers. The concert opened with a pianoforte solo, "Turkish Rondo," by Mr. Morris, which was followed by "Bel Raggio" a cavatina of Rossini's, well within the power of the fresh young voice possessed by Miss Rossow. "Rage thou angry storm" then brought on Mr. Patey, who did ample justice to this song of Benedict's; and Mr. Lemmone's appearance was greeted with applause, as was his exit after the execution of a simple but pleasing "Concert Study" by Zulow. Madame Patey then came on and delighted the audience with an arietta, "Caro mio ben" (Giordone), loud and continuous applause being kept up till the artiste's return to the stage in acknowledgement, and the first part was brought to a close by that well-known air of Bishop's "Lo, here the gentle lark," with flute obligato. Mr. Morris opened the second part with the "Funeral march of a Marionette," well played, when Madame Patey appeared and rendered "By the sad sea waves" with such effect that the audience would not be denied and clamoured till an encore was obtained. Then came Mr. Lemmone with the "Welsh Melodies"—which he gave on his previous visit to Yokohama—"Jenny Jones" and "Poor Mary Ann," the variations on the latter air being particularly effective. Cowen's well worn "It was a dream" brought on Miss Rossow, who was loudly encored, and Mr. Patey then sang "The Powder Monkey" with good effect. The gem of the programme was then given by Madame Patey—Moore's fine Irish ballad, "The meeting of the waters"—and the audience persisting in their demand for a repetition, Madame Patey kindly responded by singing "Meet me by moonlight alone," and retired amid a perfect storm of applause. A duet of Mozart's by Mr. Patey and Miss Rossow brought to a close a capital programme excellently well executed.

### A PREACHER IN TROUBLE.

THE Rev. Mr. Rollins, of Kobe, says the *Kobe Herald*, has been in trouble at a place somewhere near Kishi Wada. It appears that the reverend gentleman, who has only been three months in this country, and whose knowledge of the vocabulary is therefore limited, went on a lecturing tour accompanied by his teacher, who acted also as interpreter. Things went well enough while Mr. Rollins invited his audiences to hotels or to an improvised lecture-hall in a private house; but at the place spoken of above he hired a theatre, a thing no missionary of more mature experience would have done. No sooner had he got fairly started with his address than the stage from which he was speaking was stormed by an excited and angry crowd who, but for the interposition of the police, would have done the speaker serious hurt. Mr. Rollins speaks in the highest terms of the bravery of one member of the force who "went for" the leader of his assailants "straight from the shoulder," and sent him to the ground with such force that the noise of his fall could be heard some distance. While falling he carromed against another fellow, and this state of things was continued till soon eight or nine people lay on the ground, having gone down like "ten pins" from the one single exhibition of strength and pluck of the policeman. Mr. Rollins was then conducted to his hotel guarded by his deliverer and his comrades.

### THE STATE FUNERAL OF ON WEDNESDAY.

IT was estimated that the total cost of Prince Sanjo's funeral would be thirty thousand *yen*, but rumour says that the actual expenses exceeded that sum. It is not easy to conceive how this can have been, for, on the whole, the ceremonial and the paraphernalia were not of a character suggesting lavish outlay. Everything was doubtless the very best of its kind, but even on that assumption there did not appear to be much room for large expenditure.

* * *

It is stated that a too eager correspondent of some Western newspaper, a foreigner, gave great offence during the ceremonial at the shrine of Gokoku, by advancing in his overcoat and lying down on the ground in the immediate vicinity of the Princes of the Blood and other high dignitaries assembled to pay their respects at the burial. The object of assuming an attitude so incongruous was to obtain a clear view of some particular feature of the rites, but that excuse does not seem to have been considered valid.

### MR. FREDERICK DIVERS.

A TERRIBLY sad piece of news was received on Thursday in Tokyo. Mr. Frederick Divers, only son of Dr. Ed. Divers, F.R.S., died suddenly at Foochow on Sunday the 15th instant. The deceased entered the Imperial Chinese Customs Service about two years ago, and having successfully passed his period of probation and preliminary tests, took up his duties in due course, and enjoyed apparently good health until very shortly before the seizure that carried him

Digitized by Google

off. So far as we can learn, some intermittent and seemingly unimportant suffering from headaches was the only premonitory symptom. He was not even sufficiently unwell to remain away from his office, and the end came with suddenness as shocking to his friends as it was merciful to himself. The greatest sympathy will be felt with his bereaved family both in Tokyo and Yokohama. Death, swift and wholly unexpected, on the very threshold of a fine career, is in truth a cruel misfortune, and such a death was that of Mr. Frederick Divers. The testimony of his immediate chief, the Commissioner of Customs at Foochow, is expressive :—"His genial disposition, his accomplishments and kindly ways had already made for him many pleasant friends, and his career in the Customs Service and as a valued member of the community was full of promise."

### MISTAKES.

AT the head of a numerical list of incidents which it describes as "somewhat strange," in connection with Prince Sanjo's funeral, the *Japan Gazette* puts the following :—

(1) Among those whom one expected to join the procession, the foreign Ministers were conspicuous by their absence. We think we are correct in saying that there was not a single foreign Ambassador present. We have little doubt that they were to be seen at the cemetery, to which we were not able to go, but it may naturally be asked why did they not follow the universally observed Japanese custom of taking part in the funeral procession?

Apparently the *Japan Gazette* labours under the strange hallucination that the Representatives of the Foreign Powers at the Court of Japan are "Ambassadors" and that the Legations in Tokyo are Embassies. This by the way, however. The main point is that our contemporary calls attention to the absence of the Foreign Corps Diplomatique from the funeral cortége as a "strange" event, and by implication suggests that some want of courtesy was thus shown either towards the deceased Prince or towards the State which had assumed charge of his funeral. Now the fact is that the Foreign Representatives were specially requested to assemble at the Gokoku Shrine in Otowa, and not at the point of the procession's departure—the residence of the deceased Prince in Ichibei-machi—since, owing to the sickness of Princess Sanjo and to the very limited space available there, it would not have been possible to appropriate any chamber for their accommodation. If, before lending its columns to the circulation of such a mischievously false impression, the *Japan Gazette* did not deem it a duty to seek direct information, it might at least have taken the trouble to consult the plan of the cortége, as published in the *Official Gazette*, where it would have seen that no place in the procession was assigned to the Foreign Corps Diplomatique. So far from failing in any iota of conventional respect to the memory of Prince Sanjo, the Foreign Representatives, on this occasion, inaugurated a graceful departure by sending handsome clusters of flowers, prepared in Japanese fashion, to be placed beside the bier in Ichibeimachi and before the grave at Gokoku-ji.

* * *

We have before remarked that a sort of clumsy instinct of perverted justice seems to direct the *Japan Gazette's* blundering. Having denied the presence of Chinese residents at the Anti-Revision Meeting of last September, though their attendance had been duly reported in its own columns, it tried to compensate this error by inserting a Chinaman among the Foreign Representatives at the Treaty Revision conferences, though every decently informed person knew that no Chinaman had ever taken part in that business. Now again it exhibits the same impartiality of compensatory hallucinations. For having blamed the Foreign Representatives because they did not put in an appearance where they were invited to be absent, it rejoices over Count Ito's presence where he did not put in an appearance at all. "We were glad to observe," says the *Gazette*, "that Count Ito's indisposition had allowed of his being present." Considering that Count Ito did not follow the funeral, being still too unwell to do so, we can only regard this statement as another example of our honest contemporary's intuitive disposition to balance one blunder by another.

### A FUNERAL IN FORMER TIMES.

TOKYO has seen many a grand funeral to the magnificence of which the State lent no aid. The great dignitaries whose obsequies become a national care, are always interred according to Shinto rites, and the paraphernalia and ceremonials are therefore comparatively simple. Buddhism buries its votaries far more magnificiently, strewing their path to the grave with flowers, and investing the whole business with lavish wealth of pomp and splendour. Seventeen years ago, when a representative of the great firm of Mitsui was carried to his last resting place, one feature of the funeral left a lasting impression on the citizens. The cortége crossed the river at Asakusa, and took its way towards Mukojima. From the eastern end of Azuma Bridge to the Temple, a distance of over a mile, both sides of the road were lined with men whose sole duty was to scatter copper coins among the people. Ten thousand *yen* were converted into two-*rin* pieces for the purpose, and a shower of coppers rained for hours upon the heads of innumerable mendicants who had flocked from all quarters to assist at the ceremony.

### THE BANK OF JAPAN.

THE regular general meeting of shareholders of the Bank of Japan was held on the 21st inst. at 1 p.m., at which more than thirty gentlemen were present, the chair being occupied by Mr. Kawata Koichiro, Governor of the Bank. Messrs. Matsuo, Chief Commissioner of the Treasury Bureau, Tajiri, Chief Commissioner of the Bank Superintendence Bureau in the Financial Department, and Iida, Assistant-Director of the Bureau of the Imperial Treasury in the Imperial Household Department, were also present at the meeting. The receipts during the latter half of last year were *yen* 1,754,645.983, of which *yen* 350,000.000 were set apart as a reserve, *yen* 180,000 000 as a special reserve, *yen* 90,000.000 as remuneration to officers, *yen* 100,000.000 as expenses for the construction of new buildings for the Bank, and *yen* 750,000.000 as a dividend for the half-year, to be declared at the rate of 15 per cent. per annum, *yen* 284,645.983 being carried forward to the next account.—*Shogyo Shimpo.*

### "DEPUTY KING" OF KOREA.

THE many friends of Mr. C. R. Greathouse will rejoice to learn the news conveyed to its readers by the *Washington Post* on December 30th. We were in some measure prepared for the intelligence by observing that the Sōul correspondent of our Nagasaki contemporary—realising no doubt the disadvantages under which he must otherwise labour—had promoted Mr. Greathouse to "General." "Deputy King" sounds somewhat hollow. This is the *Post's* news :—"Clarence R. Greathouse, formerly a San Francisco newspaper man, after being appointed to a Japanese Consulate, has succeeded in winning the favour of the King of Korea, and has been made deputy king."

### COUNT ITAGAKI.

COUNT ITAGAKI has retired from the Radical Party, declaring his intention of abstaining from party politics for the time being at all events. This step was taken on Thursday. It is doubtless conclusive. Briefly speaking, the reason assigned is that the Count discerns no prospect of such united action on the part of the Radicals as could alone lead to the formation of a great party sufficiently strong to undertake the responsibility of administering the affairs of the State at any moment. By no other means can the real goal of constitutional institutions, a party Cabinet, be attained. The circumstance which led directly to the Count's resolve is that the recent division in the *Jiyu* party was virtually an accomplished fact before any information reached him officially. He was ignored at a most important crisis of the Party's career, and he naturally objects to be thus converted into a mere figure-head. Genuine tests of cohesion are now being applied to political parties, and there will be a great deal of re-modelling before anything like permanent bases can be reached.

### THE QUEEN'S CELLAR.

"ATLAS," in the *World* of December 24th says :—The Queen has an immense cellar of wine at Windsor, and supplies are regularly sent from the Castle to Osborne and to Balmoral. Champagne and claret are the wines in most constant use, but there is a splendid collection of Cabinet Rhine wines, some extraordinary old sherry (William IV. drank no other wine), a great quantity of port, including nearly all the best vintages, and some of the finest Imperial Tokay in the world. Prince Albert always drank a bumper of Tokay after dinner, but since his death it has seldom been seen at the Queen's table. Apollinaris water is much favoured, both by her Majesty and by the Prince of Wales; and the Queen's favourite whisky comes from the well-known Lochnagar Distillery, which is on the Balmoral estate.

### PAPER MANUFACTURE.

WE learn from the *Official Gazette* that during the month of December last the Oji Paper Mills, the Yukosha, the Kobe Paper Mills, the Fuji Paper Mills, and the Yokkaichi Paper Mills, manufactured 1,584,456,50 *kin*, or about 2,112,608 lbs. of paper, the sales during the same period amounting to 1,611,507.50 *kin* or about 2,148,676 lbs. Classifying the different varieties, we find that of ordinary printing paper 1,319,631.00 *kin* were manufactured and 1,405,320.10 *kin* sold; of superior printing paper 12,250.50 *kin* were manufactured and 30.029.50 sold; of coloured paper, 820.00 *kin* were sold; of wrapping paper, 161,004.00 *kin* were manufactured and 61,930.00 *kin* sold; of miscellaneous kinds 91,571.00 *kin* were manufactured and 113,408.00 *kin* sold.

### BISHOP NICOLAI'S CATHEDRAL.

THE Cathedral of the Greek Church in Japan, on Surugadai, Tokyo, has now been completed, and the opening ceremony will be performed in a short time. Several years have been occupied in the construction, and the result well repays the delay, for the building not only on account of its own proportions but also by the aid of its well chosen site, is one of the most conspicuous edifices in the capital. The opening ceremony will be on a scale of great magnificence. We read in the *Kokumin Shimbun* that advantage will be taken of the visit to Japan of His Imperial Highness the Czarevitch, but if that be so, it is evident that the date (March 8th) fixed by our contemporary for the ceremony cannot be correct.

### PRINCE SANJO'S COFFIN.

THE inner and outer shells of Prince Sanjo's coffin are of pure white *hinoki* (*Thuya obtusa*), the former six feet long by two and a half wide and one foot seven inches deep; the latter proportionately larger, the thickness of each being an inch and a half. The bier is of the same wood, its metal mountings plated with gold, and its bearing poles twenty feet long. The halberds and sword carried in the procession will be of wood, the sword blade plated with silver, and its haft lacquered black. The artificial flowers will be of two kinds, plum blossoms grouped with pines, and peonies grouped with maple. There will doubtless be an enormous quantity of natural flowers in bamboo holders, after the usual *Shinto* form, for all high officials and friends of the deceased will send a tribute of this nature.

### THE PRESIDENT OF THE HOUSE OF REPRESENTATIVES.

THE House of Representatives having unbent its brows—or "opened its eyebrows" as the Japanese put it—towards the Government, the public begins to breathe more freely. The crisis is averted, and the Budget will, by mutual agreement, undergo some appreciable reduc-

Digitized by Google

tions. Curiously enough, however, at this comparatively auspicious juncture, the resignation of the President, Mr. Nakajima Nobuyuki, begins to be talked of. People say that he will be translated to the Privy Council, but do not say why he should give up his present post.

### SUICIDE ON THE RAILWAY.

THE officials in charge of a train on the Takasaki line reported on Monday at Uyeno a painful incident that occurred on the trip to the capital. After leaving Honjo, about four miles from the station, the train having then attained a high speed, the driver observed two persons standing at the side of the line, and concluded that they intended to cross after the passage of the train. But when the engine was within less than a hundred yards away, the pair, who by this time could be seen to consist of a youth and a girl, the latter exceedingly pretty, turned to each other, embraced, and then, thus clasped together, lay down on the nearest rail. Of course not a moment was lost in the endeavour to stop the train, but on this line vacuum brakes are not in use, and under the circumstances described ordinary brakes were of little value. The train stopped some twenty minutes by the poor mangled bodies, while arrangements were made for their disposal, and during the interval it was found that, being forbidden to wed, the unhappy couple had chosen to die in each other's arms.

### RUDENESS!

WE learn from spectators that the unfortunate foreigner against whom a charge of rudeness was preferred by Japanese newspaper reporters in respect of his conduct during the funeral ceremony at the Gokoku Shrine on the 25th instant, did nothing more than sit on the ground in the place allotted to him instead of on his chair, his object apparently being to see under a large floral decoration which would otherwise have obstructed his view. In short, his offence consisted in assuming a lowly position instead of the loftier and more comfortable one assigned to him on the same spot. What shall we next hear described as rudeness?

* * *

Talking of overcoats, it seems that the wearing of a garment of that nature aggravated the offence of this particularly unoffending foreigner. It happens, however, that every foreigner present wore an overcoat, as did also the majority of the Japanese; a point of difference being that whereas the particular foreigner singled out for censure had a black over-coat, several Japanese showed sufficient bad taste, or ignorance, to wear coats coloured or checked.

### BENEFIT FOR AN ORPHANAGE.

THE entertainment to be given at the Rokumeikan on the 21st March, for the benefit of the funds of the Girls' Orphanage in Kanda, will consist of music by the Emperor's band of string and wind instruments, and of three theatrical pieces. The first will be what the French call a *lever de rideau*, and is a dialogue entitled "L'Obstacle." The other pieces will be "The Coming Woman," and "La Grammaire," by Labiche. The French pieces are under the direction of Madame Sienkiewicz, and the English is under that of Mrs. Hugh Fraser. The performance will begin at 8 o'clock to enable visitors from Yokohama to enjoy the entertainment, and return home by the last train. It is hoped that very many will come and see what capabilities Tokyo amateurs possess. The patronesses are Countess Goto, Viscountess Aoki, Viscountess Kabayama, Madame Sannomiya, Madame Sienkiewicz, Mrs. Hugh Fraser, Mrs. Loureiro, Mrs. N. J. Hannen. Tickets can be procured from any one of these ladies in lots to suit purchasers, the patronesses reserving the right of refusing more than one hundred tickets to one applicant except in cases of vehement supplication for more.

### THE SUIT OF THE ELECTRIC LIGHT COMPANY.

YESTERDAY the suit brought by the Tokyo Electric Light Company against Mr. Soné, Chief Secretary of the House of Representatives, came up for hearing by the Tokyo Chiho Saibansho, Judge Ichiji, President of the Second Civil Section, being on the Bench, and Procurator Koga being present. The plaintiffs' counsel stated that Mr. Soné, having submitted to the Minister President of State, a report, based upon his own and others' evidence, attributing the origin of the fire by which the Diet buildings were destroyed to the electric lighting apparatus, and this Report having been published in the *Official Gazette*, the *Japan Mail*, the *Japan Gazette* and other daily papers, to the serious injury of the plaintiffs' business, the plaintiffs prayed that Mr. Soné should be directed to alter his Report, and further to procure and pay for the insertion, during a space of one week, by the above newspapers, of a contradiction dictated by the plaintiffs. For the defendant it was alleged that his Report to the Minister President had been made in the due discharge of his official duties, and that he was not answerable to any private individual, or body of individuals, for its contents. He therefore prayed that the petition be dismissed. It does not appear that any lengthy evidence was offered or asked for. The case occupied the Court during yesterday afternoon only, and the Judge promised to give judgment on the 3rd instant.

### PRINCE SANJO'S FUNERAL.

THE following was the order of procession observed at the State Funeral of Prince Sanjo:—

Outriders.

Gendarme. Gendarme.

Inspector of Gendarmerie.

Gendarme. Gendarme.

Troops.

*Sakaki* (*Cleyera Japonica*) bearers. *Sakaki* bearers.

Red Flags. White Flags.

Red Flags. White Flags.

*Sakaki*-bearers. *Sakaki*-bearers.

Halberd. Halberd.

Artificial Flowers. Artificial Flowers.

Ditto. Ditto.

The Prince's Persian Decoration. The Prince's Turkish Decoration.

The Prince's Italian Decoration. The Prince's Russian Decoration.

Order of the Mirror. Grand Collar of the Rising Sun.

Grand Collar of the Paullownia. Grand Collar of the Chrysanthemum.

The Prince's body-servant. The Prince's body-servant.

Ditto. Ditto.

THE PALL
borne by 50 bearers in white.

Body-servant. Body-servant.

Stand of Pall. Cover of Pall.

Page. Page.

Umbrella. Foot-gear.

Chief Mourner
(On foot in white mourning robes).

Steward of the Prince's Household.

Assistant Steward. Assistant Steward.

Private Secretary of the Lord Keeper of the Privy Seal (on horseback).

Carriages containing Relatives of Deceased.

Chief Funeral Officials.

Funeral Officials.

Princes of the Blood.

Ministers of State.

*Shinnin* Officials.

Princes and Holders of the First Order of Merit.

Departmental Officials of *Sonin* rank, or ranking with *Sonin*, and upwards.

Nobles.

Members of the House of Peers.

Members of the House of Representatives.

Troops.

Outriders.

Inspector of Police.

Gendarme. Gendarme.

The Public.

### RAILWAY ACCIDENT.

IT is reported by the *Kokumin Shimbun* that on the 21st instant, when the train from Naoyetsu had reached a point about half a mile beyond Sekiyama station, it ran into a district where the snow lay ten feet deep. The guard of the train, Ono Chisei, in attempting to open a door which had become jammed by the snow, fell out, and was so mangled by the train that he died almost immediately.

### THE NEW LORD KEEPER OF THE PRIVY SEAL.

THE post of Lord Keeper of the Privy Seal, rendered vacant by the death of Prince Sanjo, has been conferred on H.E. Marquis Tokudaiji, Lord High Chamberlain, who receives the new appointment in conjunction with his office of Head of the Board of Chamberlains.

### COUNT ITO.

COUNT ITO'S attack of influenza seems to have been exceptionally severe, but happily he is now recovering fast. Countess Ito and Mrs. Suyematsu Kencho are now laid up with the same malady.

## *THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.*

The memorable decision of the Lower House on the 20th instant as to the proper procedure for seeking the Government's concurrence in respect of expenditures mentioned in the 67th Article of the Constitution, the split in the Constitutional Liberal party, and the complete discomfiture of the Extremists on the 26th, have been the principal topics of discussion in the columns of the vernacular press during the week.

* * *

As to the vote of the 20th instant, we have already written at some length, and it is not here necessary to recount the chain of circumstances that led to the victory of the Moderates on that occasion. The tone of the different papers on this question may easily be guessed by any one who has paid attention to current politics. The Constitutional Liberal and the Progressionist organs bitterly complain of the alleged inconsistency and faint-heartedness of the section of the *Rikken Jiyu-to* that voted with the Moderates. Fear of dissolution, say these papers, terrified the politicians of the seceding section so much as to induce them to desert their comrades of the Constitutional Liberal party. The other vernacacular papers, on the contrary, congratulate the House of Representatives on its opportune emergence from an embarrassing situation that threatened to produce a disastrous collision between the Legislature and the Executive. These journals express special satisfaction that the Representatives, by their decision of the 20th, have secured the great constitutional power which they ought to possess over the Peers on financial questions. The organs of the Extremists cling to the forlorn hope that the politicians, whose recent disaffection is so bitterly upraided, may stand true to the Budget Committee's report. On the other hand, the papers in favour of the Moderates, the *Nichi Nichi Shimbun*, the *Kokwai*, the *Tokyo Shimpo* and others—hope, that, the House of Representatives having seen its way to remove the gravest soucer of conflict between it and the Government, the latter will do all in its power to approve the reductions proposed by the Representatives. The *Kokkwai*, which supports the Moderates and at the same time seeks to be impartial, expresses itself in this strain:—"The Extremists, who wield immense power in the House of Representatives, are opposed to the Government, and seem to be determined to employ the dissolution of the Diet, should that step be actually taken, as an instrument for shaking the credit of the Government. As to the Moderates, they must not be considered partisans of the present Government; they simply object, on the ground of unconstitutionality, to the radical measures recommended by the Extremists. Their object is to accomplish great political reforms by a method more rational and orderly. The Government has taken up a position strongly opposed to the Extremists, but should it continue to think so exclusively of its convenience as to reject even sensible demands, nothing can be more evident than that the Moderates will at once turn upon it in vehement opposition. Could any Government continue to maintain its position against the united opposition of the Moderates and Extremists? These things call for careful consideration by those in power."

* * *

The old *Aikokukó-tó* elements of the Constitutional Liberal party, who, as already stated,

Digitized by Google

voted with the Moderates in the memorable debate of the 20th instant, formally severed their connection with their party on the 24th instant. The seceders at first numbered twenty-nine, but their example was soon followed by Count Itagaki and his lieutenants of the *Jiyu Shimbun*. The thirty odd politicians have decided to keep together by organizing a political club called the *Jiyu* Club. Count Itagaki and the writers on the staff of the liberal organ will hold aloof from all political bodies. According to a manifesto issued by the twenty-nine seceders, they appear to have left the *Rikken Jiyu-to* for three reasons, namely, (1) that the members of that party, instead of being united by bonds of mutual regard and respect, are influenced by sentiments of jealousy and enmity towards each other; (2) that the party tries to go so far in the control of the conscience of its members, as to virtually deprive them of individual freedom as members of the Diet; and (3) that the practical tendency of the opinions and action of the majority of the members of the party, has become too destructive to win the support of the sober section of the public. Count Itagaki denies the truth of the rumour, that he had previously approved, if not instigated, the course taken by the twenty-nine seceders. The reason why he followed their example and thereby lent some colour to the above mentioned rumour, is, according to his own words, that having been unable to maintain the unity of the party, he no longer thinks himself justified in continuing his connection with it. He will remain independent from all political parties; in fact he intends to take no part in practical politics for the immediate future at least, confining his attention to the editing of his paper, the *Jiyu Shimbun*.

* * *

The 29 seceders are generally known by the name of the Tosa faction, because the principal politicians among them, as Messrs. Kataoka Kenkichi, Hayashi Yuzo, and Uyeki Yemori, are natives of that Province. Constancy is usually considered to be among the virtues possessed by the men of Tosa, and the papers devoted to the Extremists allude to this circumstance, and call the twenty-nine seceders by various ugly names. The *Kokumin Shimbun* remarks that they are the Parnellites of Japan, and that their future rôle will be to hold the balance of power between the two great political parties. The *Hochi Shimbun* condemns the inconsistency of their conduct, and asks them if they are not ashamed of themselves. Most of the Extremist organs, however, hope that the desertion of this section of the Constitutional Liberal party will help the amalgamation of the *Rikken Jiyu-to* and the *Kaishin-to* into one progressive party.

* * *

The Government's refusal to give concurrence to the reductions proposed by the Budget Committee's report, is considered by the *Nichi Nichi Shimbun*, and the rest of the Moderate organs to be rational and proper under the circumstances. But the *Kokkwai* takes exception to the second paragraph of the answer of the Government, wherein it is declared *ultra vires* to attempt to change by the Budget what has been fixed by the provisions of law. The Constitution, according to the *Kokkwai*, plainly gives the Diet power to effect such alterations with the concurrence of the Government, and consequently there is no impropriety in the Diet's seeking the Government's concurrence with the contemplated changes. The Government ought not, therefore, in the *Kokkwai's* opinion, to refuse its concurrence on the ground of illegality or excess of power. The papers which sympathize with the Extremists protest in general and ambiguous language against the answer of the Government.

* * *

The complete and final victory of the Moderates on the 26th instant has evidently cowed the Extremist organs. The latter now only hope that the special Committee will regard themselves as the representatives, not of the Moderates, but of the whole House, and that, viewing themselves in that light, they will do their utmost to obtain the Government's concurrence to as large reductions as possible. These papers complain of the partiality of Mr. Nakajima, President of the Lower House, for the Moderates, as he did not grant the recess which the Extremists deemed it necessary to take before proceeding to elect the Special Committee for conference with the Government. The *Mainichi Shimbun*, one of the most fervent supporters of the Extremists, protests against the unconstitutionality of the election of the Committee. By what provision of the Constitution or of the Law of the Houses, it asks, was the Committee brought into existence? All communications with the Government ought, according to the 10th article of the Constitution, to be conducted by the President of the House. And if a Committee were required the Budget Committee would have sufficed. Thus our contemporary is opposed, "from the head to the tail," as the Japanese saying goes, to the decision of the 26th instant. The *Kokumin Shimbun* cannot think, as the Cabinet thinks, that the reductions proposed by the Extremists would interfere with the working of the Administrative machinery. It fears, on the contrary, that the alienation of the hearts of the people will discredit the Government in the eyes of foreign Powers.

* * *

It is stated that a compromise will be effected between the Diet and the Ministry at somewhere about 5 million *yen*. There is a rumour that the Minister of Finance is prepared to consent to reductions aggregating 6 million *yen*, but this rumour lacks confirmation.

* * *

The question of agricultural reform is engaging the attention of a considerable section of the public. A writer in the *Choya Shimbun*, after noticing the importance of agricultural improvements, proceeds to ridicule politicians who try to ingratiate themselves with the rural population by loud clamour for the reduction of the land tax. Such a step, while depriving the State of a large amount of income, cannot better the condition of the peasantry. The writer recommends, by preference, the adoption of some positive scheme of improvement. As an example, he advises farmers to form guilds with centres in Tokyo. Such guilds are now seen among other classes of the people, merchants as well as those engaged in industries.

* * *

Some people in Tokyo believe that the recent change in the Japanese representative at Söul is connected with a change in the policy which the Japanese Government intends to pursue hereafter towards Korea. Mr. Kawakita, the new representative, left his family in Tokyo when he started for his post, and this circumstance is alluded to in certain quarters as a sign that he did not think it safe to take women and children with him, since he purposed to inaugurate a new and strong course of policy towards the peninsular kingdom. The *Nippon* evidently puts faith in these reports, for, in a series of three long articles, said to embody the opinions of a certain individual, it dwells on the unwisdom of pursuing a strong and aggressive policy towards Korea. Japan ought to adopt a neutral policy in regard to that country. Russia and China are desirous of possessing the peninsula, but Japan wishes only to see Korea independent and progressive. Our contemporary believes that the Koreans have a future before them. They are naturally quite capable of enlightened progress, as may seen from the assiduity with which many a Korean youth has already prosecuted his studies in Japan. Moreover the past history of the nation reveals, says the Tokyo journal, the fact that the Koreans have been a patriotic race, always eager to maintain their national independence.

* * *

The *Tokyo Shimpo* writes on this subject in a more exhaustive manner. It is equally opposed to the reduction of the land tax. The result of the latter would be to lighten the burdens of the farming class by 1 *yen* 33 *sen* per family on the average; and those who would be actually benefited even to that extent are only twenty-five per cent. of the whole agricultural population. Moreover, so long as the present system of tenant farming remains unaltered, a reduction of the land tax would not confer the slightest advantage on the actual tillers of the soil. Instead of reducing the land tax, our contemporary, like the *Choya*, recommends the adoption of active measures of progress. First among such measures it places improvement of the courses of rivers, and the construction of durable embankments. In the second place it puts encouragement of the exportation of rice. It thinks that, so long as rice remains below 7 *yen* per *koku*, export ought to be profitable. The quantity annually exportable is estimated at 3,000,000 *koku*, and the result of exporting that quantity would be to raise the home price of the grain by 50 *sen* per *koku*. In other words farmers would receive so much additional income; whereas the proposed reduction of the land tax could only benefit them by a few *sen*. The third measure recommended is the enactment of tenant laws and the organization of agricultural associations. The fourth is the development of sources of taxation other than agricultural; and the last is the establishment of some method for supplying farmers with capital.

* * *

Captain Taylor's lecture before the Japan Geographical Society on the proposed Nicaraguan inter-oceanic canal, has awakened widespread interest in the sucess of that undertaking. Mr. Shiga's articles on the subject in the columns of the *Kokkwai* also did much to draw public attention to the enterprise. During the present week, the *Jiji Shimpo* has devoted to this subject a series of several long editorials. Having referred to the history of the unsuccessful Panama scheme; and recounted the preliminary stages of the new American enterprise, the *Jiji* observes that, although usually far from credulous, it is inclined to believe in the Nicaraguan canal, that the undertaking is destined to be a success, and in the strength of this faith it cannot but invite the attention of its countrymen to the great importance of the canal to Japan from commercial, political, and strategical points of view. It recommends the adoption of some practical measures in anticipation of the completion of the great undertaking. These measure are, first the despatch of Japanese labour to Nicaragua. There is a law in force in that country prohibiting the emigration of "Asiatics." But our contemporary thinks that the term Asiatics was originally meant to cover the Chinese alone, and that the Government of Nicargua would not be opposed to the introduction of Japanese labour. Secondly, capitalists are advised to subscribe for the shares of the company. There is plenty of money in Japan, but its owners are at present extremely conservative in using it. The *Jiji* recommends them to turn their attention to foreign enterprises as investments. The possession of shares in the Nicaraguan Scheme by Japanese capitalists, is also declared important from a strategical point of view, for in proportion to the amount of shares possessed by her subjects Japan will have influence in the control of the canal. Thirdly, the *Jiji* suggests the extension of the Poronai-Otaru railway in Hokkaido to the port of Hakodate along the western coast of the island, for on the completion of the Nicaraguan canal Hakodate will become an extremely important coaling station for vessels coming from America and Europe. The present plan is to carry Poronai coal to the ports of Otaru and Muroran, but the former is inconveniently situated for a coaling station, while the latter is too small for the purpose. Fourthly, our contemporary advocates some enlargement of the schemes of harbour construction and dockyards at Yokohama, so as to accommodate the vast amount of shipping which the port will draw after the completion of the Nicaraguan canal. The *Jiji Shimpo* hopes that in carrying out the measures thus suggested, the Government will give all necessary protection and aid.

## *THE HOUSE OF REPRESENTATIVES AND THE PRIVILEGES OF FOREIGNERS IN JAPAN.*

THE following Representation has been handed in by Mr. KOZUKI JOKEI and other members of the House of Representatives for debate by the House and, if approved, to be forwarded to the Government:—

REPRESENTATION RELATING TO THE CONTROL OF FOREIGNERS.

The conduct of trade and the owning of houses and lands outside the Settlements by foreigners, under any name whatsoever, is not permitted by the Treaties now in force. Nevertheless, of late years the control exercised in there matters has become lax, and the national rights are impaired to no small extent. Therefore, it is the desire of this House that the Government will take steps to establish strict control.

A memorandum setting forth the reasons for the course suggested in the Representation, runs as follows:—

The Minister of Foreign Affairs not having explained clearly how far the work of Treaty Revision has been carried, nothing accurate is known on the subject. So long as the present Treaties remain in force, it is obviously essential that their provisions should be strictly observed. But in consequence of the lax nature of the control exercised of late years, foreigners have begun to carry on trade under various names outside the Settlements and have almost usurped the commerce at important places on the sea coast, with results decidedly injurious to Japanese merchants. Further, foreigners have rented houses and lands outside the Settlements, some for a long term of years, some in perpetuity, and these houses and lands though nominally rented, have really become the property of foreigners. No question is raised about the residences of Foreign Representatives, missionaries, foreigners in Japanese employ, or about churches, but with regard to the rest accurate investigations should be undertaken. This is the cardinal point advocated by the Representation.

We have here another measure not unlikely to be endorsed by the House and sent up to the Government backed by the authority of the people's Representatives. As to the principle involved, it is useless to say much. We have always argued against the wisdom of drawing the reins tightly in respect of the privileges openly or tacitly granted to foreigners by the liberality of the Japanese Authorities. Japan must win her battle for independence by conciliatory methods, and every step she takes in an illiberal or restrictive sense will only awaken prejudice against her. Nobody thinks of denying that she would be within her rights if she strictly enforced the provisions confining foreigners within Treaty limits, and forbidding them to carry on trade or to own real property outside the Settlements. Neither does anybody think of denying that real property is owned and that trade is carried on by a few foreigners outside the Settlements at present. Neither, again, does anyone think of denying that the desire to put a stop to the enjoyment of these privileges by people who, on their side, confine Japan within the stern letter of her convenants, nay, even attach to their text, in some cases, a harsh and arbitrary reading, is quite natural. Like begets like. As men treat others, they must expect to be themselves treated. The unvarying lesson taught to Japan by her intercourse with Foreign States is that, unless a country is too weak to insist upon its rights, it takes jealous care that its foreign treaties shall be construed with the maximum of strictness, so far as the advantages guaranteed by them to the other contracting parties are concerned, and with the maximum of liberality in respect of the advantages secured to itself. We are well aware that to condone the adoption of a similar rule by Japan is denounced by some foreign residents as disloyal and unpatriotic. But that is mere childishness. Facts cannot be altered by a petulant and selfish objection to their statement. It must be admitted that a few foreigners do enjoy privileges not granted by the Treaties, and it must also be admitted that a wish on Japan's part to withhold such privileges is a mood quite natural under the circumstances of her relations with foreign nations. But there are two points to be considered by the House of Representatives when it comes to debate this question. The first is—how are foreigners to be restrained from carrying on trade and owning real property outside the Settlements, so long as they are willing, in the one case, to work through Japanese agents, and so long as they are satisfied, in the other, with a vicarious title to their property? Practical folks, before embarking upon any course, are wont to consider what steps shall be taken in pursuing it. We presume that the members of the Japanese Lower House count themselves pratical folks, and that they will not be content with merely asking the Government to put a stop to certain things: they will, in the first place, think how prohibition is to be enforced. A foreigner enters into a private arrangement with a Japanese to the effect that, for certain considerations, direct or cöoperative, the Japanese shall, in his own name, open a branch of the foreigner's business at some place outside the Settlements. The result is that a handsome store makes its appearance in Tokyo or Kyoto, duly licensed by Japanese authority and carrying on business under the name of the "Handa-shokai," or some other Japanese appellation. It may be strongly suspected that the affair is purely an outcome of foreign enterprise; that the goods sold there are the property of a foreigner, and that the whole risk is borne by a foreigner. But what then? How is an inquisition to be undertaken into the private affairs of the Handa-shokai? The Diet has been called into existence under the provisions of a Constitution guaranteeing, for the first time in Japanese history, full liberty of the subject. Will the Diet be the first to suggest that an official scrutiny should be instituted into the books and dealings of every Japanese firm suspected of being allied with a foreigner? Consider, again, the case of a house or a piece of land outside the Settlements. The title stands in the name of a Japanese. The entry in the Great Ledger is registered in the name of a Japanese. A foreigner may have paid the purchase-money, and may be the practical owner, but, so far as the law is concerned, a Japanese and a Japanese only is concerned. How are cases of this sort to be distinguished? What article of the Constitution or what provision of law entitles the Authorities to undertake an investigation into the circumstances under which a Japanese subject came to be registered as the owner of a certain house or a certain plot of land outside the foreign Settlements? It will be well for the Diet, before voting Mr. KOZUKI'S Representation, to reflect seriously upon the above aspects of the case.

The second point to be considered is whether any advantage could be gained by the proposed course. And here it should be noted that the foreigners against whom the Representation suggests restrictive measures, are precisely the persons whom Japan ought to treat with liberality and consideration. For they are men who not only trust Japanese sufficiently to have valuable property registered in their names, but are also desirous of carrying on trade outside the Settlements. It is not from such foreigners that any real opposition to Treaty Revision comes. Apart from this special consideration, however, there is the general fact that any attempt to limit the privileges now enjoyed, whether legally or illegally, by the foreign residents would assuredly be construed to Japan's disadvantage. People would not stop to reason. They would conclude at once that anti-foreign feeling was at work, and would consequently become more reluctant than ever to entrust themselves to Japanese jurisdiction. We do not say that the inference would be just. We only say that it would be the inference generally drawn and accepted, and that Japan would lose far more by thus ministering to foreign distrust than she could possibly gain by demonstrating the irksomeness of the strict letter of the Treaties. A nation seeking to win the confidence of the world cannot afford to take a backward step of any kind. It may seem harsh to write thus in the context of the admirable spirit shown by that clause of the Representation which excepts missionaries and churches from the scope of the proposed restriction. But those who are most ready to appreciate the great significance of such an exception, will also be the first to admit that the considerations advanced here should commend themselves to Japan in her own best interests.

HORSFORD'S ACID PHOSPHATE.
Beware of Imitations.

## *CALMER COUNSELS IN THE HOUSE OF REPRESENTATIVES.*

THE House of Representatives has retreated in good time from the extreme position hitherto taken by it. This step probably averts a political crisis and consequently deserves attention. The Budget, as submitted to the House of Representatives, contains two classes of expenditure. With all the items in the first class the House is entitled to deal just as it would deal with the provisions of a law laid before it by the Government for deliberation : that is to say, it may reduce or reject any of these items according to its own views. Further, if such rejections or reductions, made by the Lower House, obtain the endorsement of the Upper, they become practically binding upon the Government. The second class of expenditures belongs to the category defined in the 67th Article of the Constitution; namely, expenditures required for exercising the Imperial Prerogatives, as set forth in the Constitution, and expenditures involved in carrying out laws already in force, or in discharging obligations legally incurred by the Government. The items of this second class of expenditures must not be reduced or rejected by the Diet without the concurrence of the Government. Now when the House of Representatives came, for the first time, to determine its procedure in respect of the Budget, it had to consider what method should be adopted in order to seek the concurrence of the Government in the matter of this second class of expenditures. Viewed by the light of the simple propositions here stated, the question ought not to have presented much difficulty. The House of Representatives possesses only one means of expressing its opinion, namely, by vote. So soon as it has voted certain alterations in the Budget, its functions with regard to the latter are ended. In other words, the moment the Budget passes its third reading in the House, any changes it has undergone become final so far as the House is concerned. But the Constitution provides that, in respect of the second class of expenditures, no such final parliamentary action shall be taken without the concurrence of the Government. Therefore it follows that before committing itself to a conclusive vote for the reduction or rejection of any item in the second class of expenditures, the House must approach the Government and seek the latter's concurrence.

All this would be perfectly simple were the case comprised within the limits here stated. But there is another factor in the problem. We have been speaking of the procedure of the House only, whereas the Diet consists of two Houses, and the words of the Constitution are that such and such expenditures shall not be rejected or reduced "by the Diet without the concurrence of the Government." In view of this language several members of the Lower House—before which the Budget is laid first—contended that the veto must be held to refer to the action of the two Houses. "The Diet," they averred, signified the two Houses. Consequently it was not competent for one House alone to seek the concurrence of the Government. Such concurrence could only be sought in respect of reductions or rejections which had been voted by both Houses in due order. And by that view the House, after a long and animated debate, resolved to be guided.

The Government, on the other hand, emphatically asserted that the House's interpretation was wrong, and told it, almost in so many words, that if it treated the Budget in the sense of such an interpretation, it would be distinctly violating the Constitution.

This view of the Government's rested on three bases. First, if both Houses deal with the Budget as with an ordinary project of law, and having altered it in respect of the special class of expenditures, send it forward to the Government, then the latter's function is reduced simply to exercising a power of sanction or veto. The Constitution, however, speaks of the "concurrence" of the Government, not of the mere exercise of a power of veto or sanction. Secondly, the proviso in the Constitution plainly refers to the procedure of the Houses. The words, such and such expenditures "shall be neither rejected nor reduced by the Diet without the concurrence of the Government," cannot be interpreted to signify that rejections or reductions made by the Diet are inoperative without the concurrence of the Government, because that being true of all measures passed by the Diet, need not have been embodied in a special provision. Thirdly, the reference being to procedure, and the procedure of each House being independent, it follows that whichever House desires to reduce or reject any of the special expenditures must seek the concurrence of the Government by way of preliminary. In fact, the purpose of the 67th Article of the Constitution is to guarantee a certain class of expenditures against being touched by Parliament without the concurrence of the Government.

The House, however, as we have said, resolved to treat these specially reserved expenditures precisely in the same way as it treated the ordinary expenditures falling legally within its competence. It resolved to reduce or reject them by definite process of voting, and then to leave to the Peers the duty of seeking the Government's concurrence. The immediate consequence of this resolve was to bring about a state of extreme friction between the Government and the Representatives. The ultimate consequence would probably have been either the dissolution of the Diet, or a most serious collision between the Upper and the Lower Houses. Happily, however, the motion passed yesterday saves the situation. Having voted certain changes in the expenditures of the various Departments, one by one, the House now finds itself on the eve of voting the second reading of the Budget thus amended. The latter vote would, of course, finally commit the Representatives to the proposed changes; would place them in the position of having deliberately done independently what the Constitution forbids them to do without Government concurrence. But they have now decided that, before proceeding to vote the second reading, they will seek the Government's concurrence, and have thus returned once more to a constitutional route.

There is no denying, of course, that by this last vote the House has distinctly revoked its previous decision. On the 5th instant, after a hot debate, it decided that to seek the Government's concurrence before the Budget had passed the Upper House would be unconstitutional. It has now decided in precisely the opposite sense. The *volte-face* will probably provoke some ridicule, but we think it decidedly to the credit of the House that it has not shrunk from rescinding a resolution which was obviously unconstitutional, and which, if adhered to obstinately, must have involved grave consequences.

## *THE BATTLE OF THE 20TH.*

IT may well be supposed that the result of the fight in the House of Representatives on Friday week caused much excitement in political circles. Up to the evening of the 19th inst., indeed up to the moment when Mr. AMANO JAKUYEN'S motion was submitted to the House, the public imagined that victory rested absolutely and finally with the Extremists. The Moderates had struggled time after time to stem the current. Their ingenuity was quite remarkably displayed in framing proposals which, while differing sufficiently in form to justify independent debate, aimed nevertheless at one and the same result, namely, to prevent the House from definitely adopting the Report of the Budget Committee. At the outset, when these proposals came up for discussion, the Moderates, though left in a minority, were always able to make a brave showing. They suffered no crushing defeat, and it never seemed a foregone conclusion that victory would rest with their opponents. Little by little, however, the Extremists developed strength. They had one great advantage, superior organization. Every forenoon the attitude to be taken in the House was considered and decided by a caucus, and the party remained, on the whole, faithful to these decisions. For a moment there was a split. Count ITAGAKI threatened to withdraw from the association, and during the days preceding his return to the fold, the divisions in the

Digitized by Google

House gave palpable evidence of this dissension. But the breach having been temporarily healed, the united strength of the Radicals and the Progressionists overbore all opposition. It is not publicly known by what machinery the coalition between these parties, always hitherto bitterly antagonistic, was maintained and directed. The Progressionists (*Kaishin-to*) are crafty, long-headed folks. Gifted with the admirable quality of keeping their own counsel, they manage their affairs quietly. Of the routes taken by them in order to come into line with the demonstrative, notoriety-courting Radicals, nothing is generally understood.

That they had evidently made up their minds either to try and thrust the Government out of power, or to contrive the dissolution of the Diet, by means of the Budget, and that, in pursuance of this resolve, they were to be found steadily but unostentatiously voting with the Radicals—these facts represented virtually the sum of what men could discern in connection with their doings. The coalition constituted a solid phalanx, much too powerful for the Moderates, who, to numerical weakness, added the drawback of having no recognized political organization. The debate on the 13th instant practically ended the campaign. Defeated in every attempt to challenge the nature of the sweeping reductions advocated by the Budget Committee, the Moderates on that day took their final stand on the question of procedure. They appealed to the Constitution, only to find the Extremists bent upon interpreting the Constitution according to the dictates of their own convenience. Thenceforth the divisions in the House were a mere farce. The Extremists had the field to themselves. Only a mere handful of Moderates attended the debates, and the voting seemed to indicate that opposition was hopelessly crushed. Suddenly, out of this clear sky of victory fell the thunderbolt of the 20th instant. The Moderates brought in a motion distinctly reversing the memorable decision of the 13th instant, and, in a full House, carried their point by a majority of twenty-nine. To what causes must this strange occurrence be attributed? To two, apparently: first, and chiefly, to a secession of a portion of the Radical Party; secondly, and in a very trifling degree, to a growing conviction that if the House persisted in its course, dissolution was inevitable. The seceders were the members of the *Aikoku-koto*, Count ITAGAKI'S special followers. Whether or no the Constitution would be violated if the House of Representatives passed a final vote altering the "fixed expenditures" without the Government's concurrence, it could not but be evident to thoughtful persons that such a method of procedure would transfer to the Upper House a great part of the power exercisable by the Lower. The Representatives, instead of sending to the Peers a Budget amended with the consent of the Government, would send up a Budget possessing no *cachet* of finality, and liable to be radically altered by the Peers in constitutional concert with the Government. In short, the fate of the Budget would be entrusted to the Peers, instead of practically resting with the Representatives. Count ITAGAKI seems to have apprehended this, as did also several important members of his party. It is not much to their credit that they failed to perceive it earlier, or that, perceiving it, they failed to give effect to their perception. But they grasped the fact in the end, and, passing over to the Moderates, saved the situation. With them are said to have voted the National Radicals (*Kokumin Jiyu-to*), a party still in an embryonic condition, which had previously cast in its lot with the Extremists. The motive of this latter change of front is not clear, but we shall probably be correct in ascribing it to the same conviction, slowly acquired but well founded, as that which swayed the members of the other receding section. We find it different to concede much influence to the second cause mentioned above, namely, apprehension of dissolution. It is claimed that the Government, knowing how seriously many members must feel the inconvenience of a second election, sedulously encouraged the belief that dissolution would be the certain fate of the Diet if the Lower House persisted in its unconstitutional course. But in truth dissolution never entered the field of practical probabilities. There were so many arguments against it that few, if any, of the Representatives can have regarded it as a genuine contingency. The factors really active in bringing about the victory of the Moderates were, we think, a perception that the Extremists were about to transfer to the Upper House a large part of the power vested in the Lower, and that no appreciable reduction of expenditure could be accomplished if the Representatives persisted in defying the Government. Concerning the latter point, not the slighest doubt could any longer be entertained as to the attitude of the Cabinet. By repeated declarations, culminating in the announcement of the 16th instant, when the Minister President spoke from the rostrum in the presence of all his colleagues, the Government had pledged itself to reject the amendments of the Lower House if presented in the form contemplated by the Extremists. The choice therefore lay between adopting the official interpretation of the Constitution, and deliberately inviting a fiasco. It does not follow, indeed, that any very sweeping result will be accomplished by the House's change of attitude. The Government has declared itself against, not the form merely, but also the amount, of the proposed reductions. A compromise, however, may be looked for. Instead of surrendering their functions to the Upper House, provoking a grave conflict with of the Government, incurring the reproach of unconstitutional procedure, and finally accomplishing nothing tangible in respect of public expenditure, the Representatives, by a timely concession, have avoided all these unpleasant contingencies, and will probably be able to show their constituents a solid economy of administrative outlay.

## *NATURAL CHILDREN IN JAPAN.*

IN the debate in the House of Peers on the Registration Bill, an interesting point came up for discussion, with reference to the registration of natural children. The 32nd Article in the original Bill read as follows:—"In the notice about the birth of a natural child, no mention shall be made of the father, unless he has recognised the child." This article was rejected by the Special Committee appointed to report on the Bill, and the question of rejection or retention led to much discussion in the House. According to the new Civil Code, which is to come into operation in 1893, a natural child may at any time be legitimatized by recognition on the part of its father and mother, the act of recognition being performed, whether by the parents in person or by their duly authorized representatives, before the civil officer designated for the purpose, or before a notary public. Reading the above article of the proposed Registration Law in conjunction with these provisions of the Civil Code, the Special Committee appointed to examine the draft of the Law, thought that they detected a conflict of terms, inasmuch as the "natural child" of the Civil Code is essentially a child not recognised by its father, and consequently if the name of the father be duly registered, the child can no longer be called illegitimate. They therefore recommended that the article be struck out. But when the House came to consider this recommendation, difficulties were raised at once. The Government Delegate, who had charge of the Bill, being asked by a member to explain the object contemplated by the framers of the clause, said that the interdict was designed to prevent women from making false declarations as to the paternity of a child. The Committee appeared to think that record of the father's name was virtually rendered impossible if the child were registered as illegitimate, and that, consequently, the clause was superfluous; whereas the drafters of the Bill thought that unprincipled women, if not restrained by law, might cause scandal and annoyance by registering names of men upon whom they wished to father their offspring. But this inconvenient contingency did not seem to possess terrors for all the members. On the contrary, Marquis DAIGO was of opinion that every opportunity should be given to a woman to register the name of the man

Digitized by Google

whom she believed to be the father of her child, because, in that way, greater facilities would be furnished for subsequent legitimatization, and his view of the matter found so many supporters that the House agreed to omit the clause. This, however, did not end the discussion. The next article (33rd) of the Law ran as follows:—"The report of a birth shall be made by the father. When, in the case of a legitimate child, the father is absent, or when the child is illegitimate, the report shall be made by the mother, or by any relative living in the family, or by the physician or *sage-femme* engaged at the *accouchement*, or by any one who has nursed the mother during the delivery." It was proposed to amend this article so that its second clause should read, "when in the case of a legitimate or legitimatized child, the father is absent" &c. The mover of the amendment explained that, whereas the Civil Code enabled a father to legitimatize his child even before it was born by making due declaration, the above article of the Registration Law made it necessary that every child born out of wedlock should be registered after the manner of an illegitimate child, even though it had been previously legitimatized. Thus there was a conflict between the Code and the Law. Moreover, there was a further conflict between the provisions of the Law itself. For the 31st Article provided that the points to be recorded when registering a child were its name; the fact whether it was legitimate, legitimatized or illegitimate; the year, month, day, hour, and place of birth; and the name, occupation, and domicile of the father and mother. But the 33rd article omitted all mention of a legitimatized child. These natural objections received much support at first, but the Delegate in charge of the Bill, being asked to explain why no mention of a legitimatized child had been made in the 33rd article, advanced an argument similar to that on which the Committee had relied when recommending the excision of the 32nd article; namely, that if the recording of the father's name by the mother or her relatives at the time of registration were permitted in the case of a child not born in lawful wedlock, a door would be opened to grave abuses. Mr. KURODA TSUNAHIKO, the Delegate, expatiating upon this point, drew a vivid picture of the scandals that might ensue if unprincipled women were free to register their offspring as legitimatized in the name of some person of high social or official standing, without the latter's cognisance. To this very practical hypothesis he added the suggestion that, in the rare instances of a child legitimatized before its birth, the father, if prevented by any cause from being present to register it himself, could always provide a legal substitute, and thus the provision that, in the father's absence, a legitimatized child could not be registered as such, entailed no real hardship whatever. The House accepted these views, and declined to sanction the insertion of the proposed words.

This discussion conveys a pretty clear idea of the principles followed by the new Civil Code and Registration Law in respect of children born out of lawful wedlock. The cruelly unjust doctrine adhered to in so many Western countries, by which the sin of the parents is visited on the unfortunate and innocent children, finds no sympathy in Japan. A natural child can at any moment be legitimatized by a simple act of recognition on the part of its futher, and this act is irrevocable unless it has been made by testament. Farther, a child born out of lawful wedlock becomes *ispso facto* legitimatized by the marriage of its father and mother. This rule applies even to the case of a deceased child. On the other hand, a natural child is interdicted from attempting to establish its paternity, except in certain cases, namely, when its mother was seduced under promise of marriage, or was the victim of an act of abduction or rape to which the conception of the child can be reasonably referred. It is also forbidden to introduce a legitimatized child into the conjugal home of its father, unless the latter's wife consents. In this provision we find evidence of a custom long prevalent in Japan, namely, the custom of taking natural children into their fathers' domestic circle. The Japanese wife has always, except in very rare cases, been disposed to insist on this step. If she discovers that her husband is the father of an illegitimate child, she deems it a matter at once of duty and of expediency to assume the charge of the child as soon as possible, and to bring it up with her own children. It would be difficult to adduce a more striking illustration of the difference between Japanese and Western customs. Which system is the better, we leave others to decide. In this context, however, we cannot withhold applause from the provision of Japanese law, as embodied in the new Code, which distinctly imposes on relatives, in their order of kinship, the duty of supporting and educating, or assisting to support and educate, a child left destitute by the death or poverty of its parents. There is embodied in that law a fine principle of mutual help; a principle that may be traced through nearly the whole national life of Japan.

## *THE FUNERAL OF PRINCE SANJO.*

THE funeral of Prince SANJO was conducted in strict accordance with the rites of pure Shintoism: simplicity constituted its principal characteristic. Minus large bodies of troops marching before and behind the bier, and an interminable string of carriages containing almost every Japanese of note in Tokyo, the cortége consisted of nothing more than a bier carried and escorted by a crowd of men in white, a few red and white banners, and four clusters of artificial flowers. An immense quantity of natural flowers, arranged in the prescribed fashion—that is to say, grouped in bamboo cylinders with stands to support them at the shrine—had been sent by friends, but as no place is assigned for such adjuncts in the set ceremonial of the Shinto cult, they were excluded from the procession, and carried by a separate route to the Shrine. The result of this rigid adherence to rule was to deprive the cortége of one of its most striking features, and to render it considerably less picturesque than the procession which followed the remains of the late Prince IWAKURA to the grave. Enormous crowds of sightseers were perhaps the most noteworthy element in the affair. The whole population of Tokyo seemed to be in attendance, drawn up a dozen deep along the line of march. They assembled quietly and dispersed quietly, the great majority doubtless convinced as they went home that a State funeral is not such an imposing spectacle after all. At the head of the cortége were six mounted gendarmes, riding alternately singly and in pairs, and after them came a battalion of troops, with a battery of artillery and a squadron of cavalry. A similar force, disposed inversely—that is to say, the soldiers in front and the gendarmes behind—brought up the rear of the procession, and between these two bodies came the bier, with its prescribed entourage and an immense line of carriages. Branches of *Sakaki (cleyera japonica)*; eight streamers, alternately red and white, carried in double rank; a simple unpretending deal box in which were enclosed the offerings to be made at the Shrine; a number of inferior Shinto officials, in pure white robes, preceding two Imperial carriages in which rode the Principal and Assistant Shinto dignitaries; a banner with the name of the deceased Prince; four silver-bladed halberds; four large bouquets of metal flowers; the insignia of the Prince's eight Orders carried on cushions; then the dead man's body servants, and then the bier of milk-white pine relieved by massive gold mountings, with its cloud of white-clad bearers, followed by the Chief Mourner, and the Funeral Officials—these constituted the cortége proper, and behind it were hundreds of carriages containing Princes of the Blood, Ministers of State, Members of the two Houses of Parliament, and a host of officials and private persons. The chief mourner, Prince SANJO'S son, a youth of about sixteen, was dressed in flowing white robes and black *hakama*, his feet shod with straw sandals, and on his head the black *kammuri* of old-time official costume. He was on foot, but the other relatives, apparently very numerous, rode in closed carriages. There was no music, a march played by the bugles of the rear guard, excepted; nor did the navy send a contingent. Foreigners, too, were conspicuous

Digitized by Google

by their absence from the procession, some having preferred to go direct to the shrine, and a few having been deterred by finding that, whether intentionally or accidentally, they were segregated from the Japanese in a manner suggestive of racial distinction. On the whole, this part of the ceremony was neither interesting nor impressive. The arrangements at the Shrine, however, call for more minute description.

There are few spots of greater natural beauty in the immediate vicinity of the capital than the Gokokuji grounds, in the north-west quarter of the Koishikawa suburb. But for the shrines and other buildings dotted about, the visitor might imagine himself in a Japanese garden of exceptional size and perfectness. Trees old and young —gaunt pines, comely cedars, and a large variety of lesser growth—with rocks and fountains, crags, ponds, and running water, are disposed in picturesqne disarray over the slope of the hill that rises above Aoyagi-cho. On the day of the funeral, though wintry tints were still upon the foliage, the place was warmed and gladdened by a bright spring sun, while the fine outlines and deep, rich colours of the main edifice, its gates, and lesser shrines lent the scene a charm of their own. It would, indeed, be hard to imagine a fitter spot than these lonely and lovely grounds for the resting place of a nation's honoured dead.

At about half-past eleven, the head of the procession reached Gokokuji, its arrival being announced by the firing of minute-guns. The troops did not enter. But the rest, passing in on foot at the main gate, ascended the hill, with its long flights of stone steps, that leads up to the Hondo, advancing between deep, compact ranks of officials, ecclesiastics, diplomats, and other privileged spectators who had assembled earlier in the forenoon. In succession, and to the melancholy strains of Shinto music, came the *sakaki* bearers and flag bearers; men carrying the chest of offerings; many white and purple clad priests; bearers of the titular banner, more *sakaki* boughs, the halberds, and the dead noble's Orders, and his servants. Then the bier itself, at the passage of which all heads were bowed. Next, the young Prince and Princess SANJO, and the four younger daughters. Of the Prince's costume we have already spoken. The Princess wore a long black cloak over a white robe and brown *hakama;* while the junior ladies were clad from head to foot in soft white crape, with their hair pendent and tied by a single white binding. After these followed the relatives, among whom were many ladies in Japanese garments of sober hues. All these mourners passed forward behind the bier, which was now deposited on a stand beneath a spacious temporary porch, draped with curtains of black and white, and erected immediately before the entrance of the Hondo. The Prince's Orders were disposed on stands of white *hinoki* about the bier; and the flowers and banners were planted on either side of a wide aisle of immediate approach which had been formed by two large pavilions erected for the accommodation of all present. In their appointed places in one of these pavilions the principal mourners seated themselves. But the Imperial Princes, members of the Cabinet, and other dignitaries, after following in the procession as far as the entrance of the aisle, turned aside to rest in a neighbouring shrine while preparations were being completed for the coming ceremony. At half-past twelve a move was made to the two pavilions, and in ten minutes—so good were the arrangements—the whole concourse of perhaps 2,000 spectators were seated in their allotted places. The two high officiating priests, and six of minor degree, now did homage before the bier, with much bowing, hand-clapping, and recitation. Other sacerdotal ceremonies followed, with accompaniment of Shinto music. Next, the Chief Priest, standing reverently before the bier, received offerings of fish, fruit, rice, and other edibles which were passed devoutly from hand to hand of the ministering priests, and disposed them on white wood stands placed to receive them. This done, he read aloud, facing the bier, two valedictory orations, the whole assembly standing uncovered the while, except the Imperial Princes. "May your soul have eternal rest and peace in heaven," were the words with which, after a recital of the dead statesman's deeds and virtues, each of these addresses ended. The last ceremony of respect was now begun. Receiving each from the priests a sprig of *sakaki*, the young Prince, and the Envoys of the EMPEROR, EMPRESS, CROWN PRINCE, and DOWAGER EMPRESS, successively advanced to the bier, and, bowing lowly, laid before it the sacred boughs. They were followed in like manner by the young Princess and her sisters, and other chief family mourners, the Princess representing her sick mother and therefore performing the ceremony twice. The Imperial Princes ARISUGAWA, KOMATSU, and KITASHIRAKAWA next made offering. Up to this point the whole procedure had been remarkably solemn and impressive. But, as the members of the Cabinet and the Diplomatic body now advanced by groups to perform the similar rite, and were followed, *en masse*, by the rest of the pavilion occupants, eager to pay their last tribute of respect to the remains of the distinguished Prince, the simple dignity of all that had gone before was abruptly and completely changed.

For most of those present the ceremony, which had lasted about fifty minutes, was now ended. Only a few remained to see the body carried to its last home. A little to the right and back of the Hondo, a masonry-lined vault, about eight feet by ten feet, and fifteen feet deep, had been built, and over it an exquisite canopy of white *hinoki*, in the purest and simplest Shinto style. Prepared and adorned as it was on the 25th inst., the wide matted approach to the sepulchre of the great *Kuge* was in a high degree attractive. It also well illustrated the rare taste of the Japanese in preferring brightness to gloom for the externals of even death itself. For some sixty yards on either side, the approach was decked, many ranks deep, with a lovely display of great floral and other tributes from the late Prince's countless friends—among the contributors being the Foreign Representatives—which presented a mass of brilliant colour, in happy contrast to the wooded scene around. Beyond these was a small white-railed enclosure, containing pavilions for the few who were to be present at the burial ceremony. And beyond this again were two goodly cryptomeria trees, between which, as a fine natural portal, were seen, immediately behind, the graceful outlines of the canopy above the tomb. It was close upon two o'clock when the sound of music proclaimed the commencement of the last act of the funeral. The offerings and the piles of *sakaki* sprigs were removed by the priests, and the bearers, approaching, once more shouldered the great ark-like bier, and bore it, headed by the titular banner and other emblems, along the bright and beautiful approach to the grave, whither none but the chief mourners and a highly favoured few were permitted to accompany it.

## *THE ANSWER OF THE GOVERNMENT TO THE HOUSE OF REPRESENTATIVES.*

THE following is the answer sent by the Government to the application for its concurrence, made by the House of Representatives in connection with the rejections and reductions of expenditure set forth in the Budget Committee's Report:—

Before voting finally upon the Budget for the 24th year of Meiji, the House of Representatives, in pursuance of the procedure laid down in the Constitution, has asked for the Government's concurrence. The Government, on coming to examine the draft of amendments, finds that the contemplated changes of Administrative organization are in excess of the deliberative functions exercisable in connection with the Budget, and further, that it is *ultra vires* to attempt to change, by means of the Budget, not only expenditures that have arisen by the effect of law and that appertain to the legal obligations of the Government, but also rights fixed in accordance with the provisions of law. The Government should not neglect to adopt, as far as possible, an attitude of deference towards the decisions of the House, but such changes in the Budget would render it impossible to discharge the responsibilities of practical administration. It is requested that the House will re-consider the question.

Up to the moment when this reply was placed in the hands of the President of the Lower House, it had been confidently expected that the Minister of State for Finance would himself appear in the House and give a categorical explanation of the Government's objections. But for the rest, the answer astonished nobody. Its

Digitized by Google

nature had been accurately forecast from previous speeches delivered by Ministers of State in the House. The first sentiment evoked by its receipt was one of disappointment that Count MATSUKATA had not come down personally to deliver the message—a sentiment probably due to a vague idea that the presence of the Minister might contribute to the evolution of some scheme of compromise. A member accordingly moved that the Minister of Finance be invited to attend, but the practical and disagreeably blunt Mr. INOUYE KAKUGORO reminded the House of its previous experiences; how it had failed to procure the attendance of the Minister of Agriculture and Commerce, and how it "cried itself to sleep" (*naki neiri*) over the incident instead of taking any steps to assert its authority. The law did not impose on Ministers of State any obligation to respond to a summons from the House, and even supposing that Count MATSUKATA should come, the result would be, as it had always been, a fruitless bandying of frivolous questions and inconclusive answers. It was at this stage that what we may call the last act of the Budget drama was played. Mr. MISAKI KAMENOSUKE had the honour of figuring as the *deus ex machinâ*. He proposed that a Select Committee be appointed to confer with the Government and to amend the proposed alterations so as to bring them within practicable limits. This proposition was adopted by a majority of 34 in a House of 268, and Messrs. MISAKI, KATAOKA, and KOBAYASHI, three of the members who, two days previously, had formally severed their connection with the Radical Party, were chosen at the head of the nine Select Committee-men. Of course this means a compromise. The Government will agree to some reductions; the Special Committee will consent to eliminate the rest, and the House will vote the new report with very little debate. No other step was possible except the one proposed by Mr. MISAKI. Thus and thus only can the House hope to find itself face to face with a practical financial issue before the *nunc demittis* is spoken. But the chances of the Budget's being brought into existence do not appear to us to be better than they ever were. Even supposing—an exceedingly sanguine hypothesis—that the Budget reaches the Upper House on the 3rd instant, there will only remain four days for its examination and discussion by the Peers. If the Upper House consents to play an absolutely self-effacing part, and to endorse, without deliberation or inquiry, not only the amendments concerning which the Government and the Representatives have come to an agreement, but also the changes voted by the Lower House in the items of expenditure falling within its independent competence, then indeed the Budget may have passed through both Houses by this day week. But we see no chance whatever of the Peers adopting such a course. They are already discussing, on the motion of Viscount TANI, a tolerably long list of rules of procedure to be followed in treating the Budget when it reaches them, and we may therefore infer that they mean to make themselves real factors in the control of its final fate. The strong probability is that when the Budget comes up to them, and when they find that only three or four days are available to discuss it, they will decline to undertake the task at all, choosing rather to apply themselves to something capable of achievement.

## *THE CONDITION OF KOREA.*

POLITICAL complications in the East have of late been gradually assuming a phase which points towards Korea as a possible important factor in their settlement. And it is even now thought by some that the maintenance of her in dependence and neutrality is a political necessity to be secured at any cost. The questions concerning her standing and future relations to the neighbouring Governments have more than a local interest, for in them may be bound up the issues of the future.

The interest in this nation's affairs thus excited is increased by the fact that so little is known of her internal condition, politically, socially, and economically. The public has been compelled to rely to a great extent upon the reports of those of whom little more can be said than that they have touched the shores of the Peninsular Kingdom on business or pleasure. There has been a certain unanimity about the reports thus circulated, but despite this feature they have been so unqualifiedly unfavourable, that instead of producing conviction they have only awakened incredulity. It must be confessed, however, in extenuation of these reports, that the first impressions liable to be produced upon travellers visiting Korea from either Japan or China cannot but be unfavourable and unpleasant. The contrast is marked in a superlative degree. In the two larger countries the evidences of wealth, energy, and ambition are visible everywhere. Manufactures and works of art not only tempt the visitor to purchase, but also give him an idea of the skill and genius of the natives. In Japan, for instance, should he penetrate inland, he finds continual evidences of unremitting and widespread industry, and monuments of former affluence and power worthy his notice and consideration. In the open ports of China he is continually confronted by that vast trade, which, embodying the commercial interests of the Middle Kingdom, has given her no mean place among the nations of the world.

None of these features, however, nor commensurate ones of a different nature, challenge the transient observer's attention in Korea. No curio store of the neat and artistic Japanese style catches the foreign eye, nor do displays of silks, porcelain, fans, or any articles for use or decoration hint the possession of manufacturing capabilities by the people. About the open ports wretchedness and filth characterize the native towns; while inland, aside from the beauties of nature, the roads lie through one unending vista of graves, dirt, dogs, and poverty. The derogatory reports of visitors and globe-trotters are therefore easily explained; for fishing hovels are not in the least calculated to give one an impression of affluence and wealth; market places, in which only the barest necessities of a simple life may be found, speak not of industrial skill and energy; while mountains, rich in minerals but only used as grave mounds, are undeviating testimony to sloth and culpable indifference. So much at least is conceded the "reporters" on the condition of Korea.

Two things however, are patent to all. First, a hasty visit to one or two open ports, or a flying trip across the country, is not sufficient to qualify one to speak authoritatively on the condition of a nation or the resources of its territory.

Secondly, residence, temporary or permanent, and thorough investigation will alone enable the observer to form a just estimate of the difference between the surface appearance and the actual status of affairs among a people. In the case of Korea, to correctly judge of its present condition, and its possible relation to the future, the distinction between the actual condition of the people and the resources of the territory they occupy must be constantly kept in mind, for the former speaks only of stagnation and sterility, while the latter are pregnant with great possibilities.

As regards the Korean people themselves, a continuance of the present condition of affairs augurs ill for their future. Commercially it is true that a threefold increase has occurred in the customs receipts for the past year; but this significant fact, far from being due to the enterprise and commercial energy of the natives, is traceable entirely to the efforts of foreign merchants, among whom the Japnnese occupy a most important position. Were the business relations of Korea left to the people to develop, the probabilities are that the sum total would be *nil*.

As a nation the Koreans are poverty-stricken; and while it is not a poverty of actual want, or wide-spread famine or distress, it is a poverty which paralyses every sense of enterprise, and reduces life within the narrowest limits. More so than in any other country we are acquainted with, the soil is the one and only source of national wealth. And as the development of this wealth is relegated to the inferior classes, it is not surprising that its main bulk is so small, compared with the

Digitized by Google

population. The labouring classes, ground down under the deadening weight of an unthrifty and unproductive gentle class, and their horizon circumscribed by ignorance, poverty, and tradition, give as little thought to things outside their own animal wants as possible. The results of their labour, instead of insuring them a competence, pass into the hands of their lords. No degree of independence can secure them the possession of wealth; unjust taxation, infamous persecution, and violence are the ordinary methods of wresting their surplus earnings from them.

Resting upon such a rotten foundation as this is the great class called Yang Bans, or the aristocracy, whose relation to the welfare of the country is parasitical in the last degree. Supported by the labour of serfs and the products of inherited lands, their life is spent in religious abstention from labour. Their chief occupation is gathering, by fair means sometimes, by foul means often, the money of those beneath them. Their chief recreation is the dissipation of the funds thus gathered, in useless and evil extravagance. And to make the matter worse, the pernicious effect of these aristocrats' lives teaches the people that the better existence, which might be attained by wisdom, industry and frugality, is simply a life of absolute idleness and indulgence. The one ambition of the upper classes, the one and only thing that possesses any resemblance to employment among them, is office bearing. For this they study, scheme, and pray. And while we would not speak ill of the honest Korean noble, (if such there be), who accepts office as a public trust, and endeavours to conserve the interests of his country and people, it is a sad truth that the vast mass of officials rule the people simply to enrich their personal coffers, an object they accomplish by glaring and atrocious pilfering.

The result is that the people are dispirited and ambitionless. No motive exists for that commercial enterprise which would place Korea in her proper place. Hope is dead so far as the present is concerned, and things are left to take their own course. In the capital venality vies with venality, corruption and trickery match corruption and trickery; and chief among the articles of commerce there are rank and female flesh. In the country no public spirit gives the villages an appearance of life or enterprise. The traveller rides into them by execrable roads and out of them by worse. Manual labour on the farms is done largely by the women, who are worked like slaves and used like beasts; while their proud lords, the majority of them serfs, and the rest little better, imitate their gentlemanly masters in the arts of idling, gossip, and dissipation.

An evil genius seems brooding over the life of the Korean people, paralysing every nerve and muscle and spreading disaster and ruin. It appears to touch their life in its widest circumference, blighting and blasting everything. And to its malevolent influence the present generation seems to have resigned itself completely. But the power of reproduction has tided more than one people over disastrous crises. The hopeless abandon of one generation to a miserable condition has often been speedily rectified when the next generation, fresh in vigour and dauntless in courage, has put its young shoulders to the wheel. It was so in Japan; it is Korea's hope.

In great contrast to the condition of affairs which exists among the people is the natural wealth of the territory occupied by the Koreans. Its area is far too small to lead any one to argue that its products will ever take a prominent place in the markets of the world. But the Peninsula has been stored by nature with riches which in the hands of industrial folks would put them on a footing with other nations. Most favourable conditions exist for agriculture. With the ameliorating influences of the Yellow Sea on one side, and the Japan Sea on the other, neither the cold of winter is severe, nor the heat of summer excessive. There are three different soils; a limestone along the east coast, a granite in the central and southern portions, and a basalt to the north. The Koreans spend little labour in cultivation, and yet the fertility is such that a rich return, both in quality and quantity, is obtained. And to this fertility must be attributed the fact that the condition of the lower classes is undoubtedly better as regards the supply of actual wants, than that of the same classes in China, or even Europe. The territorial area is not much over eighty-five thousand square miles, and vast portions of this are mountainous and uncultivated. In such portions bears, deer, tigers, leopards, wild boars, and wolves hold undisputed possession. The agricultural area is confined to the well watered valleys and plains, and yet so rich is the soil that not only is sufficient grain to support life raised by a small outlay of muscle and money, but also there is surplus enough in a prosperous year to create a brisk trade with neighbouring nations. Rice, beans, barley, millet, and cotton are raised in great quantities, and the present bulk of these crops might, under proper conditions, be increased a hundred fold.

Concerning minerals, the natives themselves are just awakening to the wealth stored away in their mountains. Gold deposits are worked by the people in various portions of the country, and that they are not valueless is shown by the report that about three million dollars yearly in crude "dust" is exported in one way or another. Silver, used throughout the country for the manufacture of dishes and ornaments, all comes from native mines. But leaving aside the so-called precious minerals, much more is promised in the metals of industry. Rich mines of anthracite of a superior quality exist in the north, and if developed would yield ample return. Iron, copper, and lead are right at hand inviting industry and manufacture; and could the development of these begin now it might solve many difficulties of the present. But this does not exhaust the list of her resources. Throughout the long coast line embracing the three sides of the peninsula, the sea brings untold wealth to Korean doors. Already the Japanese, awake to the possibilities of Korean waters, have begun a trade in fish, seaweed, etc., which is growing in proportions yearly. In the south also are pearl fisheries, and while we do not know how extensive they may prove to be, yet they have already produced some beautiful specimens, and might under proper control became an additional source of income to the country. In the hands of a people energetic and enterprising, the natural resources of Korea would soon place her on a sound footing in the business world, and remove completely the present financial disabilities of which so much is said. Such a position might have been reached long ago had the conditions among the people been favourable. We believe it is easy to find the guilty party responsible for the present state of affairs. Some have traced it to long and unwise seclusion; others have looked upon it as the legitimate outcome of the attitude towards labour. These and other reasons have all had their part in moulding present conditions, yet by far the more potent for evil has been and is a corrupt and conscienceless official class. Drawing no salary from the Government, or simply an allowance of grain which bears no resemblance to salary, the officials batten on the people's blood like vampires. Every office in the land is auctioned off to the highest bidder, and these officials, corrupted by the very means through which they have obtained preferment, use their power in the most unprincipled extortion and robbery. The high officials in Söul "squeeze" the golden drops out of the governors and higher officials in the country; they in their turn make requisition on the magistrates, who draw to the last penny their indemnity from the people. No one who possesses money is safe from their ravenous clutches. So complete is the system of extortion that sooner or later every one becomes grist for some mill. Among Korean officials big fish eat little fish, little fish eat shrimps, and shrimps eat mud. A man's only protection from such beasts of prey is poverty.

Until this condition is changed there is little hope for the country. So long as its resources are sapped, and so long as every attempt at improvement is made a pretext by the ruling classes for a thievish descent on the Treasury, the country will be kept in a humiliated condition. So long as this dead incubus of a corrupt and criminal official class weighs it down, the nation will continue to lie prostrate and pitiable in

Digitized by Google

its misery and impotence. But should the time come when new ideas of the purpose of office shall prevail among the official classes, and the shameless system by which they obtain advancement be entirely eradicated, a brighter day will dawn for Korea. The people, free from the oppression which now throttles all hope of the future, and under the leadership, possibly of the very classes which now burden them, will develop the country and inaugurate a régime of commercial prosperity and integrity that will put Korea in her proper place.

GUY PALMERSTON.

## *IMPERIAL PARLIAMENT.*

HOUSE OF PEERS.—FEB. 20TH.

The House met at 10.50 a.m. under the presidency of Count Higashi-Kuze, and proceeded to consider a petition for the reduction of the Tax on *saké* brewing. Mr. Hayashi Soyemon supported the petition. The tax on *saké* brewing had been enormously increased of late years. It was now twenty times greater than at the beginning of the *Meiji* era, and petitions for its reduction had been perpetually presented to the Senate and the Department of Agriculture and Commerce. He also urged that official examination of the brewing business should be conducted only once *per annum*, instead of three times as at present. With regard to the objection that if the tax on *saké* were lightened, similar steps must be taken in respect of tobacco and other articles, he failed to see its force. The point was that *saké* paid too great an impost in comparison with other luxuries. A long debate ensued, involving discussion not only of the merits of this petition in particular, but also of the functions which the House ought to discharge in respect of petitions generally. It was finally decided that the petition should not be forwarded to the Government. The House then proceeded to discuss a petition for a reduction of the land tax in Wakayama Prefecture. Mr. Miura Yasu urged the impropriety of discussing in connection with one part of the empire only a question really of general application, and moved that the petition be laid aside for the present. Mr. Shimauchi opposed this proposal. On putting it to the vote, the House divided equally, 41 "ayes" and 41 "noes." The President gave a casting vote in favour of Mr. Miura's proposal, and the petition was laid aside. The House then proceeded to consider a petition relating to the manner of dividing Urban and Rural Districts, and after a short debate, rejected it. The House rose at 3.15 p.m.

FEBRUARY 21ST.

The House met at 10.55 a.m. under the presidency of Count Higashi-Kuze. Marquis Hachisuka moved for permission to change the Orders of the Day, in order to introduce a proposition for determining the objects to be kept in view in examining and debating Petitions. He argued that the duty of conducting a careful inquiry into the merits of a Petition devolved upon the Government, not upon the House. Several members supported this view, but Mr. Miura Yasu argued strongly against it, on the ground that it would render the function of the House purely mechanical in respect of Petitions. Mr. Shimauchi urged the practical impossibility of the House's undertaking to investigate accurately and decide upon the merits of the hundreds of Petitions sent up by the people. Viscount Tani supported the proposal of Marquis Hachisuka, as did Mr. Murata. Professor Toyama opposed Mr. Miura's view, and pointed out the utter futility of attempting to deal thoroughly with the matter of innumerable Petitions. After some further debate the motion was put and carried. The House rose at 4 p.m.

FEBRUARY 23RD.

The House assembled at 10.50 a.m. under the presidency of Count Higashi-Kuze. It was decided, at the suggestion of the President, that, in order that the members might attend Prince Sanjo's funeral, no session should take place on the 25th instant. A petition relating to a reduction of the tax on confectionary was adopted for submission to the Government, as was also, after some discussion, one relating to changing the jurisdiction of Kitagishi-mura, on the Tonegawa. The House rose at 12.30 p.m., and did not meet in the afternoon, the rest of the day being devoted to Committee work.

FEBRUARY 24TH.

The House met at 10.40 a.m. under the presidency of Count Higashi-Kuze, and proceeded to the first reading of a Bill relating to the manufacture of men-of-war, torpedo-boats, and naval weapons. It was decided, at the request of the Government, that the third reading of the Bill should be dispensed with. The purpose of the Bill was to sanction the application, to Naval purposes, of the surpluses of revenue remaining from 1888 and 1889. Captain Honjuku, Government Delegate, in answer to a question by Marquis Hachisuka, explained that unfortunately it was not yet possible to build large ironclads in Japan. The House voted the Bill without discussion. The next business was to consider a petition urging that the cultivation of Hokkaido should be hastened by convict settlements. Mr. Obata Yoshiine contended that the petition should not be forwarded, since it referred to national affairs, whereas the scope of petitions addressed to the House was limited by law to affairs directly concerning the petitioners. Baron Senge opposed the petition on the ground that, if its suggestion were adopted, Hokkaido would become a land of criminals. Viscount Tani condemned the petition, not because he supported Mr. Obata's view, but because the petition contained a clause charging the Government with neglect in respect of Hokkaido, whereas in truth the Government had been most earnest in its efforts to colonize the island. Viscount Matsudaira denied the justice of Baron Senge's remarks. He said that some six hundred criminals were already sent every year to Hokkaido, and it was only a question of increasing the number to twenty thousand. Convicts might reform and become good subjeets. Marquis Hachisuka denied that petitions must necessarily be limited to matters of direct interest to the petitioner. He showed that no such construction could properly be put on the Constitution and the Law of the Houses. Mr. Miura Yasu contended that since the House, by a previous vote, had decided not to consider the merits of petitions but only their legality, the present discussion was unnecessary. The petition ought to be forwarded for the Government to deal with. As to the claim that Hokkaido would be populated by criminals, he reminded the House of the proverb "earnest in evil, earnest in good also" (*aku ni tsuyoku wa zen ni mo*). After the midday recess, Mr. Shimauchi supported the petition. He admitted that the Government had been very diligent in its efforts to colonize Hokkaido, but the persons who went there were not equally diligent. They thought only of making a little money and coming back to their native place. This fatal defect would be remedied by the proposed plan, and he therefore advocated it, for he regarded Hokkaido as a mine of wealth waiting to be worked. After some further debate, the petition was rejected. The House then proceeded to consider a petition praying for the abolition of Law No. 25 of 1889, by which a special system of local government was enacted for Tokyo, Osaka, and Kyoto. Marquis Hachisuka explained that the Committee, while appreciating the difficult questions involved in this petition, had deemed it right that it should be submitted. His own name appeared among the petitioners, but he begged the House to consider that he had signed in his municipal capacity, not as a member of the House. Baron Nagaoka supported the petition, claiming that the special system of local government had been introduced for purposes of temporary convenience, and could not possess any permanence. Several members spoke in support of the petition, and the House finally decided that it should be forwarded. A similar petition from Kyoto was also approved. The House rose at 2.20 p.m., the President having announced that there would be no session on the 25th instant.

FEBRUARY 26TH.

The House met at 10.45 a.m. under the presidency of Count Higashi-Kuze. Marquis Hachisuka announced that the Petitions Committee offered, for the discussed of the House, a petition from Gifu Prefecture relating to local administrative divisions. The House proceeded to consider a Bill introduced by Viscount Tani for regulating minor points of procedure with regard to the Budget. Viscount Tani explained that the object of the Bill was simply to expedite procedure. In the course of replying to various questions, he said that the Governmental concurrence prescribed in Article 67 of the Constitution was to be sought by each House independently. A long discussion took place with regard to the 13th Article, which required that the House should seek the concurrence of the Government before voting the reduction or rejection of any item of expenditure falling within the scope of the 67th Article of the Constitution. Mr. Murata Tamotsu moved that the 13th Article be struck out, and Mr. Ito Miyoji, in an able speech, demonstrated the unsoundness of Mr. Murata's views. The closure was ultimately put and carried by 79 to 46, after which the House adopted the disputed article, an open ballot giving 69 "ayes" and 57 "noes." The House rose at 4.45 p.m.

HOUSE OF REPRESENTATIVES.—FEB. 20TH.

The House met at 10.40 a.m. The President announced that he had himself proceeded to the residence of the late Prince Sanjo and transmitted a message of condolence on behalf of the House. The message was read. The House then proceeded to debate the Minority Report on the Upper Middle, Female Normal, and Music Schools, namely that the appropriations to these schools be continued, the amounts only being reduced. Mr. Hasegawa Tai spoke at length in opposition. He urged that the education given at the Upper Middle Schools had two objects, first preparation for the University, and secondly, to equip specialists. The two purposes were incongruous, and involved the adoption of a curriculum such as no Occidental educationalists would approve. It was more than doubtful whether efficient experts even, were educated at these schools. Medical instruction, especially, did not appear to be any better than that afforded at ordinary Prefectural and City Schools. The Medical Schools in Nagoya, Kyoto, and Osaka were incomparably better, and the students at the Upper Middle Schools might be sent thither with advantage. They might even be admitted to the Medical College of the Imperial University without increasing the staff of the latter. He also argued that the appropriation to these schools was quite disproportionate to the revenue of the State. The House rose for the mid-day recess at 11.50 a.m., and re-assembled at 1.50 p.m. The President announced that an amendment had been proposed by Mr. Yokobori Sanshi, abolishing the appropriations to the 2nd, 3rd, 4th, and 5th Upper Middle Schools, and giving 22,625 *yen*, 82,034 *yen*, and 10,589 *yen* respectively to the Female Normal School, the First Upper Middle School, and the Music School. After some debate the closure was voted, and the House rejected the amendments of Mr. Hasegawa (for the abolition of appropriations to all the Schools in question) and of Mr. Yokobori, and adopted the Minority Report. Mr. Amano Jakuyen brought in an urgency motion that, before passing the second reading of the Budget, the concurrence of the Government should be sought. He urged that by adopting the course now contemplated, the House would be acting unconstitutionally, and would also divest itself of a large portion of its power in favour of the House of Peers. The House voted that the motion might be debated without changing the Orders of the Day. Mr. Iwasa Jiro opposed the motion on the ground that no occasion existed to change the procedure hither-

Digitized by Google

to contemplated. Mr. Hayashi Yuzo supported the motion, urging that the Lower House would be surrendering an important part of its competence if it divided with the Upper the duty of taking all steps relative to the Budget. Mr. Suzuki Shoji opposed the motion. He urged that the House had already settled the question, and further, that the "fixed expenditures" referred to in the 67th Article of the Constitution did not appear in the present Budget. Mr. Nii Go supported the motion. He had opposed the motion of Mr. Suyematsu Kencho because it suggested a temporary decision, which seemed an impossible mode of procedure; and he had opposed the motion of Mr. Tsubota because it proposed application to the Government with respect to each portion of the Budget separately, a procedure that would involve much loss of time. But there could be no doubt that the House was not competent to decide upon the rejection or reduction of the fixed expenditures without the concurrence of the Government. Mr. Hayashi Heitaro said that if the House passed this motion it would be revoking its previous decision. The only difference between the two was a few ideographs. It seemed to him that the House had been alarmed by the speech of the Minister President of State. Mr. Ooka Ikuzo supported the motion because, by persisting in its previously contemplated course, the House would compel the Government to reject all the reductions except a paltry sum of less than a million *yen*. To effect a practical reduction, they must come to some agreement with the Government. The closure was here moved and carried. The motion was voted upon by open ballot, and and the numbers were "ayes" 137 and "noes" 108. The House rose at 3 p.m.

FEBRUARY 21ST.

The House met at 10 48 a.m. The President announced that a Bill had been submitted by Mr. Mori Toichiro for the reform of Local Administration; also a Bill (urgency) by Mr. Itakura Naka for the appointment of a Special Committee with the object of memorializing for an extension of the House's Session; finally, a Bill by Mr. Sato Satoji for appointing a Committee to inquire into railway affairs. The House proceeded to discuss the Revenue side of the Budget. Before commencing the debate the movers of urgency proposals, namely, Messrs. Itakura, Suzuki, and Suyehiro, sought to have their motions brought on. The House decided that the Orders of the Day must be changed before proceeding to discuss Mr. Itakura's motion. A recess was taken for this purpose, and on re-assembling, Mr. Minoura opposed the idea of a memorial from the House, his ground being that the Minister President of State could not fail of his own accord, to approach the Emperor on the subject. Mr. Noguchi Kei also opposed the motion, claiming that the House might well leave the Emperor to take the desired step. Mr. Orita asked the President to rule members out of order who sought to make the Emperor responsible in this matter. The House adopted the motion, and the President asked the Sections to choose a Committee. After the mid-day recess, Mr. Soné, Government Delegate, in answer to a question, said that the original law as to a five-yearly revision of the land tax had been subsequently revoked. A number of queries were then put by members as to details of land survey, assessment, money advanced to Prefectures, and so forth. Mr. Suyehiro Shigeyasu moved that the debate on the Revenue be postponed until that on the Expenditure had been concluded, but the House rejected the motion. Mr. Nakamura Yaroku opposed the Committee's Report on Revenue, and maintained that a reduction of the land tax by one half per cent. would bring no relief whatever to the poorer class of agriculturists. While he was speaking several members rose to order, asserting that his remarks had no reference to the matter under discussion. The President ruled in the same sense. The House then voted the Revenue side of the Budget from the 1st to the 20th clause of Section I., without alteration: adopted the Budget Committee's Report in respect of the 1st and 2nd clauses of Section II.; voted the original Budget from clause 1 to clause 13 of Section III., also from clause 1 to clause 6 of Section IV., and then passing to the Extraordinary Revenue, voted Sections I. and II. On coming to Section III., Mr. Takanashi Tetsushiro moved that the subsidy of 200,000 *yen* to the Tea Company be revoked. Mr. Takanashi, in support of the motion, dwelt chiefly on the fact that the company was not yet actually in existence, and that the granting of a subsidy to an enterprise in such an embryonic conditions was beyond all reason. Mr. Nishio Denzo opposed the motion. He alleged that the Company was actually in existence, having been legally recognised on the 27th of February, 1890. It had already sent Mr. Hirao, a native of Tosa Prefecture, to Russia, and on his return the promoters had put up 130,000 *yen*, and had fixed the Company's capital at half a million. There could be no doubt that the Company had complied with all the provisions of law as to its organization, and that it was in veritable existence. He strongly denounced the impropriety of revoking a grant duly made to persons engaged in promoting the sale of Japan's second great staple of export. Such a course would be, on the part of the House, quite *ultra vires*, and would be gravely unjust to the promoters of the company, as well as injurious to the nation's belief in the credit of the Executive. Mr. Yamanaka Riunosuke disapproved of subsidies in general, and thought that in this particular case the revocation might be legally effected, as the Company was not yet a going concern. Had it been actually called into existence, he should oppose the motion. Mr. Suyematsu Kencho said that, though the grant of a subsidy to the Tea Company was a questionable proceeding, the motion now before the House could not accomplish anything, being taken in connection with the Revenue side of the Budget. To include the recovered subsidy in the revenues, they must first recover it, and that could only be effected by a Representation to the Government. He moved that a Representation be made. The House adopted this amendment. The House then voted Sections III., IV., V., and VI. of the Budget, adopting the Committee's amendments in respect of the last two Sections. The President then announced that, no objection having been raised, the following should be taken as decided in the Expenditure side; namely, that the Budget be applied in respect of the appropriations for the Upper Middle School of Yamaguchi Prefecture, the Zoshikan of Kagoshima Prefecture, and the Female Upper Normal School; and the recommendations of the Committee's Report be accepted in respect of the Imperial University, the Upper Normal School, the Upper Commercial School (*Koto Shogyo Gakko*), the Tokyo Industrial School (*Kogyo Gakko*), the School of Arts, the Deaf and Dumb School, and the Public Library. The House then proceeded to consider a Bill submitted by the Government with respect to carrying over funds for the construction of vessels of war, torpedo boats, and weapons of war. These funds had accumulated as surplus of revenue over expenditure since 1888, and, under ordinary circumstances, should have been absorbed into last year's revenue. But for special reasons of military equipment, they had been set apart, and the House was now asked to enact a law sanctioning their being carried over to next year's Revenue. The House voted the Bill unanimously, without debate, and rose at 4.20 p.m.

FEBRUARY 23RD.

The House met at 10.40 a.m. After some announcements by the President, Mr. Inouye Kakugoro rose to inquire in what capacity Mr. Saito Shuichiro appeared in the House. If as a Government Delegate, was it permitted that a Delegate should wear a less formal costume than that provided for a member? A member had to appear either in Japanese dress with *haori* and *hakama*, or in foreign costume with a frock coat or morning coat. The President said that Mr. Saito was in foreign costume. Mr. Inouye insisted that it was not proper foreign costume. Other members supported Mr. Inouye, and Mr. Miura expressed surprise that the President should show amusement about a violation of the rules. The President finally requested Mr. Saito to withdraw, and the latter did so, returning shortly afterwards in a frock coat. Mr. Tanigawa Tai, referring to the motions of which notice had been given as announced by the President, said that, as he understood, the various schools specially licensed by the Government in different localities, the Keiogijiku University, and the schools of law and political economy were no longer to receive State aid. In that case the whole duty of educating barristers and economists would devolve on the State, and a grant of only some eight thousand *yen* had been made for the purpose. Was it possible to discharge such functions with such an appropriation. The reason supposed to be assigned for withdrawing official recognition of these schools was that they were regarded as places for educating *soshi*. Was not that a mere pretext? Again, with reference to the provision that men who had not graduted at one of the local Government Schools were not eligible for examination as barristers, was not that veto really aimed at injuring private schools? If it was proposed to settle the matter of funds by Imperial Ordinance after the session of the Diet had come to an end, he could only compare such a procedure to the methods adopted by the First Napoleon. He therefore desired to receive information from the Government on these points. Mr. Nakamura Yaroku inquired whether the member had been giving them a lecture. Mr. Tanigawa replied in a loud voice that it was no lecture, and that Mr. Nakamura had better hold his peace. Mr. Kusumoto Masataka, on behalf of the Special Committee appointed to inquire into the advisability of petitioning for a prolongation of the session, reported that the Committee had decided to recommend that the President seek the honour of being admitted to audience by the Emperor, for the purpose of submitting for His Majesty's consideration the actual state of affairs, and soliciting such a prolongation as His Majesty might deem fit. The House, being new to Parliamentary procedure, had necessarily made little progress, and had moreover been interrupted and greatly impeded by the destruction of the Diet's buildings. There were more than 20 important Bills awaiting discussion, and to separate leaving them untouched would be a reproach to the House. The President announced that a message had been received from the Minister President of State, asking the House to discuss and vote upon the Supplementary Estimates for next year without submitting them for examination by a Committee. The President further announced that, in the absence of objection, he should consider the Committee's Report adopted as to the prolongation of the session. The House then proceeded to the first reading of the Weights and Measures Bill, as sent down from the Peers. Mr. Ishida, Government Delegate, explained the objects of the Bill. He pointed out the great inaccuracies of the weights and measures now in use, and laid stress upon the fact that the purpose of the Bill was in no sense to change the Japanese system, but only to fix the standards in accordance with scientific methods, and to bring the system into mathematical relation with the systems of the West. Various questions were put by members, and answered by Mr. Saito Shuichiro, Chief of the Commercial Bureau in the Department of Agriculture and Commerce. The President said that as the number of important Bills awaiting first reading was large, it seemed desirable to conduct the preliminary inquiries and hear the explanations as to several Bills in succession, and then to elect, by one operation, the Committees for examining them. The reading aloud of the Bills would also be dispensed with, as printed copies were in the hands of all the members. The House then proceeded to the Registration Bill. Mr. Shirane, Delegate for the Home Office, briefly explained the need for such a Bill. Only one question was asked, and the House then proceeded to the amended Criminal Code. Mr. Mitsukuri, Government Delegate for the Department of Justice, said

Digitized by Google

that the Code contained over 400 articles, and that full explanations were appended. There had been four bodies of criminal law promulgated since the 1st year of the Meiji era, but a perfect system had not yet been attained. He referred briefly to some of the defects of the code now in force; as its failure to define clearly the offence of seeking to bring officials into contempt (*Kanri bujyoku*); its want of distinction between treason towards the State and towards the Government; its deficiency in respect of provisions relating to local officials and registrars; and so forth. Mr. Okada Ryoichiro said that the immediate consequence of each previous revision of the Criminal Law had been an increase of criminals. Did the Government expect that this new revision would lead to a reduction? This question elicited loud laughter. After some further questions, Mr. Kondo Jumpei inquired whether this revision of the Code had been dictated by the exigencies of the country's foreign relations, and if so, what articles had been thus affected. The Government Delegate said that the revised Criminal Laws were for use in Japan, and that their compilation had not been undertaken in the smallest degree for the purpose of producing a good effect upon foreigners. Besides, they did not apply to foreigners, since the latter are at present exempt from the operation of Japanese laws. In answer to another question, he said that one great object of the revision had been to obtain thorough equilibrium of penalties. In some cases penalties might have been increased, but on the whole the alterations were on the side of leniency. Immediately after the operation of the present Criminal Code, directions had been given to the various courts that note should be taken and information furnished of all faults in the working of the Code. In accordance with the facts thus obtained the work of revision had been commenced five years ago. After some further questions, a discussion arose as to the manner of electing Committees to examine the above three Bills, but it was finally decided to follow the usual method. The President having announced that he proposed to forward to the Government the whole Budget as amended by the House at the second reading, Mr. Orita Kenshi opposed that method, urging that only the portions falling within the scope of Article 67 of the Constitution should be forwarded, as there was no occasion to seek the Government's concurrence in respect of the remaining items, with which the House had power to deal independently. This objection found no supporters. Three Committees were then elected, and the House took a recess at 3.15 p.m. On reassembling, Mr. Kawamada Tokujiro moved that the Bill for amending the land assessment be considered at once as a matter of urgency, since that course would greatly facilitate subsequent discussion of the question of land tax reduction. The proposal was rejected by 127 to 111. The House then proceeded to the first reading of a Bill for amending the Land Tax Regulations. Mr. Shiota Okuzo, the introducer of the Bill, attempted to explain it, but met with much interruption, the House appearing to think itself quite sufficiently informed on the subject. The House rose at 4 p.m.

FEBRUARY 24TH.

The House met at 10.40 a.m. The President said that a Representation had been handed in by Mr. Hayakawa Riyosuke, asking for the appointment of a commission to inquire into a disease of the mulberry tree (*Kuwa-no-ha ishuku-byo*); also a Bill by Mr. Iwasa Jiro for amending the Land Assessment in certain localities. The House then proceeded to consider a supplementary Budget for the next fiscal year. Mr. Shirane, Government Delegate, explained that the sum asked for, namely 240,000 *yen*, was for the re-building of the Diet. The Government thought that the best plan was to re-construct it of wood, so as to have it ready by the session at the close of this year. Mr. Mori Toichiro observed that a sum was included for the pay of a foreign expert, and inquired whether Japanese architects and scientific men would not suffice. Mr. Shirane said that there was no intention of procuring a foreigner from abroad. There was already a foreigner engaged in the Temporary Building Bureau of the Home Department who had had experience in the building of houses of parliament, and as his present agreement expired in March, the Government had thought it better to re-engage him for the period of the Diet's reconstruction. Consequently no special examination had been made as to the competence of Japanese experts. He presumed that if a choice were made with great care, a competent Japanese expert might be found, but the work was one of considerable magnitude. Mr. Sakurai Tokutaro said that the chief point of dissatisfaction connected with the former building had been the absence of a Throne in the Lower House. Would this be remedied in the re-constructed Diet? The Delegate replied in the negative. In answer to a question by Mr. Hamano Noboru, he said that the lighting would be by electricity, as before, but that ample precautions against fire would be adopted. Mr. Suyehiro thought that this question required careful consideration. He asked whether the building now used for the House of Representatives could not be hired for three or four years longer; whether there would be any difficulty in similarly renting the Imperial Hotel; what would be the cost per annum of adopting this plan; about how long the building of the permanent Diet would take; and finally whether some trifling changes would not render the new Patents Office suitable for the purposes of the Diet. The Delegate replied that the idea of using the Patents Office had not been considered, but that great inconvenience would result from any attempt to employ buildings now serving other official purposes. A rough estimate of the cost of the permanent Diet was 2½ million *yen*. He could not answer the other questions. Mr. Yamanaka Riunosuke said that from actual observation, he believed an outlay of 100,000 *yen* would render the Patents Office fit for temporary use by the Diet. He urged that a Special Committee be appointed to consider the whole question. Mr. Shirane said that the building now occupied by the House was required for the Museum of Antiquities of the Household Department. To prepare it for the purposes of the Diet, an outlay of 120,000 *yen* would be required. The rent of the rooms used in the Imperial Hotel was 5,000 *yen* monthly. He denied that the Patents Office could be adapted for the Diet at a cost of only 100,000 *yen*. Mr. Takaoka Kiukei proposed that the Bill be submitted to the Permanent Committee on Finance for examination, despite the Government's request that a Committee should be dispensed with. After some debate, the House rejected this proposal by 102 to 101. Mr. Suyehiro then proposed that the Bill be submitted to a Special Committee. On re-assembling after the midday recess, Mr. Kusumoto Masataka, representing the Committee appointed to consider the question of prolonging the session of the Diet, asked permission to explain that the previous recommendation of the Committee with regard to a verbal communication by the President to the Emperor, seemed to be opposed to the Constitution. The Committee therefore desired to amend their Report, so as to recommend a written memorial. Mr. Suyehiro's motion was then put and lost. A desultory discussion ensued. Mr. Horiuchi Chiuji urged the expediency of having a Throne in the House of Representatives as well as in the House of Peers. He wished to know whether the Delegate's statement as to the intention of dispensing with a Throne had been made advisedly. Mr. Inouye Kakugoro advised the Delegate not to give himself the trouble of replying to such a person, and Mr. Suzuki Manjuro endorsed the counsel, to the great indignation of Mr. Horiuchi, who pressed for a reply. The Delegate said that the plan of the former building had been adopted, and that he could give no further information. Mr. Naito Rihachi pressed his amendment for cutting off the appropriation on account of a foreign architect. The reasons given by the Delegate for employing a foreigner simply amounted to saying that, as one was on the spot, he had been engaged. Japanese architects should be well able to do the work, especially since it was simply one of re-construction. Report said that the employment of foreign architects had sometimes been the cause of serious errors of construction. The closure was moved and Mr. Naito's amendment being put, was lost by 119 to 116. Mr. Suzuki Manjuro told the House that, most regrettably, they had decided to employ a foreigner whose services might have been dispensed with, and was proceeding to dilate on the theme when he was called to order. The Bill was then voted, and the House proceeded to consider a Bill for the amendment of the Land Tax Regulations. Mr. Nakamura Yaroku made a powerful speech in opposition. The document accompanying the Bill spoke of the land tax as ancient. Undoubtedly it was so: it had existed in Japan from time immemorial. Within recent years immense social changes had taken place, and corresponding public outlay was required. Did they think they could purchase civilization for nothing? If a section of the nation were over-taxed, doubless its burden should be lightened; but when they proposed to reduce a tax paid by the whole nation, how was the public expenditure to be met? People talked of "land tax reduction" as a question approved by public opinion, but the *Sonno Joi* (honour the sovereign and expel foreigners) cry of pre-Restoration days had been a more unanimous expression of public opinion, and who entertained it now? Did they forget what the Minister of State for the Navy had told them? He had said that the Navy of Japan was not yet sufficient to protect the country. They had also been told that not until the year 1929 would the fortifications of the bay that washed the streets of the City where their Emperor lived be completed. It was impossible under such circumstances to vote for a large reduction of the land tax. Did they not know that the foreign trade of their country amounted to over 130 million *yen* annually? How much of that trade was carried on directly by Japanese? They had voted, with apparent pride, to reduce the subsidy of the Japan Mail S.S. Company. Let them go to Hongkong, and, travelling thence westward, see how often they would meet a ship flying the Japanese flag. They ought rather to recognise the necessity of increasing the subsidies to shipping companies so as to develop the mercantile marine of the empire. They imagined that by reducing the land tax they would relieve the farming class and encourage production; but in truth the effects of the proposed reduction would scarcely be felt by individuals. Again, they all talked of Treaty Revision as an object of universal desire, but would the consummation of that hope be hastened by cutting down the revenue to a sum less than the reasonable expenditure of the State? He yielded to no one in his desire to reduce useless expenditure, but he held that the money thus economized should be devoted to productive works, as irrigation, road-making, and so forth. The average sum spent every year upon works of irrigation, road-making, riverine repairs, and so forth, from 1875 to 1886, had been 1,498,000 *yen* approximately, and the average yearly loss by floods 3,866,000 *yen*. They might regard this great sum as money lent in perpetuity and without interest to the Princess Otohime of the Dragon's Palace. Such a system of finance was not to be approved by any reasoning man. Instead of reducing the land tax they should reduce useless expenditure, and employ the money thus saved to carry out works the products of which would help to reduce the national debt. Mr. Asanaga Shinzo moved, as a point of urgency, that the amendments proposed by Messrs. Suzuki Shigeta, Amakasu Fumiye, and Iwasa Jiro be examined fully, and separately discussed and voted upon. Mr. Inouye Kakugoro moved that a Special Committee be appointed to examine the Bill. Mr. Nakamura had denied that the reduction of the land tax was a subject of public desire, but for his part he thought there were very few persons in the whole nation who did not desire it. Mr. Yamaguchi Chiyosaku denounced the proposal of Mr. Asanaga as a mere device for throwing dust in the eyes of the House. The

Digitized by Google

supporters of the Bill probably foresaw that they were about to be beaten, and were therefore resorting to strategy. He exhorted them to stand up like men and face the issue stoutly. Never mind who lost or won. The question was, what was best for the country. Mr. Asanaga's motion was then put and apparently lost. The decision being challenged, the President (Mr. Tsuda) called for an open ballot. Meanwhile the House had been falling into more and more confusion. Members were speaking without leave, others shuffled with their feet, and some hammered their desks with the uprights on which their numbers were written. The President's cries of order were disregarded. Mr. Kudo Kokan insisted on speaking, though forbidden to do so, and Mr. Inouye Kakugoro shouted that he ought to be removed from the House. The President then declared that the result of the ballot was 92 "ayes" and "142" noes. The President was then about to put Mr. Inouye Kakugoro's motion, but objection was raised on the ground that the motion was virtually the same as that of Mr. Asanaga. Mr. Inouye himself called out that his motion had been "handsomely beaten." Mr. Hayashi Koichiro said that, during the past three years, the total sum annually paid by the nation in the shape of land tax and local taxes was 58 million *yen*, and further burdens would have to be borne on account of the new system of Local Government. Some relief must be given. In seeking to reduce the land tax they were only carring out the expressed wishes of the empire. Such a plan would materially help to develop the national resources. The opponents of the Bill claimed that the proposed reduction was not supported by public opinion, but the numerous petitions presented to the Diet proved the error of such a contention. The President here asked the House whether it had no objection to the course recommended by the Committee on the prolongation of the Session. No objection was raised. The closure was then put and voted. The House then decided to proceed to the second reading of the Bill, by 225 to 17. The House rose at 4.30 p.m..

FEBRUARY 26TH.

The House met at 10.40 a.m. The President announced that Mr. Takanashi had presented a motion for a Representation asking the Government to revoke the subsidy to the Tea Company. Also that a reply had been received from the Government to the House's application for its concurrence in respect of the reductions recommended by the Budget Committee's Report. The reply was read out. It intimated that the Government though anxious to give effect to the wishes of the House, was unable to make such economies as those proposed, and it asked the House to reconsider the question. Mr. Uyeki Yemori proposed that application be made for a Cabinet Minister to attend and explain the matter. Mr Inouye Kakugoro asked under what authority it was proposed to ask for the attendance of a Minister. Supposing that the request were made and refused, would the House drop the matter as it had done in the case of applying for the attendance of the Minister of Agriculture and Commerce? Mr. Uyeki replied that no law or provision of the Constitution distinctly empowered the House to take such a course, but it seemed to be a course consistent with the spirit of parliamentary procedure, especially when they were considering a matter of such importance as the Budget. Mr. Otsu Junichiro thought that the House should be in a position by this time to appreciate the unsympathetic treatment it was likely to receive at the Government's hands. The Delegates of the Government had the same status in the House as Ministers. He suggested that explanations should be sought from them first, and that afterwards, if necessary, the Government should be approached. Mr. Misaki was of opinion that nothing could be gained by entering into any verbal discussion with a Minister of State. He recommended the appointment of a carefully selected Committee to re-examine the scheme of reduction and enter into consultation with the Government. He saw no other way of reaching a practical result, in view of the proximity of the close of the session. If the House did not mind separating without effecting anything in respect of the Budget, then he had nothing more to say. But they devoted some ninety days to this subject and it would redound little to their credit if they went back to their constituents with nothing whatever to show. He proposed that the Committee should consist of nine, and that it be chosen, not by Sections, but by the whole House. Mr. Uyeki's motion was the put and lost. Mr. Misaki's motion was then discussed. Mr. Kikuchi Kanji opposed the motion, and was beginning to enter into an examination of items of the Budget when several members rose to order. Mr. Inouye Kakugoro declared that Mr. Kikuchi's speech sounded like the rough draft a rustic discourse. Mr. Tanaka Shozo shouted out "silence." Mr. Kikuchi, after further interruptions, failed to obtain a hearing and descended from the rostrum. Mr. Otsu Junichiro thought that the House should come to some decision to guide a committee before appointing one. He combatted the reasons advanced in the Government's reply, and said that if the reductions proposed by the House were opposed to the laws, amendments of the laws in the desired sense should be undertaken. The closure was here put and voted. A closed ballot was then taken on Mr. Misaki's motion, the result being 151 "ayes" and 117 "noes." The President announced that the House would now proceed to elect the Select Committee, but several members said that, being uncertain as to the functions of the Committee, they desired to hear the stenographic record of Mr. Misaki's speech. Other members asked that the usual midday recess be taken, the hour being past noon. Mr. Kudo Kokan called out to the President to be so good as to leave the House. Mr. Nakamura Yaroku said that Mr. Kudo should be handed over to the Committee for Disciplinary Punishment. Repeated calls for a recess ensued. The President ordered the stenographic record to be read. Mr. Tanaka Shozo asked whether the President had power to prevent the members from eating when they were hungry. Mr. Endo, who sat immediately beside him, bade him be silent, and rising, clenched his fist. Mr. Tanaka shouted back an angry reply, and a personal encounter seemed imminent when the President called the two members to order. The balloting proceeded, with the following results:—

| | |
|---|---|
| Mr. Misaki Kamenosuke | 150 votes. |
| Mr. Kataoka Kenkichi | 148 votes. |
| Mr. Kobayashi Kusuo | 135 votes. |
| Mr. Tanaka Gentaro | 133 votes. |
| Mr. Furusho Yoshikado | 131 votes. |
| Mr. Avai Takeo | 128 votes. |
| Mr. Abei Iwane | 127 votes. |
| Mr. Kammuchi Tomotsune | 127 votes. |
| Mr. Maki Bokushin | 123 votes. |

The House took a recess at 3 p.m., and reassembled at 3.45 p.m. The President announced that a Message had been received from the Emperor sanctioning the prolongation of the session until the 7th proximo. Mr. Koma Shiku urged the advisability of arriving at a clear understanding as to scope of the functions to be performed by the Committee appointed in the forenoon. After some discussion the President said that, according to his view of what had passed and his reading of the stenographic records, the function of the Committee was this:—To consult with the Government, and then either to make whatever amendments seemed necessary, or, if such a course appeared expedient, to take the sense of the House, and be guided by it; then to report to the House, after which the House would finally decide. This explanation was received with applause. The House rose at 4 p.m.

## *CORRESPONDENCE.*

### THREE QUERIES TO MR. ISAAC DOOMAN.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Mr. Issac Dooman, in your issue of the 12th instant, is again successful in showing that whatever else Christianity may do for its adherents, it has little influence in teaching them manners. Yet the existence of such a controversialist as this gentleman, who thinks it good taste to refer to Mrs. Humphry Ward as "the greatest literary Jezebel of the 19th century," may be found useful, if only as an example of the sort of language possible to what one may call the "natural" Christian, uninfluenced by the better manners of his time.

Mrs. Ward has not much to fear, however, from a writer who can talk of a "luminary" "harping" upon views, and who shows in almost every line that however much he knows about the fluctuations of creeds, he has but little acquaintance with the rules of grammar. Still, as Mr. Isaac Dooman would no doubt like an opportunity of giving the public some insight into the vast stores of learning which he has accumulated in the course of his extensive reading, perhaps he will be good enough to answer one or two queries arising out of his letter.

Firstly, then, he objects to Mrs. Ward's religious ideas as expounded in "Robert Elsmere" on the ground that they are not original. Now, as this want of originality seems to be in Mr. Dooman's eyes the unpardonable sin, which damns irretrievably any creed or body of teaching, will that gentleman kindly point out in your columns how much of the ethical teaching of Jesus Christ is original and not to be found in teachings and writings anterior to the assumed date of the Gospels?

Secondly, will Mr. Isaac Dooman give a few out of the "infinite number of instances" in which every day he sees divinely-made "cosmic laws" "altered, suspended, and deranged by human will," defining at the same time what he means by "cosmic laws"?

Thirdly, does he seriously mean to assert, what his words imply, that Christians are only kept from fully satiating their "animal lusts and desires" simply by belief in "God," "soul," and "future retribution?" Surely his fellow-believers, who can see the drift of an argument a little more readily than Mr. Isaac Dooman, must utter that bitter cry "Save us from our friends!" when they read such arguments as this.

Yours, &c.,
SECULARIAN.

February 21st, 1891.

### THE JINRIKISHA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Observing in the *Mail* a reference to *jinrikisha*-travel and a proposition to abolish that mode of conveyance, something within my mind made such ready response to the idea that I thought I might be permitted to "second the motion."

The unadulterated truth is that the *jinrikisha*, pulled by a human being—tautology admissible?—is a blot on civilization, and no Japanese who loves his country in its individuality should be content to have his fraternity represented by such a slavish occupation, or such a degrading method of earning the *gozen*.

While I was in San Francisco, some speculative gentlemen, abetted by a few Japanese youths, proposed introducing the *kuruma* in that cosmopolitan metropolis. The fact was mentioned to my son, who, entertaining for this fair land something of the enthusiastic friendship that Sir Edwin Arnold so eloquently expresses, hastened to the Japanese Consulate and urged the most stringent opposition to any such movement, as it would degrade the standing of the whole Japanese nation if they should allow any of their countrymen to engage in such an enterprise.

Now there is nothing more luxurious than to be seated in a springy, lacquered, elegantly finished *kuruma*, with runner outrivalling all competitors in speed. One loses all sense of the humanity of the "pull-man" and intuitively, half unconsciously, takes pride in the full, sinewy calves of his swift nether limbs, the fit of his livery, the effect of the *mon* or crest, and the curves of the little vehicle that whirls him so comfortably to his destination. I like the *jinrikisha*; but it is an evil nevertheless. It is an inhuman, degrading, killing occupation. Under my special observation within two years, three or four splendid specimens of physique have utterly broken down. Constitutions ruined. To keep up the show of strength and force into continuous service these human steeds, the drinking of *sake* is resorted to; a short lived remedy, and still more fatal the collapse which is sure to follow. To open Japan to foreigners with its men as horses, is more humiliating than to share legal rights with foreign judges. Labour is honourable and elevating save when it degrades man among men; and although the 'riksha coolie of Yokohama may lord it over the intoxicated sailor, he must bend like a beast of burden to carry the man of obliterated reason to dens of infamy, that he may win for himself a pittance more of percentage. The seven reasons

Digitized by Google

preferred in the proposition for discontinuance of this form of industry, by the editor of the *Yomiuri Shimbun*, have more or less of forcible truth, therefore. Although appreciating the luxury and convenience, I think the system should be disclaimed by all well-wishers of Japan and the Japanese.

Tokyo, Feb. 23rd, 1891. A.V.R.E.

## A JAPANESE CONFESSION OF FAITH.

To the Editor of the "Japan Mail."

Sir,—My attention has recently been called to an article which appeared in the *Japan Mail* on January 24th. Even at this late day, please allow me to correct certain statements contained in it.

The article is entitled "A Japanese Confession of Faith." It represents me as the principal author of the Confession, and as "assuring my numerous questioners that not until half an hour before the meeting had any foreigner suspected its existence." When the Confession was presented to the Synod, a simple question was asked me bearing upon its authorship; but my answer was quite different from that indicated in the article. It is true that my part in the matter proved to be nearly "an all-night work;" but it was the work of assisting in rendering the original draft into Japanese.

The article also represents the Synod as dominated by an anti-foreign spirit. It is true that the Synod did not favour the importation of any Confession of Faith prepared by a foreign Church to meet its own special requirements. It desired one suited to the needs of the Church in Japan; and the Confession adopted was adopted because it seemed to do that. But it is a mistake to suppose that the Synod was "hostile to any draft savouring in any degree of foreign inspiration." There was no division whatever of the body into foreign members and Japanese members. To show that this is not merely my own conviction, allow me to conclude with an extract from the official records of the Synod.

"From the beginning of the negotiations for the union of this Church and the Congregational Churches, Dr. Imbrie has laboured in no ordinary manner upon the Constitution and Confession of Faith, and no less for the peace and welfare of the Church. Thus at length we have been enabled to adopt the Confession of Faith of the Church of Christ in Japan; and therefore this Synod, as a slight return for his labours, expresses its gratitude to him in a vote of thanks."

SAJURO ISHIMOTO.

Meiji Gaku-in, Tokyo.

February 24th, 1891.

[It appears to be scarcely correct to state that the article represented the Synod as dominated by an anti-foreign spirit. Stress was laid, it is true, on the evident desire for an original and essentially national confession. The fruit of an anti-foreign spirit pure and simple would hardly have been referred to as "specially reassuring . . . to those who have laboured for the firm lodgement of orthodox Christianity in Japan." Whilst thanking Professor Ishimoto for pointing out that his own reply was incorrectly reported, we may state that our information was based upon impressions gathered by gentlemen present on the occasion, and upon published reports. —Ed. *J.M.*]

## *YOKOHAMA LITERARY SOCIETY.*

The last fortnightly meeting of the Literary Society, held at Van Schaick Hall on the 14th instant, was rendered more than ordinarily interesting by what was modestly termed a "Talk upon Railways." Mr. Page, of the Imperial Government Railways, was the author of the paper. Railways, or as our American cousins very properly choose to designate them, Railroads, Mr. Page remarked, admit of a variety of treatment and of a very great deal being said about them, but the limited time allowed him would he thought prevent him from saying much more than many persons were already familiar with. He would, however, briefly glance at two or three of the most striking features of the subject of railways and railway development since their inception at the beginning of the present century. All would admit how largely railways enter into the sum of our everyday happiness, though few probably have considered the subject sufficiently to really estimate the loss a withdrawal of the facilities of rapid transit would entail. After recalling the days of the old stage coaches and post chaises and some of the difficulties and discomforts and dangers of land travel 60 or 70 years ago; and of the deep misgiving and fearfulness with which even journeys of short distances were entered upon, Mr. Page went on to speak of the origin of railways. More than 200 years ago, in fact as early as the year 1676, the first dawn of the present mighty and elaborate system was heralded, when some inventive genius whose name has not come down to posterity conceived the idea of laying down balks of timber equally straight and parallel to form a tramroad for the passage of carts loaded with coal from mines to the river-side in the vicinity of Newcastle-on-Tyne. One hundred years later the Coalbrookdale Iron Works are said to have constructed the first iron rails. These rails were only 5 feet long, and were secured to oak timbers laid upon ties. Ten years later the Sheffield Colliery Society introduced cast-iron rails, and tramroads constructed in this manner are being worked for colliery purposes to this day in some districts of England. Very little change was made in the rail afterwards until the year 1820, when J. Birkinshaw took out a patent for the first malleable iron rail. A rail so made, 28lbs. to the lineal yard, and laid on blocks of stone formed the permanent way of the first railway ever constructed and worked by steam traction power. The same description of permanent way, but with a rail 35lb. per yard, was adopted by Geo. Stevenson for the Liverpool and Manchester Railway. Since then many different types of rails have been devised to meet certain ideas and needs, and they have been greatly increased in length and depth and sectional area, but the great improvement perhaps has been effected in the material of which they are composed; from malleable iron to Bessemer steel. Steel is not only found to be more homogeneous, ensuring evener wear than iron, but its strength is half as great again and rails made of steel may thus be reduced in weight by corrosion and abrasion to an extent that would be unsafe in an iron rail. Until quite recently the action of the weather and natural wear and tear were thought to be the only two elements detrimental to the life of steel rails, but it has been discovered that they are liable to be eaten by a thin, thread-like worm which feeds and actually thrives upon steel rails. Mr. Page remarked that it used to be said that the ostrich fed on ten penny nails, bits of flint glass, and the like, but the worm spoken of can give the ostrich or any other bird or beast points in the matter of solid diet. After giving all the known particulars of this marvellous worm, for the discovery of which the world stands indebted to the Germans, the lecturer proceeded. Steel rails are used on many of the best railways of the standard gauge 4′ 8½″ of a length of 30 ft. and 90lbs. per lineal yard, a very great advance since metal rails were first introduced, some rails for laying upon bridges and for other special purposes have been made 60 ft. long and 90 lbs. to the yard, but the Chiquecto Ship Railway it was generally understood would have a rail 110 lbs. to the yard. The railways in Japan, as all possibly were aware, are of the narrow gauge type, and the rails are 60 lbs. and in lengths up to 30 ft., a very excellent and solid road for a 3½ ft. gauge. The cost of steel rails had been immensely reduced, the earliest of these costing £30 sterling per ton, whereas steel rails of better quality could now be purchased at from £3.15.0 to £4.0.0 per ton. The yearly out-turn of steel rails in Europe and America is now of vast proportions, and as an illustration it was mentioned that Scranton's Mills, Scranton, U.S., by no means the largest manufactory in the world, produced 350,000 tons annually beginning with cold pig-iron, which is melted, converted into steel, sent through the various rolls, sawn into proper lengths, punched, and delivered fit for use, all in one continuous operation. And it is asserted that one finished steel rail 30 ft. long and 60 to 70 lbs. per yard is turned out every sixteen seconds. The stone blocks on which the rails of the early railways were laid made the running of the trains so rough and unpleasant that wooden sleepers or ties were substituted, and these continue to be used, though iron and steel sleepers are being experimented with. The cheapness of wood and the ease with which it can be procured in most countries will most likely prevent any other material being substituted for it, for some time to come at least. Hand in hand with improvements in the permanent way, corresponding advance, Mr. Page stated, had been made in the locomotive. All were aware that James Watt first conceived the idea of utilizing steam for locomotion, but all were not aware that the merit of inventing the first locomotive and showing its practical working as a carrying and transporting agent is due to Richard Trevithick, whose two grandsons are now occupying positions as Locomotive Superintendents of the Government Railways here in Japan. Richard Trevithick was born in Cornwall in 1771, and was consequently a contemporary of Watt, with whom, at the age of 24, he stood forward as a competitor. Trevithick was perhaps the greatest mechanical genius England, or the world, has ever known, and amongst his numerous inventions the most important probably was the making practicable the use of high pressure steam, that is, he conceived the idea of working engines by the pressure of steam instead of by vacuum. Without high pressure, which Watt condemned unreservedly as dangerous, even going the length of saying that Trevithick ought to have been hung for advocating and producing high pressure engines, it would not have been possible to have locomotives, and, as a consequence, railways as they are at the present time. Trevithick's first working model of a locomotive which is now preserved in the South Kensington museum, was made as early as 1797, and shortly afterwards he constructed a road locomotive, which carried the first load of passengers ever conveyed by this means on Christmas Day, 1801. At a subsequent trial some portion of the machinery failed and the engine, left by the roadside, took fire and was partially destroyed. The following year a patent was granted to Trevithick and Andrew Vivian for a high pressure steam-engine for propelling carriages. In 1803 Trevithick's second locomotive was built, sent from Cornwall to London, where it ran through the streets daily for some time, travelling sometimes at a rate of 8 or 9 miles an hour. This locomotive had 3 wheels, 2 driving wheels about 8 inches in diameter with a small steering wheel in front. In 1804 Trevithick built an engine for working on a tramroad in South Wales, and this was the first engine to run upon a railway. It drew a gross load of 25 tons a distance of 9¾ miles at a speed of 4 miles an hour, and without any load it ran at a speed of 16 miles. At the end of the same year one of Trevithick's engines was built at Newcastle. It differed from its predecessors in having flange wheels. The next effort was not undertaken until 1808, when Trevithick at his own cost constructed not only a locomotive but a railroad, which was laid down on what is now Euston Square, London. This railway, which was circular and upon which a speed of 12 miles an hour was maintained, may be considered to have been a complete demonstration of the present railway system. The engine ran for some weeks, when, a rail breaking, it left the road, and turned over—the first recorded railway accident. The venture not only resulted in pecuniary loss, but for lack of patronage and appreciation Trevithick ceased his efforts entirely in this branch of mechanics, and there is nothing to show that he ever resumed them. Some years after this he went out to South America, and when after 10 years' absence he returned enfeebled in health and without resources, Stevenson had entered the field which he had left open and had successfully established with the public what he had failed to do. Stevenson ran his first locomotive on the Stockton and Darlington Railway—the railway which may be considered the germ of the railway system of the world—on the 27th of September, 1825. It was named the "Locomotion," and is preserved to this day in the locomotive works of the Stockton and Darlington Railway. After speaking of the earlier locomotives, the "Rocket" and the "Samson," Mr. Page turned to modern improvements, citing as the most important the improvement introduced 10 years ago by Mr. Webb, of the London and North-Western Railway, in his compound locomotive. It is claimed that at least 50 per cent. is saved in full by the compound engine, and when it is considered that some of the large railways in England consume 3,000 tons every day or upwards of a million tons annually it is evident that the saving is a very considerable item. Railway companies are proverbially conservative, however, and although so much has been proved in favour of the compound type of locomotive, its general adoption can scarcely be said to have commenced. All must have observed the massiveness and evidence of immense power a locomotive of the modern type presents when under steam and hauling a train at a rapid speed, and yet such a wonderful machine is now-a-days turned out of the huge locomotive establishments in different parts of the world with the ease and apparent rapidity almost of a sewing machine or a watch, for it is asserted that the Baldwin Works at Philadelphia manufacture an average of two complete locomotives daily. And at the Crewe Works, England, which are said to be the largest railway works in the world, an engine was on one occasion for the purpose of an experiment wholly built, from the time the iron plates were selected and laid down to the completion of the engine in every detail, boilers tested and steam up ready and capable of hauling a train in the short space of 25½ working hours. There are computed to be 105,000 locomotives in use throughout the world, and the United States possess between 29,000 and 30,000 of them. Some interesting particulars were given of the speed of trains, in support of which the views of eminent English and American engineers and experts were quoted. Eighty miles an hour is apparently the maximum speed which is possible for locomotives of the present type, at which speed the resistance of the air, the back pressure in the cylinders, and the friction altogether become so great that they absorb the whole power of the engine, while the pressure on the wrong side of the piston becomes

Digitized by Google

greatly increased by the fact that the exhaust steam cannot be got out of the cylinders fast enough. In connection with the matter of safety of travel on railways, such high authorities as Sir Edward Watkin and Mr. Findlay, the general manager of the London and North Western Railway declare, Mr. Page stated, that it is the safest mode of progression known to mankind, and Mr. Findlay is of opinion that there is more actual danger in crossing the street of a large town than in riding in an express train. After adducing a few statistics relating to this phase of the subject, reference was made to some of the different descriptions of railways, submarine bridges, tunnels, etc., and to the salient features of the projected Trans-Siberian Railway. At the conclusion of the lecture, the railways of this country were briefly alluded to. There are, Mr. Page said, some 1,250 miles in operation, not including the Hokkaido lines. Excepting two or three short sections which have double tracks the whole system is single and of a 3 ft. 6 in. gauge. The safety of trains working upon this single line is secured by what is known is the Train Staff and Ticket system, a plan invented 40 years or so ago by a Mr. Woodhouse, an engineer of the London and North Western Railway for working a long tunnel called the Stonedge tunnel. It has its disadvantages, but there can be little doubt no better plan has yet been devised for securing the safety of a single line worked under conditions such as those existing in Japan. A few illustrations of the humorous side of the railway question were given at the close.

The following is the account of the wonderful worm :—

The German Government has been inquiring into the life history of one of the most remarkable worms in the known world. The gluttonous appetite of this peculiar and wonderful creature is only satisfied by feeding on common steel. For some time preceding the publication of the facts of the case the greatest consternation existed among the engineers employed on the railway at Hagen, on account of the accidents which always occurred at the same place, proving that some terrible defect must exist either in the material or the construction of the rails. The Government became interested and sent a Commission to the spot for the purpose of maintaining a constant watch at the spot where the accidents—one of them attended with loss of life—had occurred. It was not, however, until after six months had elapsed that the surface of the rails appeared to be corroded, as if by acid, to the extent of over one hundred yards. The rail was taken up and broken, whereupon it was found to be literally honey-combed by a thin, thread-like gray worm. The worm is said to be of about the bigness of a common knitting needle. It is of a light gray colour, and on the head it carries two little sacs or glands, filled with a most powerful corrosive secretion, which is ejected every ten minutes when the little demon is lying undisturbed. The liquid when squirted upon iron renders that metal soft and spongy, and of the colour of rust, when it is easily and greedily devoured by the little insect. "There is no exaggeration," says the official report, "in the assertion that this creature is one of the most voracious, for it has devoured thirty-six kilograms of rails in a fortnight."

## *JAPAN BREWERY COMPANY.*

The annual general meeting of the shareholders of the Japan Brewery Company (Limited) was held on Wednesday afternoon at the offices of the Company. Mr. C. Rohde occupied the chair, and among those present were Messrs. T. B. Glover, A. B. Walford, E. Blanc, C. J. Strome, D. Fraser, P. de C. Morriss, F. Abegg, Imai Sozaburo, Hakaru Isono, R. Masujima, Yeend Duer, and Wilson Walker (Secretary).

At the request of the CHAIRMAN,

The SECRETARY read the notice calling the meeting.

The minutes of the previous meeting were taken as read.

The CHAIRMAN then said—Gentlemen, the report and accounts for last year have been circulated among the shareholders, and I propose that they be taken as read. The report gives all details, and it will hardly be necessary for me to make any remarks in addition. It is certainly very satisfactory that we have been able to increase the sales notwithstanding that business in Japan generally cannot be considered as having been favourable during last year. The increase referred to shows that the quality of Kirin Beer has found approval everywhere, and it must be our endeavour now to further increase the sales; our brewery is in first rate condition and complete, and is in a position now to meet any larger demand. It is impossible of course to suit everybody's taste. One consumer would like to have the beer somewhat heavier or bitterer, another prefers it lighter, but our principle is to use nothing but pure malt and hops so that consumers may under any circumstances be convinced and sure that they obtain a pure and healthy beer, and I think that this will be the best means of securing a continued sale among our customers and the public generally. That our beer has not deteriorated from its former good quality will be seen by a new report from Dr. Divers, which I shall call on Mr. Walker to read to you.

Mr. WALKER read the report which, under date February 24th, 1891, stated that two samples of the company's beer had just been analysed which were designated in the report as No. 1 and No. 2. No. 1 was in bottles direct from the brewery, through Mr. Glover's agency, and analysed by his request. No. 2 was in bottles purchased about the same date, February 16th, 1891, for home consumption from Kameya's in Tokyo, and was analysed without the knowledge of Mr. Glover or anyone else. The report went on:—"These results prove the beer sent out from the brewery at different times to have been uniform in quality, varying only to the slight extent unavoidable in products of separate brewings even under the best management. They also show that any selection for the purpose of analysis that may have been made at the brewery has been of no effect, since the company's beer on sale in Tokyo has proved to be fully as good as that analysed at the brewery. The latter, however, was very bright, while the former was rather turbid when shaken.

"The beer is pure and perfect in composition, and evidently made from malt, hops, yeast, and water and nothing else. Its taste and aroma are considered to be excellent by the undersigned, who is, however, not necessarily better able to speak on these two points than any one else, and who only includes in this report any statement concerning them in case silence might be construed unfavourably.

"No beer can well claim to be more wholesome or of higher dietetic value than the samples here reported upon."

The CHAIRMAN said he supposed the meeting would find that report very satisfactory. With regard to the annual report he might mention that the annual expenses had been somewhat greater than usual during last year. This was especially due to the propoganda entered upon in connection with the Exhibition in Tokyo. The directors considered it best for the interests of the company that such a course should be adopted, and they hoped good effects would follow from it. If any further information was desired in connection with the annual report he should be very glad to answer any questions that might be asked.

No questions being asked,

The CHAIRMAN presumed that adoption of the report would carry with it the appropriation of profits as recommended by the directors. He therefore proposed the adoption of the report and accounts as presented by the directors.

Mr. MASUJIMA seconded the motion, which was agreed to.

Following is the report:—

REPORT.

The last Ordinary Meeting was held on the 17th March, 1890, and the last Extraordinary Meeting on the 7th April, 1890.

In accordance with the authority conferred upon the Shareholders at such Extraordinary Meeting, the Directors decided to increase the Capital by an issue of New Shares to the amount of $75,000, on the terms and conditions laid down in their Circular of the 12th June, 1890. The Directors are glad to say that these New Shares having been readily taken up, the Capital of the Company now stands at $150,000, fully paid up.

The result of the Company's business during the past year must be considered satisfactory; the sales show an increase in comparison with those of 1889, in spite of various exceptional circumstances that operated adversely to the consumption of beer generally: in particular the high price of rice, the unusually wet summer, interrupted communications owing to floods, and the dull state of the export trade. Beer is still regarded as a luxury in this country, and the demand for it must greatly be influenced by any causes that affect the prosperity of the people at large.

The fact of such increase in the sales conclusively proves the popularity of Kirin Beer and its superiority to any other beer; in this connection the Directors have pleasure in mentioning that the highest medal awarded to beer at the Japanese National Exhibition of 1890 was gained by Kirin, as well as the *Fiji Shimpo* Gold Medal for the best beer brewed in Japan.

The balance at the Company's credit on profit and loss account, after deducting the interim dividend paid in July, 1890, is $15,836.19.

And the Directors suggest that this sum should be disposed of as follows:—

| | | |
|---|---|---|
| A dividend of 6 % making 11 % for the year, 1890 | | $4,500.00 |
| Depreciation (a):— | | |
| Buildings 3 % | $1,380.98 | |
| Machinery 5 % | 1,959.73 | |
| Plant 7½ % | 1,498.12 | 4,838.83 |
| Reserve Fund increased to $10,345.85 (b) | | 4,295 85 |
| Carried forward to Profit and Loss Account, 189 | | 2,201.51 |
| | | $15,836.19 |

The Directors most sincerely regret the death of Mr. Abbott, which deprived them of the assistance of one of their oldest members and one to whose energy the early success of the Company was largely due. Mr. C. J. Strome joined the Board of Directors during the year, which now consists of Messrs. C. Rohde, T. B. Glover, E. Blanc, Shibusawa Yeiichi, and C. J. Strome. The Directors retiring are Messrs. Shibusawa Yeiichi and E. Blanc, but being eligible, offer themselves for re-election. The Auditors, Messrs. R. S. Schwabe and Donald Fraser, retire, but being eligible, the Directors propose them for re-election.

By Order of the Board of Directors,

WILSON WALKER, Secretary.

Yokohama, 13th February, 1891.

(a) The following has been written off for depreciation and wear and tear.

| | |
|---|---|
| Depreciation written off, 1889 | $6,213.83 |
| Wear and Tear written off, 1889 | 814.65 |
| Depreciation written off, 1890 | 4,838.83 |
| Wear and Tear written off, 1890 | 526.50 |
| | $12,393.81 |

(b) This Reserve Fund has been made up as follows:—

| | |
|---|---|
| In the year 1888 (first year) | $1,082.00 |
| In the year 1889 | 3,318.00 |
| In the year 1890 | 5,345.85 |
| | $10,345.85 |

GENERAL BALANCE SHEET TO 31ST DECEMBER, 1890.

LIABILITIES.—DR.

| | | |
|---|---|---|
| To Capital, 1,500 shares of $100 each fully paid up | | $150,000.00 |
| To Reserve Fund, including $1,050 premium on New Shares Sold | | 6,050.00 |
| To New Oriental Bank Corporation, Limited | | 18,328.13 |
| To Bills Payable | | 5,469.71 |
| To Sundry Creditors | | 578.08 |
| To Working Account Balance | $19,586.19 | |
| To Less ½ year Dividend paid in July | $ 3,750.00 | 15,836.19 |
| | | $196,262.11 |

ASSETS.—CR.

WILSON WALKER, Secretary.

We have examined the forgoing accounts and compared them with the Books, Vouchers, and Securities in the possession of the Company, and find them to be correct.

R. S. SCHWABE, D. FRASER, } Auditors.

Mr. WALFORD proposed that as the directors, as was evident from the accounts, had worked very hard in the interest of the shareholders, before appropriating the profits in the manner they had so generously suggested, the meeting should vote to the directors remuneration to the amount of $1,000

Digitized by Google

for last year, and further, if in order, he said he would propose that the remuneration be fixed at $1,000 per annum until the company should otherwise determine.

Mr. D. FRASER seconded the proposal, which was agreed to.

The CHAIRMAN said he was sure the directors were very glad to see that the shareholders appreciated the labours of the board, and they would be happy to continue their efforts in behalf of the company's interests.—(Hear hear.)

Mr. GLOVER proposed that the remuneration of the auditors be fixed at $300 instead of $200. The auditors had had a great deal of trouble, and he did not think $200 properly remunerated them.

Mr. ISONO seconded Mr. Glover's motion, which was agreed to.

The CHAIRMAN said the next business was the election of two directors, Messrs. Blanc and Shibusawa retiring in accordance with Article 81 of the Articles of Association, and the confirmation of Mr. Strome's election last year.

Mr. MASUJIMA proposed the reelection of Messrs. Blanc and Shibusawa and the confirmation of Mr. Strome's election.

Mr. ABEGG seconded, and the motion was adopted.

At this stage, on the suggestion of Messrs. WALFORD and FRASER,

The CHAIRMAN again put the report and accounts to the meeting, with the result that they were adopted.

The next business was the election of auditors, and on the motion of the CHAIRMAN it was decided to reappoint Messrs. Fraser and Schwabe.

Coming now to the resolutions, of which notice had been given,

The CHAIRMAN read the first as follows:—"To add to Article 116 of the Articles of Association of the Japan Brewery Company, Limited: 'They may, however, at the end of the first six months working in any year declare and pay without such sanction an interim dividend not exceeding 5 per cent. if they consider the business of the Company to justify them so doing.'" It would be remembered that in July the directors decided to pay a dividend of 5 per cent. According to the articles, however, there was no provision authorising them to do so, but they did, it on their own responsibility because they thought it a great convenience for the shareholders to receive dividends twice a year. On the other hand, they thought the directors should not have any responsibility, unless it were a moral one, and therefore this resolution was put forward.

Mr. FRASER said he thought it a pity that the directors had not acted somewhat differently. According to the report before them, the company was going to pay a dividend at the rate of 11 per cent. per annum. It might be, and he hoped it would be so soon, 12 per cent., perhaps more. Yet the directors confined themselves here to a half-yearly dividend of not more than 5 per cent. If they should find their purses large enough to justify them in declaring a dividend of 12 per cent. it would be a little awkward for investors and others to have a dividend for one half year of 5 and for the other of 7 per cent. He thought it a pity the directors did not leave the percentage out altogether. He supposed the alteration could not be made now, and therefore he would second the resolution.

The CHAIRMAN said it was very difficult to decide on the exact amount of the dividend. They considered this 5 per cent. as a kind of interest which the shareholders got on the money invested.

Mr. FRASER thought it would constitute an inducement to gamble in the shares.

The CHAIRMAN said of course the resolution must be taken as it was. They could not under the Articles of Association alter it. Under any circumstances he thought it was rather convenient for the shareholders to have 5 per cent.

Mr. FRASER said yes, it was better than nothing, but he would have preferred that they had left out the amount so that they could pay 6 per cent. However, he thought they could trust the directors with the extra one per cent.

Mr. GLOVER thought Mr. Walford would be able to tell them whether Mr. Fraser's suggestion would be in order as an amendment.

Mr. WALFORD thought it would be, but of course as the Chairman ruled otherwise he deferred to that view.

Mr. GLOVER thought that as the business of the company was likely to increase very much, and as next year they might be able to pay a dividend of 12 per cent. it would be to the interest of the company that the shareholders should have a dividend of 6 per cent. He proposed therefore that the resolution should read "— pay without such sanction any interim dividend which they may consider the business of the company justifies them in doing," or alternatively that "5 per cent." be left out.

The SECRETARY said no change could be made in the resolution. It had to be published in the Hongkong papers, and the resolution must now be considered on its merits.

Mr. GLOVER thought it better that the matter should be brought to the notice of the next meeting.

Mr. FRASER remarked that he had seconded the motion, and thought the point as to the percentage should be brought forward at another meeting. Must not these resolutions be confirmed at another meeting?

The SECRETARY said yes.

The resolution as it stood was then put and carried.

The CHAIRMAN now read the second resolution as follows:—"That Article 118 be altered to read as follows:—'The Directors may before recommending any dividend set aside out of the profits of the Company, such sum as they think proper for depreciation and reserve.'" You will observe, he said, that there was written off for depreciation in 1889 $7,028.48, in 1890 $4,838.86, and besides this the sum of $10,345.85 has been placed to reserve fund. If we continued to do this, provided of course the business continues favourable as heretofore, we would gradually build up a strong reserve, but at the same time write off the value of our buildings, machinery, &c., to a much lower figure than is necessary and than their actual value. You will find that we are forced to place one-third of our profits to reserve, but the Articles do not say anything about depreciation, and our opinion is that this Article which forces us to place one-third to reserve fund is intended to meet depreciation also. Should the business continue favourable for say 10 or 20 years we should have a strong reserve fund of perhaps $100,000, and, on the other hand, through writing off on buildings and machinery, have nothing left on that account. Of course it is always right to guard against reverses, but the directors do not think they should be forced to do it. It should be left to the directors to make their proposals at the end of the year, and it would be for the shareholders to alter or adopt the report.

Mr. ABEGG seconded the resolution, which was agreed to.

This concluded the business.

Mr. GLOVER proposed a vote of thanks to the auditors.

Mr. WALFORD seconded, and the compliment was duly paid.

Mr. FRASER said they were all agreed that the company was flourishing and doing well, a state of affairs that was in a great measure due to the care and management of the directors and secretary, to whom he proposed a cordial vote of thanks.

The CHAIRMAN briefly acknowledged the honour, and the meeting then separated.

## *YOKOHAMA GENERAL CHAMBER OF COMMERCE.*

The annual general meeting of the Yokohama Chamber of Commerce was held on Thursday afternoon in the Chamber's rooms at No. 61. Mr. A. O. Gay, Chairman, presided, and there were also present Messrs. J. Lindsley, J. P. Mollison, A. Winstanley, C. J. Strome, J. R. Merian, C. Giussani, F. Biagioni, E. Reiffinger, H. Spoerry, C. B. G. Dunlop, J. A. Fraser, W. B. Walter, A. H. Groom, E. B. Watson, A. Brent, J. D. Hutchison, E. Whittall, J. Rickett, J. Walter, Geo. Sale, W. Sutter, F. Grosser, M. Kaufmann, J. Holm, J. T. Griffin, Ed. Fribourg, A. Mottu, and W. J. S. Shand.

The notice calling the meeting having been read by the SECRETARY (Mr. O. Keil),

The CHAIRMAN said the minutes of the last regular meeting, held on the 28th February, 1890, had been distributed to all the members, and he would ask the meeting to accept those minutes without being read. If they were in order, it only remained for some one to move a resolution approving of them.

On the motion of Mr. MOLLISON, seconded by Mr. LINDSLEY, the minutes of last meeting were approved.

The CHAIRMAN said the next business was to receive the statement of accounts for last year. The result did not differ very much from the previous year; they had about the same balance at their credit as they had then. Had any one any questions to ask about the accounts?

No questions were asked, and on the motion of Mr. LINDSLEY, seconded by Mr. WINSTANLEY, they were adopted.

The CHAIRMAN said the next business was to consider the report for last year, a portion of which he read, omitting, however, the paragraphs relating to trade which, he said, were put in the report more for purposes of record than for anything else.

The report and accounts were as follow:—

### RRPORT OF THE YOKOHAMA GENERAL CHAMBER OF COMMERCE, FOR THE YEAR 1890.

At the last annual meeting of the Chamber the subject of the inadequate accommodation at the Custom House for the business of the port was again taken up, and after some discussion it was recommended to the attention of the incoming Committee.

In accordance with that resolution, a communication was addressed to the Doyen of the Diplomatic Corps, enclosing a transcript of the correspondence which had passed between the Chamber and the Superintendent of Customs, and requesting that the matter be brought to the notice of the Minister of Foreign Affairs. Identical letters were addressed to the other Foreign Ministers, and the replies received promised attention to the subject. But no later communications have been received, although your Chairman has been informed that the matter was laid before the Minister of Foreign Affairs, without result, however, so far as any improvement at the Custom House is concerned. In fact, a worse state of things has existed than before, as, during periods of activity, business has been temporarily suspended for want of landing accommodation, and merchandize has sometimes been left on the Hatoba without shelter, or in open boats, while great confusion has existed under the sheds and frequent damage to cargo has been the consequence.

It remains now for the Chamber to determine what further steps, if any, shall be taken in this very important matter.

With reference to the matter of titles to Real-Estate in the foreign settlements, concerning which the Chamber addressed the Foreign Ministers in March, 1889, as the subject was taken up by the foreign Community at a meeting held on the 11th September last, nothing further seems necessary to be done on the part of the Chamber at present

It may not be out of place here to record the important political event which occurred last November in the opening of the Diet under the new Constitution. This body, with its Lower House, coming from the people, cannot fail eventually to have an important influence upon the councils of the Government.

Several causes have injuriously affected the trade of the port during the past year, amongst which may be mentioned the short crop of rice—the great staple product of the Islands—in 1889, followed by a diminished yield of barley last season, with consequent high prices for food throughout the country; the smaller yield of silk than for the previous two years, and the poorer markets abroad, and the unusual fluctuations in exchange caused by the changing value of silver in New York and London, thus rendering the cost of merchandize, both exports and imports, very uncertain.

A table of the highest and lowest rates of sterling exchange for each month during the past year, is appended to this report, showing the extremes to have been 25 per cent.

To show the effect of the short crop of rice just referred to, which required an import of grain instead of the export as in normal years, the net import for all Japan was valued at $10.881,373, for 1890, against a net export of $7,298,186 in 1889, making a difference against the last year of $18,179,559

The trade of Yokohama shows an increase in Imports of $6,324,845, and a decrease in Exports of $9,530,139. The first is owing to the import of rice and the last to the diminished export of silk. This latter article is $12,050,000 less, while silk fabrics and copper together are $4,147,150 more than for the previous year.

Deliveries of merchandize have decreased considerably, and stocks of yarns and piece goods have visibly increased.

Yarn, the largest article on the list of imports, has fallen off 22,500 bales, as compared with the previous year. This is partly to be attributed to the deranged state of trade, and partly to the product of native mills with foreign machinery. A list of the mills, with 313,040 spindles, is appended to this report. They are largely dependant upon cotton imported principally from China. The total production is not accurately known.

Looking at the total foreign trade of the country, it will be seen from the tables that the imports have increased $15,624,815; this is explained by the large receipts of rice and increased quantity of sugar, while the exports have diminished by $13,457,200 owing to the smaller quantities of silk sent abroad, aggregating $18,6,8,000, the difference of $5,186,000 being made up by larger shipments of copper, tea, and some other articles.

Further and more particular details of the business for the past year will be found in the tables appended to this report.

The annual accounts of the Chamber are submitted, showing about the same balance at credit as the last.

Thanks are due to Messrs. D. Fraser and J. R. Parsons for their services in auditing the accounts.

In closing, it may not be inappropriate to mention that this year is the twenty-fifth anniversary of the establishment of the Chamber. There are now here but two individuals who took part in its formation, and who were on its first Committee. The list of

Digitized by Google

members has also greatly changed, but there are still a number whose names were on the original list.

Some of the early records were destroyed by fire several years ago, but what remains may be of interest to those who care to enquire into what took place in the early days, and some portions of them may, hereafter, be of value in the history of the foreign trade of Japan.

ARTHUR O. GAY, Chairman.

## Value of Imports and Exports for all Japan during the years 1890 and 1889, as furnished by the Imperial Customs.

TOTAL VALUE OF IMPORTS.

| | 1890. | 1889. | Increase. |
|---|---|---|---|
| Yokohama | $40,645,762 | $34,320,917 | $ 6,324,845 |
| Kobe and Osaka | 35,391,523 | 28,166,773 | 7,224,750 |
| Nagasaki, Hakodate, and other ports | 5,691,296 | 3,616,076 | 2,075,220 |
| | $81,728,581 | $66,103,766 | $15,624,815 |

TOTAL VALUE OF EXPORTS.

| | 1890. | 1889. | Decrease. |
|---|---|---|---|
| Yokohama | $32,331,990 | $41,862,129 | $ 9,530,139 |
| Kobe and Osaka | 17,406,593 | 20,592,566 | 3,185,973 |
| Nagasaki, Hakodate, and other ports | 6,864,923 | 7,606,011 | 741,088 |
| | $56,603,506 | $70,060,706 | $13,457,200 |

| | |
|---|---|
| Total Exports and Imports 1890 | $138,332,087 |
| Total Exports and Imports 1889 | $136,164,472 |
| Total increase of the trade of 1890 | $ 2,167,615 |

| E. & O. E. | $5,839.80 |

Yokohama, 31st December, 1890.

O. KEIL, Secretary.

Examined and found correct, 19th February, 1891.

D. FRASER
J. R. PARSONS } Auditors.

The CHAIRMAN said he should not omit to refer to the new accommodation they now had, which was much better than they had ever had, and for which they had to thank their energetic Secretary, who had placed these rooms at their disposal at a very moderate rent. They would observe that one matter in the report was referred particularly to their consideration, and that was as to whether anything further should be done in regard to the difficulties at the Custom-house. The correspondence relating to the matter had been published in the annual report of the Chamber.

No remarks being made,

The CHAIRMAN said he would conclude from the silence of the meeting that they had nothing to offer in reference to the subject he had just referred to. If there was any other portion of the report that they wished to discuss, now was the opportunity. (No member of the meeting having anything to say the Chairman continued.) They would now proceed with the other business of the meeting, the first of which was to elect a Chairman for the ensuing year. In reference to that he begged them to consider that he was not a candidate, that he did not offer himself for re-election. His two years' service, he thought, ought to be sufficient; and there were plenty of good men who ought to take his place.

A ballot was then taken, with the result that the highest number of votes, eleven, was given for Mr. J. A. Fraser.

Mr. FRASER said he was very much flattered by the choice of the members in fixing upon him as Chairman for the coming year, but he regretted extremely that it was not in his power to accept the position. He felt quite unable to undertake the duties of the office. He had already on a previous occasion filled the chair and endeavoured to discharge the duties of the post to the best of his ability. He was, however, a member of no less than four Committees in Yokohama, and Chairman of two. Under the circumstances he thought he might justly claim to be excused, especially in view of the fact that the membership of the Chamber was by no means a small one, and there was a considerable field from which to choose.—(Applause.)

The CHAIRMAN said the next on the list was Mr. Lindsley.—(Applause.)

Mr. LINDSLEY said he must decline the honour of serving as Chairman, for the same reason as that which influenced Mr. Fraser. He thought also that as they had had an American in the chair for the past year, it would be better to have some one of another nationality.—(Applause and "No, no.")

The CHAIRMAN asked Mr. Lindsley if that decision was final.

Mr. LINDSLEY said it was. He must decline for the same reason that Mr. Fraser gave; he had not time to attend to the duties of the office.

Though urged to change his mind, Mr. Lindsley adhered to his decision, and the meeting therefore proceeded to another ballot the result of which was to place Mr. Hutchison at the head of the list. The Chairman's announcement of this fact was received with applause.

M. HUTCHISON also declined the office. There were several reasons, he said, why he could not accept the honour.

Mr. W. B. WALTER now rose and said he was afraid they had got into such a state that they could not elect a Chairman. He would therefore propose that the election of a Chairman be left to a general ballot of the members of the Chamber, to be taken at the discretion of the incoming committee.

Mr. BRENT proposed as an amendment that the present Chairman be asked to retain the position for another year.—(Applause.)

The CHAIRMAN did not know whether either of those proposals was in order. Certainly the ballot had to be taken here. Under the circumstances it seemed to him that the better plan would be to hold an adjourned meeting for the special purpose. The rules provided that the Chairman, Vice-Chairman, and Committee should be elected annually at the general meeting to be held in January or February in each year. That had to be done now therefore.

Mr. WINSTANLEY thought that about four years ago they came to a dead-lock such as this, and perhaps what was done on that occasion might form a precedent now.

Mr. W. B. WALTER asked whether it would be in order at the present meeting to propose an alteration of the rule to the effect that the Committee should elect its own Chairman and Vice-Chairman.

The CHAIRMAN read the rules bearing on the subject, and pointed out that the rules could only be altered at a meeting called on requisition for the purpose.

Mr. RICKETT seconded Mr. Brent's amendment, remarking that the Chairman's assent was all that was required. There would be no doubt then about the election of a Chairman, and it would help the meeting out of the present difficulty.—(Applause.)

The CHAIRMAN said he was very much obliged to the proposer and seconder of the motion, which, however, was quite contrary to the determination that he had arrived at. After serving two years now, and two years long ago, he considered he had done his share.—("No, no.") There were many gentlemen who were well fitted to occupy the post, and if they would decide on one of them it would suit him much better. Under any circumstances, election by a resolution was scarcely in order. At any rate it was not in conformity with the practice from the beginning. It had always

Digitized by Google

been done by ballot, and he would ask the meeting therefore to ballot again.—(Laughter.)

On a ballot being taken, Mr. Gay was elected Chairman.

In acknowledging the compliment,

Mr. GAY said that under the circumstances it seemed to him that he could not decline the office.—(Applause.)

The ballot for Vice-Chairman resulted in the election of Mr. Winstanley, who, in returning thanks, hoped it was understood that Mr. Gay was not, as Mr. Fraser did, going home for another year.—(Laughter.)

The CHAIRMAN replied that he had not made up his mind to do so at present.

Mr. W. B. WALTER gave notice of the following amendment to rule 10—"The business and funds of the Chamber to be managed by a committee of nine members to be elected annually at the General Meeting of the Chamber during January and February in each year, such Committee to choose its own Chairman and Vice-Chairman." Mr. Walter went to remark that he concluded from the general silence of the members on the subject of the report that perhaps most of those present thought the less that was said as to the results of the trade of Yokohama during the past year the better; and in truth he feared that the general results of that trade must have been disappointing to the members of this Chamber. The increase which the report noted in imports of $6,324,000 was, he felt afraid, nothing but a delusion and a snare as regarded the foreign merchants of Japan. It simply meant that their godowns had been crammed during the past year with goods which they had been unable to sell, and which would in great part have to be held over and would only give their results during this coming year. Tea, which at one moment offered a fair prospect, had not towards the end of the season given such good results as were expected. As to silk, they had to realise during 1891, a great part of the crop of 1890, which was usually sold and shipped during the autumn months. Let them hope that during the coming year they might see a much improved condition of things in Japan, and that at next meeting of the Chamber, the Chairman might be able to report a much more satisfactory condition of affairs than had been seen during the past year.—(Applause.)

The ballot for the Committee resulted in the election of Messrs. Merian, Mollison, Lindsley, W. B. Walter, Brent, Hutchison, and Dunlop.

On the suggestion of the CHAIRMAN,

Mr. MOLLISON proposed, and Mr. LINDSLEY seconded a vote of thanks to Messrs. D. Fraser and J. R. Parsons for auditing the accounts.

Mr. FRASER said before they separated he would like to propose a vote of thanks to the Chairman of the Committee.—(applause)—not only for his services during the past year, but for again putting himself in the breach and going forward at a time when other members of the Chamber—the speaker himself, he regretted to say, among the number—had not the same amount of public spirit as he had shown in the matter.—(Applause.) In moving this vote of thanks he would like to go a little farther than was ordinarily done on such occasions, and it might be of interest to the meeting if he were to point out that this day twenty-four years ago Mr. Gay filled the office of Chairman.—(Applause.) Attention was drawn in the report to the fact that this year was the twenty-fifth anniversary of the establishment of the Chamber, and that there are now here but two individuals who were on its first Committee. Well, their worthy Chairman was one of those two individuals.—(Applause.) He filled the chair twenty-four years ago, in 1867. In that year Mr. Gay was Chairman, Mr. A. J. Wilkin Vice-Chairman, and if it would interest the meeting to know the names of those composing the Committee, they were Messrs. Marshall, Lindau, Bruyn, Van der Tak, Lejeune, Walsh, and Wheatley. Some of those gentlemen were still alive, but no longer in this country; many of the others had already joined the majority. But it must be a satisfaction to the present members of the Chamber, and he was sure it must be a satisfaction to the Chairman, that he had been so long connected with the Chamber; that during those twenty-four years he had been a witness of the great changes that had taken place in this country, of the unexampled progress that had been made by it; and it must also be a source of satisfaction to him to know that this Chamber, over which he presided twenty-four years ago, had had its life prolonged during these years, had made progress, had its membership increased, and had been, he thought, of some service to the mercantile community. He trusted Mr. Gay might be spared to preside over its counsels as he had kindly consented to do for another year, and that the Chamber might long flourish as it had done in the past.—(Loud applause.)

Mr. GAY said he was very much obliged to Mr. Fraser for the flattering way in which that gentleman made reference to him. He could very easily go back in memory to those early days, and latterly he had refreshed his memory by referring to the minutes of the Chamber, which fortunately were preserved from two conflagrations that destroyed a good many of the records. It was unnecessary to say more. He had always taken a great interest in the Chamber from the very first, except during the brief period that he spent in Kobe. He still felt that interest in it as he did at first. He was glad that there were now so many members in the Chamber who also took an interest in it, and lent their valuable aid to further its prosperity. He should depend on them again as he had done heretofore to aid and assist him in the work.—(Applause.)

This brought the meeting to a close.

## *THE WOOING OF WEBSTER.*

BY A. M.

TOLD UNDER THE JOGASHIMA LIGHTHOUSE, MISAKI, JULY, 1888.

"I-yah! Here we are! Down among the wind-whisked tussocks there is good!

> Brother, let us take together
> An easeful period.
> There is worse than to be as we are—
> Cast out, not of men but of God!

Although it's petticoats that's the matter with us," Webster muttered as he threw himself down upon the seaward slope of the gorse.

"Now then, you crack-brained descendant of a line of lunatics, what are you after, and what infernal doggrel is that?" I asked, as I accepted his suggestion and planted the breadth of my back among the bracken.

"It's peace and quiet, and relief from the sight of flounces and petticoats, and of female ankles, slim, beefy, and intermediate that I'm after, and as for the poetry, your imputation is a dirty libel, for which I've a mind to punch your head!"

"Don't for goodness sake! Once in a life-time is ample. I shall never forget the way you got in that jaw-smasher. Confound you! It sets my teeth all on edge and my head humming like telegraph wires when the wind is screaming across the Plains of Heaven to think of it now, and it's the best part of twenty years that lies on this side of that blow."

"Well, and didn't you deserve it, my son? I had come up, a raw Scotchey—first time south of the Grampians—and you and your eye-glasses and your rings, and your scarf-pins and your watch-chains and your seals and your other fal-de-rals must needs poke clumsy jokes at Sandy's Glengarry and the architecture of his clothes generally, with a few rasps at the matter of his 'awk-cent' in the passing. Well, Sandy turns on his heel and comes right up to you and tells you that if these were Oxford manners he don't think much of them. Then you all sniggered, and made audible side remarks—talking *at* a man and not *to* him,—which after all is only a dirty woman's or parson's trick,—and as your nose seemed to support the most aggressive and discomposing eye-glass in the whole crowd I just brought the back of my left hand across it as forcibly as I could without irretrievably ruining its frailty. Remember what happened next?"

"Ra-ther." I answered ruefully—"Or at least part of it.

"Was it two rounds, or three now?" he went on meditatively. "Perhaps it was three. Anyhow, I recollect I had just knocked you over and was taking down my sleeves when a scout rushed up with the news that the lists were out and that the Scotchey had got the first scholarship."

"A promising beginning for a Damon and Pythias friendship wasn't it?"

"With an Englishman, yes! You see you are queer folks south of the Tweed. If a man is to get on with you he must do one of two things; he must either give you a thorough, jolly good hammering straightaway to begin with, or he must conclusively show that he can do it if you give him any occasion to. After you've broken the ice in that way, and shown John Bull that you've grit in you, he is one of the finest fellows to get along with in the world. Sticks to you like a leech when you get into a tight fix, and gives himself all manner of trouble to get you out of it, and won't let you say even so much as thank you for his pains! Oh! You've got your good points you Southrons, but a man has to begin by fighting you to find them out. If he licks you, so much the better; though if he makes a good stand-up set-to of it it's enough. Yes, my son, we got on very well afterwards, although we Balliol Scotchies used to get called 'hard-headed brutes' by way of a compliment."

He relapsed into silence and puffed vigorously at his dearly-beloved meerschaum.

That meerschaum was a joy to look at, and, as Webster said, a still intenser joy to smoke. But that last averment had to be taken on trust, inasmuch as Frankie took very good care to let no one put the thing to the practical proof. That cutty was for Webster's own cheek, and for it alone; and any one with the temerity to defile the stem of its sheeny sanctity with an unchaste and adulterous kiss, would in all likelihood have come in for something a good deal more lurid and lambent than the curse of Reuben itself. You might flirt with any or all of the odd 20,000,000 petticoats in Japan without Frank ever so much as hinting that you were either a thief or a poacher; but just touch that precious pipe, and you might mistake the hole he usually kept it in for the front entrance to Tophet! Swear! Swear do you say? Sakes alive! a sailor-man's parrot was nothing to him! He would blaspheme in thirteen different languages, not counting dialects, among which latter Bullock-drivery and Aberdeenshire Scotch had the most pronounced and pungent flavour of raciness and profanity.

For the best part of ten minutes he lay still and said nothing, and I was equally eloquent. It was at Misaki, two summers ago,—or was it three? Right in front of the mill-pond they misname the harbour lies a great ill-conditioned hobbledehoy sort of a lump of an island, called Jogashima. Folks are not quite agreed what purpose Providence had at the root of its wisdom teeth when it dumped it there. Professor East says its circuit must have been meant as a short distance sailing course. But then on a matter of this sort East's opinion is not worth half the price of a second-hand pair of braces. He is a crank on yachting, and so far gone on it is he too, that he not only makes it an unholy engine of systematic Sabbath-breaking, but he seems in imminent danger of losing his immortal soul into the bargain. He has been heard to assert that if he croaks and goes aloft and finds that there's no provision for periodic sailing races among the Saints, he means to petition the authorities to let him have a passport to navigate an asbestos 27ft. rater on the Lake of Fire and Brimstone.

We—that is one-half of a detachment that afterwards become martyrs to science—were camped in the single house on the landward shore of this island, just at the mouth of the mill-pond. There were two Daigakko Professrs besides East, with a consignment of nitro-glycerine and infernal machines sufficient to dismember the whole Royal Family of Russia, and to leave something over for fireworks to celebrate the joyful event. Then there was Webster, sub-editor of the *Yokohama Snorter*, who had come down to write up the expedition for his rag. I had come along, partly out of a mild curiosity, and partly to kill time.

This afternoon about five o'clock a steam-launch had run in with a cargo of petticoats from the Treaty Port. Webster looked at them getting into the punt to land with holy horror writ large on every wrinkle of his ugly phiz, and then he tapped we on the shoulder and asked me if I shouldn't like to sniff the evening breeze up under the Lighthouse. I don't dislike female society at all,—there are lots of good points about it,—but Webster did, and I didn't like to be thought unneighbourly. So I said I didn't mind; and here we were.

It was very beautiful and very picturesque and very romantic, but more than ten minutes doing nothing beyond watching the dip of the sun over the shoulder of Fuji gets beastly and abominably slow. So I gave Webster a kick in the ribs, and inquired the why and wherefore of his misguided misogyny.

"Don't punctuate your impertinent remarks on tender parts of my person with your dirty-shoe leather in that way, please, and I may see fit to gratify your curiosity!" he said catching me by the foot, and almost wrenching my leg off.

He sat up, and, taking out his tobacco pouch, began to refill his pipe with more than the care of a mother administering the feeding-bottle to her four months old first-born.

"Well, it is this way, you see. In the matter of women my virtue has been deficient from the start."

I couldn't help roaring at this compendious statement, made as it was was with such grave and portentous solemnity.

"Well, you're a shallower fool than I took you to be, and that's saying a good deal," he expostulated, evidently considerably ruffled. "I don't mean to say I have been an immoral man in the usual sense of the word,—'cause I haven't, or at least only so in moderation. But Socrates says—rake the cinders of your classical recollections for

Digitized by Google

the precise Dialogues—that virtue and knowledge are the same thing, and I'm inclined to believe he's on the spot when he says so. Now I'm speaking in the Socratic sense. I didn't know any women when I was a kid. I had no sisters. I never ran across any females, except cows and cats and hens when I was a youngster, and consequently when I tackled them as a grown-up I came an immortal howler! Hey! Ho! But I did come the blooming idiot with them!"

He clasped his hands over his drawn-up knees with the stem of his dearly-beloved between his two forefingers and the middle one and looked dreamily and weariedly toward the smoke-wreaths heavily oozing from Oshima.

"What sort of a howler did you come?" I asked at last.

"What sort? He placed the pipe in his mouth and struck a match. "Oh," he said slowly and nonchalantly as he threw the flickering vesta over his shoulder. "Oh! I only took them seriously!"

"How?" I queried. "Spin us the yarn. Out with the autobiography!"

"No, that's altogether too big an order. But say; you knew me in Oxford. Well, a woman sent me there and that wasn't so bad. You knew me ten years later in Australia."

"Yes. Shan't forget the fine morning I pinked that 'gater for you in the Fitzroy. That was a near thing, my boy!"

"It was. It was an odd meeting. I fancied it was a cedar log and I was much discomposed when it snapped at me. That was a fine shot of yours. But never mind that. I say a woman sent me to Australia. That was bad. And it was a woman that drove me from Australia, which was worse. Now the latter two episodes are not for publication—at least just at present, because they're other folks' secrets as well as mine. But the first piece of foolery will help to pass the time of day till these minxes think it time to retire for a fresh coat of paint. So here's how it came to pass that you got that first-class licking in Balliol quad.

It was in the kirk that the mischief had its commencement. There was a gallery round three sweeps of the circle and the pulpit occupied the fourth. I sat down below to the left of the rostrum where the Holy Man of God ranted and banged the Bible, and raised the stoor from the cushions in aureole-like clouds. *She* sat in a plush cushioned seat in the front of the gallery to the right side of the Laird's Pew which was just *vis-à-vis* to the Devil-dodger in action. My seat had no cushions; they weren't fashionable in our quarter of the kirk, you see. The benches we sat upon might have been built for stools of repentance; they were hard enough and uneasy enough anyhow. Yet I wouldn't have swapped positions with any soul in the building. Because, you understand, I could feed my e'en on *her* all the time, during the Prayer even, through the slits, twixt my outspread fingers.

"Of course, I was below her,—in some ways. My folks had been swinkers and hedgers and hinds and drudges on the lands of a master off and on for generations. That is my father's forbears. But, notwithstanding that, we have our coat-of-arms and can trace ourselves right away back to the day of Bannockburn when we got them. My mother—she died when I was a brat in the cradle—was a Macdonald of Glencoe. And if we didn't have the dollars to maintain our dignity, we had pride enough any way to say nothing about it. My governor in spite of his drudging was the most outspoken wight in the country side, and made Minister and Laird alike sit up and listen when he had a mind to. When the innovation in the posture of prayer came about in the kirk, he stood up like the valiant man he was and led a forlorn hope of one against the embattled authorities. God rest his soul—he had spunk and smeddum for a barnful."

"But he had also a plentiful lack of bawbees, because he was too honest to get rich by over-reaching his neighbours. Therefore his son had to work. I was thirteen when I was introduced to the dignity of labour and the blessings of industry, and twelve hours a day was the tale of my toil and fourteen on Saturday which was pay-day,—it being highly proper that apprentices should be duly prepared to appreciate the holy calm of the Sabbath. I didn't put on much flesh at that business. You can't get into anything like decent condition on half-a-crown a week, which was the sum total of my income. Four hungry years of this soul-eating treadmill, during which my only joy was stolen snatches at books I kept hid in holes all over the shop, and then one day I met *her*. She was on her pony; and in that hat and tight-fitting riding habit you might guess she was a picture, and you would be right. She dropped her whip and I picked it up and gave it to her."

Here Webster put his left palm on the crown of his head and brought it slowly down the side of his face, finishing the motion with a quick outward sweep of the opened fingers.

"Whoo-osh!" he said. "She gave me a flashing smile, and her e'en went though me and thrilled me like a battle-song. I stood still in my traces with my blood tingling and my heart thumping and a commotion among the molecules of my soul such as I had never felt before and never will again! Even all the gloriousness of the best Glenlivat is powerless to produce it.

Ah, me! I was drunk, drunk, reeling drunk with love! That was on a Saturday; I didn't sleep all that night, yet on Sunday I was as fit as a fiddle. I didn't pay much heed to the Rev. John MacFadyen's homilies on Original sin and Hell-fire and Damnation For Ever that day. But I was thinking; and by the end of the sermon I had made up my mind, and then when it came to the Psalm, although I can't sing worth a cent I got up and joined in "I to the hills will left mine eyes" with all the stern determination of a death-doomed Covenanter before Drumclog or Bothwell Brig. That swelling outburst of the weird old wailing battle-tune that erst while sounded by the lonely tarn and on the bleak hill-side put the sword of the Lord and of Gideon in every one of my three and thirty vertebræ and I determined to do it."

"*It* meant wooing and winning and wearing her, and it was to be done in the way that Scotchmen climb usually,—through the University. I had heard something about Bursaries at Aberdeen and I found out more, and I meant to get one. Just then, as luck would have, a new Dominie had taken to wielding the trawse in the Parish School, and he had been fourth bursar in his time, which was no small beer for a schoolmaster. I went and saw him, and told him what I wanted, and he said if I meant business he would give me a trial. He gave me a fortnight's show and then he asked me to help him in the school. Those were the times I worked! Sixteen hours a day and sometimes two and twenty, and two meals to keep the machinery in motion. I had a fireless closet to sit in, where the rats played hide and seek beneath the door in summer, and the snow came drifting through in wreaths in winter, Hardship! Pouf! It was none! In a case of that sort you haven't time to feel it! Every Sunday I saw *her*, and that was meat and drink and fire enough for me in those days.

"Well, I contrived to pack away in a little more than one year, the work that takes most folks six. At last the competition came. It was a tussle. My heart sank a bit when I looked round on a sea of two hundred and forty faces all on the same errand as myself, and all meaning business. But I thought of the plush cushioned pew in the front gallery of the Auld Kirk and I screwed my courage up to the sticking point, and I went in with all my heart and with all my strength, and with all my soul, and with all my mind.

"We finished on a Wednesday; on a Saturday the result was to be announced.

On the afternoon of that day the quad of King's College was seething with a roaring sea of student life. At last the Senatus room door swings open, and the Janitor with a mace as big as himself steps out. We have just time to catch a glimpse of the long file of Professorial robes that flutter solemnly behind him when we are carried on the crest of the crush right into the hall, which looks like a cross 'twixt Pandemonium and Donnybrook Fair. Meanwhile the Faculty has filed on to the platfrom by a side door, and the Principal sits him down in his chair of state, in all the dignity of robes of office and (wonder of wonders) for once in his life, of clean linen. Gradually the uproar subsides, and the Principal slowly upends himself, clears his throat and begins.

"Gentlemen (tremendous cheers) you will now, learn (a voice, "the hundred and nineteenth Psalm") the result of the competition for Bursaries just held. And I hope you will behave yourselves, for this uproar is perfectly disgraceful!"

The Secretary of the Senatus opens a roll of papers, coughs, and then in mellifluous accents takes up his parable.

"The first Bursary to be disposed of is a Simpson Bursary of £35 in annual value, and has been awarded to the first in the order of merit, Mr. Francis Webster."

"That was a moment, my son! A moment worth two years, six years, ten years of an ordinary life! I have never heard, and never shall ever hear music like that cheer. You see I had just as good as breasted the tape first from fifty yards back of scratch in the quarter, and they knew it and shouted like wild things! No! No!" he sighed. "that comes but once in a lifetime."

I said something about the ovation that greeted him when he spread-eagled seven Victorian wickets for 46 in the Intercolonial on the Sydney Association Ground.

"Pouf," he said, flipping his fingers. "That was nought! That was only for honour and glory; *this* time I was fighting for *her*. And it was only *her* that was in my mind when the desks were jumping and the room was ringing with the cheering. Ow! The best game is but poor fun when you're only playing a lone hand for your filthy dirty self!

"Of course I was the talk of the parish, and next Sunday I got far more attention from the congregation than the minister himself. She came right up to me at the door at the skailing of the kirk and she shook me by the hand and said, 'Oh! I am so glad, Mr. Webster!'

"Heavens! man, that touch sent the blood swirling through my veins like the rush of the Dee in spate. I walked home with her, in Elysium, but worshipping humbly.

"Then I went to college and sat down to the stroke. The previous pace now told heavily on me and I could bucket no longer. Then I broke up physically and could do no work, and folks thought I was done for. I wasn't though. In the midst of it all my head was as clear as a Queensland sky when an eighteen months drought is hanging there, and just sixty degrees cooler. I didn't work much, but I worked with a purpose and never threw away a single shot. In those times there was a pith, a verve, and a spin in my stuff that was not of myself at all. It was inspiration. I was a poet in those days!" he said softly and absently; "a real, live poet!

"Man, you needn't laugh!" he protested. "It was true! No! I didn't pour out my immortal soul in agonies in the Poet's Corner of the *Aberdeen Free Press*, or spoil good ink and paper by scribbling halting doggrel. But a 'maker' I was for all that, and a right powerful 'maker' too. The music of energy was humming in my head when I went to sleep, and singing in my heart when I awoke.

"I lived on the hill-tops and trod on rolling clouds, and although my fleshly knees tottered and my breath came hard in pants, I felt in my soul the mighty tread of a charging Highland battalion. I was strong, strong, strong in those days!

"Well the exams came round and I was right on the spot, and I knew it. You know that springy sensation through all your frame when it's your day out with the leather, and you *feel* that the batsman is not born of woman that can keep you out of the wicket? Well that was me, that time! There were five events, and I ran clear first in four of them, and first equal in the fifth. And that, my son, is a record in the old shop even unto this day! And to this day I marvel how it was done. There were smarter men than I in the race, but *they weren't in love*, you see, and that perhaps made all the odds.

"Of course this brought me nearer her, but still I veiled my eyes and adored from afar off. What was in my mind I kept to myself hard and fast under lock and key in the innermost recesses of my heart.

"Next year came, and I braced me again for the tussle. And well had I need to, for half a dozen better men than I had sworn to press me hard and lower my colours between them. I was to be pounded front, flank, and rank with horse, foot and artillery simultaneously. But I didn't fear or flinch.

"At Christmas I go, home, and went, of course, you know where. Some times I would meet her on the road; she once remarked that it was wonderful the number of times accident brought us across each other.

One afternoon I met her in company with a local squireen, Kinnaird by name. He was a man that held his head high when he went among poor folks, and generally rated himself at an outrageous social valuation, all because his father had been a laird and he hadn't to work for his living. Once, three years before, he had thrown the bridle of his horse to me at the Town-Hall door as if I had been his flunkey, and I hadn't quite forgotten the favour. I just lashed the brute across the quarters, and Kinnaird had to trudge home through the mud on shank's mare swearing many an ugly curse by the way. Well this afternoon, of course when I met her, my bonnet went off like a shot and I got a flash of her eyes that was as meat and drink to my soul for a week of Sundays. But my lord of a lairdie would have it, an't please you, that my salute was an obeisance to his squireenship, as if forsooth I'd ever stoop to unbonnet to a cuif like him. So he stared at me with an insolent puckering of his eyelids, and honoured my insignificance with the curtest of impudent nods by way of acknowledging my kow-tow. That was too much for the first-born son of my mother to stomach, so I wheeled round on my heel with the red bluid i'my veins hottering like water bubbling in a pot when the fire

Digitized by Google

is lowing beneath it Miss Murray just then went into Lyons the draper's shop and my lairdling gets strutting up and down and swinging his cane waiting for the end of her marketing. So I step right up to him, and remark very quietly:

"Mr. Kinnaird, my head is as good as yours and perhaps a trifle better, and when I lift my bonnet your hat has to come off too!"

"He looked dumfoundered and then blurted out something about insolence and impudence with adjectives prefixed.

"I said nothing more but just swept his tile into the gutter by way of teaching it manners. He tried to cut me across the face with his cane, and he did. But next second it flew into flinders and then it was fists on both sides. He was a man,—four years older and thirty pounds heavier than I; but he was heavy and lubberly and whiskey-sodden, and I was lithe and limber as the best in those days. We hit out and then I feinted and dodged and caught him a right-hander under the chin just on the apple of the throat. It lifted him off his legs and landed him frock-coat and all atop of his tile in the slush. I didn't wait for *her* to come out, but next time she met me she smiled in a way that told me she had heard all about it and that I hadn't been crossed out of her good books in consequence thereof. Yes, my son, when a woman's involved, never put up with sauce. Hit out, clean and straight, and if there is to be any mercy shown to the other fellow, leave that part of the business to the Lord!

"Well the second session came to an end, and I was in it again right up to the neck, with four firsts and a third, the latter of which was a slight miscarriage by reason of a raging toothache I had on the day of the exam. Folks told me I was as good as made (which I was half-inclined to believe) and that I was a genius, which I knew perfectly well was so much arrant rot. But I wasn't fool enough to proclaim the source of my strength from the house-tops. Strength, did I say? I'd better have said weakness."

He paused and his face darkled as if he had just raked up an evil memory.

"Yes!" he went on. "Weakness,—worse than womanly weakness! I was as good as made; therefore I was entitled to speak. And I did. Twelve pages of closely written note paper was the extent of the statement,—twelve pages of the hottest and intensest copy I ever threw off. I told her all—the whole thing from the beginning, simply enough without either beating round the bush or rodomontade. At least I didn't think it was rodomontade. It was all so unaffectedly genuine. I meant every word of it right up to the hilt. Now when I come to consider the matter, as a piece of composition, it *may* have been a trifle over-florid.

"In a week I got an answer. 'Very much honoured, and highly flattered,' and all the rest of the formulæ that some months afterwards I discovered in the 'Lady's Complete Letter-writer.' But she didn't promise 'to be a sister to me' in so many words, and so I didn't lose hope. Of course she didn't say "yes," but then according to all I had read about women folks in story-books that wasn't quite their way under the circumstances. So I carried her letter about with me in an inside pocket on the left of my waistcoat and read it twenty times a day with thrills running all through me when no one was near to see me playing the blooming idiot.

"In the vacation I was in the country and saw her once or twice a month or two afterwards. She was wonderfully kind, although there was something in her manner now and then I couldn't quite understand. Sometimes I even got an uneasy suspicion that she was quizzing me; and once I was as sure as death that she was laughing at a matter that I thought very grave indeed. And a worshipper doesn't like to be made a mock of by the flashing-eyed goddess Athena, when he is so serious and devout in his adoration as I was. And day by by this uneasy feeling waxed apace.

"At last the crisis came, and its happening was on this wise. I used to go pulling with a mate round by the old Castle on the cliffs. A devil he was to sit behind when he was in fettle, for he had the style of a Hanlan and the stay of a Beach. I used to cook him by taking the stroke thwart, but that has nothing to do with the story. One evening we went out for a spin, and not far from the Castle-scaur we passed close in shore, just clearing the rocks with our feather. I saw some shells on the face of the cliffs I wanted to get, so I stepped out, and Daulton—that was my chum—sculled out into the open and left me. I saw a few other specimens on a ledge about thirty yards away and I wanted to get them. Swim was the only way to reach it, so I stripped at once. I had just climbed up by the dulse and tangles when I heard the crunching of footsteps on the shingly beach round the ledge, and the murmur of voices—one of them a woman's. I crouched down where I was, waiting for them to pass, for folks there are more particular in the matter of clothes than they are in Japan, and I was arrayed in what was full dress in the Garden of Eden before the fall of sinful man. But pass they didn't. I heard a shuffling among the shingle and recognised with holy horror that they had sat them down on a boulder. As I caught the tones of the lady's voice, my heart jumped up into my mouth, and I felt my person blushing all over, worse than if I had been caught eating pease with a knife. I heard her laugh a little mocking laugh and an answer came to it in tones that made my ears tingle with anger. They belonged to Kinnaird. He was sacrilegeously familiar too, and called her "Marian." I wanted to knock him down, but although it is usual to strip for the ring it doesn't do to be too much stripped in the presence of ladies, and I just dug my nails into my palms by way of keeping my hands out of mischief. Then my ear caught a cheep there was no mistaking. A cold sweat came out all over me. I was as furious as the Jews when the king of Syria sacrificed swine in the Temple: my idol was being smashed. It was a bitter moment. Then my own name was mentioned as the subject of a sentence where the predicate was most decidedly and pronouncedly uncomplimentary."

'Frank Webster' she said in the dulcet tones that used to thrill me like a war-trump. 'George dear,'—I felt as if I had been pithed—'you can't be so silly as to think that any girl could care a rush for that high-flown young fool. Only it's such fun, you know, to draw him on. It's as good as a play to listen to him mouthing and ranting about honour and duty and all that nonsense. He'll not be able to support a wife for years, and if he were he would drive nine out of ten ladies crazy with his moonshine before the end of the honeymoon.'

"And again the soft silvery laugh came floating round the crag, mockingly bitter.

"At last they rose, and I loosed my hold and dropped into the water. The current ran strong with an undersuction and I felt much inclined to let it carry me down in its rush. But I didn't.

"When Daulton came to pick me up, he asked me if I had seen a ghost or a mermaid.

"'Yes, a mermaid; I said. '*Ut turpiter atrum Desinat in piscem mulier formosa superne.*'"

"I don't know how I got back, or what happened for the next few months. And then ——"

Here there was a long pause; Webster's face was as lifeless and lustreless as a hunk of stale damper, or a heap of calcined chips that had once been *billets-doux*.

"Well, and then?" I at length queried, giving him a poke in the ribs by way of flapping his thoughts off the banks of the Acheron where they had seemingly roosted.

"Oh, then!" he said with a start and a quiet bitter laugh. "I just went to the Devil. Not rampageously, and with a racket, you know, but decently and in order. I meant to quit the country and everything therein at the end of the next session, and I just set to work to kill time meanwhile. I was what Homer calls *analkis*, utterly and thoroughly *analkis*. There was a powerful loosening of my moral and intellectual knees, and I just drove quietly onwards towards immortal smash. Drink? No! I wasn't built that way then you see. I hadn't cut half my wisdom teeth at that age and didn't know a tithe of the things that are good for sinful man. I hadn't learned to appreciate whiskey then, and hated the very smell of it. No, it wasn't the other thing either. I just did nothing, or rather I allowed higher mathematics and physics to go to the devil, instead of wrestling with them like a man, as I ought to have done that session. I read snatches of Philosophy and became a mild sort of Cyrenaic. And novels and romances, and all the literary pastry and jam and sponge-cakes and the rubbish generally that gives you incurable mental dyspepsia, I devoured till I was surfeited and scunnered. I sometimes looked back at the work that lay behind me, and wondered how the mischief I did it. Towards examination time I did try to pull up a bit and make up the leeway, but the stuff I did was as pithless and worthless as moist muck. I was no better than one of the gibbering, bloodless, fusionless shades in Hades. I felt that I had become a *thing*, a mere intellectual eunuch, and when a man feels that way the best he can do is to take a bucketful of prussic acid and invite his friends to the funeral. Well, the smash came, and it *was* a smash! A miserable last prize in one class, gulfed in another, and ploughed in the third. Ploughed, man, actually ploughed! Only think of it! Ploughed, man, ploughed! The First Bursar, and First Prizeman utterly ploughed! The whole place rang with the deed of shame, I had just wrought in Israel. Ow, man, but it was Marah-bitter to meet the pitying looks of mockery that shot me through and through, turn me whichever way I would. And the cackling sneers of triumphant noodles rang in my ears like the crackling of thorns under a pot."

He stopped again and I noticed his fingers twitching nervously over the pipe-stem.

"Aye," he went on. "I mind it all as if it had happened yesterday. I was standing at the inner entrance of the Quad, with my shoulder against the wall and my bonnet plucked down over my brows. It wasn't to keep off the dazzle of the sun cause I was standing in the shade, it was to——. On every side in the sea of seething humanity I heard nothing but 'Webster, Webster, Webster' and Webster's disgrace. One of the Profs that had talked of me as the 'coming man' and a 'star' passed through and he lowered upon me with anger and contempt. Man! that look irked me sore, and I felt as if salt had been rubbed into the raw.

"I was standing under the cage where the notices were pinned. For nothing better to do I looked up at them and began to read them mechanically. I went over them all with the letters all blurred and run together in my head and never a notion of what they meant. There was one small square of paper in the centre of the lot, and somehow I ever came back to that. After I had looked at it six times I began to have an idea of what it said. And then, my soul began to work, and light came into my head, and a purpose began to form itself. As it grew and came from darkness into life, I felt my strength returning in full force, and I clenched my teeth and my hands in my pockets, and I straightened myself where I stood, and my back-bone again became stiff and I swore I would do it or die. And of a sudden life leapt into my head once more, and I lifted it up and looked the best of them in the face unabashed and began to bandy words with the bitterest of the mockers. And soon they saw that my tongue had again got its edge, and one by one they shifted out of reach of its rasp. I felt the blood tingling with lusty strength in all my veins, because I knew 'that the hair of my head had begun to grow after that it had been shaven.' It was the announcement of the Balliol scholarship election that I had read, and I had purposed to be the man that was to be elected or to burst myself like a shower of sky-flaring fire-works.

"The tussle was ten weeks off, and if I ever did a man's work it was that time. I went through my books as a sea of fire leaps through a stretch of six-foot grass with a roaring autumn buster astern of it to give it a hoist ahead. A pretty face is all very well to dream about but revenge is stronger fuel to keep the furnace aglow. Of course I don't mean the knife-in-the-back revenge of the coward. That's a sort of thing I know nothing about and I don't want to make its acquaintance. But I had been down, and had been kicked—and foully kicked too when I was down, and oh! it was luscious to think of what would be toward when I got on my pins again! But at the same time I kept quiet and pretended to moon and to fool and to drivel and to spend my days and my substance in doing what was worse than riotous sin, viz., in doing nix.

"Her? Oh! Yes! I met her, and she also had her peck at me. She tried to rub it in after the fashion of her sex. But I took it all mildly, as weak as a pitiful sheep. Then the next time she saw me coming she passed by on the other side, and one day when I called she was 'not at home.' But you see that did me good; I was already case-hardened and steeled and that made me steelier still.

"One morning I disappeared, and neither man nor woman knew whither I had departed. It was then your honourable nose became acquainted with the backside of my sinister fist, and of course you know the rest of it.

"Yes! It was a goodish bit of work, though I say it myself that shouldn't. But those were the days that were!

"Of course I came back splashed and spattered all over with glory and kudos. The Prof that had glowered upon me as the archangels frown upon the damned, wrote me a five-page letter of compliments and good advice. I took the compliments with a wink and filed the good advice for future reference. You bet I made some of my quondam friends smell more than the scent of cayenne-pepper seasoned with their own assafoetida. I don't think they ever tried that trick again. When I went back I discovered my undoing had been the making of me. I had got a lesson, a dour and bitter lesson; but I gave as good as I got, with possibly an allowance for unearned increment chucked in as boot to the bargain. No! no! my son, it doesn't do to turn the slapped cheek overmuch among ordinary folks. If you're hit give the smiter room for repentance, and the biggest thrashing you can administer to help to furnish the chamber. Anyhow I had got on the line once

Digitized by Google

more, and I told myself quite cock-a-whoop-like that a petticoat would never derail me again."

"You ran pretty well as long as I knew you I'm bound to say." I remarked.

"Ay, may be. When you knew me I was a fairish man, I don't deny. But whishper! I could keep the length, I could keep the pace, I could put in work both from the leg and the off, *but all the same a lot of the devil had gone out of the bowling.* Iyah! There's nothing like a pair of eyes that you might light your pipe at for putting spin into a man's work! That I avow."

"And what did *she* say to you when you came back?" I asked.

"Say? Well, now, that's just where the odd thing came in. Three weeks before I went to Oxford there had been a regular financial crash in the country and Kinnaird was in it up to his neck! Of course she helped him out with her sympathy! Not much! She just left him to flounder and welter and lair in the mire, and wrote him with ink compounded of indifference and 30° of frost. When I came back she wrote me too; such a sweet little note of congratulation scented and with sympathetic affection rustling in every fold of the dainty toned letter paper. But I didn't wear my head under my arm any longer."

"Of course, you answered?" I ventured.

"In common politeness, I did. And I took the answer myself;" he replied grimly. "Aye, I recall the last time I met her as clearly as if I saw the whole piece played down there now for the benefit of us twain."

He pointed to the swell below now ruffled by the darkling wind and being kissed good-night by the sun's upper rim dropping behind the shoulder of Fuji. "It was about the tail end of afternoon tea when I lifted the knocker, and had the door opened for me by the hussy herself. And faith, it was well that there was nothing about the casings of my sowl, 'cept cinders and chunks of scoriæ, and Dead Sea fruity ashes, and dour and lifeless lumps and streaks of what had once been an erotic lava-torrent running and seething and raging, scorching Ætna-hot. If there had been anything in the shape of spiritual tinder about me, that look of hers would at once have licked it into a lowe. But there wasn't. My heart was icy and stony and steely, as void of sentiment as the scarred scalp of Shirane San is of verdure. The love that had dirled and thirled in every fibre of my being from the top of my head to the tendon Achilles, turning my emotion into one huge volume of poetry, and my brain into an intellectual dynamo, was as dead as a ring-barked gum tree or a blood-wood smitten by the levin bolt. I saw her now as she was in the very flesh, with all the ideality washed out. For me she was no longer a Goddess, or an Alruna Maiden at whose knee one might reverently bend one's head and draw in wisdom and inspiration and strength to strike the blows that only men can deal. She was now a woman, and nothing but a woman; what would make a gouty old leering lecherous Major Pendennis put up his eye-glass and rap out between a dozen mess-room expletives 'a d—d fine woman!' All that she was, and just that. There was the same firm litheness in her well-poised figure and her sculpturesque limbs, and the same fine scent in her Annie Laurie like-neck and bosom so coyly hidden beneath her lacy kerchief. But now to me she was but flesh, flesh, flesh, which God Almighty meant only to be kissed. And I had come sworn to kiss it and then go my way. And I did."

"Was that square do you think now, in cold blood?" I asked.

"Square! of course I do! It's but few folks that have done me scaith and yet come off so easily as she did. That evening I had within me the courage that laughs. What's that, you ask? Well there are several kinds of pluck you see. First there's the

> Courage of the 'Dorian mood
> Such as raised
> To heighth of noblest temper heroes old
> Arming to battle and instead of rage
> Deliberate valour breathed, firm, and unmoved,
> With dread of death to flight or foul retreat.

That's the sort of stuff that made Thermopylae immortal, and the swads of the *Birkenhead* undying when they drew up on the quarter deck for their funeral in the sharks' bellies. It's first. You know the chances are every jack one of them, agin' you, and you've simply got to die with your company manners on, and a heavenly smile playing all over your ugly phiz. Then there's the dare-devil dash, when you throw yourself with a cheer upon odds twenty to one and count upon coming out all right at the other side of the scrimmage, but yet are not *quite* cocksure of doing the trick. That's number two. Then there's the case where you've all the trumps in your hand; the case where you've collared the bowling and have nothing to do but to wade in and slate, as cool as a cucumber and a ha! ha! of triumph struggling to escape from the down-ward side of your diaphram, and only kept back by a Christian consideration for the feelings of your enemies. That's the courage that laughs, my son. I've had it before I've got to the second round in the ring; I've had it before I've rowed a hundred strokes in the race. I've had it on the back of a buck-jumper, and I had it that evening, and, ah me, it *was* sweet; sweet as the forbidden fruit in Eden!

"And possibly enough like it, it turned to the dead-sea fruit of ashes in your mouth," I remarked.

"Maybe it did, and maybe it didn't. Well, I could see that this trip I was taken seriously, or in other words, like a man. I never cared much for the insipid shallowness of afternoon drawing-room chat, but that time I splashed about in its tiny wavelets and ripples with the gusto of a brat in its bath trying to catch a chunk of Pear's soap. My lady—we were alone of course—did make one or two breaks towards the sentimental, but I gave her no show. She opened her glorious eyes with mild astonishment as she seemed to realize the fact that by taking thought I had added more than a cubit to my stature since the last time we met. Then I was but lowly—I had knelt at her knee. Now I had risen higher. I would throw my arm about her waist, and kiss her on the mouth! I saw that she read me as clearly as she could read print, and I don't think she was *very* much enraged, although she did seem a sort of trembling all over and generally looked tense and tight, like the strings of a *koto* all ready for the thrumming of the player. Ah! ha, my fine lady,' think I to myself, "there's been a sort of *ō jishin* in the relationships between us twain. It's not me, but you, that are the instrument now, and it's not you but me that am the performer, and by the Lord above I've a mind to play a tune upon the fibres of your soul that will make up for some of those disquieting discords you were kind enough to set a-jangling among the molecules of my mental and moral make-up! But I didn't. It's mean to wreak a masculine revenge on silly and misguided females, and I let her down easy. So when she looked at me like a startled deer, and I saw she read me, I just laughed as a batsman laughs when he slogs the bowler to the chains for four and makes the winning hit, and I put my left arm round her waist—by this time I had risen and we were standing opposite to each other—and with my right hand I drew her face down, down, down, towards my own, till her breath played fast and quick upon my cheeks, and her eyes grew soft, and her lips met mine in a long and clinging kiss, such as women-folks don't mean for mere make-believe, and her head sunk forward and rested on my shoulder as if the Lord Almighty had built it expressly for its permanent support. Then she looked up into my face and started. She saw it all—they're quick, women are, in things like that, and she flushed all over red as the dying-rays darting from behind Fuji's flanks there, and she covered her face with her hands, for by this time mine was set and hard.

"'Yes!' I said! 'There is no use for words to this piece of music. You *made* me,—or rather you caused me to make myself, between which two things there's not perhaps any very great gulf fixed, and for doing so I'm your debtor. But at the same time you did your best to send me straight to hell and you've ruined my belief in women right to the beyond of forever. So we'll call the thing quits. Only you might have made an Excalibur of me, instead of the conscienceless curse of a Muramasa blade as which I'm bound to go forth into the world all along of the distemper you infused into the steel when it was a-forging.'

"Stuff!" I remarked. "You never said anything of the kind to her! Why what could she know of Muramasas? You might as well have rated her in Greek Iambics."

"Well," he corrected; "it was words to that effect. You've no imagination. Anyhow she understood my drift and curstesied me out and said good-bye with a throaty sob that made me feel worse than a beast. The wind was sighing and moaning in the tree tops as I went out through the old kirk-yard, and altogether I felt that life was a valley and existence a curse, and that there were some triumphs that ought to put your tail further down atween your hind legs than any drubbing you ever got."

"I'm glad to see there's that much grace left in you, old man," I said by way of endorsing the sentiment.

He threw himself back flat on the gorse and clasped his hands behind his head, evidently rummaging in the dusty pigeon-holes of his memory. For three minutes nothing was heard but the mechanical puff, puff, puff of the dry smoke he was now enjoying, and the moanful soughing of the night breeze in the long waving grass around us. At last he sprang up and knocking out the ashes from his cutty preparatory to stowing it away in its case, he meditatively observed.

'Tis queer how old scars will show even when you fancy time has closed them up for ever. It was at the Cape in '83 that I met Alec Wilson, a townie of mine. Of course we went over all our friends. It was with a quaver that I asked after Marian Murray?"

"'Dinna ye ken, mon?" he asked incredulously. "She married Rogers of the Town and County Bank four years ago and has three fine bairns already. She 's a captain of the Gourdonshire Volunteers, for her man's entirely under her thoomb, an' it's her that gies the orders. Lord, man, what's the matter wi ye.'

"I answered it was only a stitch in the side; and that I was subject to stitches. He recommended whiskey, and I took it. I felt my hand shaking as I raised the glass to my lips."

"Only imagine,—the mother of three children, and Captain of a company of volunteers! Now why the Devil did my heart go off that way, I'd like to ask? Why! man it was in my very mouth!

But come along, the launch is screeching for a start and the petticoats are getting into the punt. Look out, my dear, your ancle's very shapely, truly, but there is no real occasion to show so much of your silk stockings to the Professor!"

Webster jogged off down the hill and I followed. Poor devil! I little fancied that was about the last yarn I was to have with him. A fortnight afterwards we laid him in Yokohama Cemetery. It was his heart that gave way.

## *THE BIRTHDAY OF JAPAN'S FIRST PARLIAMENT.*

The following letter from the Tokyo Correspondent of *The Times* appeared in that journal on the 6th of January :—

Tokio, November 30th.

Twenty-two years ago the Emperor Mutsuhito promised his people a representative form of government. Twenty-two months ago he fulfilled that promise by granting and proclaiming a Parliamentary Constitution and a system of fundamental laws. Yesterday, with the ceremonial opening by his Majesty of the first Japanese Diet, the Constitution became an accomplished fact. As a result of the peculiar circumstances of her modern career, as well as of her extraordinary earnestness, Japan has from time to time during the last thirty years presented to the astonished gaze of the Western world a series of advances and reforms so swift and so tremendous that history may be searched in vain to find its like. The ease and success with which these drastic changes have been brought about are hardly less remarkable than their magnitude. Men have at last almost ceased to wonder at anything Japan may do, or to tremble for the possible consequences. But of all the bold experiments on which she has hitherto ventured, this plunge into Parliamentary institutions is perhaps the boldest. With yesterday's ceremony, when the Emperor delivered the first Imperial Message ever addressed by a Japanese Sovereign to a Constitutional Assembly, began an order of things so organically new that its probable issue cannot be argued from anything that has gone before, and fraught with such possibilities of good or evil to the country that its first fruits will be watched with the keenest interest by all who know Japan, and even by many who do not.

As I explained in *The Times* of the 22nd of March, 1889, the Japanese Diet consists of a House of Peers and a House of Representatives—the former composed of members sitting for life by virtue of their rank, of nobles elected by their respective orders, of Imperial nominees, and of a few elected wealthy taxpayers; the latter consisting only of elected members. The elections to the Lower House took place in July last, and passed off in a quiet and orderly manner, though the contests in most places on behalf of rival candidates were very spirited and keen. Without figures as a guide, which are not yet forthcoming, it is impossible to give the exact ratio between the whole electoral body and the number of voters. As far as is known, however, the percentage of the latter indicates high political activity rather than inertness on the part of the electorate. Two or three cases of bribery have since been brought into court, but not established; and, on the whole, there seems to have been a happy freedom from jobbery and corruption. In the House of Peers now sitting there are 252 members, of whom ten belong to the Imperial family, and 139 to the various orders of the

Digitized by Google

nobility, while 59 commoners have been nominated by the Emperor for meritorious services to the State, or for erudition, and the remaining 44, also commoners, have been chosen by their fellows from among the 15 highest national taxpayers in the several electoral areas. Of the nobility, 34 are former *Kuge*, or nobles of the Court, 64 are former *Daimyo*, or territorial lords, and 41 are of those who have been created nobles since the Restoration. Thirty-one are princes and marquises, holding their seats by the provisions of the law; and of the lower ranks 100 have been elected by the members of their respective orders, while two are the Emperor's nominees, and one has been elected by the taxpayers as above. The Imperial nominees are largely composed of members of the lately defunct Genro-In, or Senate, and the elected commoners chiefly represent the landed interest. With a few exceptions, the political faiths of the members and their probable attitude towards the present Cabinet are unknown. As a rule, they have not allied themselves openly with any political parties. It is the general belief of the Japanese, however, that the House of Peers will prove to be a spirited, independent, and powerful body, exercising at least its due share of influence in the Parliamentary fabric. Though mostly rather of the old school than of the new, and not proficient in modern learning, they are of maturer average age and greater political experience than the members of the Lower House, and we may certainly expect from them a reflexion of the dignity of language and manner, and temperance in debate, which were marked characteristics of the aristocracy of Old Japan.

In the House of Representatives there are 300 members, most of them between the ages of 35 and 55, and recruited mainly from the following classes :—landowners, merchants, lawyers, journalists, and ex-officials. Of *shisoku*, the former *samurai*, there are 180, the rest being of the *heimin* or lower middle grade. Men of the old school, with some admixtures of modern ideas, predominate; the rest are of the new school, a few of them graduates of colleges and Universities at home and abroad. Without doubt there are some unquiet spirits in the mass, from whom lively things may be expected. But well-informed Japanese anticipate with confidence that the proceedings of the House will be conducted, on the whole, with dignity and order; and, generally, the country seems to be satisfied with the elections, and to regard its new representatives as suitable and worthy men. The body most numerously represented in the House is the Rikken Jiyu-to, or Constitutional Liberal party, a recent amalgamation of three sections holding somewhat similar views. Broadly, Liberalism, aimed at maintaining the dignity and prosperity of the Crown, extending the popular rights and happiness, reforming the systems of finance and taxation, and securing equal treaties with foreign Powers, is the platform of this party—a party understood to be generally opposed to the policy of the present Government, though not inclined to factious opposition, or likely to advocate rash measures. Of the whole 300 members, 130 belong to this body. Next in number come the "Independent" members, of whom there are 115, not committed to anything in particular, except a resolve to justify their appellation by standing aloof from existing parties, and to observe moderation in political matters. Including in their ranks, however, many highly-educated and powerful men of the modern school, they are likely to prove a very influential factor in the Assembly, and are expected to give their warm support to all reasonable measures of the Government. The Rikken Kaishin-to or Constitutional Progressive party, of which Count Okuma, not a member of the Diet, is the leader, comes next, with 50 representatives in the House. In most respects the principles of this party and its attitude towards the Cabinet resemble those of the Rikken Jiyu-to, though the former are certainly less Radical in degree. Lastly, the Hoshu Chusei-ha, or Moderate Conservative party, sends five members, whose ideas, to judge from the recent utterances of their reputed leader, Viscount Torio, are likely to be rather Utopian than practical, and wholly out of tone with the rest.

Such, very briefly, are the constituents of Japan's first Diet, convoked by the Emperor on the 23rd ult., and occupied till the 28th with matters of organization preliminary to serious work. For the Presidency of the Upper House, the Emperor's choice has fallen on the well known statesman Count Ito. For the Lower House the President elected by the members and approved by the Sovereign is a Mr. Nakajima, of the Rikken Jiyu-to party, an ex-Senator and ex-Prefect, and a staunch follower, by the way, of the Christian faith. Externally, the temporary Parliament House, where yesterday's ceremony took place, is simplicity itself, the Government having made the prudent resolve to defer the construction of permanent buildings till full experience of the Diet's needs should be acquired, and to be content meanwhile with a cheap, unpretentious wooden edifice. A sum of about £40,000 represents the whole expenditure on the present establishment. Its internal arrangements and accessories are, however, most admirable, and it could not be Japanese if it were not surrounded by beautifully laid-out grounds. The Session Chambers for the Peers and Representatives, each measuring about 85 feet by 53 feet, are lofty, well-ventilated, and well-lighted rooms, decorated and fitted up in excellent taste, and illumined at night by electricity. At the centre of one side rises a lofty podium, with the table of the President and Vice-President, before which, a little lower down, is the rostrum for speakers, set immediately above the space occupied by the table of the House and the seats for stenographers. Round these rise, amphitheatre-wise, the benches of the members—each with a table before it—ranged in concentric semi-circles, which are cut by radial passages giving access to the several tiers. In the strangers' gallery of each House there is room for fully 400 spectators, besides a large compartment reserved for Royalty. And in the Peers' House provision for great occasions of State has been made by a handsomely designed Imperial alcove, giving on to the centre of the podium and ordinarily closed by curtains. In the gallery of this Chamber was gathered together by 10 o'clock yesterday morning a concourse of some 400 Japanese notables of all degrees, who were privileged to witness the coming spectacle—most of them in civil, naval, or military uniforms, of dark blue and gold. With these were about a score of lucky foreigners, of high grade in the Japanese service or otherwise entitled to special recognition. Below, at the time of my arrival, the body of the House was still empty. The President's table had been removed from the podium already mentioned, and at the back, beneath the raised curtains of the alcove, was seen the throne from before which the Emperor was soon to address the whole Diet. At length there was heard the sound of trumpets without, heralding the Emperor's approch. His Majesty had come in great State from the Palace, attended by the Imperial Princes and the Court, as well by the Cabinet and other members of the Government, and escorted by squadrons of mounted troops. Great enthusiasm after its kind greeted his progress past the densely-packed masses of Japan's loyal populace. Japanese throngs, however, have not yet learned to cheer as we do. Moreover, in the case of their Sacred Ruler especially, they probably have misgivings as to the politeness or propriety of a very noisy welcome; and the Emperor himself preserves much of the stately frigidity of Japan's old-time etiquette. Partly awed then, and partly doubtful, the crowd subdued their cheering. But their whole demeanour and their intense eagerness to see the procession were proof enough, if proof were needed, that love and reverence towards the Throne are rooted as deeply and firmly as ever in the hearts of the Japanese people.

Alighting at the Parliament building, his Majesty was received by all the members and functionaries of both Houses, and conducted to the Imperial waiting-room. Then the Peers began to file slowly into the Upper Chamber, and to take their allotted places in the right-hand half of the concentric semi-circles of seats facing the alcove. They were of three classes —hereditary peers, who wore the rich robes of their orders; those appointed from official life, who wore the uniforms of their respective ranks; and those nominated from among the highest taxpayers, who were in evening dress. With them came the President, Count Ito, to whom, it will be remembered, is due the chief share of credit in the long task of preparing Japan's Constitution. He took his stand in front of his fellow members, immediately below the balustrade of the podium. A few minutes later, the Peers having all entered, the members of the House of Representatives flocked in from the opposite quarter, and massed themselves in the left-hand quadrant. There was more hurry and excitement in the movements of this half of the Legislature, and it was not a little interesting to find here, in this very first gathering together of Japan's first Diet, the same contrast between the eagerness of the Commons and the dignity and leisurely ease of the Peers that has been characteristic of such assemblies elsewhere since dual Parliaments began. Next came the Diplomatic Body, filling the boxes reserved for them in the gallery. After them, the Cabinet and other dignitaries of Ministerial rank, headed by Count Yamagata, the Minister-President of State. These entered from the right of the podium, and grouped themselves thereon at that side of the throne. Every one was now standing, and the whole assemblage remained wonderfully silent and still. Lastly, as the cannon began to salute and loud cheering was heard from without, the Emperor, preceded by the Chamberlains and high functionaries bearing the Imperial regalia, and attended by the Imperial Princes and the Court, came in slowly and with great state from the left of the podium. Every head was bowed in homage, to which the Sovereign responded as he turned to take his stand before the throne. The Minister-President of State, Count Yamagata, now advancing and making obeisance, handed to the Emperor a scroll, from which his Majesty read in dignified tones, and in a voice that was well heard throughout the whole Chamber, the following speech to the assembled Diet :—

We announce to the members of the House of Peers and to those of the House of Representatives—

That all institutions relating to internal administration, established during the period of 20 years since our accession to the throne, have been brought to a state approaching completedness and regular arrangement. By the efficacy of the virtues of our ancestors, and in concert with yourselves, we hope to continue and extend those measures, to reap good fruits from the working of the Constitution, and thereby to manifest, both at home and abroad, the glory of our country and the loyal and enterprising character of our people.

We have always cherished a resolve to maintain friendly relations with other countries, to develop commerce, and to extend the prestige of our land. Happily our relations with all the treaty Powers are on a footing of constantly growing amity and intimacy.

In order to preserve tranquillity at home and security from abroad, it is essential that the completion of our naval and military defences should be made an object of gradual attainment.

We shall direct our Ministers of State to submit to the Diet the Budget for the twenty-fourth year of Meiji, and certain projects of laws. We expect that you will deliberate and advise upon them with impartiality and discretion, and we trust that you will establish such precedents as may serve for future guidance.

The Speech from the Throne finished, Count Ito advanced, received the scroll from the Emperor, made obeisance, and withdrew; whereupon the Sovereign, Court, and Cabinet immediately left the Chamber, the rest of the audience remaining a few minutes, till the strains of the National Anthem, played outside, told of his Majesty's departure for the Palace. Brief though it naturally was, the ceremonial was nevertheless dignified and impressive in a high degree. In every respect, in arrangement, execution, and accessories—it was undoubtedly a success, and worthy of the occasion of one of the weightiest episodes in Japan's modern history. The Emperor, who wore a military uniform, looked in excellent health, and discharged his high functions, as his Majesty always does, with kingly dignity and ease. Not even the sagest student of the national thought and character could venture to forecast with any confidence, at this epoch, the issue of the momentous plunge that Japan has now taken, after more than two decades of preparation. For the present her friends can only hope the best of her. To judge from the past, there certainly seems to be ground for hope. Nothing has so puzzled even the men who best know Japan as the way in which, despite the worst fears and prognostications, she has conquered, one after another, by some qualities wholly inscrutable to Western minds, difficulties that might well have brought an ordinary country to grief. Most of the rulers and counsellors who have led her up to her present stage are still to the fore in the fabric of the Government, and their influence and experience can hardly fail, for some time to come, to have an effect on the conduct of the national affairs.

It is unfortunate for Japan that any part of a ceremony so memorable in her modern annals, and so happily conducted in all other ways, should have been disfigured by the violent acts of some reckless students, said to belong to the *soshi* class. Mixed up with the struggling crowd at a point already passed by the Imperial procession, a band of these fanatics, doubtless thirsting for a row, descried sundry Japanese grooms perched on the roof of a stable inside the wall of the Russian Legation grounds, and, close by, a party of foreigners, chiefly ladies, occupying a pavilion within the same inclosure, where they had assembled to see the procession. Unfortunately, both of these points of view overlooked the road, and it is a fact that all classes of Japanese hold it to be an inexcusable breach of etiquette to look down upon the Sovereign as he passes by. Enraged at the sight of the grooms and foreigners thus posted, the hot-headed students below set to work at stone-throwing, which was instantly responded to by the stable-men with a shower of tiles. A general *mêlée* ensued, in which the pavilion, despite the sex of its occupants, was not spared, though happily none of these were injured before the assailants themselves had been seized by the police. The student-rioters had had time enough, however, to disgrace their nation, seeing that, whatever cause of umbrage they had, against their own countrymen in particular, nothing

Digitized by Google

could warrant the hurling of missiles at defenceless women and girls. It is to be regretted that the easy-going, kindly disposition of the Japanese people seems to make them unpardonably tolerant of the acts of roughs of this genus, whether directed against themselves or against strangers within their gates. The *soshi*, as I have explained in former letters, are the curse of modern Japan, and it is high time that they were extinguished, with a swift and strong hand.

## *IN THE SUPREME COURT OF JAPAN.*

Before Judge NISHIOKA YUMEI, President of the First Criminal Bureau, and Judges H. YAMANE S. KAWAGUCHI, S. SHOYA, and S. OKUYAMA.

### CNCEALMENT OF STOLEN GOODS.

THE PUBLIC PROCURATOR OF THE MATSUYE CORRECTIONAL COURT V. FUJIMOTO SEIZABURO.

Principles deduced from the following case:—The offence described in Art. 399, Penal Code, shall be constructed as soon as stolen goods are concealed by a person who knows the same to have been stolen, whether the thief has been punished or not.

If for some reason or other punishment is remitted, such remission, arising only from the personal unfitness of the offender to undergo punishment, shall not change the character of the act.

Reference—"An offence committed by a person who is under the age of 12 years shall not be punishable, but offenders over the age of 8 years may, according to circumstances, be detained in a reformatory until they attain the age of 16 years."

"Any person who receives, conceals, purchases or acts as agent for goods, knowing the same to be stolen, shall be punished with major imprisonment for not less than one month and not more than three years, and a fine of not less than *yen* 3 and not more than *yen* 30."—Art. 399, Penal Code.

The accused was tried in the Matsuye Correctional Court for having concealed stolen goods, but was acquitted under Art. 2 of the Penal Code, the act being found not to constitute an offence.

The Procurator of the Court appealed. The circumstances under which the offence was alleged to have been committed were these. The son of the accused, Juichiro, aged 8½ years, stole on June 9th, 1889, from the forecastle of the steamer *Kotobuki Maru*, then lying at anchor in the harbour of Anrai, Nomi, Shimane Prefecture, a silver watch belonging to a man named Mori Shimpei. The accused knew of the theft, and, as was alleged, intended to dispose of the watch for his own private interest. He became aware, however, of the fact that the theft and his concealment of the property were known to the Anrai Police authorities and that a detective had been ordered to make investigations, and at once, therefore, reported at the Police Station that he had picked up the watch. The lower Court acquitted him on the ground that as the principal or first offender was exempted by his youth from punishment, the offence, in the second degree, of concealing stolen property could not be constructed. The Procurator pointed out that larceny and the concealment of stolen property were two separate and independent offences bearing no relation to each other as set forth in the Penal Code. Though in this case, therefore, the thief would escape punishment on account of his youth, the offence of concealing the property that he had stolen was none the less constructed, and the accused must be punished under Arts. 399 and 400 of the Penal Code, the judgment of the lower Court being *ultra vires*.

The bench held that the offence of concealing stolen goods is constituted as soon as a person conceals such property knowing it to be stolen, irrespective altogether of whether the thief is exempted from punishment or not. According to the original judgment, the accused found a silver watch belonging to Mori Shimpei, which his (accused's) son Juichiro, who lived with him, had stolen from the *Kotobuki Maru*, then lying in the harbour of Anrai, and had afterwards concealed in the house. The accused, after questioning his son, took the watch and concealed it, an act which undoubtedly constitutes the offence of concealing stolen property. The judgment of the lower court was therefore a misapplication of law, because the boy's exemption from punishment could not extinguish the man's offence and therefore the goods were plainly stolen. In accordance with Art. 429 of the Code of Criminal Procedure, the original judgment must be cancelled and a new judgment pronounced by this court, dealing with the act of the accused as described in the decision of the lower court. The sentence was that the accused be punished with major imprisonment for one month, with a fine of *yen* 3, and be subject to police surveillance for six months, according to Art. 399 of the Penal Code.

Before Judge HARADA TANENARI, Acting-President of the Second Criminal Division, and Judges KAKEHI MOTOTADA, HIDISHI KEITEN, and SHIMADA SEISHO.

### CONTRAVENTION OF THE STAMP REGULATIONS.

THE PROCURATOR OF THE FUKUSHIMA CORRECTIONAL COURT V. HONDA KUMAKICHI.

Principle deduced from the following case:—A stamp shall not be valid if any part of it is missing.

The Fukushima Correctional Court tried this case, and discharged the accused in accordance with Art. 2 of the Penal Code, holding that in giving a receipt on November 2nd, 1889, to Watanabe Gihachi, on which was affixed an incomplete stamp, accused could not be held to have used an invalid stamp.

The Procurator appealed and pointed out that though the Regulations as to Stamps on Receipts (*Shoken inzei kisoku*) contained no reference to the use of a torn stamp, the present case must be taken as one in which a receipt had been given without any stamp. That being so, the person giving such receipt was liable to a penalty equal to twenty times the amount of the stamp that should have been affixed under Art. 19 of the Regulations. A torn stamp had lost its validity, and to use such a stamp pasting together its severed portions, was nothing different from the use of no stamp at all. He therefore urged that the judgment of the lower Court should be revoked.

The bench held that no stamp could have validity if it were torn, being imperfect and deficient. In the first part of the judgment the lower Court stated that the accused had given to Watanabe Gihachi, Kuwaorimachi, Date-gori, on November 2nd, 1889, a receipt bearing a torn stamp. According to this finding, the stamp was a torn one and consequently had no validity. But further on the judgment stated that as the torn stamp did not seem to have lost its validity, therefore so and so was the case. Why did not the Court find that the stamp had lost its validity? There was no reason given for it. The two facts were inconsistent. It was therefore impossible for this Court to decide whether the law had been properly applied or not in the finding of the lower court; such finding being based on a view not in accordance with law, and must be reversed. The case was consequently transferred to the Sendai Correctional Court for a proper decision, in accordance with Art. 428 of the Code of Criminal Procedure.—*Saiban Suishi*, Dec. 6th, 1890.

## *LATEST TELEGRAMS.*

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, February 23rd.

The Coinage Committee of the House of Representatives recommend the rejection of the Free Coinage of Silver Bill.

General Sir Lothian Nicholson, K.C.B., has been appointed Governor and Commander-in-Chief of Gibraltar, vice General Sir Leicester Smith, deceased.

The Egyptian troops have occupied Tokar.

[Sir LOTHIAN NICHOLSON, who entered the Royal Engineers August 6th, 1846, served at the siege and fall of Sebastopol from August, 1855, commanding the 4th Company R.E. at Kinburn, and was in immediate direction of the works for the destruction of Sebastopol Dockyard (Medal with Clasp, Brevet of Major, 5th Class of the Medjidie, and Turkish Medal). Served in the Indian campaign from 12th December, 1857, to 23rd December, 1858, and was present at the capture of Lucknow (Brevet of Lieut.-Colonel, C.B., Medal with Clasp); has been frequently mentioned in despatches. Became Major-General, October 1st, 1877, Lieut.-General, October 19th, 1881; General, May 5th, 1888. Sir Lothian Nicholson's last employment was Inspector-General of Fortifications.—ED. *J. M.*]

London, February 24th.

The Report of the Coinage Committee puts an end to all prospect of silver legislation during the present Congress.

Mr. Foster succeeds the late Mr. Windom, and is said to be opposed to the free coinage of silver.

Later.

Osman Digna made a stubborn resistance to the Egyptian troops before the latter effected the capture of Tokar, and in the desperate hand-to-hand fighting which took place Captain Barrow was killed and Captain Beach wounded. Four Egyptian officers were also severely wounded, and fifty-four men were killed and wounded. Osman Digna and his followers ultimately fled.

London, February 25th.

Mr. Goschen has announced that the amount of silver held is believed to be sufficient to cover the ten shilling notes (? one pound ten shilling notes), but should it not exceed the amount required to pay the notes in silver the remainder will be secured partly by gold and partly by silver. The notes will be a legal tender only to the same amount as coin.

["SPECIAL" TELEGRAM TO "JAPAN MAIL."]

Kobe, February 27th.

The body of Mr. Nankivell, who left Kobe in a boat on a rowing excursion a few weeks ago, and was never after heard of, has been found at Sumoto, on the island of Awaji. The body was in an advanced state of decomposition, but was fully identified by the clothing.

[FROM MANILA PAPERS.]

Madrid, January 23rd.

Receptions at the Palace have been suspended on account of the delicate state of health of the Queen Regent.

Madrid, January 30th.

The Queen continues in delicate health.

The United States have proposed the negotiation of a treaty with Spain having for its basis the free admission of sugar, coffee, and hides.

All the commercial treaties have been denounced by Spain.

Madrid, February 1st.

The probable Presidents of the Senate and the Congress are General Martinez Campos and the Marquis de Pidal.

The election of deputies for Madrid has resulted in a victory for the Government.

Madrid, February 3rd.

The execution of Eyraud, the French murderer, has taken place.

Madrid, February 6th.

The following is the result of the general election:—Ministerialists, 290; Sagastinos, 94; Radicals, 30; Romerists, 13; Martistas, 8; Carlists, 8.

The Queen is better and the reception will take place at the Palace to-morrow.

### REPORTS.

The Japanese steamer *Sagami Maru,* Captain Walter, reports:—Left Kobe the 21st February at noon; had light variable winds to Oshima; thence to port moderate N.W. winds and fine weather. Arrived at Yokohama the 22nd February at 7 p.m.

The Japanese steamer *Satsuma Maru,* Captain Brown, reports:—Left Hakodate the 21st February at 4 a.m.; had light to moderate northerly winds and fine weather. Arrived at Oginohama the 22nd at 1 a.m. and left at 8 a.m.; passed Inuboye at 9 p.m.; had moderate northerly winds and fine weather up to port. Arrived at Yokohama the 23rd February at 6.30 a.m.

The Japanese steamer *Yamashiro Maru,* Captain Young, reports:—Left Hiroshima the 22nd February at 6.30 a.m.; passed through Akashi Straits at 7.50 p.m.; had light winds and fine weather; rounded Oshima the 23rd at 3.50 a.m.; Rock Island at 7 p.m., wind fresh northerly and overcast. Arrived at Yokohama the 24th February at 1 a.m.

The Japanese steamer *Omi Maru,* Captain Wynn, reports:—Left Kobe the 23rd February at noon; had moderate N.W. winds to Oshima; thence to port strong N. to N.E. winds with head sea. Arrived at Yokohama the 24th February at 6.30 p.m.

The Japanese steamer *Nagato Maru,* Captain Ekstrand, reports:—Left Hakodate the 23rd February at 2 p.m., had moderate southerly winds and overcast sky; after passing Shiriya-saki wind hauled to the northward with rain, clearing at 8 a.m. on the 24th, when wind hauled to N.W. fresh breeze and cloudy. On the 25th at 6 a.m. wind light and variable and fine clear weather. Arrived at Yokohama at 10 30 a.m.

The Japanese steamer *Wakanoura Maru,* Captain Kenderdine, reports:—Left Kobe the 25th February at 4.30 p.m.; had light winds from the south and fine weather; passed Oshima the 26th at 2.15 a.m. moderate easterly winds and dull cloudy weather; passed Rock Island at 6.30 p.m.; Cape Sagami at 11.20 p.m. Arrived at Yokohama the 27th February at 2 a.m., moderate easterly winds and dull cloudy weather throughout the passage.

## *LATEST COMMERCIAL.*

### IMPORTS.

There is at last a slight improvement to report in this Market. Yarns 16/14 counts have met with some demand, and prices have improved from 75 cents to $1.00 per picul on previous rates, but exchange has continued dropping at the same time, thereby keeping the relative difference between cost and price unchanged. This difference being very considerable it seems as if a further rise must take place, as holders cannot go on at present rates; 28/32's are still without any demand. Bombay Yarns have shared in the improvement both in demand and price. Other imports are still lifeless. Shirtings have also improved in price, but there is very little doing. Sales for the week amount to about 600 bales English Yarns, 200 bales Bombays. and 3,500 pieces Shirtings.

### METALS.

Market steady; buyers, however, appear inclined to hold off a bit (now that exchange is turning upwards) in the hope that holders will accept some reduction in prices. Quotations unchanged.

| | | | |
|---|---|---|---|
| | PER PICUL. | | |
| Flat Bars, ¼ inch | $2.65 | to | 2.70 |
| Flat Bars, ½ inch | 2.75 | to | 2.80 |
| Round and square up to ¾ inch | 2.65 | to | 2.80 |
| Nailrod, assorted | Nom. | | |
| Nailrod, small size | Nom. | | |
| Iron Plates, assorted | 2.70 | to | 2.80 |
| Sheet Iron | 3.00 | to | 3.40 |
| Galvanized Iron sheets | 5.80 | to | 6.00 |
| Wire Nails, assorted | 4.20 | to | 4.50 |
| Tin Plates, per box | 5.10 | to | 5.40 |
| Pig Iron, No. 3 | 1.30 | to | 1.35 |

### KEROSENE.

Market quiet after the large sales of the middle of this month. Tokyo market is said to be weaker, buyers being apparently well supplied for the present. Deliveries continue on a fair scale; but arrivals of late have been large, and the stock is once more up to 700,000 cases.

#### QUOTATIONS.

| | | | |

| Brown Canton | 4.70 | to | 5.70 |
| Brown Java and Penang | 4.50 | to | 5.50 |

## EXPORTS.

### RAW SILK.

Our last issue was of the 20th inst., since that date settlements in this Market have been 1,113 piculs, divided thus:—*Hanks*, 145; *Filatures*, 544; *Re-reels*, 302; *Kakeda*, 18; *Oshu*, 104. In addition to these figures Japanese direct shipments are 82 bales, making the total export trade of the week equal to 1,200 piculs.

Market has continued firm with plenty of business doing from day to day. A further decline in Exchange assisted exporters to fill all their orders and at the same time enabled Japanese to command full prices. Those of them who were sensible did not fail to sell currently and thus get rid of some considerable portion of their holdings.

The good business doing has attracted a few supplies from the interior, but in spite of these arrivals stock is down to about 9,000 piculs and shows a very great reduction on the figures of a month ago.

The active Market here has brought in from the interior several wealthy owners who have come to see for themselves how things are. They have quitted some of their good silks and could have sold more had they been a little more current in their ideas. As it is, with exchange turning upwards again, buyers are a little more coy and there is less business doing at the close. We think holders would do well not to be too conservative just now, for the state of trade in consuming markets is not of the best, and clients abroad will be soon thinking and talking of New Crop prospects.

Quotations given below are in many instances unchanged from last week with the exception of *Hanks* and *Kakedas*. For the first named class prices have distinctly advanced, buyers paying freely the prices noted; while for *Kakedas*, which have been held abnormally high and have, in consequence, been neglected, holders are now willing to accept some reduction from the top figures of a week ago.

There have been two shipping opportunities since we last wrote, the English and American mails both taking silk. The *Ancona* (21st instant), had 173 bales for Europe, while the *City of Peking*, on the 24th instant, carried 369 bales for the States. These departures bring the export figures to 20,349 piculs, against 33,916 last year and 35,912 to the same date in 1889.

*Hanks.*—Considerable business in these, about half the stock having been settled at high prices. *Shinshu Shiban* has been purchased at $555; while *Shimare* has brought $535. *Joshu* (*Agatsuma*) have been done at $525. The available stock is very small and in strong hands.

*Filatures.*—About half the business of the week has been done in this class. Some good chop silks of excellent quality passing the scales; *Shinshu* filatures being done at $635; $625; $620, according to mark. In fine sizes for Europe some little business has been done at $640 for fine quality. The stock in this department is rapidly working down, not being more than half what it was three months ago.

*Re-reels.*—Trade in these has been difficult; there are still some parcels of best chops on hand but holders ask very full prices and the consequence is that very little business has been done. One parcel of *Five Girl* Chop was settled at $595; *Turtle* Chop $590 and *Shorusha* $585. Good medium silk grading 1½/2 are very scarce and hard to find, buyers having run upon these nearly all the season leaving in stock now chiefly best and common qualities.

*Kakeda.*—Very small business indeed, and the absence of transactions has caused holders to climb down. They are now willing to sell at our quotations and possibly better could be done.

*Oshu.*—At the beginning of the week several parcels were weighed up at $540, $525, and $510, according to quality and grade.

| Available supplies to date | 31,600 | 37,300 | 41,150 |

### WASTE SILK.

Business continues on a good scale, settlements for the week being 1,338 piculs, divided thus: *Noshi*, 334; *Kibiso*, 820; *Neri*, 184.

Prices are strong and well maintained, especially for anything approaching decent quality. Not finding any quantity of good *Noshi*, buyers have turned their attention to *Kibiso* and are taking *Low Curlies* freely at prices ranging from $28 to $33 per picul.

There have been two shipping opportunities, English and American Mails both taking something. The *Ancona* had 294 bales for Europe and the *City of Peking*, 17 bales *Mawata* for the States. These departures bring the present export figures up to 23,366 piculs against 22,233 last year and 26,047 to the same date in 1889.

*Pierced Cocoons.*—Nothing doing and holders must either accept lower prices for the present stock or send it back to the interior for home consumption.

*Noshi.*—Some little business at quotations, buyers complain that "best" is no longer obtainable. The stock is down to 850 piculs, mostly *Joshu*, which has not this year been so much favoured by shippers as usual.

*Kibiso.*—Considerable business in this department chiefly in medium and common grades, filatures being neglected. *Shinshu* has again been done at $55 and $50; *Oshu* at $70 while *Joshu* and *Bushu* of common quality have been taken at from $28 to $35.

*Mawata.*—No business in this and the stock is small and badly assorted.

*Sundries.*—Large purchases of *Neri* at prices ranging from $12 to $15 for the uncleaned stock. Two parcels of *Tama-ito* have also found buyers at $245 and $212½ respectively.

## CHELTENHAM COLLEGE JUBILEE.

THE 50th Anniversary of the existence of the College will be celebrated in the latter end of June next, Speech Day being fixed for the 26th June. The arrangements include an O.C. Dinner, Cricket Matches, and Greek Play at the College.

A. GWYNNE-JAMES,
Hon. Sec. of Cheltonian Society, 2, Temple Gardens, London, E.C.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).

LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." 1y. June 28, 1890.

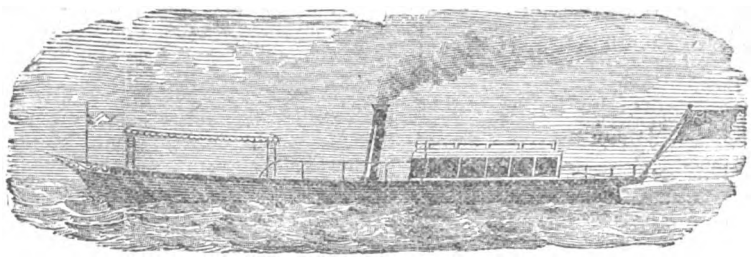
## KEATING'S COUGH LOZENGES.

COUGHS, ASTHMA, BRONCHITIS, DIFFICULTY OF BREATHING are speedily cured by KEATING'S COUGH LOZENGES (recognised and recommended by the Medical Faculty). No other remedy is half so effective. One Lozenge alone gives relief. They contain no Opium, Morphia, nor any violent drug, and may be taken by the most delicate. One or two at bed-time ensure rest when troubled by the throat. Sold by all Chemists, in Small Tins. Dec. 27th, 1890.—21ins.

## THE GREATEST WONDER OF MODERN TIMES.
## HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In I short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."



SIMPLE, SAFE, AND CERTAIN!

## HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulceration of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, aud in arresting and subduing all inflammations.

MR. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

# YARROW'S
## SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

MACHINERY CONSTRUCTED FOR BOATS BUILT ABROAD.

## YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, MARCH 7, 1891.

BIRTH.

On the 2nd March, at 154, Bluff, the wife of H. J. CHOPE of a Daughter.

DEATH.

At No. 187, Yokohama, Japan, March 4th, 1891, JOSEPH FREEMAN GORHAM (of the P. M. S. S. Co.'s, service), a native of Yarmouth, Mass., U.S.A., in the fifty-ninth year of his age.

## *SUMMARY OF NEWS.*

THE House of Peers has passed the Budget as amended by the Lower House and accepted by the Government.

COUNT ITO returned to the capital on the 1st instant from Odawara.

HIS IMPERIAL HIGHNESS PRINCE KOMATSU AKIHITO returned to Tokyo on the 2nd instant from Numazu.

THE graduation ceremony of the Tokyo Postal and Telegraph School will take place on the 5th instant.

CAPTAIN JOHN INGLES, R.N., Adviser to the Naval Department, returned to Japan on the 1st instant from England.

THE closing ceremony of the Imperial Diet will take place on the 8th instant in the Main Hall of the Imperial Palace.

THE regular general meeting of the shareholders of the Yokohama Specie Bank will take place on the 10th instant at 2.30 p.m.

H.I.H. PRINCE KOMATSU, Commander of the Imperial Body-guards, left the capital on the morning of the 28th ult. for Numazu.

THE total number of persons who have policies with the Japan Life Insurance Company is at present 5,926, the sums insured amounting to *yen* 2,001,100.

H.I.H. PRINCE KITASHIRAKAWA YOSHIHISA left the capital on the 2nd instant for Saitama and Kanagawa Prefectures on official business.

THE *Yamashiro Maru* started from this port on the 27th ultimo for the Hawaiian Islands with one thousand and ninety Japanese emigrants.

THE first anniversary of the establishment of the Uyeno Mission, at Hirokoji, Uyeno, was to be celebrated on the 1st instant at the Central Cathedral, Harukicho, Hongo.

THE election to fill the vacancy caused by the resignation of Mr. Mori Tokinosuke, a member of the House of Representatives for the tenth district of Tokyo, will take place on the 18th instant.

ON the night of the 20th ultimo fire broke out in the house of Sate Takichi, Toyousamura, Nishitamagori, Yamagata Prefecture, destroying 34 dwellings, 22 godowns, and 22 sheds before the flames could be subdued.

ANOTHER batch of emigrants to the Hawaiian Islands will leave Yokohama about the middle of the present month. The Nippon Yusen Kaisha steamer *Omi Maru* lefr on the 5th instant for Shinminato, Boshu, and Ujina, Geishu, to bring them to Yokohama.

THE members of the Japan Educational Society have in preparation the holding of a series of meetings of representatives of Educational Societies from various parts of the Empire in the capital, extending over 5 days, and commencing on the 26th of the next month.

COUNT ITO, who returned to the capital on the 1st instant from Odawara, proceeded on the 3rd instant at 2.30 p.m. to the Palace, where he was received in audience by the Emperor. He then visited to the Cabinet Office and held a conference with the Ministers of State.

THE Prince Imperial, who had been staying for some time at Atami, arrived at the Shimbashi Station on the 1st instant at 5.35 p.m., where he was received by Count Saigo, several officials of the War Department, and a number of students of the Nobles' Schools for Boys and Girls.

AN earthquake was experienced in the capital on the 1st instant at 4h. 17m. 43s. p.m. The duration was 2 minutes and 20 seconds, and the direction was from S.W. to N.E., the maximum horizontal motion being 0.5 milimetre in 0.3 second. The shock was a sharp one.

MR. N. NABESHIMA, a son of Marquis Nabeshima, started from Yokohama on the morning of the 1st instant by the steamer *Natal* to pursue his studies in Germany. Viscount Sano, Mr. Motono Seikyo, several members of his family, and a number of friends accompanied him on board.

THE ceremony of presenting certificates to graduates of the Marine Products School, which was to take place on the 25th ultimo, was postponed to the 3rd instant in consequence of the funeral of His Excellency the late Prince Sanjo. H.I.H. Prince Komatsu, President of the Marine Products Society, will, it is expected, attend the ceremony.

AN action for damages amounting to *yen* 116,260.123, raised by Messrs. Iwasa Masahiro and Minamigawa Masao, owners of a coal mine at Ongagori, Fukuoka Prefecture, against Mr. Takahashi Shinkichi, Director of the Kyushu Railway Company, will be commenced in the Fukuoka District Court about the end of the present month.

THE section between Kurume and Takase (distance over 40 miles) of the Kyushu Railway Company having been completed, a trial run was made on the 25th ultimo. Mr. Yasuba, Prefect of Fukuoka, Mr. Tomioka, Prefect of Kumamoto, and several higher officials of the Kumamoto and Fukuoka Prefectural Governments were present on the occasion.

THE total amounts of money deposited in and withdrawn from postal savings banks throughout the Empire during the month of January last were *yen* 695,932 and *yen* 1,122,781 respectively, showing a decrease of *yen* 106,455 in the amount of deposits, and *yen* 330,078 in the amount of withdrawals as compared with the previous month.

DURING last year the quantity of tea that was sent from Kyoto to various parts of the Empire, was 3,243,825 *kin* (one *kin* is 1⅓ lb. avoird), of which 2,814,025 *kin* were for Kobe, 50,000 *kin* for Yokohama, 75,000 *kin* for Tokyo, 21,800 *kin* for Niigata Prefecture, 20,000 *kin* for Ishikawa Prefecture, 15,000 *kin* for Nagasaki Prefecture, 15,800 *kin* for Osaka, 20,000 *kin* for Hakodate, and 700 *kin* for other Prefectures.

REPRESENTATIVES of Osaka City and of sixteen Prefectures, numbering about one hundred and seventy in all, met on the 26th ultimo at the Nakamura-ro, Ryogoku, Tokyo, and decided to organize a society to be named the Kisei Domei-kai, with the object of equalising land-values. They afterwards held a social entertainment, at which Messrs. Sakamoto Kantaro, Yamada Ginosuke, Kimura Seitaro, and a few other gentlemen delivered addresses.

THE opening ceremony of the Yoshu Gakkan, an industrial school erected by Mr. Tsunoda Shimpei at Kanda, Tokyo, was held on the 1st instant in the Lecture Hall of the Imperial University at Kanda. About eight hundred persons were invited. Messrs. Izawa, Director of the Bureau of Compilation in the Educational Department; Naruse, Instructor of the Higher Commercial School; Taguchi Ukichi, of the *Keizai Zasshi*, and other gentlemen, delivered addresses in the course of the proceedings.

THE Import trade continues to mend, though ever so slightly, and over 1,000 bales of Yarn were sold and better rates realised. This business was done early in the week, and during the last few days holders have asked a further advance, which has checked inquiry. Piece-goods are firmly held as cost increases, and little has been done, but the market is healthy. There is not much doing in Metals, but dealers have paid better prices for the small quantities taken, and inquiry is made. Kerosene is quiet, and fresh arrivals are reported. In Sugar there has been a steady business in both White and Brown, and prospects are fair. There has been a small daily trade in Silk, but the trade is largely ruled by exchange, the fluctuations in which induce a see-saw policy on the part of holders. Shipments to date are nearly 13,000 piculs less than at same time last year, and more than 5,000 piculs have yet to come in to bring the season's outturn up to that of last year's supply. Waste Silk remains quiet. Exchange has been unsteady, and presents no appearance of firmness at the close.

## *EDITORIAL NOTES.*

### COUNT ITAGAKI.

COUNT ITAGAKI'S statement of the reasons that have induced him to sever his connection with the Radical Party is as follows:—"The object of the labours of our Party, continued through many years, is to propagate the principles of liberalism in the country, and to establish constitutional government. A party Cabinet is the true form of constitutional government. In order to establish this true form there is need of a great party holding the same principles. It was for this reason that, lamenting our condition of division into sections, I took steps, at an early date, to effect a union of fellow-thinkers. At first I was unsuccessful in the attempt made at Osaka to unite the two branches of the Party; I then organised the *Aikokuko-to*, and subsequently, by renewed efforts, accomplished my purpose of union in the formation of the *Rikken Jiyu-to*. No sooner, however, had our Party made its appearance in the Imperial Diet than it failed to work together, lost sight of the true object of party organization in internal disputes, divided into two sections in respect of the Budget question, and almost reached the stage of actual dismemberment. I could not sit quietly watching this conjuncture, and I therefore spared no effort to effect a reconciliation, but under existing circumstances that aim has proved unattainable. For a time, indeed, the Party seemed to be working harmoniously, but new troubles have arisen, and we are again brought face to face with the misfortune of disruption. For a long time I clung to the desire of loyal union, and in the cause of our Party's interests employed every effort and every device, but all has proved vain. Some critics asserted that if no attempt were made to effect union at the outset, and if the different sections were left to work in their own way, a party would be evolved by natural processes. Others affirmed that unless efforts were made to maintain harmony, the views of the two sections would develop independently and a suitable compromise could not be effected. As for the motives that induced me to labour in the cause, they have been ascribed to mere partiality for the *Aikokuko-to*, and I have become the object of unexpected condemnation. Yet I venture to boast that I have sought neither wealth nor fame, and that my sole and perpetual hope has been to plant our purpose in the breasts of the rising generation, and to make our principles of liberty an active reality. But when I find, as I do now, that no information was conveyed to me until after the decision to divide had been taken, and that I was left in ignorance of what was going on, I can neither complain of fate or blame my fellows, but have only to lament the inefficacy of my own understanding, and the insufficiency of my merits. It is for this reason that I now leave the Party, and desire to stand for a time beyond the pale of party politics. Even though others share my wish to abstain from party politics, I do not wish that they should assemble in numbers and form an association. My only aim is, with the cōoperation of a few others and by means of the *Jiyū Shimbun*, to become a protector of the policy of liberalism and to work independently. Such are my reasons for leaving the Party. I trust that my motives will be appreciated and my request complied with."

* * *

The only point likely to perplex our readers in the above manifesto is Count Itagaki's statement, made in a tone of reproach, that he was kept in ignorance of the intention to divide the Party until division had been actually decided upon. It will be remembered that, when analysing the causes which led to the defeat of the Extremists on the 20th ultimo, we said that the secession of the *Aikokuko-to* section was chiefly responsible. We also explained that one of the principal motives influencing the seceders was supposed to be the conviction, which they shared with Count Itagaki, that the Lower House, by persisting in the course advocated by the Extremists, would deprive itself of a large part of its competence in respect of the Budget. At first sight Count Itagaki's complaint seems to suggest that no community of understanding existed between himself and the seceding members on this subject, but there can be little doubt that his reproach is addressed not to the men who retire with him, but to the men who remain. The latter, not the former, are accused by him of carrying things with a high hand, and of so far ignoring his own previous labours in the cause of harmony as to decide upon disruption without even referring to him. The simple fact evidently is that the Extremists had pushed matters beyond the point whither any reasonable self-respecting men could consent to follow them. They wanted to plunge the House of Representatives into a conflict with the Administration, on an issue where the position taken by the House was distinctly unconstitutional. By reading the 67th Article of the Constitution in the sense attributed to it by the Government, that is to say, by the Emperor himself, the House retained in its own hands a larger measure of financial control, and avoided the perpetual reproach of perverting its first exercise of legislative power into an exhibition of lawlessness. Of course giddy agitators, to whom the fact of opposition is everything, and the fashion nothing, will applaud the Extremists, and apply such adjectives as loyal, stable, earnest, and so forth to their ill-considered obstinacy. Fortunately tastes differ.

### WHERE ARE WE NOW?

THE resignation of their positions by public men in this country seems to throw the *Japan Gazette* into a state of more than wonted mental confusion. The "honest old warrior," Count Yamada, underwent some most puzzling metamorphoses when, heavy hearted, he turned his back upon his colleagues, and now Count Itagaki's retirement from the *Jiyu-to* is wrapped in similar mystery by our lucid contemporary. "The earnest and faithful members of the Party," says the *Japan Gazette*, "naturally resented the ignominious course pursued by the members who voted for Amano's motion on the 20th. This resentment has led to the resignation of the said members, and, as a consequence, to Itagaki's throwing up the leadership of the Radical party in disgust." The sequence of ideas is very pretty. Some members behaved ignominiously. Their earnest and faithful fellow-members showed resentment. The bad members resigned. Therefore Count Itagaki, in disgust, severed his connection with the earnest and faithful members. It is evident that some of these words must be "capable of being understood in two ways."

### GOODS REMAINING FROM THE INDUSTRIAL EXHIBITION.

SINCE the curious announcement that legal proceedings had been issued by a person of particularly strict morals against the distinguished noblemen and gentlemen who are interesting themselves in the philanthropic work of disposing of the goods left unsold from the Industrial Exhibition, the subscribers to the lottery scheme have been asking anxiously how it will fare with their money. Of course under no circumstances is there any cause for anxiety on that score, nor indeed do we imagine that the holding of the lottery will be interfered with, for, unless we greatly mistake, lotteries in which every one draws a prize are not illegal in Japan. However, it is now stated confidently that the articles to be disposed of will be all in their places to-morrow or next day, that the public will be invited to inspect them on the 4th, 5th, and 6th, and that the business of the lottery will commence on the 7th. The total value of the articles shown at the Exhibition in the sections to be thus dealt with was 679,762 *yen*, and the sales aggregated only 127,139 *yen*. As to the value of the remaining articles to be distributed by lottery, details have already been published.

### THE LATE MR. NANKIVELL.

WE published a telegram on Saturday, stating that the body of Mr. Nankivell had been found on the island of Awaji, in reference to which the *Hyogo News* of that day gives the following particulars:—"The body of a foreigner has been picked up on the beach at Sumoto, on the island of Awaji, having been washed ashore, and the police identify it as that of Mr. Nankivell, as the clothes correspond exactly with those that gentleman wore on the morning of his ill-fated boating excursion. The body is greatly decomposed, and it is estimated that it must have been in the water at least forty days. Identification is only possible by the clothes. The police report is as follows:—Age from 35 to 40 years; height 5 ft. 9½ in.; body well nourished; clothes, singlet, drawers, white shirt and grey woollen pants, and black stockings with purple and red stripe. This description on inquiry answers exactly to the clothes worn by Mr. Nankivell on leaving the boat-house. The exact place of the discovery is Miya-saki, of Kamaguchi-mura, Tsunagori, Awaji, just opposite Suma. Messrs. Sim and Grimble have gone to Awaji to try and identify the body."

* * *

The *Kobe Herald* of the same date has the following:—Messrs. Sim and Grimble returned this morning from Kamaguchi, Island of Awaji, bringing with them the body of the late Mr. G. Nankivell, and they speak in grateful terms of the care and reverence that it had received at the hands of the Mayor. It was not difficult of identification, although it had been upwards of seven weeks in the water. The place at which it was found is on the east side of the Island, about 6 miles from Akashi Straits. Mr. George Nankivell received his professional training at the Stratford Locomotive Works—passing through the shops and drawing office—in which latter place he showed much more than ordinary capability. He was selected to fill the position of draughtsman at the works of the Japanese Imperial Railways about sixteen years ago and so satisfactory was his knowledge and service that in 1887, when Mr. Smith was Locomotive Superintendent, he was placed in charge of the blacksmiths and boiler making department. By the death of Mr. Nankivell the Imperial Government Railway Department loses a clever man, and Kobe also loses one who has been well liked and respected socially, and who has taken a prominent part in rowing and other athletics.

* * *

The inquest held at Kobe on the body of Mr. Nankivell was concluded on the 3rd inst. before the British Consul. Very little evidence was forthcoming. The Jury, having retired for consultation, returned after some fifteen minutes, when the foreman, Mr. Woolley, stated that they had come to the decision that death was due to accidental drowning; they also desired to record their hearty appreciation of the care and respect bestowed on the body by the head man of the village near which it was found, and they asked the Coroner to take suitable steps, by letter or otherwise, to make these sentiments known to the official in question. Mr. Enslie said he agreed with all that the jury had said, both as to the verdict and the care shown by the Japanese, and he would take the proper steps for communicating their rider to the authorities.

### POLITICAL INFORMATION.

THE organ established in Yokohama by an association of residents for the purpose, as was generally supposed, of rendering all possible journalistic assistance towards the postponement of Treaty Revision, has unexpectedly become conspicuous in two other rôles; namely, as a blunderer, and as a second-hand exponent of anti-Governmental slanders. It is rumoured that the performances of the new organ in the latter rôle are considered in some degree compensatory for its accidents in the former. "We can at any rate congratulate ourselves," say the uneasy shareholders in the Printing and Publishing Company, "on having an organ which gives us a view of the opposition side of Japanese public opinion. Granted that it blunders lamentably and even ingeniously, since it discovers opportunities to go wrong

Digitized by Google

where no one other newspaper could have detected their existence—still it shows us the black side of Japanese politics, and that is always a gain." It is well to be satisfied with small mercies. We should have imagined, for our own part, that instead of hiring an expensive editor and organizing a costly journalistic machine in order to obtain access to the scraps of political vilification floating through the columns of the vernacular press, the Printing and Publishing Company might have attained its object much more cheaply and effectually by engaging a couple of competent Japanese translators, and instructing them to extract from the pages of the Tokyo journals every item calculated to discredit the Japanese Administration, or to suggest the existence of corruption and dissension in official circles. However, the machine having been constructed and set in motion, grinds out with cumbrous effort its daily dole of second-hand canards and aspersions, extolling at the same time its own honesty and independence. A very funny spectacle the performance is in its way, especially when, as is not infrequently the case, it combines the two rôles of original blundering and plagiarized back-biting. An example of this dual exhibition has just been furnished. In an article intended to demonstrate "the fickleness of Japanese politicians" and the general instability of everything Japanese, the "honest" organ, alluding to the remarkable division in the House of Representatives on tne 20th instant, says:—"The defeat of the extreme party was caused by intrigues which effected a combination of the *Rikken Kaishin-to* and the *Rikken Jiyu-to*." This is truly one of the most marvellous bits of bathos ever published. The Extremists in the House of Representatives consisted of the *Kaishin-to* and the *Jiyu-to*. It was owing to the unlooked for combination of these two previously antagonistic parties that the Budget Committee's Report was adopted. Every child over seven years of age in Tokyo knows this. And now, behold, the sapient and honest organ tells us that the two parties were ultimately defeated because they combined! It is exactly as though one should write of English politics:—"The Parnellites and Liberals combining, were able to defeat the Conservatives, but were afterwards themselves defeated owing to intrigues which led to their combination." The *Rikken Jiyu-to* are the Radicals. The *Rikken Kaishin-to* are the Progessionists. Probably every newspaper reader in Japan, whether foreign or Japanese, except the editor of the organ, is aware and has been aware for more than two months, that the Radicals and Progressionists joined forces for the purpose of overthrowing the Cabinet in connection with the Budget, and that the representatives of the two parties in the Lower House received the name of "Extremists," owing to the sweeping reductions which they advocated. On the 20th instant these Extremists ceased to have a majority, and were defeated owing to the secession of several important members who passed over into the camp of the Moderates. But the Printing and Publishing Company's exponent of Japanese politics informs the public that the Extremists were defeated owing to "intrigues which effected a combination" of the two Extremist parties. If the thing is intended for fooling it is painfully clumsy: if for serious writing, it is inexpressibly ludicrous.

### THE "HOKKAI JI-RON."

We welcome the appearance of a new periodical named the *Hokkai Ji-ron* (Current Topics of the North) the first number of which was issued in Tokyo on the 11th instant, under the editorship of Mr. Yamaguchi Ginoshin, a graduate of the Sapporo Agricultural College. It is to be published on the 1st, the 11th, and the 21st day of every month. Its object is, as the editor tells us in the opening article, to rouse public opinion to the paramount importance of colonizing the island of Hokkaido. In an article entitled "How to Construct New Japan," Mr. Yamaguchi dwells, in lucid and spirited language, upon the favourable position Japan occupies in reference to the growing trade between the countries bordering on the Pacific Ocean. He calls attention to the ever increasing influence of the Occidental races in the East; warns his countrymen of the gravity and importance of the obligations they are under as the creators of New Japan, and urges the vital necessity of colonizing and developing the northern island, which, despite vast sums of money already spent on it by the State during the past twenty years, still remains virtually unreclaimed from its primeval wildness. The area of the island is nearly equal to one-fourth of the area of the whole empire, and exceeds that of the two islands of Kyushu and Shikoku together. But the present population is only 370,576, whereas the place could easily maintain 10 millions. Schemes of emigration to foreign countries are now contemplated by a section of the people, but the writer reminds his fellow patriots that a country of almost incalculable resources lies close at hand within the bounds of their own native land. To this fair country every Japanese who cares for the future greatness of the empire should turn his attention.

* * *

Thus far Mr. Yamaguchi. Among the numerous contributed articles, we may notice two: one by Professor Sato, of the Sapporo Agricultural College and the other by Mizushina Shichisaburo, of the Hokkaido Administration Board. Professor Sato writes at some length on the importance of sober working men emigrating to Hokkaido. In the days of the former Kaitakushi, encouragement was given to immigrants in the shape of direct aid. But under the administration of the present local Government, that policy has been discarded and more attention is paid to the development of industries specially adapted to the island. Professor Sato does not find fault with the latter policy, but he suggests that the feeble and somewhat incongruous working of the various factories called into existence under the influence of the present system, might be remedied by the advent of a thriving class of farmers and working men. Hokkaido wants, not poor and abandoned wretches, but honest and independent immigrants, willing to make the island their home. There are already signs, says the writer, that people of this desirable kind are beginning to turn their attention to the north. Such a sign is the recent emigration of a group of families from the Prefecture of Kumamoto. The professor in conclusion recommends the establishment of emigration societies such as are found in the United States of America.

* * *

Mr. Mizushima writes on the colonizable land of Hokkaido. His article contains some interesting figures. The Hokkaido Administration Board has surveyed the whole island with the view of determining the area of arable land in each Province. As the result of these surveys, we have the following table, showing the area of land of various kinds:—

| Province. | Land that can be cultivated at once. Tsubo. | Land that can be cultivated after drainage. Tsubo. | Land adapted for Pasturage. Tsubo. | Land requiring great improvements. Tsubo. |
|---|---|---|---|---|
| Ishikari | 319,827,192 | 190,263,200 | 8,188,000 | 231,727,463 |
| Iburi | 26,561,000 | — | 8,908,500 | — |
| Shiribeshi | 14,538,263 | 4,152,950 | 1,371,140 | — |
| Teshiro | 144,575,775 | 6,211,200 | 11,20-,050 | 55,315,750 |
| Takachi | 176,804,227 | 100,868,300 | 595,600,980 | 18,100,650 |
| Kushiro | 137,330,165 | 86,862,111 | 181,696,000 | 64,390,736 |
| Nemuro | 90,148,850 | 34,929,263 | 282,975,450 | 22,221,350 |

As to Chishima and the Province of Hidaka, the survey has not yet been completed, while in the Province of Tashima there remains little that can be further reclaimed. For that reason all figures relating to these three districts are wanting in the above table. Besides these articles there are a number of useful queries and answers as to the necessary equipment of intending emigrants, as to methods of farming in Hokkaido, and with regard to other topics having interest for the settlers. We trust that the *Hokkai Ji-ron* will receive from the public the attention it certainly deserves.

### "SWEPT AND GARNISHED."

Most unfortunate are the attempts of the *Japan Gazette* to escape the consequences of its blunders. Its ill-starred columns remind us of the house in the parable. The seven devils of blundering keep the edifice in tolerably bad order, but when they take unto themselves the seven devils of explanation, the last state of the building becomes pitiable. On Thursday the *Gazette* declared that "the defeat of the extreme party in the House of Representatives was caused by intrigues which effected a combination of the *Rikken Kaishin-to* and the *Rikken Jiyu-to*." On Friday it corrected this singular blunder by informing its readers that the words "effected a combination" should read "effected a disruption." But the correction only makes matters worse, for there has been no disruption, nor any hint of a disruption, between the Radicals and the Progressionists. A newspaper editor, at certain moments, may commit the slight mistake of saying precisely the opposite of what he intends to say, but when what he intended to say proves to be absolutely untrue, his last state is worse than the first.

### THE PROPOSED REDUCTION OF THE LAND TAX.

The *Yomiuri Shimbun* awaits with some interest the result of the discussion in the Lower House on the Reduction of the Land Tax Bill. Whether justly or not, it is a fact that the chief excuse urged by those on whom the tax falls, when they are asked to contribute more liberally to the maintenance of persons in their employment, or holding land from them, is that they find the burden of the tax too heavy. If as is anticipated, the Diet resolves to reduce the tax, this action will place an effective weapon in the hands of small tenants for securing from their landlords some improvement of their condition. Moreover, the reduction of a landlord's burdens must have a general tendency to promote the circulation of money, and to benefit those around or under him. In view, therefore, of the indirect advantages which the reduction of the tax will bring within the reach of the poorer tenants, our contemporary expresses the sincere hope that the Diet will decide in favour of reducing the tax.

### MADAME PATEY'S FAREWELL CONCERT.

Madame Patey and her concert company gave their last entertainment on Saturday evening in the Public Hall before an audience which, though still far from proportionate to the merits of our accomplished visitors, proved that the poor attendance on Thursday evening should not be taken as indicative of a poverty of musical interest in the community. The house was about half filled, and the empty seats were almost atoned for by the enthusiastic applause accorded to most of the numbers. We can add little to what we have already said of the nature of Madame Patey's concerts; that she is a great artiste and that she brought with her a company each of whom might be classified as first-rate without exaggerating her or his powers, are propositions that must be taken without argument. Saturday's entertainment was in no respect inferior to those that preceded it; classical and popular music equally found a place in the programme, and Madame Patey may rest assured, however imperfectly the obligation may have been repaid, that she has afforded by her visit to us at this end of the world the most unalloyed pleasure. It is probable that Madame Patey fully realised and appreciated the sincere admiration which her wonderful powers have aroused in those who heard her in Yokohama. That, indeed, may be taken as a matter of course. But it seems likely, too, that like the true artiste that she is, she wished in her own way to acknowledge the warmth of the plaud its that her appearance has invariably provoked. If that be so then she could not have adopted a method better calculated to complete her conquest. For, after responding

Digitized by Google

to the ordinary recalls in the course of the programme, and towards its close singing seven verses of "Auld Robin Gray" she returned in compliance with an enthusiasttic demand and stepping smilingly forward to the footlights rendered the "Laird o'Cockpen"—every one of seven verses, from "The Laird o'Cockpen, he's prood and he's great" to "She's daft tae refuse the Laird o' Cockpen." It is impossible to adequately describe the effect which her appearance, and the singing in good, plain Doric of the droll old ballad which it preceded, produced upon the audience, to whom the charming grace of the act appealed with irresistible force. For the reasons already indicated we need venture upon little more than a bare enumeration of the numbers on the programme. Madame Patey's contributions in the first part consisted of the Recitative and Aria "Quando a te" (Gounod), and Giordani's "Caro mia ben" (given as an encore). In the second half she appeared immediately after Mr. Morris's introductory solo to sing Knight's "Rocked in the Cradle of the Deep," and coming on again supplemented this magnificent effort (in the *finale* singing down to E flat) by rendering with infinite feeling that inexpressibly touching song, "The Land the Leal." With "Auld Robin Gray" she again thrilled and delighted her listeners, and finally she drew the current of their feelings into a new and more lively channel by recounting to them the wooing of the "Laird o' Cockpen." Miss Rossow came on twice in the first part of the concert, in the Recitative and Aria "Qui la voce" (Bellini); in Schubert's "Ave Maria," and as an encore of the latter in an air from "Un Ballo in Maschera" of Verdi. After the interval she gave a fine rendering of Balfe's "Killarney" and being recalled repeated one verse; her last apperance being in conjunction with Mr. Patey in Mozart's "Crudel perche" which was given with much taste and power. Mr. Lemmone played with great brilliance that charming "Hungarian Rhapsody" of Doppler, and with Mr. Morris the beautiful "Romance" (Gallico) duett for flute and piano. His only performance in the second part was a solo consisting of an "Air de Ballet" (Garibaldi) and the sprightly "Polka de Concert" of Reichart, which he repeated in response to a call. Mr. Patey's fine voice was heard to advantage in "I am a Friar of orders grey," and in Mendelssohn's "I am a Roamer." Mr. Morris in addition to rendering Schubert's charming" Impromptu in A flat" and Heller's "The Hunter's Rest," the latter with very fine expression, played the accompaniments with his accustomed skill, and bore a worthy share in the flute and piano duett. Too much praise cannot be given to this clever and talented young artist, whether in respect of his brilliance and power when playing in solo, or of his grace and sympathy of touch in accompaniment.

### AN AGRICULTURAL IDEA OF THE DOINGS IN THE DIET.

It must have been rather a shock to the Extremists to receive the document which has just reached them from 153 farmers of Kasuga-mura, in Niigata Prefecture. The Niigata folks consider themselves entitled to be specially interested in the Budget question, because one of the representatives of the Prefecture, Mr. Suzuki Shoji, is a leading Extremist. The farmers have addressed to their member, and to the 107 members who voted with him in the minority on the 20th ultimo, an exceedingly plain-spoken epistle, charging them with having brought disrepute on Japanese representative institutions by adopting a course distinctly opposed to the Constitution. One of two things, say the hard-headed rustics, most be true of the Extremists: either, in consequence of a secret understanding with the Government, they sought to betray the House into appplying to the Budget amendments that could not possibly be accepted on account of their palpable unconstitutionality, so that the Budget might not come into existence and the Cabinet might thus be enabled to carry out the Budget of the preceding year; or else, without any due regard for the gravity of Parliament's functions in respect of the national finance, they deliberately plotted to pervert the Budget into a lever for ousting the Government, and putting themselves into its place. On either hypothesis they are not worthy of the people's confidence, and the farmers call upon them to resign their seats and make way for better men. It is a leading principle of parliamentary government, add these country people, that if Ministers of State have forfeited the confidence of the nation, they should resign their portfolios. The same principle applies with equal force to members of Parliament. It is undoubtedly a curious feature of Japanese contemporary history that a difficult question like that which recently agitated the House of Representatives, should be keenly watched by a number of farmers in a remote district, and that a document such as we have described should have been the outcome of the scrutiny.

### THE "EMPRESS OF INDIA."

A Home paper of 19th Jan. says:—The new steamer of the Canadian Pacific Railway, the *Empress of India*, twin-screw, for the Vancouver Pacific service, has just arrived in Liverpool from the builders in Barrow. Her arrival excited immense interest in shipping circles. She leaves on a trial trip to Glasgow, and will return on Wednesday next, 22nd Jan., starting on Saturday, January 31, for a "round-the-world tour," via Suez, India, and China to Vancouver, whence she will commence the new Pacific service. The *Empress of Japan* and the *Empress of China* will follow in subsequent months. They carry 170 saloon passengers each. All the berths for the round-the-world tour have been snatched up. The new vessels are beautiful ships, 485 ft. long, painted white with cream coloured funnels. They present quite a man-of-war appearance.

### BUDDHISTIC PRIESTS AND PRIMARY EDUCATION.

The *Koku-Hon*, referring to the movement among Buddist priests to obtain the franchise, is glad to notice that, their course having met with the unqualified condemnation of the public, they have come to appreciate the absurdity of their demands. To do them justice, observes the Tokyo periodical, these Buddhists were originally impelled to prefer such a request by zeal to increase the influence of their religion. They thought that their cause would gain materially by the presence in the Diet of a powerful contingent of men devoted to their creed. That they thought thus was quite natural, seeing into how deplorable a condition of ruin the whole fabric of Buddhist power has fallen in these latter days. Nevertheless, Buddhism is a force having deep foundations in the history, customs, and art of the country, and it can yet, thinks the *Koku-Hon*, be made an influential factor of the new civilization, if only the work of its regeneration be carried out in a judicious and practical manner. Certainly it was not either judicious or practical to seek to re-construct Buddhism with political materials. But now that the priests are beginning to see the absurdity of their position as political demagogues, our contemporary advises them to turn their attention to the sphere of primary education. There are a number of seminaries of high standing, supported and conducted by Buddhist priests. But most of these institutions, however liberally endowed, do not draw a sufficient number of students. There seems to be something wrong with the system of education adopted. The *Koku-Hon*, without stopping to examine exactly in what respect the system is imperfect, declares it a mistake for Buddhist priests to devote the best portion of their attention to higher education. The field in which they are specially qualified to be of service to the country as well as to themselves is that of primary education. Not that they have not paid attention to this department: they have indeed the credit of maintaining some well conducted establishments for the education of boys and girls. But the point urged by the *Koku-Hon* is that they should devote themselves chiefly to primary education. By following this advice they will kill two birds with one stone. In the first place, they will discharge their highest duty as desciples of their great teacher by supplying a want keenly felt in villages and hamlets too poor and too small to maintain a school, and in the second place they will thus be able to maintain and develop their hold upon the mass of the people. The *Koku-Hon* further recommends them to compile Reading Books which will impart to children, in simple and graceful language, the beautiful precepts of morality taught by Buddha and exemplified by the conduct of himself and of the immortal founders of the different Buddhistic sects. Boys and girls receiving the benefits of such instruction will not become unfavourably disposed to Buddhism.

### THE LAST DAY OF THE BUDGET IN THE LOWER HOUSE.

The Select Committee presented its Report on the Budget to the House of Representatives on Monday. The figures correspond with those given in our last issue, with one exception, namely, that the Committee added a further recommendation in the form of a reduction of two hundred thousand *yen* in the item of Extraordinary Railway Construction. Thus the total reduction was brought up to 6½ million *yen*, a sum obviously determined by the Committee's resolve—which the Government seems to have endorsed—to effect such a diminution on the expenditure side as should meet the loss of revenue resulting from lightening the Land Tax by 0.5 per cent. It is plain from the Committee's Report that this compromise was not effected without difficulty. Naturally the Committee shrank from the least semblance of lightly departing from the amendments voted by the House after such long and exhaustive debate. On the other hand, the Government understood fully, as everybody understood, that the decision taken by the House on the 26th instant to appoint a Select Committee for purposes of consultation and revision, meant a compromise. While, therefore, carrying compliance to the limits of expediency, the Government stood firm in its resolve not to yield more than a certain amount, and the Committee, on its side, maintained a stubborn attitude at least long enough to prove its fidelity to the House's wishes. Count Matsukata spoke of the agreement finally evolved as a matter of national congratulation and the great bulk of the Japanese people will doubtless agree with him; for it is now everywhere admitted that the Extremists nearly betrayed the House into a course of action as unconstitutional as it was unpractical.

* * *

The tactics of the Extremists in the House yesterday were the tactics of men who knew that defeat stared them in the face. They attempted to prove that the Select Committee had exceeded its powers, on the one hand, and failed to discharge an important part of its duty on the other. Our report of the debate shows how these contentions were supported, and shows also that, while professing to be so desirous of effecting economies and lightening the people burdens, the Extremists would have preferred to see the Budget of last year carried out to seeing the House and the Government part on good terms. They aimed simply at getting the Report sent back for amendment, which would have assuredly entailed the non-existence of the Budget. With this object they mustered all their forces. Not since the earliest days of the Diet's session has such a large attendance been present. Out of a possible total of about 290—some ten members being accounted for by sickness or resignation—282 were present, and the Committee's Report was voted by a majority of 32. Nothing seems to have influenced the Moderates so much as the conviction, repeated again and again, that unless they accepted the proposed compromise, they must resign themselves to go without anything. The Japanese are very practical folks. They know how to give and take, and the Moderates have the satisfaction of knowing

Digitized by Google

that they have saved the whole session from ending in a fiasco, have rescued the House from an anomalous position, and have accomplished a solid work of economy.

* * *

The one really regrettable feature of the affair is that no less a sum that twelve hundred thousand *yen* should be deducted from the fund set apart for railway construction during the next financial year. We are entirely opposed to the policy of sinking Japanese floating capital in railways; but that is inevitable until the revision of the Treaties places the country in a position to borrow money abroad. To arrest the construction of railways as a prime step towards reducing expenditure seems, however, a distinctly retrogressive policy, and we are sorry that the first Japanese Parliament should be associated with such a measure.

### THE HOUSE OF PEERS AND THE BUDGET.

THE Budget was transmitted on Tuesday to the Peers, so that five days remained for its discussion and approval by the Upper House. The question whether or no so brief a period can possibly suffice for such an important debate, would be answered in the negative by anyone referring to the Rules of Procedure in relation to the Budget, adopted recently by the Peers on the motion of Viscount Tani. The provisions of the Rules are briefly as follow:—On receiving the Budget from the Lower House, the President causes it to be printed and distributes copies among the members; the House then commits it to the Budget Committee, fixing a limit of time within which the latter's Report must be submitted; the Committee, having divided itself into Sections, proceeds to examine the Budget according to a system accurately laid down in the Rules; the examination being concluded, the Committee submits its report to the President of the House, who causes it to be printed and distributes copies among the members; the House then undertakes the examination of the Report and of the Budget in accordance with the same system, in respect of textual division, as that previously pursued by the Committee; votes are taken as to seeking the Government's concurrence to changes in the "fixed expenditures," and on obtaining concurrence the changes are voted; having finished the work of discussing and amending, the House directs the Committee to prepare a complete statement, and if the latter includes any alterations of the Budget as sent up from the Representatives, a conference of the two Houses is opened. It is difficult to imagine that all these steps can be completed in the very brief interval remaining before the close of the Session. Evidently if the Peers amend any of the items that have already passed the Representatives, the chances of "existence" become almost infinitesimally small. But even supposing that no changes are made requiring a conference of the two Houses and re-submission of the Budget to the Representatives, it is plain that unless the Peers bring to bear on the work a very large measure of zeal and good-will, they cannot carry it through. In other countries the function discharged by the Upper House in respect of the Budget is of a purely formal character, merely a perfunctory kind of endorsement. But the Japanese Upper House includes an exceptional element, namely, elected representatives of the highest tax-payers in all the Cities and Prefectures. It would not be natural that these men should submit to be treated as mere dummies in relation to national finance. They have a better right than any members of the Commons to make their voices heard in the matter of imposing taxes, and applying the proceeds of taxation, and their right ought to receive practical recognition. But the circumstances of the present Budget are exceptional, and the Upper House appears disposed to treat it in an exceptional manner. It has been entrusted to the Committee with an instruction that the latter's Report must be furnished in two days. From the questions addressed by Viscount Tani to the Minister of State for Finance, it was evident that the Viscount contemplated some recalcitrant action, and such proved to be the case, for after the Budget had been handed over to the Committee, he and several other sympathizing members withdrew their names from the Committee on the plea that the instruction as to time rendered it impossible to undertake any efficient examination. This proceeding has not disturbed the arrangements. The Committee is at work, and will submit its Report within the prescribed period. Whether Viscount Tani will muster a sufficient following to obstruct the subsequent debate, remains to be seen. We do not think so, however. A majority of the members will, it is confidently asserted, make every possible endeavour to save the labour of the Lower House from becoming abortive. If they accomplish their purpose there will be a striking contrast between the five days of the Peers and the ninety days of the Commons.

### THE HOUSE OF REPRESENTATIVES AND THE "SOSHI."

WE are unable to understand the motives that guide the procedure of the House of Representatives. Last month, when a *soshi* made his way into the House and attacked Mr. Inouye Kakugoro, the latter gave a statement of the fact an hour afterwards from his place in the House, and the President, having afforded information as to the name of the rioter, announced that nothing appeared necessary further than to leave the matter in the hands of the police. Some days afterwards another *soshi* repeated the operation, Mr. Misaki being this time the victim, and the assault again taking place within the precincts of the House. But on this second occasion the Representatives showed even greater indifference than before. The occurrence was not even alluded to by either the President or a member, and the incident was treated as though such things fell within the ordinary routine of daily work. Then followed the performance of the 3rd instant, when a youth threw a quantity of filth wrapped in a newspaper at Mr. Inouye Kakugoro. The mal-odorous parcel, discharged from the Strangers' Gallery, failed happily to strike any one. Of course the thrower was immediately arrested, but he turned out to be as unlike a politician as could be conceived. The sixteen-year old son of a *shizoku* in greatly reduced circumstances, who resides in the Shiba district of Tokyo, and is much too concerned about earning his bread to meddle with politics, the youth obtains a few *sen* daily by hawking newspapers. His story of the occurrence is that a stranger in the gallery gave him the parcel and offered him 20 *sen* on condition that he would throw it at an indicated member, Mr. Inouye Kakugoro. The stranger explained, as an additional inducement, that the proceeding would serve as a splendid advertisement for the newspaper. Whether the silly lad believed this, or whether he really acted at such a bidding, it is at all events certain that the sum of his offence was to throw a newspaper parcel of horse droppings from the gallery of the House on the seat of an absent member. Yet the President announced, the following day, that as the act had constituted an insult to the House, it seemed proper that the House should prosecute, and this view was adopted without question. But if the throwing of dirt from the gallery is an insult demanding legal proceedings in the name of the House, what shall be said of the assaults committed on Messrs. Inouye Kakugoro and Misaki Kamenosuke within the precincts of the House? A member thought it advisable to inquire who had introduced the dirt-thrower, but not one question has ever been put in the House as to wielders of fists and bludgeons who assaulted Messrs. Inouye and Misaki. Neither did the House consider itself bound to move in these latter incomparably graver cases. It is all incomprehensible.

### RAPID LEGISLATION.

THE House of Representatives seems determined to show that if it dallied an immense time over the Budget, it can legislate very rapidly when it pleases. It has disposed of several important measures with remarkable celerity since the Budget left its hands. The Weights and Measures Bill was a conspicuous example. One forenoon may be said to have represented the total time given to it by the House. A Special Committee had, of course, fully considered the measure and reported favourably on it, recommending, however, one slight amendment, which would have necessitated conference with the Upper House, and probably the return of the Bill to the latter. The Representatives never even discussed the amendment. They rejected it incontinently, and voted the Bill by an overwhelming majority. Mr. Takanashi's extraordinary speech in opposition will remain a feature of the session. It found one applauder in the House, Mr. Tanaka Shozo, and if Mr. Takanashi is proud of the association, he certainly need not be proud of the blindly conservative sentiments of his speech, elegant as was the language in which they were expressed. It will be a source of sincere satisfaction to Professor Kikuchi, who engineered the Bill through the Upper House and had so much to say to its drafting, that his labours have borne practical fruit, and it is emphatically creditable to the Representatives that they took such a liberal and enlightened view of the measure. Mr. Saito Shiuichiro, who had charge of it in the Lower House, showed excellent judgment in not wearying the members or occupying their precious time with explanations which his quick perception of the situation showed to be unnecessary.

### HYDROPHOBIA.

SINGAPORE has been considerably excited recently by several deaths in quick succession from hydrophobia. A commission has sat and an influential deputation has waited upon Sir Cecil Smith in connection with the matter, and meetings have also been held. If ever the fell disease should break out in Japan the consequences would be likely to be terrible in Yokohama, on account of the number of mangy ownerless curs and cayotes that swarm in the Settlement and in the surrounding villages. The *Singapore Free Press* says:—A largely attended private meeting was held in the Exchange Rooms, on the afternoon of the 13th inst., to consider the hydrophobia question, and the following resolution was adopted:—"That this meeting is opinion that, owing to the increased number of deaths from hydrophobia in Singapore, some strong measures should be at once taken to stamp out the disease in the island, and subject to provision for quarantine, to be afterwards considered, all dogs should be killed; and that a deputation wait on His Excellency the Governor to urge these views."

### JAPAN AND GERMANY'S TEXTILE INDUSTRY.

UNDER the above heading the *National Zeitung* has published in its commercial supplement a few thoughts that may be of some interest to our readers. We translate them is follows:—The has just closed has not been a very prosperous one for Germany's textile industry. In America, a reckless legislature has passed the notorious McKinley Act, and has thus dealt a severe blow to German exports to the Union. In South America, political and financial embarrassments have seriously hindered Germany's commercial activity. In view of the injurious effects of the McKinley Act especially, Germany would do well to seek for its imminent losses compensation elsewhere, as the most favourable political constellations in the United States cannot easily undo what has been done. Besides the extension of her colonial activity, Germany must also make it her duty successfully to resist foreign competition in other and longer civilized lands, in order to gain additional ground in the markets she has already entered but is not yet supplying to the full extent of her capacities. Such a market, among others, is Japan. If we consult the commercial statistics of that country, we find that Japan has made the most steady economical progress, and that Germany plays an important *rôle* in her markets, but that England still predominates. and maintains the first rank, especially in textile fabrics. Here then

Digitized by Google

—and we would call general attention to this point—a favourable and fair field is offered to German industry and enterprise, a field whose cultivation may easily secure compensation for the losses in America. We will give a review of Japan's trade during the last years. (Here follow statistics covering the time from 1884 to 1889, well known fo the readers of the *Mail*.) From these facts it will be apparent that Japan's imports, since 1884, rose by 133 per cent., her exports by 112 per cent. How far did Germany participate in this trade? Unfortunately we are uot in possession of sufficient data to come to definite conclusions. We have only the statistics of 1888. (These are then given.) Among the European powers Germany, it is true, occupies the second place, so far as the import trade is concerned; but England is still her superior, and that by a wide margin: while among non-European powers she has stronger rivals in the Chinese, the Indians, and the Americans. England's superior position rests, as we gather from various other statistics, especially on her exports of textile fabrics that have secured the lion's share of Japan's consumption of foreign manufactures. By far the largest share of what the country needs in cotton and woollen fabrics is supplied by England, and goods of this description constitute about 40 per cent. of Japan's total import. We are of opinion that in this line Germany may by greater vigilance and industry secure a larger field for her imports. Only very recently the *German Commercial Archives* have given valuable hints in this respect, with reference also to features that require caution. We there read that merchants in Japan, find themselves face to face with a growing change in the mode of payment, inasmuch as buying on credit has become more and more customary, a change natural enough in view of the fact that the native merchant, the intermediary of the commerce with the interior, himself sells on credit, while the facilities offered by Japanese banks are at present merely nominal and liable to be withdrawn in critical moments. The credit system, however, not only increases the risks of the foreign importer, but also occasionally favours an import altogether out of proportion to the needs of the situation, a fact which would again first of all react upon the foreign trader. Finally, it may also be mentioned that a number of Japanese aim at gradually displacing ali European manufactures, an object that, according to competent observers, it will take a good while yet to realise. Especially fears as to woollen fabries are quite infounded. Woollen manufactures, whose present perfection in Europe is the result of long and tedious processes, could not possibly be produced in equal quality and cheapness in a country that does not itself possess the raw material, and whose demand for wool is not yet sufficiently developed to create a regular and cheap supply from the great wool-growing districts of the world.

### THE YOKOHAMA HARBOUR.

Mr. Takanashi Tetsushiro has acquired a high reputation for eloquence in the House of Representatives, but his name has not yet been associated, in a leading position, with any measure of genuine utility. His time will come, however. He is already a prominent figure in Parliament. But we cannot see that he will enhance his reputation by the motion he has introduced in relation to the Yokohama Harbour. He has asked to have a Committee appointed to inquire into the expenditure hitherto incurred in connection with the work, and into the progress made, and further to give advice as to the course that ought hereafter to be adopted. In an explanatory document accompanying this proposal, he dwells on the important influence likely to be exercised on the trade of the country by the construction of a harbour at Yokohama, and declares that the probable results of the undertaking ought to be carefully studied. Ostensibly the motion is referred to the fact that whereas an appropriation of 200,000 *yen* appears in this year's Budget on account of the Harbour, the Diet is given no information as to the expenditure to be entailed in prosecuting the work subsequently, but it is plain that this plea possesses little value, inasmuch as all information of such a nature might have been obtained by addressing a few questions to the Government Delegate for the Home Office, when the Budget was under discussion. If Mr. Takanashi's proposition has any vertebra—and we presume that it has, since he gives an emphatic proof of earnestness by recommending that the Committee should sit without remuneration after the closing of the Diet—he must contemplate the arrest of the work of construction. Every one knows that a considerable feeling of jealousy exists in Tokyo with respect to the Yokohama Harbour. The citizens of the capital very naturally want to have a port for themselves, which may gradually attract all the maritime trade from Yokohama. They do not like the idea of Yokohama becoming a sort of Gravesend to Tokyo. Therefore, if they could put a stop to the Yokohama Works on any reasonable pretext, they would doubtless be glad to do so. But they have lost their opportunity, if, indeed, it ever existed. Before the Diet reassembles the construction of Yokohama Harbour will be carried to such a point that its abandonment would make a laughing-stock of Japan. We do not suppose for a moment that the Diet would consent to anything of the kind, and such being the case, the utility of Mr. Takanashi's Committee is difficult to appreciate. The members can get a lesson in the art of harbour construction, it is true, but that is scarcely a sufficient reason for parliamentary action of the nature proposed.

### JOURNALISTIC CURIOSITIES.

*Japan Mail*.—Feb. 23rd. (Concerning the defeat of the Extremists).

To what causes must this strange occurrence be attributed? To two, apparently: first, and chiefly, to a secession of a portion of the Radical Party; secondly, and in a very trifling degree, to a growing conviction that if the House persisted in its course, dissolution was inevitable. The seceders were the members of the *Aikoku-koto*, Count Itagaki's special followers. * * * With them are said to have voted the National Radicals (*Kokumin Jiyu-to*), a party still in an embryonic condition, which had previously cast in its lot with the Extremists.

*Japan Gazette*.—March 2nd. (on the same subject).

"Twenty members, belonging to the Tosa faction of the *Jiyu-to*, who hitherto had voted for the Budget Committee's Report, betrayed their cause by joining the opposite party. This it was that decided the contest."

It is no doubt not a little annoying to our contemporary to find the "ill-starred" journal publishing a credible explanation of a somewhat complicated political event, which, relying on the credulity of its readers, it attributed to the eloquence of a non-influential member of the Diet, Amano Jakuyen.

The marvel of the *Gazette's* assertion, evident at once by reference to the above extract from our own columns, will be better appreciated when we say that not the remotest allusion has ever been made by us, directly or indirectly to Mr. Amano Jakuyen's "eloquence," nor have we ever hinted that the defeat of the Extremists on the 20th inst. was due to any cause other than the one distinctly stated by us originally, namely, "the secession of a portion of the Radical Party." Eight days after our statement of that cause, the *Japan Gazette* re-states precisely the same cause; six days after our publication of the names of the seceders, the *Japan Gazette* publishes the names of the same seceders. And then this "honest" newspaper turns round and deliberately accuses us of attributing the defeat of the Extremists to Mr. Amano Jakuyen's eloquence, though not one word about that gentleman's eloquence had ever appeared in our columns.

* * *

Regarding the new *Japan Gazette* as a species of journalistic phenomenon, endued with some mischievous capacities on account of its connections, we think there is interest in analysing its methods. Here, then, is another curious example. On the morning of Tuesday, Feb. 24th, the *Japan Mail* published a translation of the order to be observed in marshalling the funeral cortége of Prince Sanjo. On the evening of the same day the *Japan Gazette* published a translation of the same thing. The two translations were absolutely identical, except that a group of eight flags carried in the procession were arranged by us with the red flags on one side and the white on the other, whereas the *Japan Gazette* arranged them alternately as to colours. There were, of course, some trifling variations of phraseology, and one of Prince Sanjo's decorations appeared in our list as "Persian" instead of "Belgian." But for the rest, there was not the most infinitesmal difference between the two translations. Nevertheless, the *Japan Gazette*, three days later, had the extraordinary temerity to write thus:—"It is somewhat amusing to be referred to the *Kwampō* notification of the ceremony, when the *Gazette* was the only paper that, prior to its celebration, published a correct translation of that notification. The translation published in the *Mail* was *a perfect jumble, the parties and articles mixed up in hopeless confusion, the flags all wrong*, and the deceased endowed with a new order, the *Persian*, instead of the Belgian." (The italics are ours). We have never, in the course of ten years' journalistic experience, encountered such reckless indifference to truth as the *Japan Gazette* displays. How to treat such a newspaper is a novel problem. Must we hold it non-accountable, or must we accept the far less welcome hypothesis that it does not attach the smallest importance to veracity?

### THE IMPS AGAIN.

So it was "avoid tautology" that the *Japan Gazette* spoke of the Foreign Representatives in Tokyo as "Ambassadors!" What malicious villains they are, these seven devils of explanation! They found a house swept of information, and they garnished it with the funniest evasions and delusions conceivable. We begin to think that they will end by starting the unfortunate editor down the steep place of that other parable. He has rushed off now in pursuit of the will-o-the-wisp that the title of "Excellency" should not be applied to the wives of the Foreign Ministers in Tokyo. Certainly not, if strict rule be followed. But neither ought the title of "Excellency" to be applied to the Ministers. It is applied, however. Such is the social usage of the capital, and what is certain is that if the Ministers' names are to have the prefix "Excellency," the same courtesy must be extended to their wives. The wife of an Excellency is an Excellency. Society stretches many points in these matters, and long usage has imparted the value of rules to her politenesses. She permits the title of "Esquire" to be employed in cases that do not fall within the list of persons qualified to receive it, and we suspect that the editor of the *Japan Gazette* would be greatly chagrined if he ceased to find that familiar suffix in the superscriptions of his epistles. It seems a somewhat futile task to speak of social usages to a journalist who has allowed himself to show such indifference to the ordinary canons of politeness in his manner of alluding to the wife of the French Representative, but the particular point at issue is so simple that the *Gazette* will perhaps be able to grasp it.

### THE LATE MR. DIVERS.

The *Foochow Echo* says:—"The sudden death of Mr. Frederick James Divers, of the Customs, on Sunday, 15th February, at noon, was a great shock to the community. Perfectly well and happy to within a few minutes of his death, he was carried off in the prime of youth, without warning, and without the possibility of help, in less time than it takes to write this brief tribute to his memory. In the few months that Mr. Divers had been with us he had won for himself a firm place in the esteem of the community, and was universally liked for his genial ways, musical accomplishments, and sunny disposition. In this sudden bereavement the afflicted family has the heartfelt sympathy of the entire community, in which each member feels a personal loss at the taking away of one so young and justly popular, and for whom the future, with its many possibilities, held out so much of promise." Mr. Divers was recently transferred

Digitized by Google

from Canton to Foochow. He was, we believe, the writer of some very graceful and spirited sketches that appeared lately in the *Echo* over the signature of "Madeleine."

### THE STORY OF THE BUGDET.

It is not easy to see whence some of the local foreign journals in Japan derive their ideas of the settlement effected by the Committee of the Lower House in the matter of the Budget. The *Japan Herald* says that the Government "virtually censures itself, by thus admitting that its scheme of expenditure was in excess of the needs of the nation" and "in thus widely departing from its own estimates to please the House;" while the *Kobe Herald* concludes that all the sweeping reductions of salaries proposed by the Budget Committee had to be accepted by the Government. The latter journal probably wrote before full details had reached it, and the former seems to have adopted a conclusion which, though natural enough if mere totals are considered, is not supported by an accurate examination of the items. In order to make the matter plain, we reproduce here a table showing the amounts asked for by the original Budget under the heading of "Ordinary Expenditures," the amounts proposed by the Budget Committee, and the amounts finally settled by conference between the Select Committee and the Government:—

ORDINARY EXPENDITURES.

| | Amounts asked for by the Government. | Amounts proposed by Budget Committee. | Amounts agreed upon after Conference. |
|---|---|---|---|
| | *yen.* | *yen.* | *yen.* |
| Imperial Purse | 3,000,000 | 3,000,000 | 3,000,000 |
| Foreign Office | 844,636 | 628,552 | 741,097 |
| Home Office | 8,551,808 | 6,841,645 | 7,954,576 |
| Finance Department | 29,721,667 | 27,250,937 | 27,706,967 |
| War Office | 12,713,161 | 12,127,078 | 12,507,161 |
| Admiralty | 6,100,691 | 5,749,833 | 5,712,470 |
| Department of Justice | 4,216,350 | 3,270,262 | 3,692,537 |
| Department of Education | 1,075,583 | 781,794 | 955,583 |
| Department of Agriculture and Commerce | 955,934 | 698,382 | 830,834 |
| Department of Communications | 4,991,347 | 4,803,849 | 4,684,204 |
| Totals | 72,171,177 | 65,152,332 | 67,785,429 |

It appears from the above that whereas the Budget Committee proposed to reduce the Ordinary Expenditures by 7,018,845 *yen*, the total reduction agreed upon was only 4,385,748 *yen*; or, if one million taken from the Reserves be omitted in each case, the Budget Committee proposed a total reduction of 6 millions and the Select Committee cut this down to 3¼ millions. The other sums conceded by the Government were deducted from the Extraordinary Expenditure, and from the appropriations for railway construction. In short, while the House succeeded in effecting a sufficient reduction of Expenditure to meet the deficiency caused by cutting down the Land Tax, it really accomplished none of the Administrative reforms which it had pronounced necessary, and which, on the other hand, the Government had declared incapable of immediate enforcement without throwing the machine of State seriously out of gear. This year sees no reduction in either the salaries or numbers of officials, so far as the Budget is concerned.

### JAPAN IN THE "PALL MALL BUDGET."

The *Pall Mall Budget* devotes a column to "Japan's First Parliament." The text is accompanied by a view of the now defunct buildings of the Diet, and by two portraits, the one of Count Ito, the other of Mr. Nakashima Nobuyuki. Count Ito's likeness is not successful. The forehead alone is correct. But Mr. Nakashima is very well re-produced, only that he is made a dozen years younger than he really looks. It is very fortunate for these two gentlemen and also for the Diet buildings that a certain youthful artist who lately visited Japan did not happen to be here on the memorable 29th of November:—

By this time a great deal of the excitement which attended the opening of Japan's first Parliament has sobered down into calm appreciation of the privileges of the franchise. A correspondent from the Mikado's realm sends us some particulars. In the House of Peers, as already published, are some 170 members, and in the House of Representatives, about 300. Political thought is naturally at this initial stage crude, yet its tendency was clearly manifested during the election of Commoners. Out of the 300 Representatives, 140 are Radicals, 40 Liberals, 80 Independents, and the remaining 30 Conservatives, or Government allies. This classification is likely to lead to confusion if it is thought that it has any literal correspondence with that with which the Englishman in the street is acquainted. The opening ceremony took place on the 29th of November, in the presence of a gathering rendered intensely spectacular by the pompous habiliment of vernacular officialdom, and the assertive accoutrements of diplomacy. The Emperor Mutsuhito delivered his message in person, declaring—

That the leading features of the various systems of domestic Government We have promoted during the twenty years since Our ascension to the Throne are now almost completed. We earnestly pray that We, aided by the virtue inherited from the Imperial Founder of Our House and from Our other Imperial Ancestors, and with your co-operation, will unite the past, brighten the future, garner the excellent fruits to be yielded by the Constitution, and thereby continue to augment the glory of Our Empire, and to display the admirable, loyal, and brave character of Our subjects both at home and abroad.

The ceremony was not less impressive than brief. Within five minutes from the time of the Emperor's ascension of the dais in gold and red, from which he delivered his address, cannon were belching forth to the outer world of Tokyo that the promise so solemnly uttered more than a score of years back had at last been fully fulfilled.

Our illustrations show the temporary building in Tokyo, in which the Imperial Diet is now meeting. Count Ito, whose portrait is given, drafted the Constitution, and is a statesman who would compare favourably with those of whom Englishmen are so proud. As a master of high politics, he is a giant among Oriental pigmies. Count Ito guides the destinies of the Upper Chamber; while Mr. Nakashima, whose portrait is also here presented, and who has been closely associated with Christian movements, leads the Emperor's "faithful Commons."

### THE ELECTRIC LIGHT COMPANY'S CASE.

Judgment was delivered at one o'clock on Tuesday afternoon in the suit of the Tokyo Electric Light Company against Mr. Soné, Chief Secretary of the Lower House. The judgment was as follows:—"It is beyond question that if an official of the Executive, in the discharge of his duty, acts unlawfully so as to interfere with the rights of an individual, and cause him to suffer loss, the official cannot escape the responsibility of his act. But in the case before the Court, where the defendant reported to the Cabinet the observations actually made by himself as to the origin of a conflagration, no illegal act was involved, and consequently, though the result may have been injurious to the plantiff's business interests, there is no sufficient reason why this Court should order the defendant to alter his report, or direct him to cause any corrections of the report to be published in the *Official Gazette* or other journals. The case is therefore dismissed with costs." This issue, having been universally expected, will surprise nobody. The Electric Light Company should have sought redress by some other route.

### FUNERAL OF THE LATE MR. J. F. GORHAM.

The remains of Mr. J. F. Gorham were interred on Thursday in the General Cemetery with the honours accorded on such occasions by Free Masonry and Oddfellowship, of which orders the deceased was an attached and valued member. The coffin, having been conveyed from the residence at No. 187, was deposited in the lodge room of the Star in the East Lodge of A. F. & A. Masons, surrounded by many wreaths of great beauty, the tributes of sorrow from friends. Shortly before 4 o'clock a Lodge of Sorrow was opened. No less than sixty brethren were present. The ceremonies peculiar to the occasion were performed under the presidency of R.W.P. Bro. Keil, Mr. Griffin assisting at the organ. The coffin was thence conveyed to the hearse, and a procession formed, the pall-bearers being Messrs. Crane, A. T. Watson, Geo. Hodges, H. Moss, Geo. Booth, F. Retz, and G. Charlesworth, Mr. J. J. Efford, W.M., and Messrs. Keil and Tripler, P. M. of the Star in the East Lodge, walking behind the hearse. The general body of Free-Masons, who wore crape rosettes, followed. The members of the Far East Lodge of Oddfellows, who had assembled in another room of the building came next, wearing ribbons and crape rosettes in their button-holes, and marching in partial regalia. They consisted of Mr. J. J. Pearson (Noble Grand), and Messrs. E. Thorn, E. A. Sargent, C. R. T. Dross, and T. W. Kennaway, Paymaster McDonald, U.S.N; and Dr. Hall, Messrs. L. Ph. Von Hemert, W. G. Cameron, L. Stornebrink, Rev. G. Booth; Messrs. F. H. Bugbird, G. H. Scidmore, J. Maclean, Ivison, McShane, &c. No. 4 was represented by Mr. A. Center, Mr. Howard, and Mr. Tilden, and among the general public were Rev. E. C. Irwine, Messrs. J. Martin, J. L. O. Eyton, C. H. Hinton, B. H. Pratt, H. J. Gorman, &c. The procession proceeded by Camp-hill to the Cemetery where, led by Mr. Keil, the Free Masons present united in performing the closing rites and rendering the last honours to their deceased brother. After casting sprays of evergreen into the grave, the Masonic brethren made way for the Oddfellows who also, at greater length recited round the grave the beautiful ritual of their order, Mr. Pearson and Rev. Mr. Booth leading the service. This brought the ceremonies to a close. The late Mr. Gorham had, we believe twice passed the chair in the Hyogo and Osaka Lodge at Kobe; he was one of the charter members of Star in the East Lodge, and his name is on the charter of Far East Lodge of Oddfellows in a similar honourable capacity. The large attendance yesterday of both orders, and of the general public was a striking proof of the esteem in which the deceased was held in this community.

### HONGKONG RACES.

From the opening day's running at Wong-nei-cheong, it looked very much as if Mr. John Peel would take at least half the races at the meeting, as the "blue and silver" landed no less than six events of the first day's programme, and that too with five different ponies. The balance of the results to hand, however, show that there was a more equal division of the spoil on the second and third days, though the "Ewo" stable has no less than ten races to its credit, and these include the Hongkong Derby on the first day, the German Cup on the second, and the Ladies' Purse on the third. Mr. Buxey was second on the list with six wins, and Mr. Sassoon next with four. The crack Zephyr won the Lusitano Cup on the first day, and the Challenge Cup and the Champion Stakes on the third, in the latter race owner up.

### AN OCEAN RACE.

We have just learned the result of an ocean race which possesses a certain amount of local interest. Two fine ships, the *Milverton* (Capt. Hansford) 2,112 tons, and the *Pythomene* (Capt. Dexter) 1,896 tons, left Yokohama in December last bound for Tacoma in ballast. Previous to their departure a wager was laid between the captains (other money being put on by shore believers in the merits of the respective vessels) as to the result of the passage, each commander backing his own vessel to make the speedier trip. The *Milverton* left Yokosuka (whither she had gone to be cleaned) on December 13th, and arrived at Townsend on January 6th (24 days) thus, according to a Tacoma contemporary, breaking the record. The *Pythomene* left on December 22nd and arrived at Townsend on January 23rd (32 days) losing the wager by 8 days. We learn from a private letter that Captain Hansford's first night out from port was a dirty one, for, under lower main-topsail, he was kept wearing every three hours between Mela Ledge and Vries Island in a nasty S.E. gale, with thick heavy rain. The wind shifted to S.W. about 10 a.m. the following day (Sunday) and he squared away, his only other detention being off Cape Flattery, where he stuck for three days.

### MR. GUBBINS' DICTIONARY.

The Second Part of Mr. J. H. Gubbins' "Dictionary of Chinese-Japanese Words" has now been published. The first thought that occurs to us in connection with it is that few men would have had the courage to set about such a work, while the materials of which it is composed are in a state of constant change. Many years must elapse—certainly ten, probably twenty—before the enormous additions now almost daily made to the vocabulary of modern Japanese will have crystallized into a form inviting the task of exhaustive lexicography. Anyone attempting, in the meanwhile, to fix in the pages of a dictionary the perpetually shifting medium employed by new Japan to communicate ideas, resembles a man treading on a quicksand; every step brings to the surface depths hitherto unsuspected. And yet this difficulty makes it all the more essential that some helping hand

Digitized by Google

should be held out to the student who daily feels disposed to fold his arms in despair as the vista before him expands in unlooked-for directions. If he takes up a newspaper, or opens the pages of a new work, expressions wholly unfamiliar greet him continually. Should he be deeply versed in ideographs, he can generally grasp the sense of these strange words, since they are nothing more than compounds of two or more Chinese roots. But even granting the possession of such exceptional scholarship, there remains the difficulty of determining exact English equivalents—a difficulty only to be appreciated by those who know how completely an Englishman must divest himself of his wonted modes of thought and expression in order to come into close touch with the Japanese tongue. It is not necessary that one's own language should be sent to coventry when one seeks to make the acquaintance of German, French, or some other European tongue, but it is absolutely necessary in the case of Japanese. Japanese is a thorough despot. It must have the field wholly to itself. Scholars really *en rapport* with its spirit affirm that when they read Japanese or hear it spoken, any attempt to render its meaning into English involves a painful mental wrench, and the more fully they comprehend it, the greater is the distance from which they have to recall their thoughts in order to play the part of interpretation or translation. To the most erudite of these, as well as to their less gifted brethren, Mr. Gubbins' Dictionary will be an immense boon. He has done all the thinking for them. An apt and exact English equivalent is to be found in his pages for the vast majority of the classical expressions now in literary and linguistic use. Of course some words are wanting. That is inevitable, for however rapidly such a book may be compiled the increments of the language always distance it. Thus we find that the very title of the dictionary already looks antiquated. The words it treats of are indeed "Chinese-Japanese" in respect of their origin, but within the past two years a vast number of them have become as thoroughly Japanese for all practical purposes as any familiar colloquialism of the pure *Yamato-kotoba*. Parliament has done much towards bridging over the interval that separates the written from the spoken language of Japan. Many a term never encountered outside an erudite document when Mr. Gubbins began to compile his dictionary, has now been included in the nation's domestic vocabulary. There could be no better evidence of the strength and soundness of his scholarship than the fact that, despite this spontaneous and incessant piling up of materials, his work still remains on the summit of the mountain. His deep insight into the capacities of Sinico-Japanese has enabled him, if not to forecast all its actual developments, at any rate to indicate them so clearly that the student can scarcely ever find himself in a difficulty. We shall no doubt be thought to have failed in our task as reviewers unless we indicate some faults or correct some inaccuracies. But we have not a scintilla of sympathy with reviewers who admit any such obligation. No English sinologue has ever devoted the same toil and thought as Mr. Gubbins to this branch of the language, and though every sinologue, following the thread of his own particular researches, might discover some *lacunæ* in the work, its general scope would still be quite beyond the range of his reasonable criticism. A Japanese, possessing an exceptionally minute knowledge of English, concludes a strong eulogy of the book with the remarks:—"A few improvements suggest themselves. For instance, the initial ideographs of the sections might be printed in the upper margin of each page, and accents might be used to distinguish the pronunciation of such words as *kwa-han* (過半) and *kwa-han* (過般), which, though phonetically rendered alike, are pronounced with accents on different syllables (the former on the second, the latter on the first, syllable.)" The former suggestion is certainly worth consideration, for the use of the dictionary would be facilitated could one see at a glance the fundamental ideographs in each page. But what we look for most earnestly is the publication of the third volume, and of a supplement containing English-Japanese. This Second Part carries the dictionary from *K* to *R* inclusive, the former letter alone occupying no less than 246 pages. When a lexicographer of Japanese has conquered *K* the back of his work is fairly broken, and *S* alone remains for serious negotiation. An idea of what is involved in dealing with *K* may be gathered from the fact that there are no less than 19 different ideographs all pronounced *Kwa*, and that the compounds under one of them (花) number 107. The Third Part of the dictionary will, therefore, be less formidable than the Second, and we may fairly congratulate Mr. Gubbins on having carried his great task within sight of completion. The book is absolutely indispensable to every one engaged in translating modern Japanese into English, and indeed to all earnest students of what may fairly be called the most difficult language in the world. Happy students and translators to be furnished with such aids! Very different are the obstacles lying in their path from those that impeded the progress of their predecessors. The acquisition of Japanese is immeasurably easier now than it was in the times when Mr. Gubbins laid the foundations of the knowledge that has borne such excellent fruit to-day.

## THE KOREAN SEMI-MILLENIUM.

A CORRESPONDENT writes as follows from Korea:—"We have entered upon the five hundredth year of the present dynasty of Korea. It is an important and interesting period, at least in the eyes of the Koreans, for they consider these periods of five hundred years to be crises in national life. It may be interesting to your readers to glance at the different dynasties that have swayed the sceptre in the peninsula. First we have the fabulous age when a sacred personage called the Langoon reigned over the country. He is supposed to have come into power about 3000 B.C. and reigned until 1122 B.C. when Ki Ja, the founder of Chosen, came from China. The origin of the Langoon is an interesting myth, and as it is not to be found in either the Chinese or Japanese annals of the country I will give a short sketch of it here:—

### LEGEND OF THE LANGGON.

Thousands of years ago, while the peninsula of Korea was as yet inhabited only by savage beasts and still more savage men, a wonder appeared in heaven. The son of the great Buddha, afflicted with Divine ennui, stood before his father's throne and asked permission to take upon himself an earthly form and rule over an earthly kingdom. Permission was granted and the fiat went forth. Meanwhile another wonder was seen on earth. In the heart of the primeval forests of northern Korea on the slopes of the Pak Tou (white head) mountains, in a gloomy cave, a bear and a tiger met and held a colloquy. "Would that we might become men" they said, and even as they spoke they heard the voice of the great Buddha, and it said, "Here are twenty bunches of garlic for each of you. Eat them and keep yourselves from the light of the sun for twenty-one days and you will become men." They ate them and went far back into the recesses of the cave to spend the allotted time in darkness; but the tiger, by reason of the fierceness and impatience of his nature, could not endure the long restraint and wandered forth with his beastly nature intensified so that he is the deadliest enemy of man. The bear, however, with greater faith and patience, waited the allotted time and then stepped forth into the sunlight a perfect woman. As she sat under an ancient cedar by the stream her only thought was that of maternity, and the only words that came from her lips were, "Would that I had a son!" As she sat thus lovely but melancholy, there passed her on the wind the spirit of Buddha's son seeking earthly form. It beheld her then, lone-sitting by the stream. It stopped in mid career. It approached and circled round her, breathed upon her, won her, and her cry was answered. She cradled her babe in moss beneath that same ancient tree, and when he attained manhood the wild people found him siting in deep and holy contemplation beneath its shade, and they made him their king. This was the Langoon, the man half divine half earthly. He reigned two thousand years, a divine day, and then went back to his father."

Such, according to native accounts is the origin of the Langoon. In 1122 the semi-historical period begins. Ki Ja came with his 5,000 followers from the Court of China and founded the civilization of Korea. It must be remembered that neither of these kingdoms extended south of the Han river, near whose banks the present capital is situated. Ki Ja and his descendants reigned in the ancient city of Pyeng Yang nearly a thousand years, until overthrown by the treachery of Eniman, a Chinese refugee. Then the remnants of the Ki Ja family fled south, and discovered to their great surprise that the south part of the peninsula was inhabited by a host of little clans along the coast. They were kindly received and soon Ki Jun, the last of the ancient chosen dynasty was made king. Meanwhile, the petty tribes in the south east had coalesced and formed a Kingdom called *Silla* or rather *Sinla*, given in Japanese annals as Sin-lo. Soon after the Chinese power in the north, which had shattered the power of Eniman, went down before the conquering Chu-mong, the son of the King of Puya (Chinese Fuyu), and the Kingdom of Kokoria was formed, not among the mountains of Pak Fou, as is stated by Ross and Griffis and others, but with its capital at Eniju. In other words, ancient Chosen and Kokoria were never contemporaneous. Soon after the founding of Kokoria in the north, the refugees who had fled from Pyeng Yang after the fall of Chosen, and had settled in the south-west, gained control of the whole south-west, and set up the kingdom of *Pak Jay*, called in Japanese *Hiak-sai*. The kingdom of Pak Jay fell before the power of Silla after an existence of 680 years, and Kokoria also was annexed to Silla after an existence of 705 years. Then Silla was mistress of the whole land, and remained so for 268 years, making her total 992 years. At that point the powerful General Wang Geun stepped in, and, without attempting any violence to the King of Silla or its capital, formed another kingdom with its capital at Song Do. The King of Silla shortly after handed over his little remnant in the south, and accepted office under the new king. The new kingdom was called Korea, and was the first of that name. When Kokoria was founded it is said by some to have been called Korai, which is quite wide of the mark. There never was a kingdom of Korai or Korea on the peninsula anterior to the Wang dynasty, which Waug Geun founded about 960 years ago. There may have been a Korai in early times far north of Korea on the banks of the Amoor, but there was none south of that. There is some discrepancy in dates as regards the duration of the Waug dynasty, the kingdom of Korea. We must remember that the Chinese records of that time are not nearly so reliable as the Korean, for the great struggle against the wild Mongols was going on much of the time, and the condition of the civilization of China at that epoch, and the fact that for many decades the only relations the Koreans had with China were in connection with these half savage Mongols, make it highly probable that the Koreans, who were vastly in advance of the Mongols in civilization, were more accurate historians, especially of Korean matters, than the Chinese could possibly be. The question is: How long did the Kingdom of Korea exist. Those who write from Japanese and Chinese standpoints say about 458 years, while Korean historians give it fifteen or twenty years more. During the whole of that period of four centuries and a half the land was priest-ridden, and for a time Mongol-ridden as well, although of course the Mongols were in power only a century or so during the latter part of the dominion of the Wang dynasty. This was the period during which the coasts of Korea were being continually ravaged by Japanese pirates, which was the cause of the desertion of the coast on the part of the people, and the present bareness and bleakness of the land as seen from the deck of the steamer. When priestcraft had done all it could, and had brought the land to the furthest edge and circumference of patience and endurance, the great general Ta Jo, or Yi Ta Jo, assumed the royal function, not as a usurper, for the sceptre was forced into his hand. He re-

Digitized by Google

moved the seat of government southward fifty miles, to the present place; whose name is Han Yang, not Söul, for when the capital was at Song Do that was Sōul as well. The latter word means simply "Capital." Less is known of the first two centuries of this dynasty than of the centuries that preceded it. There are many reasons for this. In the first place the relations between Korea and China, as well as between Korea and Japan, were far less intimate than they were before or after, and so we learn less from Chinese and Japanese sources. In the second place we have to depend on the Government annals which are always to a certain extent euphemistic in this as in all countries, and deal more with the doings and sayings of kings than with the development and growth of the people. They partake, in short of the character of a court calendar. There are doubtless "people's histories" of this period, but for manifest reasons they are difficult to procure. Then comes the terrible Japanese invasion, the fruitful theme of song and story, the effect of which is stamped upon the people's minds and burned into their memories, though only through tradition, in a way that will never be entirely erased. After it followed the age of the repression of Catholicism, and the strengthening of the exclusive spirit and the sudden breaking down of the barriers. To-day Korea presents a striking contrast to what she was a couple of decades ago, and she has entered upon the last year of a semi-millenium. The fifteen day festival is closing. The common people have to-day performed their curious exorcism of demons for the year by stuffing coins into straw manikins and throwing them into the street for the small boys to tear open, signifying the destruction of the evil spirits. The kites have been pulled in, and small boys are counting up how many kites they have captured to how many yards of string. The people, at least the superstitious among them, are out in their good clothes walking the bridges of the city under the impression that if they walk over all the bridges of Sōul to-night it will insure immunity from disease for the coming year. At midnight a crowd of men, good-natured happily, will be massed at Chongllo, the open square in the centre of the city, and will participate in the most peculiar and objectless species of amusement ever devised: rushing in a solid mass up the street a distance of fifty yards sweeping everything before them, and then back again, and woe to the unlucky wright that falls. He will be walked over by several hundred pairs of hob-nailed shoes, to the detriment of his apparel if not of his constitution. The only fun in this all seems to be simply the excitement of the rush, accompanied as it is by a loud simultaneous yell from every pair of lungs. To-day marks the beginning of the spring stone fights, in which are exhibited the maximum of bravado and the minimum of bravery, but an occasional broken head, together with the possiblility of more, serve to keep up the excitement. It is a jolly good time all round, and represents to the Korean as much hearty good cheer and healthy optimism as our own Christmas represents to us. And indeed Korea has a right to feel optimistic. A land flowing with milk and honey, by which I mean a constant agricultural surplus. A larger arable area in proportion to her population than either Japan or China. Free from the climatic disasters of Japan on the one hand, and the "Sorrow of China" on the other. An inflated currency to be sure, but the certain prospect of a speedy equilibrium between the wages of the labouring man, and the cost of his daily bread. And politically described by no better words than those wise ones: "Happy is that country whose annals are tiresome."

### THE UPPER HOUSE AND THE BUDGET.

THE Report of the Budget Committee in the Upper House was presented on Thursday forenoon. The Committee had sat up the whole of the previous night to prepare it. The Report accepts the reductions made by the Lower House *en bloc*, and declares that, after careful inquiry from the Government Delegates, it has been ascertained that the efficiency of the Administration will be in no wise impaired by carrying out these reductions. But a section of the Peers, led by Viscounts Tani and Kiooka, Mr. Kato Hiroyuki, President of the University, and Mr. Miura Yasu, are doing everything in their power to prevent the passing of the measure. It is impossible not to sympathise with the motives of these objectors. They feel that the Upper House is consenting to be reduced to a mere nonentity in a matter of great importance, and they resolutely seek to avert such a conjuncture. But the vote on the closure, yesterday evening at 8 o'clock, shows that the majority of the House is determined to pass the Budget. Viscount Tani and his followers sought to prevent the closure from being applied, but only 59 voted with them against 104. The acting President—unhappily neither Count Ito nor Prince Konoye was available—showed considerable want of decision at this juncture. He announced that the Budget should be taken in detail, and finding his decision challenged, deemed it expedient to order a recess. The House re-assembled at 8.35 p.m., but no reports were issued after that hour. No decision had been arrived at, however, by 11 o'clock, when the House rose.

### MR. MAYEJIMA.

THE rumour of Mr. Mayejima's resignation grows more and more general. Several reasons are assigned. It is stated that his relations with Count Goto, Minister of the Department of Communications, are somewhat strained, and that he has been much disturbed by the circulation of a story that when the affairs of a certain company were before the House of Representatives, he disclosed to a member some points about the company that should not have been revealed. But it is impossible to attach any importance to such assertions. If Mr. Mayejima resigns, we can at least be sure that he has excellent reasons for doing so.

### MODERN GEOGRAPHY.

HERE'S a sample of *London and China Express'* geography, though it is not the first time an English paper has placed Tokyo in China. Captain Bougoüin, too, from Peking! "The M.M. steamer *Melbourne*, which brought the present mail, had amongst her passengers the Master of Napier, Secretary to H.M. Legation at Tokio, and Lady Napier, who are bound from China to Suez. Another distinguished traveller was General Bichot, who has been engaged in Tong-King on active service, and travelling with him is Commandant Belin. Another passenger of note is Captain Bougouin, military attaché of the French Legation at Peking."

### THE "TOKYO MARU."

WE publish in another column the finding of the Court of Enquiry held in connection with the stranding of the *Tokyo Maru*. As will be seen, the Court have dealt only with the certificate of Mr. Browning, the chief officer, suspending it for twelve months. Mr. Browning, we understand, has left Japan, no doubt anticipating the result of the enquiry, but Captain Drummond was present to hear his complete exoneration from blame by the Court, and to receive back his certificate.

### EXCELLENT SIGHT.

IT would be a matter of considerable interest to know the names of the exceedingly long-sighted persons four or five of whom, according to the *Japan Gazette*, saw Count Ito pass down Reinan-zaka on the 25th ultimo, in Prince Sanjo's funeral procession. For Count Ito was not in Tokyo at all that day. The *Gazette* has christened itself "honest." It is rapidly qualifying to be christened "truthful" by others.

WE are informed by the Secretary of the Japan Brewery Co., Limited that the "Kirin Beer" challenge cups, which have been presented by the Directors and officers of the Japan Brewery Company, Limited, to the Kioda Keiba Kaisha and the Nippon Race Club, have arrived, and will be on view in the Fine Art Gallery, No. 12, Water Street, for a few days.

WE have to acknowledge the receipt of the annual issue from the Lighthouse Bureau of the Department of Communications of the "List of Japanese Lighthouses, Lightships, Buoys, and Beacons" for the 24th year of Meiji. This list should be in the possession of every shipmaster on the coast or frequenting Japan waters. It only costs 15 *sen*.

A CONCERT was announced for Monday night at Kobe by the Patey party, but when it was discovered that only a small number of seats had been taken up to the afternoon of the day the performance, Madame Patey declined to sing to a number of empty benches and the concert was declared "off."

DR. MEACHAM will preach to-morrow morning in the Union Church, on "Christ, the Word of God."

## *THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.*

The Budget question still continues to engross the attention of the journalistic world. The conferences between the Special Committee of the Lower House and the Ministry over the question of the reduction of expenditures, resulted, as already noticed, in the Government's agreeing to a reduction of 6½ million *yen* in round members. The Committee having laid its report before the House of Representatives on the 2nd instant, the report was passed by the House without much difficulty, and the decision at once communicated to the House of Peers. The Peers promptly decided to instruct their Budget Committee to prepare and submit its report by the 5th. This decision gave rise to serious complaints on the part of a section of the Peers, headed by Viscount Tani. That nobleman and eleven others communicated to the President their desire to be released from membership of the Committee. The President, Count Ito, persuaded them to reconsider their step, and a few were said to be inclined to follow his advice, but the majority persisted in their demand. The President, however, not perceiving sufficient ground for resignation, is said to be determined not to grant it. The Committee, despite the falling off of these disaffected members, went to work and reported on the appointed day, the 5th, that in its opinion the decision of the Lower House on the Budget was quite proper. At the time of writing this (evening of the 6th), the Peers have passed the greater part of the Budget, and there is now very little doubt that it will be brought into existence.

* * *

The passage of the Special Committee's report in the House of Representatives on the 2nd instant has been received with no good grace by the *Kaishin-to* and the *Rikken Jiyu-to* organs. They express a doubt whether the reduction of 6½ million *yen* will be sufficient to give satisfaction to the people. Upon the whole, the tone of these papers show them to be smarting under a severe defeat, and at the same time conscious of the absurdity of the cause they advocated. On the other hand, the exultation of the organs of the Moderates knows no bounds. They observe, with a great show of justice, that, but for their disinterested efforts, the present session of the Diet would have ended without achieving anything in the way of fiscal reform, and might possibly have resulted in dissolution. The *Nichi Nichi Shimbun*, in the height of its exultation over the victory of the Moderates, cries *Ban-zai* ("ten thousand years") to the Diet, to the country, and above all to the Moderates. The *Kokkwai*, while exceedingly elated, endeavours to do justice to its opponents, the Extremists, and observes that if the Moderates are entitled to the credit of averting the non-existence of the Budget, the Extremists are equally justified in claiming that the Govern-

Digitized by Google

ment's concurrence to the reduction of 6½ million *yen* was owing to their advocacy of much larger economies. On the whole, the public, as reflected by the press, seems to be very well satisfied with the Budget as finally voted by the Lower House.

* * *

The scene of warfare having been shifted to the Upper House, papers of all descriptions join in advising and even entreating the Peers to give a speedy and favourable decision on the reductions voted by the Representatives with the full concurrence of the Government. The *Nichi Nichi Shimbun* even goes so far as to declare in a threatening manner that, should the Peers allow themselves to be betrayed into a course leading to the non-existence of the Budget, it will not hesitate to write their names in large and glaring characters, to be handed down to all posterity for eternal condemnation. A section of the Extremists—especially the members of the *Kaishin-to*—is reported to have spared nothing to persuade the members of the Upper House to reject the amendments of the Lower House, the object of these schemers being to cause embarrassment to the Executive, and also perhaps to bring about the dissolution of the Diet. But the papers reflect little, if any, of the sentiments attributed to this coterie of agitators.

* * *

The resignation of Viscount Tani and eleven other members of the Budget Committee of the Upper House, has called forth diverse comments from the Metropolitan papers. The majority of the papers unite in condemning the conduct of these disaffected members of the Committee. They admit that the time allowed to the Committee for the purpose of reporting on the Budget was very limited, but the present case is altogether exceptional, and consequently they argue that the plain duty of the Committee was to do all it could to finish the work within the allotted period of time. Further, the members of the Committee must have keenly watched each successive stage of the progress of the Budget in the House of Representatives, and their views must by this time have become fully settled as to the desirability or undesirability of particular measures of financial reform. The journals, therefore, consider it quite possible for the Committee to complete their investigations within the stated length of time. A small minority—including the *Jiji Shimpo* and a few others—seem to take the same side as the resigning members. These papers are of opinion that it is impossible to expect the Committee to accomplish in two short days a task which occupied the Representatives for 13 weeks. The *Jiji Shimpo's* idea is that, the reductions voted by the Representatives being far from satisfactory, the Peers are expected by the people to carefully examine the Budget over again and introduce such amendments as they may think necessary. Otherwise the House of Peers, concludes our contemporary, will be open to the charge of trifling with grave matters of State.

* * *

The question of the Land Tax was debated a few days ago in the House of Representatives, when it was decided by a large majority that the rate, which is at present 2½ per cent., should be reduced to 2 per cent. for wet and dry fields. The Bill awaits the concurrence of the Upper House, but it is believed that the Peers are not favourably disposed to the decision of the Representatives. At all events, it is extremely unlikely that, under present circumstances, the Bill will be even got so far as to be included in the orders of the day in the Upper House. As we lately pointed out, public opinion—that is, in circles unfettered by pledges made to electors—is against the measure, and it is believed that the Government will not approve the proposed reduction, even though it receives the concurrence of the Peers. Among daily papers, the *Jiji Shimpo*, the *Choya Shimbun*, the *Kokkwai*, the *Toyo Shimpo*, the *Tokyo Shimpo*, and the *Nippon*, that is to say, all those having no connection with political parties, are opposed to any reduction of the Land Tax; whereas the measure is enthusiastically advocated by all the party organs, as the *Jiyu Shimbun*, the *Mainichi Shimbun*, the *Rikken Jiyu Shimbun*, and *Yomiuri Shimbun*. The *Hochi Shimbun* also belongs to the latter category. It professes to be independent, but the public, while conceding its intention, doubts its ability to remain strictly neutral so long as its editorial staff is almost exclusively composed of members of the *Kaishin-to*. Among magazines, the only influential ones in favour of reducing the Land Tax are the *Nippon Hyoron* and the *Kokumin-no-Tomo*. Periodicals like the *Keizai Zasshi*, the *Koku-Hon*, and the *Nippon-jin* do not see that reduction is either wise or necessary.

* * *

During the present week, the question has been specially discussed by the *Jiji Shimpo*, the *Toyo Shimpo*, and the *Hochi Shimbun*. The *Jiji Shimpo*, as usual, is very outspoken. It regrets that the majority of the members of the Lower House allowed themselves to be so far enslaved by their desire to conciliate "vulgar opinion" (*zokuron*), as to vote for a measure which, in their heart of hearts, they must know to be prejudicial to the interest of the nation as a whole. The *Jiji* lays special stress on the importance of maintaining the prestige of the country abroad, and nothing, it argues, can be more unwise than to decrease the most important and facile source of public revenue. The reduction will confer no benefit on the classes for whose sake it is ostensibly effected. Our contemporary believes that the decision of the Representatives will not be favourably received in the House of Peers, and further that, even if approved by the latter, it will be rejected by the Government.

* * *

The *Toyo Shimpo's* articles on this question need not be noticed at any length, for the arguments they contain have already been set forth in these columns. Suffice it to say that the *Toyo* is one of the most enthusiastic opponents of reduction.

* * *

The *Hochi Shimbun*, as stated above, supports the decision of the Lower House. It seems to be persuaded that the measure will receive the concurrence of the Peers, and that it will further be approved by the Government. On the strength of this conviction, the Tokyo paper hastens to discuss the changes that will be necessitated in the *personnel* of the Governors of *Fu* and *Ken* when the proposed reform is carried out. It thinks that the nature of the uses to which farmers will apply their improved finances, must depend upon the guidance given them by Local Authorities. Among the present Governors of *Fu* and *Ken*, many are highly educated after the modern fashion, and well qualified to guide the people in new industrial and commercial careers. But many others hold their positions owing to military exploits achieved more than twenty years ago. These persons are not at all fitted to discharge the important functions of their office. The *Hochi* consequently urges the necessity of replacing the men of the old school by younger and more capable functionaries.

* * *

The proposed transformation of the *Taisei Kwai* into a political party attracts much attention. In the way of consummating such an object, stands the firm opposition of a section of the association led by Mr. Koretsune. But under the dexterous management of Mr. Suematsu Kencho and others, a middle course has been proposed, and at present it is reported that not only the *Taisei Kwai* but the National Liberals and the 29 seceders of the Constitutional Liberal party, will be amalgamated into a club for the purpose of preserving the ties that united them together on the question of the Budget. There being signs that the *Kaishin-to* and the *Rikken Jiyu-to* are forming a more and more intimate alliance, it may be expected that the above mentioned agglomeration of Moderates, despite its obvious incongruity, will last for some time. Possibly it will eventually lead to the formation of a great political party.

* * *

The *Yomiuri Shimbun*, writing on the importance of the amalgamation of the *Kaishin-to* and the *Rikken Jiyu-to*, observes that there is no essential difference in the platforms of the two parties. That they can work together with perfect unanimity, is proved by the intimate relation in which they have stood to each other on the question of the Budget. Attempts to amalgamate them failed last year, because they were then held asunder by certain strong prejudices. But these feelings have since been entirely dispelled, and the two parties are at present one in spirit. Our contemporary thinks it quite possible that they may become one in name also.

* * *

Of late there is a tendency in certain quarters to pay more and more attention to the relations between this country and Russia. Some days ago, the *Toyo Shimpo* published an extraordinary article, containing the strange news that three Japanese are regularly furnishing the Russian Government with information about State secrets. One of these spies is stated to be an official in a certain Department of State; the second, a retired functionary on the *hishoku* list, and the third, an ex-official now engaged in business. This secret was said to have been found out by some Japanese at the Imperial Legation in St. Petersburg. We (*Japan Mail*) think that there is no ground to credit such extraordinary intelligence, but it is to be feared that any news, however incredible, about the great Northern Power will find a section of the public ready to believe it.

* * *

The *Kokkwai*, which pays special attention to international questions, urges the importance of encouraging the study of the Russian language. While tens of thousands can read and write English, there are scarcely twenty who understand Russian. The rapid development taking place on the Russian shores of the Sea of Japan, and the construction of the great Siberian railway, ought to show any ordinary observer—says the *Kokkwai*—that the relations between Japan and Russia are about to enter upon a new phase, from political, military, and commercial points of view. Our contemporary deems it highly important that the Russian language should attract wider attention among Japanese students.

* * *

The *Mainichi Shimbun* severely criticises the answer given by the Government to the House of Representatives, as to the Budget Committee's report. In another article, the same paper strongly condemns the memorable decision of the Lower House as to the method of seeking the Government's concurrence in respect of changes of expenditures mentioned in the 67th article of the Constitution. That decision it declares was made in compliance with the Government's interpretation, whereas the proper authorities to decide doubtful points in the Constitution are the Privy Council, not the Executive. The *Hochi Shimbun* alludes to a rumour that the shares of leading railway companies are being purchased by the Crown through the agency of the Mitsui Ginko, and strongly disapproves such a measure. The *Toyo Shimpo* discusses the World's Fair at Chicago, and urges its countrymen to avail themselves, as far as possible, of the unique opportunity thus offered for the introduction of Japanese goods into Western markets. The *Kokumin Shimbun* reviews the present condition of the economic world, paying special attention to the rise of syndicates and to strikes. The *Jiji Shimpo* supplements its recent articles on the Nicaraguan canal, by giving a more minute history of the various attempts hitherto made to dig a canal across Central America. The *Rikken Jiyu Shimbun* expresses heartfelt sympathy with the unfortunate situation in which Count Itagaki now finds himself, separated from the men with whom he toiled in the cause of liberal principles for fifteen years.

## *THE SOSHI AGAIN.*

ON the 27th ult., at a few minutes past twelve o'clock, Mr. MISAKI KAMENOSUKE was standing at the door of the Special Committee Room in the House of Representatives, talking with Mr. ARAI SHOZO, when a youth came up, and without an instant's hesitation struck Mr. MISAKI a violent blow on the shoulder. Mr. MISAKI attempted to close with the ruffian, and seize the stick, but before he could do so he received another heavy blow on the left arm. The intruder was at once arrested, and found to be a young man, by name TASAKI KIHEI, a native of Ibaraki Prefecture. He had been residing for ome time with one OCHIAI, in No. 6, Omotes Jimbo-cho, Kanda, and when questioned by the police, he confessed very frankly that his motive in making the assault was political. He had not come to the House, however, for the purpose of attacking Mr. MISAKI. The real object of his resentment, he declared, was Mr. SUYEMATSU KENCHO, to whose organizing capacities the *Soshi* attribute the gradual growth of moderate opinions in the House and the consequent defeat of the Budget Committee's Report at the eleventh hour. Failing to meet Mr. SUYEMATSU, he had utilized the opportunity to attack Mr. MISAKI, and he put so much *vim* into his blow that his victim's arm is likely to be disabled for several days. It may well be that this story is only true in part, for Mr. MISAKI, as the mover of the resolution by which the Extremists received their *coup de grâce* on the 26th instant, has become a more prominent figure in the political arena than Mr. SUYEMATSU KENCHO.

This is the second occasion of an assault committed by *Soshi* within the precincts of the Diet. Mr. INOUYE KAKUGORO was the victim of the first, and on that occasion a strong impression prevailed among the public that these ruffianly disturbers of the peace must be acting with the countenance, if not under the direction, of members of the House of Representatives. The impression now becomes almost a certainty. It is true that the approaches to the present temporary House cannot be guarded as securely as could the approaches to the original building. The chamber of debate is on the ground floor, as are all the rooms in use by the members, and their doors open upon a wide stone corridor, access to which is obstructed by nothing more than a low wooden railing. Still there are guards always present in the corridor, and we find it extremely difficult to believe that any one could pass without showing a ticket of admission to the strangers' gallery. To procure a ticket, however, a visitor must be introduced by a member, and only very credulous people will be able to imagine that no member was responsible for the presence of either of the young ruffians who insulted the House by their performances on the 9th and 27th instant. In all countries political roughs are to be found. Their activity in Japan, though disgraceful enough, is a mere bagatelle in comparison with the humiliation inflicted on the country by the mere supposition that among the people's representatives are to be found men capable of countenancing, nay of inspiring, acts of violence within the very precincts of the Diet. After the Imperial Palace itself, the most sacred spot in all the Empire is that enclosed by the walls of the Diet. Within that space even the laws of the realm lose their power. Neither the Judiciary nor the Executive can lay a finger upon a member inside the Diet. Everything he says is privileged, and his person is secure against arrest except by the orders, or with the sanction, of his fellow-members. Nevertheless, twice within the short space of three weeks, men have been able to make their way into the Diet and to commit acts of violence against members. Whether they were or were not introduced by members, they have placed the House of Representatives in this position that unless it takes earnest, active, and speedy steps to sift the matter to the bottom, it will rest under an implication most injurious to Japan's fair fame.

Some days ago the *Choya Shimbun* had the admirable courage and patriotism to publish an accurate list showing the number of *Soshi* residing in Tokyo, the districts whence they came, the parties to which they belonged, and the politicians by whom they were supported. We perused this list with unbounded astonishment. Was it possible, we asked ourselves, that such statistics should be submitted to public inspection by a newspaper of high repute, without either evoking immediate contradiction or bringing instant disgrace on the persons implicated? To this moment neither result appears to have ensued. We must therefore accept the *Choya's* assertions as facts. The total number of *Soshi* in Tokyo was put by our contemporary at one hundred and fifty-one, of whom seven only belonged to the capital, the rest having assembled there from various localities. One hundred and three of these *soshi* were assigned to the *Rikken Jiyu-to*, forty-two to the *Kokumin Jiyu-to*, and six to the *Rikken Kaishin-to*. Then followed the extraordinary piece of intelligence that fifty were supported and employed by Mr. OI KENTARO; thirty by Mr. HOSHI TORU; twenty-eight by Mr. YENDO HIDEKAGE: fourteen by Messrs. FURUSHO YOSHIKADO, YAMAGIWA SHICHI-JI, and INAGAKI SHIMESU; while the remaining thirty-three occupied the position of free-lances under Mr. HOSHI TORU and other leading members of the *Rikken Jiyu* party. Now it cannot be supposed that these figures and assertions escaped the attention of all the members of the House of Representatives, two of whom—Messrs. FURUSHO and YAMAGIWA—were directly charged with supporting *soshi*. Of course, it is not a crime to maintain a youth with a proclivity for politics and a belief in the efficacy of physical force. Many of the so-called *Soshi* have never committed any offence against the public peace, and do not necessarily intend to commit any. But when a leading newspaper boldly affirms that *Soshi* are supported by two members of the House of Representatives, and that more than one third of the total number of *Soshi* in the capital belong to a political party some ninety associates of which sit in the House; and when, twice within the space of three weeks, *Soshi*, finding their way into the precincts of the House where they can procure admittance only by the introduction of members, prepetrate violent assaults upon the persons of members, then we say that unless the Representatives take some active steps to purge themselves of the suspicion thus fixed upon them, and to vindicate the sanctity of their place of debate, they will have done much towards bringing Japanese parliamentary institutions into disrepute. Every one of the four attacks made upon members of the House of Representatives since it came into session have been undertaken, so far as the public can judge, in the interests of the Extremists, and in consequence of legitimate acts performed by members in the due discharge of their Parliamentary functions. The responsibility no longer rests on the shoulders of the Executive. It rests with the House itself.

## *THE PEERS AND THE COMMONS.*

THE debate in the House of Peers on the 26th ult. may be said to have finally disposed of the question which so nearly involved a serious conflict between the Administration and the House of Representatives. As this affair undoubtedly marks a crisis in Japan's political history, and since, further, it helps us to form an idea of the attitude assumed by the Extremists toward the Constitution, our readers will doubtless be interested in the details of its sequel. By way of preliminary, let us restate the case. The Constitution forbids that certain items of the Budget shall undergo parliamentary reduction or rejection without the concurrence of the Government. Now Parliament has only one means of altering an item in the Budget, namely, by voting that it shall be altered. Consequently, if Parliament votes in that sense without previously obtaining the concurrence of the Government, it distinctly violates the Constitution. Parliament, however, consists of two Houses, and this dual organization puzzled the Representatives for a time. They imagined that they themselves were not entitled to discharge independently the duty of seeking the Government's concurrence, but that the Upper House's functions in respect of the Budget must be discharged

Digitized by Google

prior to any application for such concurrence. Obeying this conception, they resolved to pass final votes, reducing or rejecting the special items, and to leave to the Peers the task of approaching the Government. In other words, the Representatives decided that the veto contained in the 67th Article of the Constitution did not apply to their own procedure, and that they might treat the Budget just as though the 67th Article did not exist at all: might reduce or reject any and every part of it absolutely and finally, so far as their own procedure was concerned, without making any attempt to obtain the Government's concurrence. Fortunately the Moderates succeeded in inducing the House to beat a timely retreat from this unconstitutional position, but the Extremists still occupy the same ground, and though outvoted, are not convinced.

When it became apparent that the Lower House, led by the Extremists, was about to treat the Budget in this manner, the public turned with much curiosity and excitement to the Upper House. There were too distinct questions to be decided by the Peers: first, whether they would endorse the method of the Lower House; secondly, whether they would confirm the amount of its sweeping reductions. We need not consider the latter point here: it is beside our purpose. With regard to the former, it must of course be premised that the Upper House was not expected to pronounce any direct decision in relation to the procedure of the Representatives. Its verdict would evidently be indirect. If it adopted the same procedure, then it must be considered to accept the interpretation put on the Constitution by the Extremists in the Lower House. If it adopted a different procedure, then its reading of the Constitution would be opposed to that of the Extremists. To put the matter more plainly: if the Peers, before seeking the Government's concurrence, passed final votes rejecting or reducing items of "fixed expenditure," then they would be at one with the Extremists as to the sense of the Constitution; if, on the contrary, they sought the Government's concurrence before passing final votes of that nature, then their position would be diametrically opposite to that assumed by the Extremists.

The Lower House, as we have said, changed its attitude at the eleventh hour, and thus the part to be played by the Upper House lost something of its immediate interest. But for those who wish to forecast the working of constitutional institutions in Japan, it is just as important now as it was a fortnight ago to know whether the Peers endorse or reject the Government's rendering of the Constitution. Fortunately we are able to acquire distinct knowledge. The subject of debate in the Upper House on the 26th and 27th ultimo was a set of Regulations proposed by Viscount TANI to determine the procedure of the House in relation to the Budget. The Regulations numbered sixteen, and four of them were devoted to the treatment of items falling within the scope of the 67th Article of the Constitution. These four Regulations run as follow:—

X.—When the House proposes to reject or reduce any items of the expenditures referred to in the 67th Article of the Constitution, it shall decide to seek the Government's concurrence.

XI.—When the House has decided to seek the Government's concurrence, the President shall communicate the fact to the Government in writing.

NOTE.—In seeking the Government's concurrence as above provided, the House shall determine whether all the items of the Budget, in respect of which concurrence is songht, shall be grouped togethe, or whether they shall be treated separately, for that purpose

XII.—When the Government's concurrence has been obtained as provided in the last article, the House shall proceed to decide upon the various items of reduction or rejection.

XIII.—In dealing with the expenditures designated in the 67th Article of the Constitution, items which it is not proposed to reduce or reject, and items concerning which the Government's concurrence, thought sought, has not been obtained, shall not fall within the scope of the House's decision.

The first three of these Regulations were passed almost without discussion and virtually without dissent. The last led to some debate for reasons which we shall explain presently, but which have no direct bearing on the point of immediate examination.

It will be seen, therefore, that the House of Peers, by a practically unaminous vote, has proclaimed its belief in the unconstitutionality of the course advocated by the Extremists in the Lower House. Instead of proceeding, as the Extremists did, to vote rejections or reductions of the "fixed expenditures," the Peers vote, in the first place, to seek the Government's concurrence, and having obtained that concurrence through the President, they then proceed to vote the rejections or reductions thus sanctioned. In short, the Upper House has emphatically declared its dissent from the methods to which the Extremists would have fatally committed the Lower House but for the fortunate prevalence of sounder views at the eleventh hour. There cannot be two radically different methods of procedure for the Upper and Lower Houses of the same Legislature under the same article of the same Constitution. If the Peers are right in their interpretation of the Constitution—an interpretation endorsed by the Government and plainly confirmed by the language of the Constitution—then the Extremists in the House of Representatives are wrong.

To complete this analysis of the debate in the Peers, a brief reference is necessary to the discussion provoked by the Thirteenth Article. That Article pledges the House to dispense with pronouncing any decision in respect of such items of the "fixed expenditures' as it does not desire, or is not permitted, to reduce or reject. To the principle here involved Mr. MURATA TAMOTSU took exception. He based his objection on the 64th Article of the Constitution, which provides that "the expenditure and revenue of the State require the consent of the Imperial Diet by means of an annual Budget." That Article, he maintained, permits no exceptions. Each and every item in the Buget must obtain the consent of the Diet, whereas the proposed Regulation exempts certain items. Mr. ITO MIYOJI tore this argument to fragments by methods which any careful reader of the Constitution can at once divine, and the House voted the Resolution as it stood.

The question naturally presents itself:—. Why did the Extremists in the Lower House seek to enforce a mode of procedure by which, in the abstract, the House could gain nothing and would lose a great deal? There was no liberal principle involved. On the contrary, every disciple of government by the people must have opposed the method of the Extremists, since it deprived the people's representatives of their constitutional right to take all vital steps in respect of the national expenditure. There seems to be only one explanation: the Extremists wished to place the Lower House in a position of violent antagonism to the Government, and, if need be, to the Peers also. They have failed, happily, and their methods are now as fully discredited as the result of their manœuvres would have been unfortunate.

## *THE "GOVERNMENT."*

WHEN the Constitution was promulgated people found that, as might have been expected, the exact meaning of its provisions generally depended in no small degree on the view of the person interpreting them. Viscount TANI voiced the popular notion on this subject when he said, a few days ago in the Peers, that the Constitution had been not inaptly compared to a piece of gum, so readily did it lend itself to expansion and contraction at the will of manipulators. One term especially perplexed searchers after facts, namely the word "Government." What does "Government" signify? Everywhere the word occurs, sometimes in the simple sense of "Administration, but frequently also with an evidently larger significance, as in the celebrated 67th Article, where a final power of sanction or veto is reserved to "the Government" in respect of certain classes of public expenditure. This latter use of the term requires, for its proper understanding, reference to the organization of the Executive machinery, over which organization the Sovereign, according to the Constitution, exercises supreme control. How then is the Japanese polity organized, and what part of it is called the "Government?" There appears to us to be no difficulty in answering these questions. Theoretically, and according to the letter of

Digitized by Google

published laws, the EMPEROR not only rules but governs. He presides at the deliberations of the Cabinet, and with the Cabinet constitutes the "Government" spoken of in the Constitution. The Sovereign and the Ministers of State appointed by him are the Government, and when men speak of the "Cabinet" (*Naikaku*) they constitutionally include the EMPEROR, its President. We refer to the point now because of its interest in connection with the vote of censure to which the leaders of the Progresssionist Party are said to be seeking to commit the House of Representatives. In countries where the Cabinet, though nominated by the Sovereign, receives its mandate from Parliament and holds office entirely at Parliament's good pleasure, it is distinctly within the competence of the people's representatives to declare whether or no the Cabinet enjoys their confidence. But the case is very different in Japan. Party government is still a thing of the future in this empire—a thing of the near future, perhaps, but certainly not yet a realized fact. Here, then, a vote of want of confidence would possess a peculiar signification. It would be equivalent to a declaration that the House pronounces unfavourable judgment upon the Ministers chosen and appointed by the EMPEROR, and upon the competence of the Cabinet presided over by the EMPEROR himself. Of course it is well understood that in practice the EMPEROR of Japan does not select his Ministers with anything like autocratic liberty of choice. In reality the sphere within which HIS MAJESTY'S volition has been exercisable in such matters since the Restoration is just as narrow as though it were limited by the principles of party government. But this consideration has no conclusive value. The theory of the Japanese polity is that the EMPEROR chooses and appoints his Ministers; that they are removable by his will only, and that they are absolutely independent of any decision pronounced by the Diet. It is plain that under such circumstances a vote of want of confidence passed by the House of Representatives would be as completely as possible subversive of the principle supposed to be enunciated by the Constitution; would, in fact, amount to a declaration that the Cabinet holds office by the mandate of the people, not by the fiat of the Sovereign. We shall be greatly surprised if the leaders of the *Kaishinto*, or any other politicians, succeed in persuading the House to adopt such a resolution. On the whole the attitude of the Diet towards the Throne has been essentially loyal and deferential. A rare indication of some disposition to mention the Sovereign casually in debate or to speak lightly of the Constitution, HIS MAJESTY'S gift to the nation, has been sternly suppressed. The old atmosphere of sanctity still circulates about Imperialism. The House of Peers, indeed, contrary to all expectation, has in one instance departed from this conservatism. Its action with regard to the new Civil Code was certainly not what we should have anticipated. The Code had been issued only a few months previously over the EMPEROR'S signature, yet the House addressed to the Government a Representation asking that a Committee be appointed to revise it. With this exception, however, the Diet has given no evidence of faithlessness to the time-honoured traditions of the country's polity. If the motion now said to be contemplated by the Progressionist Party obtains the approval of the Lower House, a distinctly novel character will be imparted to the relation between the Sovereign and the people.

## *A MISSIONARY NUT TO CRACK.*

WE hear on good authority that many of the Missionary community in Tokyo find themselves in a difficulty. It is an educational difficulty of a very personal character, being neither more nor less than "How shall we educate our children?" At first hearing it may seem strange that a community so largely educational in its aims should find itself in such a strait. The fact can only be regarded as a flaw in the working of the Protestant Missions in Japan. It betokens either carelessness in a very important matter, or lack of forethought. In the much earlier days when, generally speaking, missionaries' children were in the majority of cases hardly beyond the infant age, the lack of a good school did not practically declare itself. And for the last few years the gap has been sufficiently well filled by a purely private venture on the part of an energetic American lady. Now, however, this lady is retiring from the field; and like a thunder-clap the stern reality comes upon the good people of Tsukiji, "there is no school for our boys and girls."

The statement of course, is true only in a certain sense. For there are in Tokyo two very good schools, one for boys and one for girls. The former we described recently in these columns. It is virtually under the control of the Roman Catholic Church; and this is a sufficient objection in the eyes of Protestants to throw it quite out of the reckoning. No Church or Sect of Christendom has ever worked for the intellectual welfare of youth in a wholly disinterested way. The *raison d'être* of the Protestant Mission Schools of Japan is, by educating the many, to convert at least the few. The same is true of the finely equipped Christian Colleges of India. It is in short an admitted principle in all Mission bodies to grant a recognised good in the hope of awakening a desire for the unrecognised best. More than that, this Best is to be pushed prudently but determinedly. In the carrying out of this principle in all directions no Church has shown greater zeal or greater ability than the Church of Rome. It is not to be expected, then, that Protestant missionaries will hasten to send their sons to *L'École de l'Etoile du Matin*, however high the educational merits of that institution.

On the other hand, as regards the Ladies' Institute, with its staff of five qualified English teachers, there is the objection that it is under direct control of a Japanese Association. There has been no difficulty, so far, in foreign girls obtaining admittance into this school; but it is doubtful if the Council of Management would care to see the majority of the pupils foreign, as would almost certainly be the case if the applications for admittance became general. Moreover, there might be a difficulty in carrying the classes and the curricula of studies so as to suit both Japanese and English-speaking children. This, however, would surely not prove an insurmountable difficulty. Why then, it may be asked, cannot the Protestant Mission Schools themselves make some arrangements for taking in the children of their own Missionaries? To the unenlightened this would seem to be a most natural way out of the wood; but unfortunately a mighty barrier of principle blocks the path.

We have here in fact a very good illustration of what a lady resident of Tokyo has called "The Theory of the *O-kuroi*." To the Mission eye, and indeed to many a missionary eye, there is a grand charm in the figure of a noble pagan awaiting conversion. The pale-faced Missionaries of the West, the *O-shiroi* in fact, have spread east and south wherever a duskier brother dwells, and are trying to rescue him from the pit of heathendom. It is a noble object; but it leads in many cases to an undue over-rating of the necessities of the inhabitants of non-Christian lands. A Japanese youth of some fair ability is taken by the hand and sent to be educated in a Christian land, where he is pampered and spoiled. A Western youth comes perchance to Japan and, free from the gentle constraints of home, drifts first slowly then rapidly into pure heathendom; but in him the average missionary takes no interest. He may be black enough; but he doesn't belong to the *O-kuroi;* so he is left to take care of himself. That of course is an extreme case; but it illustrates the meaning of the theory, whose influence in this question of a school for the children, can be traced all too surely. The teachers in the Mission Schools cannot take in foreign children, because they are sent to teach the Japanese. They are paid to teach the Japanese; and it would be a breach of contract to expend their energies on the poor Foreign Missionary child. It is a melancholy revelation; and it is time the Mission Boards at home were awakened to the enormity of

Digitized by Google

their sin in making no provision for the education of these children. It is not enough, apparently, that Missionaries, at considerable self-sacrifice, should break with the closest ties of home; but their children must suffer the penalty of being half-educated. In many Foreign Mission Fields the climate is not suitable for the prolonged stay of young children, and the missionaries going there know from the beginning that they must part with their family after some years. But it is not so in Japan. Here children could stay until they were ready to enter the University or an office, provided only they got a thorough school education. It is reasonable to suppose that many, so brought up, would follow their parents' footsteps. And what a power such a second generation of Missionaries would have, with their innate knowledge of the colloquial, and their natural sympathy with the people! It is indeed a singular lack of forethought on the part of the Protestant Missions —this policy of *laissez faire*. They might well take a lesson from their rivals of the Church of Rome, who with characteristic wisdom, planted a fully equipped school in Tokyo just at the time it was needed.

Perhaps some exception might be taken to the manner in which we have expressed our views. But there cannot be two opinions as to the necessity for reform. We believe that a forcible representation of the facts to the Mission Boards at home would have a good effect. But it should be really forcible—a regular "Round Robin" in fact from *all* the Committees here to *all* the Boards there. It would be a comparatively easy matter, we doubt not, for these Boards to devote a certain percentage of their funds for the education of their own missionaries' children. The accumulated funds, together with small fees from those directly profiting, would suffice to organise a good school and support an efficient staff of qualified teachers. Missionaries resident in the provinces would preferably send their children as boarders to such a school than be compelled to part with them, to the distant home lands. And if no such school should be established, the only choice left to the missionaries would be to ship their children back to America or Europe. There can be no question as to the more economical course to be pursued; and there can be even less doubt as to which would prove more satisfactory alike to the parent and the child.

It seems to us in fact that, alike from an educational, a moral, a missionary, and a Christian point of view, a thoroughly non-denominational school for foreign boys and girls is a desideratum in Tokyo. From the greater interests at stake, the organizing of such a school naturally falls to the Protestant Missions in Japan, and chiefly those of Canada and the United States. We have offered a suggestion as to how the project might be practically carried into effect. We have virtually constituted ourselves pleaders for those poor missionary children, who are to some extent unfortunate in not belonging to the family *O-kuroi*. Was its ever before known that a Church neglected its own children for sake of some one else's? In the eyes of the true Church there should be no respect of the persons.

## *THE LAND TAX.*

THE following is a translation of the very short Bill which the House of Representatives has just adopted in regard to the Land Tax:—"The Land Tax on wet and dry fields shall be 2 per cent. of the assessed value of the land. The Land Tax on rural and urban house-lands, on salt fields, on mineral spring lands, on marsh lands, on forests, on pasture lands, on moors, and on variously cropped lands, shall be 2½ per cent. of the assessed value of the land." The consequence of thus changing the tax on wet and dry fields from 2.5 to 2 per cent., will be a loss of revenue aggregating about six million *yen* annually. The measure, if approved by the Government, cannot come into force before April 1st, and would therefore mean a lightening of taxation to the extent of 4 million *yen* during the present year. In addition to this measure, another, relating to re-assessment for the purposes of the Land Tax, passed its first reading, and was handed to a Special Committee, but the House yesterday decided not to proceed with it this session. It consists of six articles, of which the following is a translation:—

Art. 1.—The assessment of wet and dry fields shall be amended on the basis of the average price of the *koku* during the five year period, ending 1888, less 25 per cent.

Art. 2.—The price of the *koku* in each Urban and Prefectural district shall be assessed according to the new scheme of Land Tax, but the principle of determining produce and of calculating returns shall be as of old. Provided that in cases when the limits of the price of the *koku* cannot be determined according to the old methods, the Minister of State for Finance shall determine them on receipt of an application from the Prefect or Governor of the district concerned.

Art. 3.—In cases where the taxable valuation of land is increased by the provisions of this law, such increase shall not exceed twenty-five per cent. of the old valuation.

Art. 4.—The tax on wet and dry fields shall be levied according to the new system from the first taxation Term of 1891. Provided that, in the case of lands where the whole of the Tax shall have been paid up before the work of re-assessment is completed, a final account shall be made on the conclusion of the assessment.

Art. 5.—In the case of lands, wherever situated, where manifest improprieties exist in respect of the nominal produce and the method of calculating returns, it shall be competent for the Government to order a special re-assessment within a term of three years from the promulgation of this law. Provided that, in cases where the taxable valuation is increased by the working of this law, the limitation of Article 3 shall be applied.

Art. 6.—The duty of issuing regulations for the purpose of putting this law into force shall devolve upon the Minister of State for Finance.

It has not been accurately calculated how much diminution in the proceeds of the Land Tax would be caused by the application of this latter law, but, speaking roughly, the loss to the Treasury is put at nearly two million *yen* annually. Avowedly the idea of the proposers and supporters of the measure is to equalize the incidence of the Land Tax. At the beginning of the *Meiji* era, when the assessment now in force was made, means of communication were not nearly so well developed as they are to-day, and in consequence the differences in the market values of rice and other grain in different localities were much more marked than they are at present. This state of affairs operated in both directions, appreciating prices in one district and depreciating them in another. We should have imagined that a general re-assessment, based on the less divergent prices of the five years preceding 1888, would result in a substantial addition to the total yield from this kind of taxation. But the framers of the new law guard against anything of that kind by limiting the increase of assessment in any case to twenty-five per cent. of the former valuation, and thus the net result is stated to be a reduction of some two million *yen* in the proceeds of the Land Tax. Of course the effects of the law would be variously felt. In some cases the measure would be welcomed; in others bitterly opposed. The northern districts would suffer signally. Owing to their inaccessibility in former times, the rice produced there found no market in the great centres of population. Its price was therefore determined by local demand. But all this has been greatly changed by the introduction of railways and steamers, the building of roads and the improvement of harbours. The Oshiu folks have consequently done everything in their power to impede the passage of the Bill. An influential deputation from the six O-u Prefectures came to Tokyo some time ago, and its members have left no stone unturned to effect their purpose. They are said to have incurred expenses aggregating a hundred and thirty thousand *yen*, and they will doubtless be proportionately pleased by the failure of the Bill to become law during this session at all events. The two great objects which the Radicals and Progressionists undertook to accomplish when the Diet came into session, were the cutting down of administrative expenses and the reduction of the Land Tax. They have not achieved much in the former direction, so far as concerns this year, for though the Budget is to be reduced by 6½ million *yen*, a great part of the total is due to the abandonment of works of public utility and to other financial changes which cannot be considered permament. But the first of the above two measures in relation to the Land Tax effects a solid and lasting reduction in the revenue of the State, and, if passed by the Upper House, will necessitate a corresponding re-organization of the Administration. That such a re-organization is possible we entertain little doubt. It has been talked of for the last three years, and would pro-

Digitized by Google

bably have been carried out had not other measures of an equally pressing and more congenial character called for settlement. When Count OKUMA was Minister of Foreign Affairs he accepted the additional appointment of President of a financial Committee, the chief object of which was understood to be retrenchment of public expenditure. The Committee did not complete its labours, but it carried them to the point of elaborating a scheme of re-organization which would have accomplished considerable economies without in any way impairing administrative efficiency. It is a significant fact that the amendments proposed by the Budget Committee were based, in great part, on the leading features of the OKUMA Committee's recommendations. The insuperable difficulty was that the acceptance of the Budget Committee's Report, and its endorsement by the Government would have necessitated the immediate application of the proposed changes, whereas their gradual carrying out is obviously the only possible way of keeping the executive machinery in gear. It may be presumed, however, that the Government, faithful to the pledge which Counts YAMAGATA and MATSUKATA are said to have given, will lose no time in completing and giving effect to these reforms. If the new Land Tax Bill serves to spur the Cabinet to fresh exertions in so useful a direction, it will possess one redeeming feature. But, for the rest, we hold that the Bill is entirely to be condemned. The reduction of the Land Tax by 0.5 per cent. will bring no relief to the class of agriculturists who need assistance, and will only increase the advantages already enjoyed by land-owners over other tax-payers. The abandonment, even for a time, of productive works in order to carry out an economical phantasy so little justified, is a result that history will not place to the credit of the first Japanese Legislative Assembly. The Representatives have indeed shown that they appreciate the details of the situation, for they have taken practical cognisance of the comparative immunity hitherto enjoyed by urban house lands. If they had limited themselves to that, they would merit only praise. But their general attitude towards the chief and most legitimate source of State revenue, does not, in our opinion, display great discrimination.

## *JAPANESE WOMEN ABROAD.*

THE House of Peers included in its Orders of the Day for the 3rd inst., the discussion of a Bill entitled "Project of a Law for the Protection of Japanese Females in Foreign Countries." The Project contains five clauses, of which the following is a translation :—

Art. 1.—Persons in Foreign countries, who entice Japanese females for purposes of prostitution or who procure them, or who hire rooms for the uses of prostitution, or who wittingly suffer prostitution to be carried on in their own houses, shall be liable to imprisonment with hard labour for not less than one month and not more than six months, and to a fine of from 2 to 20 *yen*.

Art. 2.—Females who proceed, or are about to proceed, to Foreign countries for purposes of prostitution, shall be liable to imprisonment with hard labour for from 11 days to 2 months, together with a fine of from 2 to 20 *yen*.

Art. 3.—Persons who wittingly assist females to proceed to foreign countries for purposes of prostitution, shall be liable to imprisonment with hard labour for from two months to one year, and to a fine of from 5 to 50 *yen*.

Art. 4.—Persons who entice females and send them, or are about to send them, to Foreign countries for purposes of prostitution, shall be liable to imprisonment with hard labour for from six months to three years, and to a fine of from 10 to 100 *yen*.

Art. 5.—Persons punished under the provisions of this Law, shall be placed under police supervision for from one month to one year.

The House of Peers debated this Bill in secret session on the 3rd instant, and having passed the first reading, handed the Bill to a Special Committee, as provided by law. There can be no doubt that the measure will pass both Houses without difficulty. Every respectable Japanese feels keenly the disgrace inflicted on the country by the constantly increasing stream of girls who are persuaded to go to foreign countries for purposes of prostitution. The temptations to engage in this kind of traffic are enormous. A Japanese female's gains in the most miserable of all pursuits are utterly paltry, as compared with the gains of her Western sisters, whereas the charms she has to sell are scarcely, if at all, inferior. She is therefore a splendid object of speculation to unprincipled persons. They can afford to offer her sums of dazzling magnitude in her eyes, and there yet remains to them a wide margin of profit. The consequence of these peculiar conditions is that, in nearly all the principal places where Westerns live or resort in neighbouring States to Japan, numbers of Japanese girls are to be found plying a disgraceful trade, and helping materially to spread a false impression of their country's moral circumstances. Great suffering, too, has often been inflicted on the unfortunate girls, and from every point of view the wretched business calls for authoritative interference. The only question is whether the law can step in with any practical effect. When the terrible case of suffocation occurred on board a steamer travelling from Nagasaki to Hongkong, we pointed out the fallacy of the popular idea that Japanese are not at liberty to leave their country without passports. No such law exists. A Japanese is just as free as a foreigner to come and go at will, except that, without a passport, he cannot obtain the assistance and protection of his own Consuls abroad. How then can steps be taken to investigate the objects of females leaving the country, or of persons assisting them to leave? We presume that these points have received full consideration at the hands of the framers of the new law, but intention is a very difficult thing to establish in any court of justice, and the magistrates will have to be guided largely by circumstantial evidence and by collateral considerations in deciding whether or no the purpose of a woman's departure from her country is immoral. On the other hand, so soon as a Japanese female reaches a foreign country, she becomes justiciable by its tribunals, and the same is true of all Japanese subjects within territories of other States, China excepted. It is evident, therefore, that the provisions of the first Article of the proposed law cannot become operative until the offenders referred to in it return to Japan. On the whole, we find great difficulty in foreseeing any really useful results. In flagrant cases the police may be able to obtain information justifying the arrest of a woman before she leaves the country, and of those connected with her departure. But the existence of this new law will entail increased caution on the part of intending wrong-doers. It seems to us that to apply a radical remedy the new law must be supplemented by a regulation conferring on the Authorities supervisory competence in respect of every female leaving the country. If it were distinctly illegal for any woman to go beyond the shores of Japan without a passport, the purpose of her departure could generally be ascertained with sufficient accuracy to prevent, in great part at any rate, the serious abuses now complained of. In the abstract, passports and all other restrictions upon the liberty of the subject are emphatically objectionable. But we are here confronted by conditions of a grave and exceptional nature. It is Japan's bounden duty to employ every possible means of putting an end to a disgraceful traffic in the virtue and happiness of her women. She will find sympathy rather than censure if she applies herself to the task with earnestness even more drastic than is generally approved by legislators. Besides, the number of Japanese women proceeding abroad for legitimate purposes is exceedingly small, and their social positions and connections would enable them to obtain passports without submitting to any inconvenient scrutiny. The only persons at all likely to be embarrassed by the necessity of furnishing themselves with passports are precisely the kind of females for whose protection or restraint the new law is intended. Supplemented by a strict regulation making it incumbent on every Japanese female to procure a passport before leaving Japan, the measure now before the Diet may have wholesome and desirable effects, but without the addition of such a regulation, it does not seem likely to accomplish much.

## *IMPERIAL PARLIAMENT.*

HOUSE OF PEERS.—FEB. 27TH.

The House met at 10.50 a.m., under the presidency of Count Higashi-Kuze. Marquis Hachisuka, President of the Memorials Committee, presented four petitions for the House's consideration:—(1) a petition from Okayama Prefecture, for a reduction of the tax on *Saké* brewing; (2) a petition from Aomori Prefecture, of the same import; (3) a petition from Tochigi Prefecture, relating to local boundaries; and (4) A petition from Shizuoka Prefecture, asking that the cost of repairing the banks of the rivers Tenryu, Oi, Abe, and Fuji should be borne by the Central Government. The House then resumed the consideration of Viscount Tani's rules of procedure for the discussion of the Budget. The 14th article was expunged, and the remainder adopted with slight modifications. The next business was to consider a Bill for the amendment of the First Section of the Rules of the House's Procedure. Mr. Miura Yasu, the introducer of the Bill, explained that the Rules hitherto used were, in effect, a draft prepared by the Government, and adopted by the House without discussion. Experience was needed to show their faults or advantages, and the House now possessed that experience. Therefore it seemed advisable to make the necessary amendments by way of provision for next session. He attached much importance to an amendment which provided that the seats of the members—Princes of the Blood excepted—should be arranged by lot, and that no distinctions of rank should be recognised. Mr. Kioka strongly opposed the principle involved in this change of seats, and his opposition was supported by Viscount Tani and others. Mr. Watari Masamoto traversed Mr. Kioka's arguments, and claimed that the social customs of Japan could not be affected by equalizing the rights of all the members as to order of sitting. Professor Toyama denied the propriety of taking this one article of the Bill as a reason for rejecting it *in toto*. They could alter or expunge the article at the second reading. He himself was against it. Twenty years ago they would not have thought of sitting on equal terms with nobles, and probably some of those listening to him would have had to go on their knees when a noble passed by. That social system had ceased, in great part, to exist, but the day had not yet come for its total abolition. He was in favour of preserving social distinctions. He had heard of a case in this country where a certain private gentleman having been invited to a meeting of a learned society, had declined to attend on account of the order of sitting. He did not himself approve of the old principle of honouring officials and despising the people, and to the extent of overthrowing that principle he was ready to proceed at once, by making the *Samurai* and the *Heimin* sit side by side. But he placed Princes and Nobles in a different category at present, and thought that the levelling down method of the proposed article should not extend beyond the untitled members of the House. The closure was moved and carried. The House then voted Mr. Kioka's amendment—namely, that the Bill be rejected, and that the existing rules of organization of the House become the first chapter of the Rules of Procedure. The third of the petitions mentioned above was then adopted for forwarding to the Government, and the House rose at 3.40 p.m.

FEBRUARY 28TH.

The House met at 11 a.m. under the presidency of Count Higashi-Kuze, a quorum not being present before that hour. A petition for the amendment of the 21st Article of the *Saké* Brewing Regulations was adopted for transmission, but a petition relating to license fees for the sale of *saké* was rejected. On coming to a petition from Gifu Prefecture as to a change of boundaries, some members urged that as a Bill on the subject of local boundaries in general had been already submitted by the Government to the House of Representatives, this petition need not be forwarded. Mr. Miura Yasu recommended that the petition be kept by the House for purposes of reference when considering the Local Boundaries Bill as sent up by the Representatives. After some debate the petition was adopted for transmission. The President begged members to be more punctual in their attendance, and the House rose at 12.30 p.m.

MARCH 2ND

The House met at 10.25 a.m. under the presidency of Count Higashi-Kuze, and proceeded to consider petitions relating to the tax on *saké* brewing, to changes of local boundaries, and to the expenses of riparian repairs in Shizuoka Prefecture. The first petition was rejected; the second accepted for transmission, and the third accepted after some debate. The House rose at 11.10 a.m., the afternoon being devoted to Committee meetings.

MARCH 3RD.

The House met at 10.20 a.m., under the presidency of Count Higashi-Kuze. The President announced that, the Budget having been received from the Lower House, the House should determine the time to be allowed to the Committee for preparing its Report. Marquis Hachisuka pointed out that the Budget had been submitted to the Representatives at the beginning of the session, and had been in their hands for the unexpectedly long period of over ninety days. Now, at length, it had reached the Upper House, when only five days remained for its discussion. The task was exceedingly difficult, but he strongly deprecated the idea of abstaining from effort because of the apparent impossibility of achievement. Whether the House had five days or five hours before it, its plain duty was to exhaust all industry in order to bring the Budget into existence. He therefore proposed that the Committee be required to submit its Report during the forenoon of the 5th inst. He was well aware of the extreme hardship of such an undertaking, but the Committee would doubtless work night and day. The House must not shrink from its manifest duty. The Minister of State for Finance said that the Budget for the 24th year of Meiji, having passed the Representatives, had now been submitted to the Peers, and he begged permission to say a word in support of it. They were aware of the long period during which the Budget had been under discussion by the Lower House, and how, on the 23rd ultimo, the Government's concurrence had been sought with regard to the expenditures included in the scope of the 67th Article of the Constitution. The Government had been unable to give its assent to the proposed amendments, as some of them conflicted with the provisions of law. On the other hand, this being the first session of the first Japanese Diet, there was naturally a strong wish that the Budget should be brought into existence. The Government had therefore asked the Lower House to reconsider its amendments. This request, conveyed on the 26th ultimo, had happily met with the approval of the House, which had appointed a Select Committee to consult with the Government and prepare a new Report. The Committee, in discharge of these functions, had conferred with the Government Delegates, and after some difficulty an agreement was arrived at on the 1st instant. Yesterday, the 2nd instant, the Lower House had adopted the revised Report. Thus, in the short interval of five days, from the 26th of last month to the 2nd of this month, the Committee, by exceptional diligence, had succeeded in accomplishing a good result. The Government fully appreciated the difficult position in which the Upper House was placed by having the Budget submitted to it to-day with only an interval of five days remaining before the end of the session. The Lower House, having to deal with the Budget for the first time, had not unnaturally debated it with exceptional minuteness, but the Government trusted that the Upper House would see the advisability of bringing the Budget into existence, although only five days remained for the purpose. It would be a matter of the gravest national regret if, on the very morrow of the birth of parliamentary institutions in Japan, the Budget, a measure of such great importance, could not be brought into existence. As the House was well aware, there had seemed at first no hope of the Budget being brought into existence, in view of the difficulties that arose between the Government and the Representatives, and the fact that these difficulties had been overcome, inspired the strongest satisfaction. It was to be earnestly hoped that the Upper House would contrive to save from fruitlessness the result of so much labour and discussion. Full particulars would be given to the Committee, but so far as concerned the House itself, he most earnestly begged the members to take into due consideration the events that had preceded the submission of the Budget to the Peers. Mr. Takiguchi Kichiro spoke at some length in support of Marquis Hachisuka. He argued that, though the fact of passing the Budget in five days might imply that the functions of the Peers in respect of it were of no consequence, the present case should be regarded as exceptional, and not as furnishing a precedent. He adduced several instances from Western Parliamentary history to justify the course proposed to the House, and concluded by summing up reasons that ought to induce the members to agree to the passing of the Budget within the remaining days of the session. Viscount Tani inquired whether he was right in concluding that the Minister of Finance had asked the House to pass the Bill without amendment, and without discussion. Count Matsukata replied that the Bill had been revised by the Lower House in consultation with the Government, and he trusted that it would receive the approval of the Peers, in view of the short time remaining at the disposal of the Diet. "Then," said Viscount Tani, "may we understand that you desire us to pass the amendments of the Lower House at once?" "Yes," answered Count Matsukata, "and my reason is that as the time available is too brief for full discussion, we can only hope for the bringing of the Budget into existence. The Government, in view of the fact that this is the first session of the Diet, and being anxious to show its respect for parliamentary institutions, made large concessions to the Lower House. If the Budget can be brought into existence in accordance with the Constitution, His Majesty's satisfaction will be great, and moreover, the reputation of the country abroad will be preserved. It would be most regrettable if a measure concerning which an agreement has been with difficulty reached between the Government and the Representatives, were rendered inoperative. The Emperor undoubtedly gave his consent to a prolongation of the session in order that the Budget might be brought into existence." Mr. Ozaki Saburo objected to the mention made of the Emperor's views. Mr. Miura Yasu supported the objection, and urged that even a Minister of State ought not to make conjectures as to the Sovereign's sentiments. He suggested that Count Matsukata should withdraw his statement. Count Matsukata emphatically declined to do so. "Who granted the Constitution?" he asked. "The Emperor and the Emperor only." Mr. Miura Yasu admitted that the Emperor had granted the Constitution. Every one knew that. But different people interpreted the Constitution differently. If men were to be free to divine the Emperor's opinion, and to adduce their conception of it as an argument in the House, they would be wanting in respect towards His Majesty. The Constitution provided a resource in the event of the Budget not being brought into existence, and the Constitution would not be in any way violated though the House failed to complete its discussion and examination within the fixed period of the session. Mr. Okada Shigetoshi said that in interpreting the Constitution it was perfectly correct to refer to the Emperor's views. The Minister President had done so in the Lower House. There was no occasion whatever for the Minister of Finance to withdraw what he had said. Viscount Tani contended that any reference to the Emperor's opinion, merely for the purpose of passing the Budget was most improper. Count Matsukata said that his conception of the Emperor's view had been expressed in connection with the carrying out of the Constitution, not at all with

Digitized by Google

reference to its interpretation. He considered himself perfectly justified in doing as he had done. At this stage, when the discussion threatened to assume an acute character, Mr. Shimauchi Takeshige asked permission to speak, and ascending the rostrum, delivered a speech of some length in support of Marquis Hachisuka's motion, thus giving time for the disputants to reflect. Marquis Nakayama Takamaro attempted to raise the question again, but, being called to order by the President, went on to support Marquis Hachisuka's motion, at the some time protesting against the Minister's suggestion that the House should accept the amendments of the Representatives without discussion. Count Matsuketa denied that he had intended to convery any such meaning. He had merely expressed the hope that the House would agree, if possible. The closure was put and voted. The House them voted Marquis Hachisuka's motion, and rose for the midday recess at 11.55 a.m. On re-assembling at 1.30 p.m. Marquis Hachisuka announced that the Petitions Committee had selected for submission to the House petitions for the better examination of silk-worms' eggs, for changes of local government boundaries, and for amendments of the Stamp Regulations. The House then held a secret session to consider a Bill for the protection of Japanese Females in Foreign Countries. A committee was appointed to examine the Bill. The House rose at 3.20 p.m.

MARCH 4TH.

The House met at 10.40 a.m., under the presidency of Count Higashi-Kuze, and proceeded to consider a Bill—sent up from the Representatives—for the amendment of the dates for paying the Land Tax. On the motion of Baron Watanabe, the Bill was handed over to a Special Committee, and the President announced the names of the Committee. The next business was the first reading of the Bill relating to political speeches and parties, as sent up from the Lower House. Mr. Kiura, Government Delegate, spoke strongly against the amendments proposed by the Lower House. He thought that their proposers had not given due thought to existing conditions. It was absolutely necessary still to exercise some control over political meetings and speeches. Many instances had occurred of so-called scientific or even religious lectures being used as a cloak for delivering political orations, sometimes of an international character. As for the decision of the Representatives that teachers and pupils of Primary Schools and persons not yet of age should be permitted to attend political meetings, he denounced it in unmeasured terms. He also contended that natural functions as well as Japanese social customs forbade women to take part in politics, and that the carrying of arms or other lethal weapons at political gatherings was contrary to law, whereas the Lower House had permitted both of these things. The state of political parties in Japan did not yet sanction such a sweeping away of restrictions as the Lower House contemplated. The Representatives had also expunged the veto upon out-door political gatherings during the session of the Diet, whereas such gatherings had no *raison d'être* when the people's representatives were assembled in their places to legislate for the nation. Further, the amendments of the Lower House did away with imprisonment for offences against the law of political parties, and limited the punishment to fines only—a course distinctly opposed to the view of the leading jurists of the day. If these amendments were adopted, it would inevitably be necessary to re-amend them at no distant date. On the motion of Mr. Obata, the House, without further debate, handed the Bill to a Special Committee, and the President announced the names of the Committee. The next business was a Representation for the establishment of an Agricultural and Industrial Bank to assist local enterprise. Viscount Yuri, the mover of the Representation, spoke in support of it. His arguments were chiefly directed to proving that increased pecuniary facilities were essential to the development of agriculture and industry, and that Japan was much less fully equipped in this respect than other countries. He urged that it was unfair to allow the citizens of Tokyo to contract a loan for water-works, without extending similar competence to other cities and districts. On the motion of Mr. Okauchi, the Representation was handed to a Special Committee nominated by the President. There being no further business, the House rose at 2.30 p.m.

MARCH 5TH.

The House met at 10.30 a.m., under the presidency of Count Higashi-Kuze and held a secret session to consider the Bill for the Protection of Japanese Females in Foreign Countries, which occupied until noon. After the mid-day recess, the Report of the Budget Committee was read. Mr. Hosokawa Junjiro, on behalf of the Committee, said that the procedure laid down by the recently adopted Detailed Rules had been followed, the Committee dividing into sections and devoting itself to the examination of the various parts of the Budget. On the 4th instant the Budget as a whole had been considered and the Committee had decided to recommend its adoption in the form received from the Lower House. They greatly regretted that want of time had prevented them from conducting as accurate an inquiry as they could have desired, and they hoped that the House of Representatives would dispose of the Budget in better time next session. They had, however, assured themselves by minute questioning of the Delegates that the proposed reductions would not impair Administrative efficiency. Viscount Kiooka inquired whether the statement contained in the Report, to the effect that the proposed reduction would not impair Administrative efficiency, was made simply on the Committee's faith in the Government's statements, and whether the Committee thought that it was not entitled to satisfy itself on that point by actual investigation. Mr. Hosokawa said that the Committee advanced no opinion as to the limits of their powers in the matter. Not being themselves officials, however, they had been content to accept the assurances of the Government Delegates in regard to a point which officials only could determine. Mr. Ozaki Saburo asked how the surplus of revenue over expenditure—namely 6½ million *yen*—was to be disposed of. Did the Committee contemplate letting it lie in the Treasury? Count Matsukata replied that it would be kept in the Treasury. Mr. Yamagawa Ko opposed the Report. He failed to comprehend why the Government had given its concurrence. If, merely to curry favour with the Lower House, the Administration blindly set its seal to the reductions of the Representatives, its action could not escape subsequent condemnation. He strongly condemned the idea of passing the Budget without full consideration, and he moved that the House go immediately into Committee. He also expressed a hope that members would refrain from moving the closure at an early period of the debate. Mr. Kato Hiroyuki said that he had been utterly astounded by two events. When it was proposed to hand the Budget to the Committee for examination and report within the space of two days, he had protested that, not being gods, the Committee-men could not undertake such a task. They had undertaken it, however, and he had consequently resigned. And now these wonderful members had actually completed their task within the prescribed period. That was the first shock his nervous system had received. The second was when he learned that the Committee had accepted all the amendments of the Lower House *en bloc*. He sincerely congratulated them. But his satisfaction was not unmixed. The Lower House had spent ninety days elaborating its amendments. The Upper House was about to pass them in almost as many hours. Was this because the Peers were so much quicker than the Commons, or was it for the sake of preserving good relations between the Government and the Lower House? He thought the latter. If the House passed the Bill without proper deliberation merely because it had faith in the Government and in the Representatives, it would be throwing away the power vested in it by the Constitution. Which was better, to despise their Constitutional powers or to let the Budget stand over? Mr. Yamagawa's motion was then put and lost. Mr. Shimauchi supported the Committee's Report. He said it was a great mistake to suppose that the Committee had only spent two days over the Budget. They had in reality been considering it for many days, though not officially. He urged that it would be most regrettable if the long labour of the Representatives were rendered null and void. Such a result could not conduce to the good relations between the Houses. The delay in the Lower House had been due not to any want of diligence, but to quite exceptional causes, and the Upper House might well adopt an exceptional course. Mr. Obata Tokujiro opposed the Report. Like every one else he wanted to see the Budget brought into existence, but he disapproved not only of the reductions applied in the Lower House but of the manner of accomplishing them. He denounced in very strong terms the conduct of the Government, which seemed to have had no fixed policy, but to have bargained and cut down the Budget in an undignified manner. The Government stood outside political parties and was under no obligation to please the Lower House. Mr. Watanabe supported the Report. He contended that this being the first meeting of the Diet, it was natural to expect difficulties in procedure, and the course now adopted by the Upper House need not be regarded as a precedent. Viscount Kioka spoke at considerable length in opposition. His principal argument was based on the impossibility of the House's discharging its proper functions in respect of the Budget in the brief space of five days. He related the history of the Budget in the Lower House, and deduced from it the conclusion that the Government had departed from the strong position orignally taken by it with regard to the reductions proposed by the Representatives, and had shown great want of firmness. He thought that the precipitate passing of the Bill by the Upper House would bring the Diet into discredit both at home and abroad. Mr. Okauchi supported the Report. He ridiculed the idea of pretending that the Government had been wrong in agreeing to reductions. For what purpose was the Budget submitted to the Diet except that it might be reduced if necessary? As to the argument that the House would cut an absurd figure did it pass the Budget in five days, they had examples of much greater celerity in foreign Parliaments. Mr. Miura Yasu and Viscount Tani said they had questions to put to the Minister President and the Minister of Finance, and begged that the Ministers might be called if they were in the waiting rooms. Mr. Okauchi pointed out that Government Delegates were present to ask questions if needed. Mr. Ozaki Saburo said that he wished to question the Minister of Finance with regard to his reference to the Emperor's views. The Minister of Finance returned to the House at this moment and Mr. Miura asked him on what reading of the Constitution he had informed the Lower House, in his speech of February 24th, that their procedure in respect of the Budget exceeded their powers. Count Matsukata replied that the remark referred to had been made in the Lower House and he could not answer any question relating to it here. The House took a short recess and reassembled at 6.35 p.m. The President announced that the closing ceremony of the Diet would take place in the principal hall of the Palace on the 8th instant. Mr. Miura Yasu asked the Government Delegates whether the Budget had not been prepared originally so as to allow of subsequent reductions. Mr. Watanabe, Vice-Minister of Finance, replied that such had not been the case. Referring to remarks of this nature, he pointed out that it was absurd to argue any excess in the Government's original appropriations merely because consent was given to reductions proposed in the House. If such reductions had not been contemplated by the Constitution, why should any provision have been made for submitting the Budget to the Diet? Mr. Miura then proceeded to attack the Budget, contending that if it could be reduced by six millions, it might also be reduced by eight, or perhaps even by ten. Such a Budget could not

Digitized by Google

be lightly passed. Its not coming into existence was a matter of one year, whereas the course they were asked to pursue with regard to it would be a lasting discredit to them. He insisted that the appropriations asked for by the Government had been purposely put at figures larger than necessary. If the total reduction had only been three million *yen* or thereabouts he could have consented. Mr. Watanabe, Government Delegate, pointed out the unreasonable character of this argument. There was no sense in fixing on one figure more than another if both were mere matters of conjecture. Besides, the reductions on account of railways and the Reserve Fund were subtracted, only four millions remained. Would Mr. Miura agree to three millions but object to four? Viscount Tani said that he had felt compelled to resign his position on the Budget Committee. He argued strongly against passing the Budget, chiefly on the ground that the House would be making light of the power vested in it. He also urged that the unconstitutional and illegal course pursued by the Lower House made it all the more necessary that the Upper House should examine the matter leisurely and carefully. The Government Delegate said that Viscount Tani appeared to have fallen into the same mistake as other members, in supposing that the reductions finally voted by the Lower House involved changes in the organization of the Administration. Such was not the case at all. Professor Toyama supported the Report. He pointed out that it was out of the question to expect perfection in the first session of the first Diet opened in Japan. They must be content to do the best they could. The closure was moved and voted by 104 to 59, after much obstruction on the part of Viscount Tani, Mr. Miura, and Mr. Ozaki Saburo. The President then announced that the House would proceed to consider the Budget in detail. This led to much discussion and interruption, and finally a recess was taken at 8.35 p.m.

HOUSE OF REPRESENTATIVES.—FEB. 27TH.

The House met at 10.40 a.m. The President announced that Mr. Arai Shogo and 39 other members of the Budget Committee had sent in their resignations; also that a written reply had been received from the Department of Agriculture and Commerce in relation to the Antimony Mine at Ichi-no-Kawa in Yehime Prefecture; also that Messrs. Mori Tokinosuke, Soma Nagatane and Nakaye Tokusuke had resigned their seats. A Secretary read a reply sent by the Department of Agriculture and Commerce with regard to the disposal of the Osarugawa Copper Mine, in Rikuchiu. The document said that the term of the original lease having expired, and no application for a renewal having been received from the lessees, the mine had been leased to the owner of a neighbouring mine, Mr. Iwasaki, in consequence of his tendering for it. The operation had been strictly in accord with the law, and no favour whatever had been shown. One of the former lessees, Mr. Koizumi Katsusaburo, had brought an action against the Government, but the Tokyo Court of Appeal had given judgment against him. As for the Antimony Mine at Ichi-no-kawa, it had been worked by a number of independent lessees until the 17th year of *Meiji*. Owing to frequent cessations of the working, and violations of the Mining Laws, the mine had been taken over by the Government and worked by the Ehime Prefectural Authorities. But in the 20th year of *Meiji*, the system of official control had been abandoned, and the mine was transferred to a company consisting in part of the former lessees. The House then proceeded to consider the resignations of three members. The plea advanced by all alike was sickness. No difficulty was raised in the cases of Messrs. Mori and Soma, but Mr. Nakaye's application provoked some discussion. The reason assigned was poisoning by alcohol. A member said that when a man gave such a reason, nothing was less likely than its truth. Another declared that such a superlatively good member as Mr. Nakaye was not needed in an elementary House of Representatives. Finally an open ballot gave 97 "ayes" and 93 "noes," so Mr. Nakaye's resignation was accepted. Mr. Arai Shogo explained the motives of the Budget Committee's resignation. It was evident that, the House having appointed a Select Committee with power to alter the Budget Committee's Report, the latter Committee had ceased to possess the confidence of the House. Under such circumstances resignation was the only course consistent with the spirit of representative institutions. Just as Ministers of State ought to resign if it appeared that they had ceased to enjoy the confidence of the nation, so the Budget Committee now resigned, and begged that another Committee be chosen in its place. Mr. Satake Gikwa opposed the acceptance of the Committee's resignation. The Budget Committee was a Permanent Committee. Further, if another Committee were now appointed in its place, the new Committee would have to examine the Budget again, a task for the due performance of which no time remained. The Select Committee had not been chosen because of the Budget Committee's having lost the confidence of the House, but because special circumstances had arisen requiring the House to place itself in communication with the Government. The President asked the House whether, in voting upon this question, the members of the resigning Committee should be allowed to vote. The House decided in the affirmative. An open ballot gave 82 "ayes" and 114 "noes" on the question of accepting the Committee's resignation. The House then proceeded to the first reading of a Bill for Amending Special Assessments of Land Values. The object of the Bill was explained by its introducer, Mr. Amakasu Fumiye, who said that great inequalities in the incidence of the land tax existed in different localities. According to the original scheme of land taxation, a re-assessment should be made every five years. This had not been done, however, and to do it properly would involve great expenditure of time and money. The present Bill proposed to apply a partial remedy by re-assessing taxable values in localities where the prices of rice and other articles exhibited marked differences, such differences alone being considered for purposes of re-assessment. Differences in annual yield did not exercise any influence comparable with that exercised by difference in the price of the produce yielded. Mr. Iwasa Jiro said that the Bill introduced by himself was virtually the same as that now before the House, and hoped that both would be approved. Mr. Koma Shiku proposed that the Bill he handed to a Special Committee of inquiry. Mr. Kusumoto Masataka opposed the Bill. He said that nothing could be more unreasonable than to think of employing a uniform standard of values throughout the empire without regard to the local conditions to which differences of value were due. Mr. Okada Rioichiro supported the Bill. Mr. Yamaguchi Chiosaku opposed it, pointing out numerous reasons which rendered it impossible to adopt a uniform rate of taxation everywhere. The debate continued for some time longer, when the closure was moved and carried. A closed ballot was then taken on Mr. Koma's motion for a Special Committee, the result being 127 "ayes" and 111 "noes." The President directed that each Section choose a member of Committee, and the House then (4.20 p.m.) proceeded to the Second reading of the Land Tax Regulations Amendment Bill. Mr. Waki Yeitaro moved as an amendment of the first article, that the land tax be reduced from 2.5 to 2.2 per cent. His principal argument was that the proposed reduction of 0.5 per cent. could not be put into practice under existing financial circumstances, and considering the certain fate of the Budget Committee's Report. Some verbal amendments proposed by Mr. Kurata Jumpu were adopted by the House, but Mr. Waki's amendment did not obtain sufficient support to become a subject of debate. There being no further objection raised, the President said that the House should proceed at once to the 3rd reading. The House voted to dispense with the third reading by 129 to 40, being more than the prescribed two-thirds vote. The House rose at 5.50 p.m.

FEARUARY 28TH

The House met at 10.45 a.m. On the motion of Mr. Shimizu Sanzo it was decided that, in view of the near approach of the end of the session, the House should sit on Sunday, the 1st proximo. A Report having been received from the Qualifications Committee to the effect that it did not fall within the Committee's province to inquire into accusations of bribery against a member—as in the case of a petition against the validity of Mr. Nita's election—such matters being judiciable by the Law Courts, a long debate ensued, the House taking up the general question of its competence to consider the validity of a member's election. The closure was put and lost, and the debate lasted until late in the afternoon, the Committee's Report being finally adopted by 128 to 64. The President then announced the names of the Special Committee chosen to examine the Bill for Special Amendments of Land Tax Assessment. The Qualifications Committee's Report in the case of Mr. Akamatsu Shinyemon was then adopted. The House proceeded to the first reading of a Bill to amend the periods of paying the land tax, and after a short discussion, voted it. The second and final reading was then commenced, the House having voted to dispense with the third reading. The Bill was passed with the amendments recommended by the Committee of Examination. Mr. Suyehiro Shigeyasu moved, as a point of urgency, that the Order of the Day be changed so as to allow the House to proceed at once to consider the Bill relating to political lecture meetings and political parties. This proposal obtained a majority of votes. Mr. Kato Heishiro supported the amendments proposed by the Committee of Examination, with the exception of the clauses forbiding teachers or pupils of Primary Schools to attend political lecture meetings. The House was counted out at 4.30 p.m.

SUNDAY, MARCH 1ST.

The House met at 10.40 a.m. The President announced that Mr. Ozaki Saburo, of the Legislative Bureau, had been appointed Government Delegate for a Bill for the protection of Japanese women in foreign countries. Also that a proposal had been handed in by Mr. Takagi Masatoshi for the appointment of a Committee of 27 members to transact the business of the House between the sessions. Also that certain questions had been received from Mr. Shimada Saburo relating to the Government's reply to the House's request for concurrence in respect of the Budget. Mr. Kato Heishiro, on behalf of the Petitions Committee, explained that, owing to the nature of the business before the House, the sickness of members and other causes, it had not been possible to examine and report upon the numerous petitions which had been submitted. Mr. Makino urged that some portion of the petitions ought, if possible, to be dealt with before the session ended. The House then resumed the discussion of the Bill relating to political lecture meetings and political parties. Mr. Kiyoura Keizo, Chief of the Criminal Laws Bureau in the Home Department, as Government Delegate, explained that, in the present state of Japanese society, the amount of liberty contemplated by the Committee's amendments to the Bill could not be granted without imperilling the preservation of public peace and good order. The Bill had been drafted at the close of last year with due regard to the conditions then existing. The Committee's amendments would have the effect of closing the front door to license and opening the back door. They would render it impossible even to control meetings of farmers assembled for the express purpose of intimidation. He further explained at length and minutely the practical difficulties of carrying out the amendments of the Committee. Mr. Suyehiro Shigeyasu expressed great satisfaction with the clearness and fullness of the Delegate's explanations, and trusted that his example would be adopted by Delegates generally in future. He fully agreed that the relaxation of restrictions on the right of free speech and public meetings should be gradual, and he admitted that the Bill now before the House

Digitized by Google

was a great improvement on the Regulations actually in force. But he objected to the clause forbidding women to attend political lecture meetings. Granting that women should not concern themselves actively with politics, it nevertheless seemed an undue severity to apply an interdict which would exclude them even from the Diet, where their presence was now permitted. He traversed some other arguments advanced by the Delegate. Several members said that, as no opposition was raised to the Committee's amendments, they should refrain from delivering the speeches announced by them to the President. The closure was here put and lost. Mr. Suyematsu Kencho argued that no hope existed of fully discussing and passing the amended Bill during the present session. He recommended that the Regulations now in force be retained for the purposes of the current year, with alterations only of the 28th Article, and of the provisions forbidding intercourse between political parties, and requiring that 48 hours' notice must be given before holding a political lecture meeting. He moved that the Regulations be handed to the Committee for the purpose of being amended in these respects. The motion was put and lost. The House then voted to proceed to the second reading of the Bill. After the mid-day recess the President announced that a proposal had been handed in by Mr. Suyematsu Kencho, to amend the time (48 hours) mentioned in Articles 2, 7 and 24, so as to read 24 hours, and, to excise Articles 28 and 32. Mr. Suyematsu Kencho explained that the purpose of his motion was to enable the House to take some practical action within the short time at its disposal. If they proceeded to discuss the Bill and the amendments clause by clause, they could not hope to attain any practical result, whereas if they voted his amendment at once, the Bill might be immediately disposed of. After some debate the House refused to allow the motion to be accepted, several members arguing that it was out of order. The Committee's amendments were subsequently put and carried in respect ot the first three articles, but rejected in respect of the 4th and 5th (the latter article in the original Bill permits teachers in Primary Schools, scholars, and persons not yet of age to take part in political meetings). The 6th, 7th, and 8th articles were voted with an amendment forbidding the carrying of arms at any public meeting whatever. Mr. Uyeki Yemori strongly opposed the Committee's amendment forbidding women to take part in political meetings. The House, however, adopted the amendment. The remainder of the Bill was voted with trifling amendments, and on the motion of Mr. Tateichi it was agreed that the provisions of the Bill should become operative from April 1st, 1891. The third reading was voted without discussion. The next business was a Bill for amending the Newspaper Regulations, introduced by Mr. Suyehiro. A second Bill of a similar character had been introduced by Mr. Minoura, and Mr. Seki Naohiko moved that a Special Committee be appointed to examine both Bills and combine them into a single measure. Mr. Suyehiro thought that Mr. Minoura's Bill should be treated as an amendment, but the House voted Mr. Seki's proposition. Mr. Takanashi Tetsushiro said that during the whole session Mr. Mutsu Munemitsu had attended in his place only for three or four days at the beginning of the session. The Rules of the House were very clear on this point. Mr. Mutsu had violated them, and ought to be handed over to the Committee for Disciplinary Punishments. Several members objected to the proposal on the ground that Mr. Mutsu had doubtless applied for leave, week by week, in due form. The President, on being questioned, said that the Attendance Book and Leave Book were before him, and that they showed that Mr. Mutsu had sent in applications for leave week by week. Mr. Horikoshi pointed out that others had failed to attend as well as Mr. Mutsu, and protested against the latter being singled out for censure. Mr. Ozaki Yukio accused the President of acting as Mr. Mutsu's advocate. The House voted Mr. Takanashi's proposition. The President then demanded an explanation of the charge brought against him by Mr. Ozaki Yukio. Mr. Ozaki said that he had merely expressed his opinion. The President warmly inquired why he held such an opinion. Mr. Ozaki retorted that if the President pressed him, he was prepared to defend his statement. Much confusion ensued. Several members urged Mr. Ozaki to withdraw his statement, and others begged the President to let the matter drop. The President ultimately consented to take no further notice of the incident, and the House rose at 4.20 p.m.

MARCH 2ND.

The House met at 11.15 a.m. The President announced the receipt of several Bills from members, and also the names of the Committee chosen to inquire into the Bill for amending the Newspaper Regulations. Mr. Abei Hankon, President of the Select Committee on the Budget, reported the result of the Committee's proceedings. He said that he himself having been elected President, and Mr. Misaki chosen Manager (*Riji*), the Committee had applied for the attendance of Government Delegates. The Minister and Vice-Minister of State for Finance, and Mr. Soné, Chief of the Accountants Bureau in the Finance Department, had attended. Various questions had been put and explanations given, with only the general result that the Delegates had remained firm in their declaration of inability to accept the Budget Committee's Report. The details of this part of the inquiry were given in the stenographic record. The Committee had then proceeded to consider amounts. Knowing that the Budget Committee's Report represented the leading ideas of the House, the Select Committee had made it the basis of their calculations. The Government Delegates had not been able on the 26th instant to make any concessions which the Committeee deemed satisfactory, and the sitting had been resumed on the 27th inst. at an early hour. No immediately favourable result had at first been attained, in spite of long conferences and careful investigations. The Committee had then asked for the attendance of the Minister President of State and the Minister of Finance, and renewing the negotiations, had declared that they could not consent to a smaller reduction than 7½ million *yen*. This sum had been fixed upon as representing the wishes of the majority of the House, as being an amount sufficiently large to afford substantial relief to tax-payers, and as indicating a considerable measure of administrative reform. The two Ministers of State had evinced much sympathy with the Committee's objects, but no definite result had been reached on the 27th inst. The following day, the Minister and Vice-Minister of Finance, as well as Mr. Soné, had attended, and explained that, while not differing in general from the Committee's views, it was wholly out of the question for the Government to agree to a reduction of 7½ millions. The utmost possible concession, they said, was a total of 6,312,001.77 *yen*, made up as follows, namely, Ordinary Expenditure 3,385,748.82 *yen*; Reserves 1,000,000 *yen*; Extraordinary Expenditure 926,252.91 *yen*; and Railway Construction Fund, 1,000,000 *yen*. Beyond this the Committee had not been able to obtain anything, and they had then to consider whether they would refrain from making any Report to the House in consequence of their failure to reach the desired result; or whether, seeing that the Government was determined to yield no more, they should simply report the facts and leave the House to decide. They had adopted the latter course, with the added recommendation that a further reduction should be made by cutting down the appropriation for Extraordinary Railway Construction from 250,000 *yen* to 50,000 *yen*, thus bringing the total reductions to 6,512,001 *yen*. The President announced that as the session was drawing to a close, the House should proceed to consider the Committee's Report that same day, after the noon recess. Mr. Shimada Saburo said that, as they had only just received the stenographic records, it would be well to extend the time of the midday recess in order to give the members an opportunity of studying the subject. Mr. Inouye Kakugoro spoke against this. He said that Mr. Shimada Saburo had been able to present a proposal in opposition to the Committee's Report before seeing the latter, and ought not therefore to be inconvenienced by such a trifle as want of time to read it. Mr. Kudo Kokan wanted to know whether Mr. Inouye himself had not approved the Report before its delivery to the House. Mr. Iuouye replied that he had approved it after the printed copy had been placed in his hands. The President said that the House would take a recess from 11.30 a.m. to 2 p.m. On re-assembling, Count Matsukata addressed the House as follows:—"Gentlemen, having unfortunately been unable to accede to your application for its concurrence in respect of the amendments proposed by the Budget Committee in the Budget for the 24th year of *Meiji*, the Government put you to the trouble of reconsidering the question, and happily you appointed a Special Committee for the purpose of full consultation. That this consultation has resulted in an agreement, is a matter of national congratulation. The Government, being from the outset desirous of meeting the wishes of the House, has sought to make every possible reduction, and has accordingly given its concurrence to amendments proposed by your select Committee in items falling within the scope of the 67th Article of the Constitution. As for the reduction of superfluous expenditure, that is a duty which the Government is already endeavouring to discharge, and which it has no intention of neglecting in the future also. I trust, therefore, that you will be able at once to approve your Select Committee's Amended Report." Mr. Takagi Masatoshi asked for an explanation of the Committee's principle of procedure. He understood their President to say that they had set out by taking 7½ million *yen* as the total of reduction. Had they not exceeded their power in doing so? Further, he was unable to discover that any uniform system had been observed in applying reductions to the office expenses and travelling allowances in the various Departments. Mr. Tanaka Gentaro replied that the Committee had not exceeded their functions in any way. They had endeavoured, in the first place, to obtain the Government's consent to the Budget Committee's Report, but finding that quite hopeless, had then sought to accomplish a reduction of 7½ millions. The Government, after much conference, had agreed to 6¼ millions, and the Committee had thought it wise to except that compromise as the best that could be done for the present year. The alternative was that the Budget would not come into existence, and that no reduction at all would be effected. The Government had expressed its earnest desire to meet the wishes of the people as conveyed through their representatives, but had explained that the brief interval remaining before the commencement of the next financial year could not possibly suffice to adapt administrative affairs to any sweeping fiscal changes. During the 24th year, however, preparations would gradually be made, and it was fully hoped that the object of the House would be ultimately achieved. The Government had pledged itself to adopt the spirit of the House's retrenchments, but could not, in the course of this year, effect more than the Report indicated. Mr. Kono Hironaka, while thanking the Committee, and applauding the trouble it had taken as shown by the stenographic records, thought that it should be asked to re-open conference with the Government. The chief function entrusted to the Committee had been to obtain the Government's concurrence in respect of items falling within the scope of Article 67 of the Constitution, but in that sphere very little had been accomplished. The original Budget contemplated a considerable increase in the *personnel* of the Administration. The Budget Committee's Report had proposed a considerable decrease. The House had hoped that the Select Committee would succeed in bringing the number down at least to the present establishment, but on the contrary, they found that an increase of 700 or 800 officials was still contemplated. He

Digitized by Google

thought that the question of procuring for the long labours of the House partial success at the cost of considerable concessions should be kept quite apart from the purely financial issue, and that, whatever might be the fate of the Budget, the Select Committee ought to be asked to re-open conference with the Government. Mr. Sasaki Zenyemon opposed this proposition. It was quite plain that whatever steps the Committee might take, no result more substantial could be attained than they had now before them, whereas, on the other hand, they were threatened with the misfortune of the Budget's not being brought into existence, and consequently with failure to carry out their cherished reforms, Land Tax reduction and Land Assessment adjustment. Mr. Shimada Saburo expressed great disappointment that the committee had confined itself to mere figures, and had given no attention to the vital point of the House's debating competence. The Government's reply stated that in seeking to amend the Administrative organization and to alter the laws by means of the Budget, the House had transgressed the proper limits of its functions and powers. Was this so? Why had the Committee abstained from considering this phase of the matter? The figures in the Budget, however important they might be economically, only affected the finances of one year. But the rights of the House were matters of perpetual importance. If the House voted to reduce or reject certain of the fixed expenditures subject to the Government's concurrence, and if the Government concurred, then what was to prevent the Government from taking whatever steps might be necessary in the sequel of its concurrence, whether as to re-organization of the Administration or revision of laws? How did the House overstep its competence by applying for concurrence which it was distinctly entitled to apply for, no matter what consequences the granting of such concurrence might entail? He was astounded to find a disposition on the part of the House to pass over this grave question. Turning to the nature of the proposed reductions, he condemned them because they depended in great part on the abandonment of works of public utility which it might be necessary to undertake next year. Consequently the reductions were not permanent, whereas the desired diminution of the Land Tax would make a permanent deficit on the revenue side. He asked the Government Delegates to give a clear statement in respect of the charge that the House had exceeded its proper functions, and he utterly condemned the notion of departing from the position taken by the majority of the House merely because a Committee of nine members judged differently. Mr. Inouye Kakugoro said that Mr. Shimada's objection had been formulated three or four days before the publication of the Report to which it related. The House had better postpone the consideration of so wide a subject as the question of its deliberative competence, until time to examine it fully was available. He then pointed out that of the total reduction proposed by the Budget Committee the House had only power to vote, independently, a sum of less than three millions. If they did not accept the new Report, the certain alternative was that the Budget would not come into existence, and last year's Budget would be carried out. But the expenditure under last year's Budget was only 2.998,000 *yen* less than the expenditure under this year's Budget, whereas by endorsing the Select Committee's Report they would secure an economy of 6½ millions, which would enable them to carry out the reduction of the Land Tax and the revision of the Land Assessment. Better half a loaf than no bread. Mr. Arai Shogo contended that the Committee had exceeded its functions. It had been commissioned to treat only the expenditures under Article 67 of the Constitution, and it had treated the whole of the reductions made by the House. He thought that the Report should be returned for re-compilation. Mr. Oyagi Biichiro denied the truth of the last speaker's statement. The duty entrusted to the Committee had been to amend the Report. No limits whatever had been fixed, nor had one part been indicated to the exclusion of the remainder. Mr. Ozaki Yukio said that the duty of amending the Budget devolved upon the Budget Committee, and could not be entrusted to a Special Committee. The Special Committee had been appointed to discharge special and limited functions. He maintained that the Committee had no manner of business to meddle with the decisions recorded by the House in respect of items over which the House possessed independent control, and he denounced the want of spirit shown by the Committee in yielding simply because the Government stood firm. He was going on to condemn the procedure of the Government when Mr. Hamano Noboru called out:—"Does not Mr. Ozaki receive pay from Count Okuma?" This remark threw the House into some confusion, but Mr. Ozaki merely smiled and went on with his speech. The Government he said, bade them be content with 6¼ millions this year, and promised great things for next year, but what reliance could be placed on such promises? If they had a Cabinet established by law, the case would be different, but the present Cabinet might be snuffed out of existence like a candle at any moment. Mr. Tanaka Shozo asked leave to bring in an urgency motion showing that the Committee's Report violated the 64th Article of the Constitution. Mr. Ooka Ikuzo ridiculed Mr. Ozaki Yukio's contention that the Committee had no business to meddle with items decided by a majority of the House. The Committee had been elected by a majority and commissioned by a majority: it represented the whole House for the purposes of its functions. Moreover, the Budget Committee had dealt with items falling within the independent competence of the House. The Select Committee was equally entitled to deal with such items. Mr. Ishida Kannosuke opposed the Report. He repeated the arguments of Mr. Shimada Saburo. The closure was put and carried. A closed ballot was then taken on the question of adopting the Select Committee's Report, the result being 157 "ayes" and 125 "noes." The Revenue side of the Budget was then voted, and the President was about to put the third reading of the whole Budget as amended, when Mr. Misaki urged that the Government's concurrence had not yet been publicly given. The Vice-Minister of Finance ascended the rostrum and formally announced the Government's concurrence. The third reading was then passed without question, and the House rose at 4.45 p.m.

MARCH 3RD.

The House met at 10.40 a.m. The President announced the receipt of various draft Bills from members, of a reply from the Minister of State for Education with reference to the withdrawal of the subsidy to the Keiogijuku University and the specially licensed Schools, and of various replies to other questions. Mr. Minoura Kanaye explained his Bill for the amendment of the Registration Law. He said that his object was to put an end to abuses that had arisen since the introduction of the Great Ledger. After some debate the Bill was thrown out. Another Bill for amending the same Law was introduced by Mr. Okada Riyoichiro and discussed at considerable length, but ultimately rejected. Mr. Ooka Ikuzo then received permission to change the Orders of the Day in order to bring forward a Bill for excising the 11th Article of the Rules for the Reorganization of the Law Courts. The Bill was thrown out. Mr. Amano Saburo, on behalf of the Petitions Committee, gave an account of the work of the Committee in respect of numerous petitions relating to alterations of local boundaries. Mr. Kikuchi Kanji, on behalf of the Special Committee on the Weights and Measures Bill, reported that the Committee had found the Bill a good measure. As for the employment of the metre standard, it was a question of purely scientific character, not inviting any objection. There had been some discussion in the Committee as to whether it might not be better to confine the manufacture of weights and measures to official hands, but ultimately the Committee had decided to recommend no change in this respect. The only amendment proposed was to retain the clause at the end of the 13th Article of the Bill, providing that the catty should be 160 *me*. The Upper House had altered this, and it would consequently be necessary to hold a conference if the Lower House adopted the Committee's suggestion. Expedition was therefore important, and the Committee asked that the Orders of the Day might be changed so as to permit of their Report being debated at once. At this point a stranger, said to present the appearance of a *soshi*, threw from the gallery at Mr. Inouye Kakugoro a quality of horse-dung wrapped in a newspaper. The parcel missed its aim and descended upon the seat of No. 77, who fortunately happened to be absent at the moment. Several members objected to the introduction of the Weights and Measures Bill, as they had not brought copies of the Bill or other documents connected with it, not having anticipated that it would come up for discussion. The third reading of the Copyright Bill was passed, and the House proceeded to the first reading of a Bill for postponing the operation of the new Local Government system for Cities, Prefectures, and Districts. After a short debate and a detailed speech in opposition by the Government Delegate, the second reading of the Bill was passed by 82 votes to 59. The House rose at 4.05 p.m.

MARCH 4TH.

The House met at 11 a.m. The President announced that Mr. Takagi Masatoshi had submitted a Bill for amending the new Commercial Code; also that the person who had thrown a newspaper containing horse-dung in the House the previous day was a youth aged 16, by name Matsumoto Kiuichi, the eldest son of a *shizoku* living at No. 10, Izumi-cho, Sakurada, in the Shiba District. As the act had been an insult to the House, the President thought that the House should institute a prosecution. Mr. Imai Isoichiro asked who had introduced the youth. The President said that it was not yet known. No objection was raised to the course suggested by the President. The House proceeded with the first reading of the Weights and Measures Bill. Mr. Saito Shiuichiro, Government Delegate, said a few words as to the great importance of the Bill, the admirable combination of despatch and accuracy shown by the Committee in reporting on it, and the desirability of its being passed during the present session. Mr. Takanashi Tetsushiro opposed the Bill. He claimed that the so-called reforms included in it were purely nominal. Such a measure as that of Toyotomi Hideyoshi, who changed the Nara *masu* of 15 *go* into the fixed *masu* ever since employed, was a genuine reform. But for all this new talk about thousandths of an inch and a combination of metals compensating one another's alterations, the only result would be a beautiful piece of accurate mechanism lying in the Department of Agriculture and Commerce, and the same old bamboo measures and rough weights in use among the people. He went on to say that the change of weights and measures necessitated by the Bill would only give opportunity to the Department of Agriculture and Commerce to show favour to special merchants, who would receive the job of making the new instruments. He also ridiculed the course followed by Professor Kikuchi in the Upper House, who had exhibited to the members certain weights and measures now in use by way of illustrating their conspicuous divergence from the standards. That simply amounted to saying that because there were abuses, the system itself must be wrong. He concluded by declaring that the present weights and measures sufficed very well for all practical purposes, and by denouncing the Bill as another example of official interference with the people's business. It would merely be a means of increasing the burdens already borne by the lower classes. Mr. Tanaka Shozo supported the last speaker. Mr. Suyehiro Shigeyasu denounced Mr. Takanashi's arguments as becoming only in the mouth of a person opposed to all the principles of civilized progress. Mr. Suzuki Manjuro followed in the same strain, and pointed out the absurdity of claiming that

Digitized by Google

the present system of weights and measures was sufficient. He said that Mr. Takanashi's argument, if pushed to its logical issue, meant that in savage times when men measured a foot by the length of their own and a *ken* by extending their arms, there was no need of any change. Mr. Takanashi had intended to oppose the Bill, but in reality he had furnished arguments to its supporters. The closure was put and carried, and the House proceeded at once to the second reading. Mr. Takagi Masatoshi proposed an amendment to the effect that the manufacture of all weights and measures should be officially undertaken, and that the Bill should be returned to the Committee for inquiry in that sense. Asked whether such a step was consistent with the hope of passing the Bill during the present session, he said that to defer an imperfect measure would be a gain, not a loss. The closure was moved and carried, and Mr. Takagi's amendment lost. The House then passed the second and third readings. On re-assembling after the mid-day recess, Mr. Matsunami Koga moved that a Special Committee be appointed to determine what Bills should be submitted to the Committee provided for in Article 25 of the Law of the Houses (namely, the Committee for continuing the examination of Bills during the interval when the Diet is not sitting). The House voted urgency for the motion, and passed it without debate. Mr. Koma Shiku, on behalf of the Committee appointed to examine the Bill for the Special Amendment of Land Assessment, reported that there had been considerable difference of opinion in the Committee, and that a Minority Report would be presented. The majority, however, had agreed to recommend the Bill with slight amendments. The Minority Report was made by Mr. Koritsune. It condemned the Bill altogether, on the ground that to determine the assessment by the price of rice alone, would be an insufficient and unjust measure. The Minority held that re-assessment was not a matter to be lightly undertaken by mere arithmetical calculations, and recommended that the question be postponed until next session. Mr. Suyematsu Kencho, on behalf of the Newspaper Regulations Bill Committee, then made a Report. Mr. Higashio moved that precedence be given to the Land Assessment Bill, and the House endorsed the motion. After considerable debate the House voted against the second reading by 125 to 107, many members being avowedly influenced by the feeling that to attempt the consideration of so important a measure at this late stage of the session would be a fruitless task. The President announced 25 Bills and Representations for consideration the following day, and the House rose at 5.15 p.m.

MARCH 5TH.

The House met at 10.50 a.m. The President announced the receipt of various Bills, and that the Minister of Foreign Affairs had signified his intention of answering the questions addressed to the Government some time ago by Mr. Misaki and Mr. Inouye Kakugoro, the former reply to be given at 11 o'clock, the latter at 1 o'clock. Mr. Kusumoto Masataka, on behalf of the Committee appointed to determine what Bills should be submitted for examination by the Continuing Committee between the Sessions of the House, reported that 81 Bills and other measures had been submitted to the House since the beginning of the Session, and 15 or 16 might be said to have been disposed of. A list of those which the Committee proposed to submit had been circulated among the members. It was recommended that the Continuing Committee should consist of 27 members, and that it should sit for 100 days, at most. There had been much discussion as to the remuneration of the Committee, but the majority had finally voted for 3 *yen* per diem. The Minister for Foreign Affairs then spoke as follows:—"Gentlemen—I propose to answer briefly the questions addressed to the Government on the 24th of December by Mr. Misaki and others. I had hoped to give you the required explanations at an early date, but various business, coupled with my desire to be in a position to tell you as much as possible of what has been under discussion, must plead my excuse for delay. Now, however, since you are on the eve of returning to your homes, I feel it to be my duty to afford you whatever information is permissible. The gist of Mr. Misaki's inquiry is whether the Government, in negotiating the Revision of Treaties, looks to recover the Empire's Judicial Autonomy and Tariff Autonomy together and in their entirety, or whether it looks to recover them in part only. To such a brief inquiry, I purpose giving a brief answer. With regard to the first query, whether we look to recover Judicial Autonomy and Tariff Autonomy together and in their entirety, I can only answer, I need scarcely say that the full recovery of both together is our wish and that we should gladly accomplish it, but in carrying out an affair of of such magnitude, proper steps of procedure must be followed. If, in traversing a plain, one comes to a river, a bridge must be built to cross it. The Government, in carrying out this work, is equally compelled to build a bridge, and the only question is, what shall the length of the bridge be. It is the Government's earnest wish to make the bridge as short as possible. With regard to the second question, whether we look to recover a portion now and to complete the recovery at a later date, I may say that, practically, our idea is to complete the recovery at a future date. Only, as I have already said, we shall of course spare no effort to curtail as much as may be the interval preceding completion. You will perhaps ask for further information on the subject of recovering a portion of our autonomy. Such a course applies especially to the case of the Tariff. Foreigners have acquired certain Tariff privileges under the Treaties and are in actual enjoyment of them. To revoke those privileges at once would be difficult, and not only the Government, but I also, hold that view." The Minister was about to decend from the rostrum when Mr. Tanaka Shozo said he had a question to put, and Viscount Aoki remained in the rostrum. Mr. Inouye Kakugoro:—"Speak from the rostrum, please, Mr. Tanaka." Mr. Tanaka:—"Don't make rude suggestions. The rostrum is already occupied." Mr. Inouye:—"Why do you call it rude to suggest that you should speak from the rostrum?" Mr. Tanaka:—"There is an *okiyakusama* (guest) there already." Viscount Aoki laughingly vacated the rostrum and Mr. Tanaka occupying it, said that he was much obliged to Mr. Inouye for enabling him to reach the rostrum. When the Minister of State for Foreign Affairs addressed the House on a previous occasion, he had said that the foreign affairs of the country were not limited to Treaty Revision: there were other things to be dealt with. In view of that somewhat confident assertion, they had hoped to hear to-day that the Government proposed to recover Tariff Autonomy and Judicial Autonomy completely and to conclude Treaties with Foreign Powers on equal terms. But judging by what the Minister had just told them, it appeared that the policy contemplated did not differ over much from the programme of Count Inouye. He did not seek to pry into matters that ought to be kept secret, but he wished to know in what respects the programme of the present Cabinet differed from the programme of its predecessors. Viscount Aoki said:—"Mr. Tanaka has propounded a question difficult to answer. But if you read carefully what I said when I last had the honour to address you on this subject, I think you will perceive, that while admitting the existence of defective features in the programmes of Counts Inouye and Okuma, I did not undertake to make a signal display of superiority (literally, to overthrow them finely by a display of wrestling). As for my statement that other matters than Treaty Revision called for attention, it was merely intended to account for the impossibility of devoting exclusive attention to this matter. By way of example, I referred to the opportunities afforded by our country's coal resources, and I pointed out to you that, geographically speaking, America's back is turned to us. That, of course, was purely from a geographical aspect and had no relation whatever to the close relations consisting between the two countries. Of course, I did not mean to imply that, either morally or politically, the two countries occupy such a position towards each other. But it is not possible for me to explain exactly in what respect the proposals of Counts Inouye and Okuma differ from mine, for though their projects are now things of the past, mine forms the subject of actual negotiation." Mr. Yoshino Seikei, on behalf of the Special Committee for the Registration Bill, then reported that the Committee found, on examination, that the Registration Law now in force was founded on Notifications issued in 1871 and 1886, and was unsuited to existing conditions. The Law now proposed seemed a very suitable measure, and the Committee had not found any points sufficiently calling for amendment to require the return of the Bill to the Peers. The House then proceeded with the first reading of the Bill. Mr. Suyematsu Saburo, while approving the general principle of the Bill, opposed its adoption because he thought that the means provided by it for determining personal status were too trivial. Mr. Kuroda Tsunahiko, Government Delegate, combatted this objection, explaining that the system proposed had great advantages in respect of convenience and economy. Mr. Minobe Teiriyo objected to three points in the amendments adopted by the Peers, and urged that, in view of the importance of the measure, and of the fact that it was not to come into operation till 1893, it should be handed over to the Continuing Committee and discussed at length hereafter. Mr. Shirane, Government Delegate, urged that the Bill should be passed this session, for though its operation was to be deferred until 1893, the interval remaining was barely sufficient to make the necessary preparations. The House then voted the second reading. On reassembling after the mid-day recess, the President announced that a notification had been received intimating that the closing ceremony of the Diet would take place on the 8th instant in the chief hall (*Homeiden*) of the Imperial Palace. The Minister of Foreign Affairs then addressed the House as follows:—"Gentlemen, I propose to reply to certain questions addressed by Mr. Inouye Kakugoro and 33 other members to the Government on the 9th of February. With regard to the first question, namely, whether the Korean Government borrowed money from the Specie Bank of Yokohama, Count Inouye Kaoru endorsing the transaction, I have to say that the Japanese Government has no official cognisance of such a transaction, and the statement that the customs dues of Fusan and two other ports were hypothecated as security is incorrect. The document relating to the loan did indeed contain a clause that in the event of the Korean Government failing to discharge the debt, the customs dues at Fusan and elsewhere should be appropriated for the purpose. But on enquiring from the Specie Bank—the Foreign Office having no knowledge of the affair— it turns out that the instalments of the debt have been duly paid, except that for last year, application for which is now being made. The instalment for 1889 was only paid in April, 1890, and there is therefore no reason to suppose that the instatement for 1890 will not come to hand in due course. Under these circumstances no action on the part of the Government has seemed necessary. With regard to the second question, the facts stated are not correct. Inquiries made by the Government show that the Chinese serving in the Korean Customs are actually Korean employés, and the Korean Government represents them as its own officials. The point relating to ginsing in the same question is one of great difficulty. In the 6th article of the Trande Regulations between China and Korea, it is provided that Koreans exporting ginsing across the Chinese frontier must pay a duty of 15 per cent., while if Chinese attempt to export it, the punishment is confiscation. It many seem from the sixth article that any other nationals would be free to export the drug on paying a duty of 15 per cent., but the Korean Government exercises such close supervision over the staple from the time of its production till the moment of export that no one seems to have attempted the business. Moreover, the use of ginsing in Japan is very small, having been virtually confined to the period

Digitized by Google

when Dutch physicians practised here. There could be no profit in importing it. As to the third question, something of the kind is said to have occurred, but there is no information more certain than that furnished by a newspaper report. Above all, there has been no complaint from the parties concerned, and consequently the Government has not been called on to take action. Of course if a complaint were received through the proper channels, the Government would not fail to adopt whatever measures might be necessary." Mr. Inouye Kakugoro acknowledged the minuteness with which the Foreign Minister had answered his inquiries, and said that he should raise no question now as to the correctness of the Minister's information. Should it turn out that the information was not correct, the responsibility would rest with the Minister, and for his part he was content to let the matter stand over. As for the statement that Count Inouye had not gone security, the fact was not now capable of concealment. He also believed that the Korean Government had not made any payment for 1885, but that the fact had been glossed over. It seemed to him, further, that for all practical purposes the customs dues of the three ports had been hypothecated for the debt, while as to the question of whether the Korean Customs Service was independent or not, they had only to look to the locality of the head customs office. He also claimed that the permission to export ginsing into China on payment of a duty of 15 per cent. must be extended to Japanese, or else most-favoured-nation treatment was not enjoyed. The claim that little of the drug was used in Japan meant nothing, since the profit looked for lay in exporting it from Nagasaki to Hongkong and Shanghai, where a quantity costing only a *yen* originally fetched 15 *yen*. Finally, the affair of Hashimoto Gentaro was publicly known, and he thought that the Government ought to take cognisance of it. If the failure of the sufferers to complain was a reason for leaving them unaided, he failed to see the use of sending Japanese Ministers and Consuls abroad. He must leave the House to judge between the Minister's statement and his own. In conclusion he begged to say that five years travel in Korea, from 1881 to 1886, China, and Russia, had not impressed him with a favourable idea of Japan's policy towards those countries, and he earnestly hoped that a more decided line would be adopted in future. Viscount Aoki said that it might seem as though nothing had been done in the affair of Hashimoto Gentaro, but in truth the facts already stated by him had been ascertained before the receipt of Mr. Inouye's question. He was pleased that Mr. Inouye had spoken about the country's policy towards China and Korea. The incident of 1884 and other matters had, perhaps, caused a change in that policy. He himself had been in Europe at the time, and could not speak with accuracy, but the present intention was to pursue, as far as possible, a uniform and unchanging policy. Foreign relations sometimes demanded an expenditure of blood aud treasure, and were not to be treated lightly, but the Government hoped to raise Japan's prestige as high as possible in the Orient. Mr. Inouye expressed himself quite satisfied. Mr. Takanashi complained that the questions put by him as to the Osaruzawa Copper Mine had only elicited a brief written reply. He thought that such a course was contrary to the Law of the Houses, and he had accordingly presented an urgency motion to that effect, but it had not as yet come up for hearing. He then entered into some particulars as to the history of the mine—particulars already published—and asserted that nothing could be more unsatisfactory than the information afforded by the Government. Mr. Awatane Shinazo observed that Mr. Takanashi had moved for the committal of Mr. Mutsu, the Minister of Agriculture and Commerce, to the Disciplinary Committee, and was now pressing enquiries so presistently in respect to that Department, that it really seemed as if the House were having another edition of Mr. Tanaka Shozo and Count Goto. Had Mr. Takanashi any private grudge against Mr. Mutsu? Mr. Takanashi replied that of all the Departments of the Government, the Department of Agriculture and Commerce called for most criticism, and Mr. Mutsu, as its head, had to bear the attack. Mr. Suyematsu Kencho said that he also desired to make an urgency motion in the same sense as that of Mr. Takanashi, namely, with regard to the general question whether a written reply could properly be given to questions preferred under the provisions of Article 48 of the Law of the Houses. The motion of Mr. Takanashi was then put and carried. An urgency motion was then introduced by Mr. Nakamura Yaroku for a supplementary estimate appropriating five hundred thousand *yen* to purposes of preparing for the Chicago International Exhibition of 1893. Mr. Nakamura spoke in support of the motion, dwelling upon the importance of making Japanese products known in foreign markets, and speaking in very strong terms of the close relations of friendship existing between the United States and Japan. The House agreed to allow urgency for the motion, and also for a motion by Mr. Suzuki Shoji that the Bill already handed in with regard to Local Government Divisions should be taken after the Bill relating to the postponement of the date of puttiug the new Local Government system for Cities and Prefectures into operation. Leave having been obtained to change the Orders of the Day, Mr. Nakamura's motion was taken. After a brief debate the motion was carried, and the House proceeded to the second reading of the Bill for postponing the date of operation of the Local Government System for Cities and Prefectures. After a short debate, the House voted the second reading by 116 to 69 and the third reading by 102 to 52. The House then took the Bill on Local Government Divisions, which was rejected. The House rose at 4.42 p.m., the President having announced 48 Bills and other matters for debate the next day.

## *CORRESPONDENCE.*

### KARUIZAWA.

To the Editor of the "Japan Mail."

Sir,—I was at Karuizawa a few days ago. The two days I spent there were bright, and without wind. Out of doors in the daytime it was warm and pleasant. At night, however, it was quite cold; about two inches of water in a tumbler, in my bed-room, had frozen to solid ice in the morning. There was no snow on the plain, except in shaded spots. Even Asama's coat seemed quite thin.

I was told there would be no troops there this year; but that there was some talk of moving the barracks from Takasaki there, in a year or two.

A man informed me that there had been no influenza cases at Karuizawa. I was told that the lowest reading in the village of the thermometer, this year, was 16, but that on the *toge* it had been as low as 6. At 8 a.m., on the morning I was there, the thermometer in the village hotel showed 26.

On the road between Yokogawa and Karuizawa, I passed a number of railway surveyors at work. I hear the line is to be finished in two years, have seven tunnels, and in some places be graded one in twelve. The locomotive to be used in this climb, will have gearing working on a centre toothed rail. The station is to be at New Karuizawa; and already land has gone up in its neighborhood considerably in value.

In a shop at Yokogawa I saw the carcasses of several deer and hares.

In the neighbourhood of Takasaki a fellow-passenger pointed out to me a number of mounds. He told me that this was the site of an old battle field, and that these mounds were where the dead had been gathered in heaps, and covered with earth. He said that in making the railway, a great number of bones and pieces of armour had been unearthed.

I remain, Sir, yours truly, E. F.
February 27th, 1891.

### WAS IT A FREAK OF MEMORY?

To the Editor of the "Japan Mail."

Sir,—To psychologists certain phenomena of the memory are among the most puzzling of their science. I refer to the ease with which some minds forget that which they labour hard to retain, and the persistence with which others remember and repeat what has, apparently only shadow like, touched them. The well known fact published by Coleridge, of the German girl, who, in sickness repeats long passages from classical and rabbinical writings, which, it was learned, she, without conscious attention had heard her master read aloud years before, is a standard illustration of this mysterious mental operation. Many other illustrations might be given. Has the *Mail* just brought to light an addition to this catalogue of inexplicables? Two bits of writing which have lately been republished in the *Mail's* columns raise the question. With the exception of a very few words, Sir Edwin Arnold's sentences are an exact repetition of those of Mr. Wigmore. I say repetition, since Mr. Wigmore's words were written in June, 1890, and Sir Edwin's five months later. Memory's oddities sometimes put one face to face with embarrassing though interesting questions.

J. H. Wigmore, in New York *Nation*, dated Tokyo, June, 1890.

"Kwaigi (sometimes called *Gi-in*) met in July, 1875, at the *Hongwanji* (a temple), and was hailed as a decisive token that the promise of 1868 was in process of fulfilment. It consisted, of course, of appointed officials only, but the Government treated it as the mouth-piece of the people, and undoubtedly regarded the method of selection of its members as only temporary. An imperial speech opened the session, and the able Kido (the "brain and pen" of the Restoration) was appointed *Gi-cho* (President). There were seventy delegates, who were either governors or their deputies. Rules of procedure had already been drawn up by the Government. The results of this first session were not at all promising. The Assembly occupied most of its time in discussing a system of roads and bridges laid before it by the Government. The meetings were not opened to the public or to the press, and the publication of the debates by the Government did not mitigate the general dissatisfaction which this caused. The Assembly itself showed a conservatism which did not tend to commend it to the people. In a discussion on the proposition to establish a national representative assembly, the vote was to constitute it of *ku-cho* and *ko-cho* (county and town mayors, appointed by the Government). At the same time its influence was weakened by contrast with the action of some of the citizens of local prominence, who had been brought up to Tokyo by the governors to assist with their advice. These met and drew up a memorial asking for an assembly founded on popular election. . . . Finally on October 12th, 1881, came the well-known decree establishing a parliament in 1890."

Sir Edwin Arnold, in *Daily Telegraph*, dated Tokyo, November, 29th, 1890.

"The Kwaiji met in July. 1875, at the Hongwanji (a temple), and was hailed as a decisive token that the promise of 1868 was in process of fulfilment. It consisted, of course, of appointed officials only, but the Government treated it as the mouthpiece of the people, and undoubtedly regarded the method of selection of its members as only temporary. An imperial speech opened the session, and the able Kido (the "brain and pen" of the Restoration) was appointed *Gi-cho* (President). There were seventy delegates, who were either governors or their deputies. Yet the results of this first session were not at all promising. The Assembly occupied most of its time in discussing a system of roads and bridges laid before it by the Government. The meetings were not opened to the public or to the press, and the publication of the debates by the Government did not mitigate the general disatisfaction which this caused. The Assembly itself showed a conservatism which did not tend to commend it to the people. At the same time its influence was weakened by contrast with the action of some of the citizens of local prominence, who had been brought up to Tokyo by the governors to assist with their advice. These met, and drew up a memorial asking for an Assembly founded on popular election. Finally, on Oct. 12, 1881, came the well-known decree establishing a Parliament in 1890."

Very truly yours, PSYCHOLOGIST.
Tokyo, February 28th, 1891.

### EDUCATION FOR SONS OF MISSIONARIES AND OTHER TOKYO BOYS.

To the Editor of the "Japan Mail."

Sir,—In your leader of to-day you remark that owing to the closing of a school in Tsukiji the Missionaries in Tokyo find themselves without a school to which to send their sons.

Surely the distance between Yokohama and Tokyo is not sufficient to raise any serious or insuperable barrier to these boys being sent to the Victoria Public School? They would receive there a first-rate education, and would materially assist in supporting an institution, working under a Committee enjoying the fullest public confidence and having Bishop Bickersteth as Chairman.

With such a school available, and in need of pupils, a new school for boys would seem superfluous.

Yours faithfully, A PROFESSOR.
Tokyo, March 4th, 1891.

For Prostration use Horsford's Acid Phosphate.

Dr. N. I. Butler, L.K.Q.C.P., 52, Longstone-road, Eastbourn, says: "I have used it in convalescence from acute diseases (fever, etc.), where there was profound prostration, with complete loss of appetite. Its effects were very quickly manifested and most satisfactory. I have also used it in cases of general debility with the good results. I regard as a most valuable addition to our materia medica."

## *YOKOHAMA CRICKET AND ATHLETIC CLUB.*

The annual general meeting of the Yokohama Cricket and Athletic Club was held on the 27th ult. Mr. N. J. Hannen presided, and among those present were Messrs. W. L. Merriman, W. B. Walford, J. Rickett, F. Walkinshaw, E. O. Kenyon, G. B. Watson, G. Hood, E. Abbey, W. D. S. Edwards, E. B. S. Edwards, J. P. Mollison, C. Gibbens, F. H. Hooper, H. C. Litchfield, A. Hearne, A. H. Stewart, T. Brewer, W. W. Till, G. W. Barton, C. S. Averill, Archer, Geo. Philip, E. Morriss, C. H. Balfour, R. Abenheim, H. V. Henson, K. F. Crawford (Hon. Sec.).

The CHAIRMAN said he was sure he might congratulate everybody on the success of the Club during the past year. Their accounts were just to the good a little better than they were last year, and he believed there was still a subscription going on, so that the members might consider themselves a little better off than the statement of accounts made them out to be. Throughout the various paragraphs of the report they would see that in every one of the departments except athletics they had been most successful during the course of the year. If was somewhat to be regretted that the athletic meeting did not come off last autumn, but it had always been found throughout the time that he had been here that there were periods during whichone particular sport was neglected, but it was also found that that sport always revived after a little while, so that no one need despair about athletics, and the chances were that next autumn they would be able to bring off as successful an athletic meeting as ever before. As he had already said, they were successful throughout in their contests with Kobe, and generally in their other contests, and, what was exceedingly pleasant to him and would no doubt be so to the whole of the Club, was that for the first time during the existence of the Club they had succeeded in beating somebody at baseball.—(Applause.) Hitherto when they played against other teams they had been ignominiously defeated, but during the past year, and for that they had to thank Mr. Merriman, they had succeeded in retrieving their laurels. The members would see that though the report was very pleasant, it really suggested a beautiful insect with a great big sting in its tail.—(Laughter.) For when they came to look at the pavilion they found they had to spend a lot of money on it. At the end of the year—he was speaking of the repairs to the pavilion only, and not of the water—they would be if they undertook those repairs probably something like $180 to the bad, and if they succeeded in the following year in wiping that off it was as much as they could expect, and he did not think the Club should regret if during the coming year they should prove a little bit to the bad in their accounts. He proposed that they should take the report as read, and that any one who had any general remarks to make on the report, except in regard to the question of the pavilion, should make them, and the Committee, and himself to the best of his ability, would answer any questions that might be put. The question of the pavilion would, he thought, probably necessitate considerable discussion, and for the convenience of the members that discussion should take place while they were electing the committee. He therefore proposed the adoption of the report. It did not commit them to anything, because the Committee had only mentioned what the repairs to the pavilion were, but had not recommended that they should be done. He proposed that the report and accounts be approved, leaving to a later period the discussion as to the paragraphs with regard to the pavilion. Before he sat down he could not help remarking on this, possibly the last occasion on which he would preside there, that during the course of the present year they had lost one who was really the originator of the Club, Mr. E. Abbott. It was owing to his energy and to the amount of work he did that a lot of scattered clubs were gathered into one, and made the Cricket and Athletic Club the Club it now is. He devoted so much time to it that he succeeded in doing what had for many years been wanted, but could not be accomplished, and he (Mr. Hannen) could not help at this time calling to the minds of the members the fact that he had passed away. How much he was regretted only those who were intimately associated with him would know.—(Applause.)

Mr. WALKINSHAW seconded Mr. Hannen's proposal.

The CHAIRMAN invited questions, but none being asked, put the report and accounts to the meeting and they were approved of.

The following were the report and accounts :—

ANNUAL REPORT OF THE Y.C. & A.C. SEASON 1890-1891.

In submitting the Report for the past year, the Committee have much pleasure in congratulating the members on another successful season.

ACCOUNTS.—The Committee beg to lay before the members a statement of accounts for the past financial year showing a balance of $5.56, after having paid the ground-rent up to the 1st of January, 1892, besides which there is a good stock of gear carried over for the coming season, only a small further outlay being necessary.

CRICKET.—The season of 1890 may be considered a very satisfactory one. The number of matches played, eleven, is the same as in 1889. Three were against the Fleet, and two against the Kobe Cricket Club, all of which were won easily by the Club, though time nearly deprived us of victory in the return match with the latter. The other matches played were the Eleven v. The Next Twenty Two, Bluff v. Settlement, and four scratch matches. Larger, and more frequent, individual scores have been made than heretofore, due probably to the excellent pitch which the Club now possesses. The Interport Matches were watched with great interest, and some of the best batting seen here for sometime was shown on both sides. The highest average falls to Mr W. D. S. Edwards with 122.1 for 8 innings, in 6 of which he was not out, which materially helps. Mr. Walkinshaw comes second with 53.2 for 10 innings, once not out, and is also credited with the highest individual score of 117, against Kobe. Mr. Crawford is again third with 49.6 for 12 innings, twice not out. These averages are far and away higher than any recorded for some years. In bowling Mr. W. D. S. Edwards also takes first honours, with the good average of 4.7 runs per wicket, Mr. Walford being a good second with 6.7 runs per wicket, though the latter took 35 wickets to the former's 31. In Messrs E. B. S. Edwards and G. Watson, the Club have acquired two good cricketers who strengthen the Eleven very materially, both in batting and bowling, and it is hoped they will be able to play as often during next season as is possible.

ATHLETICS.—Owing to the small number of entries for the usual Autumn Athletic Meeting, it was decided not to hold one, which is to be regretted as it shows a lack of interest in this branch of sport.

FOOTBALL.—The revival of interest which commenced last season has more than been maintained during the present one. In addition to the many interesting games played amougst members, assisted by players from the Navy, we have had the pleasure of receiving a second visit from our Kobe friends, and after a very fast and exciting game proved victorious by 4 goals to nil. The Match was won mainly through the strong combination of our team doing their utmost to play an unselfish passing game. The team has been strengthened by several new members, notably Messrs. E B. S. Edwards, Barton, and MacNeil, who played up well in the Interport Match, and did more than their share towards winning it. The selection of the team proved an extremely difficult task owing to so many members playing alike, and after much consideration the one which played was decided on, and more than upheld the honours of the Club. Mr. G. Watson would have played, had he not been disabled at the last moment, and would no doubt have proved another useful addition to our football strength.

BASEBALL.—During the past year there has been quite a revival of interest in this game. Several matches were played against nines from the U S.S. *Omaha*, in all of which the Club was victorious. New balls and a good selection of bats were got over from America, the gear, etc., for the game now being in better condition than ever before. It is hoped that new blood may be introduced during the coming season and the interest in the game not allowed to flag.

LAWN TENNIS.—The courts have been in good order throughout. A handicap played in the Spring attracted a large number of competitors, and after being well contested was won by Mr. W. F. Page, for whom a suitable prize was provided. In the autumn it was impossible to arrange anything of the kind on account of the increased interest in Cricket, and the playing of the annual tournaments on the Ladies Lawn Tennis grounnd. Two new nets have been provided, but some further expenditure in the same direction will be necessary in the coming year. There are 6 dozen new balls in hand.

PAVILION.—The Committee find that it will be necessary to spend a considerable amount of money on the Pavilion, and now place the matter before the members for consideration. The staircases and floors are quite rotten, the roof is very much out of order, and the majority of the pillars require renewing. Besides it is proposed to make the dressing room more comfortable generally. Five Estimates, including painting, &c., have been obtained, running from $537.40 to $424 90. Another question for consideration is the advisability of laying on the water supply. Two Estimates have been obtained from the Water Works office, the first amounting to $129.50, and the second to $110.84 provided the owner of the house adjoining the pavilion will allow of the pipe being taken through his garden. The reason of this large estimate is mainly due to the long length of piping required to bring the water from the street main into the building.

The present Committee beg to tender their resignations with every good wish for the continued prosperity and success of the Club.

THE HONORARY FREASURER IN ACCOUNT WITH THE YOKOHAMA CRICKET AND ATHLETIC CLUB.

| 1891.—January 31. Dr. | | |

E. & O. E.

**Yokohama, 31st January, 1891.**

W. D. S. EDWARDS, Act. Hon. Treasurer.

Examined with vouchers and found correct.

J. A. JEFFREY, C. H. BALFOUR, } Auditors.

The CHAIRMAN explained that under the rules the election of a President came first, then that of a Vice-President and Captain of Cricket, and lastly that of seven members of Committee to whom it was left to distribute the work amongst themselves.

It was announced amid applause that the ballot for President had resulted in the election of Mr. Hannen.

Mr. WALKINSHAW'S election as Vice-President and Captain of Cricket was received also with applause.

While the ballot for the Committee was proceeding,

Mr. WALKINSHAW said before any member made any remarks he would like to point out one matter in reference to the laying on of the water. Besides the estimate given here of $424.90, which was the lowest obtained, there was a further expenditure to be incurred amounting to $27, and there was also $110.84 for the cost of laying on the water. During the past few days he had received a communication from Mr. Walford, who intimated that he was willing to pay half the amount of those two items, $137.84, if the other half could be raised by subscription.—(Applause.) He had to thank Mr. Walford for his kind offer on behalf of the members of the Club, and he hoped they could see their way to do as suggested without burdening the Club more than they could help. They had to expend $400, which included repairs to the pavilion, putting it in good order, painting it, and making everything as comfortable as possible. The idea of the $27 was to extend the present rooms and take in the bath rooms, so as, the water being laid on, to provide shower baths.

The CHAIRMAN thought the best way to raise discussion was for some one to propose that it be a recommendation to the Committee to carry out to the best of their ability the repairs mentioned in the paragraph with reference to the pavilion.

Mr. MOLLISON thought the Committee, before taking upon themselves the expenditures of such a large sum, should have authority for doing so from the general body of the members. He proposed that a vote of thanks be accorded to Mr. Walford; that his kind offer be accepted; and that the other half of the amount of $137 be raised by subscription as suggested. As to the expenses in connection with the pavilion, he proposed that the members authorise the Committee to spend whatever they thought was necessary in that direction.

Mr. GIBBENS seconded.

Mr. MOLLISON said it was a large sum but he did not think the incoming Committee should be required to spend it on their own responsibility.

Mr. WALKINSHAW intimated that he had already received $20 towards the other half of the total of $137 from Mr. Hannen.—(Applause.)

The motion of Mr. MOLLISON was then put to the meeting and carried unanimously.

The scrutineers (Messrs. RICKETT and HENSON) not yet having finished their work,

The CHAIRMAN mentioned that the amount still required was $48.92, and invited subscriptions.

Mr. WALKINSHAW said as the members had done him the honour of reelecting him Vice-President and Captain of Cricket he would like to say a few words on the subject of cricket. It was remarked the other day to him that the second eleven did not get as much cricket as they ought to, and the suggestion he had now to offer for the consideration of the incoming Committee to work on was that if some gentlemen would be willing to get up matches among the younger members of the Club and those who were not able to play in what he might be allowed to call the better Cricket Matches, he would be quite willing to lend what aid he could. But he could not undertake to get up both a first and a second cricket

Digitized by Google

eleven. If any one therefore would offer some suggestion as to the best way of getting it done, he would be most happy to assist in carrying it out, so as to give everybody a chance of playing cricket as much as possible. The cricket season, as would be seen, had been most successful, and what they wanted now was to try to get some of the younger members to come forward, and help the other cricketers who now represented Yokohama. If the matter could be worked properly there was no reason why they should not greatly improve their cricket, and so be able to give a good account of themselves wherever they went. For they must remember that they always played best on their own ground, and that though they had beaten Kobe here they must look forward to going down to Kobe as the Kobe team had come up here. They could not always hope to have the best team, and for that reason they ought to try and improve their cricket.—(Applause.)

Mr. WALFORD said as regarded the extension of the pavilion and the laying on of the water, of which Mr. Walkinshaw had spoken, he must in the first place express his gratitude for the vote of thanks they had been kind enough to pass in reference to him. He had been much impressed by the fact that for the last two years this question of water had been before them. They had had great demands on the funds of the Club during that period, and the Committee had thought it undesirable to burden the Club with the expense of laying on the water at this time. As the members knew they had to spend a large sum in repairs, and it seemed to him that while they were at the pavilion they might go a little further and do a little more. He went down to the pavilion and looked at it, and Mr. Walkinshaw kindly came down a little later, and together they made out that they could extend the room very much by knocking down the partitions between the pavilion and the bathrooms and also by putting seats along the window side, of the pavilion, taking down the present boxes and replacing them with seats provided with lockers underneath and hinges on the top. In addition to that they would have pegs along the wall so that the space for hanging clothes would be really greater than before. They would thus have seats and lockers where now they had only a few odd chairs. It must be conceded that they had not enough room in the pavilion at present, and in addition they had no proper place to wash in. He was sure they would all appreciate an extension which would give them the means of making themselves cleaner than before. It seemed to him, especially at this time, that the Club funds were not in a condition to meet this extra demand, seeing that they had repairs to carry out, and it also seemed to him a good time to get in the water for if they did not do so now it might be two or three years before they could. He felt further that instead of depending on the Club funds they should depend on voluntary subscriptions.—(Applause.)

It was announced that the ballot for the Committee had resulted in the election of Messrs W.D.S. Edwards, K. F. Crawford, A .B. Walford, W. L. Merriman, H. C. Litchfield, E. B. S. Edwards, and J. P. Mollison.—(Applause.)

Mr. W. D. S. EDWARDS proposed that voluntary subscription lists should be sent round, so that all the members should have a chance of contributing to these repairs, and that thus the Club should not be burdened by debt at the end of the year. If they did so he thought $200 would be raised without any difficulty, even if members only gave $1 or $2. He therefore proposed that the secretary be instructed to send round a voluntary subscription list towards the expense of altering the pavilion and also to meet the other expense of laying on the water. In connection with the accounts, they had another item to take into consideration, namely the cost of the water, and it was therefore all the more necessary that such a list as he had mentioned should be sent round. Moreover, there was the expense of keeping up the ground, especially the new piece in the centre which required a great deal of rolling, cutting, and weeding, that each year during which he had been on the committee seemed to increase rather than decrease. Taking everything into consideration, he thought the idea he suggested would not only be acceptable to the members but would also be the means of bringing the Club out right at the end of the year. —(Applause.)

Mr. MOLLISON seconded.

The CHAIRMAN said it was to be observed that if Mr. Mollison's first proposition were carried out there would be an estimated amount beyond which they would not require subscriptions. Then would come the difficulty as to what they were to do with the extra subscriptions. They would have to be rejected altogether, or there would have to be returned to all the subscribers an amount *pro rata* of their subscriptions. Mr. Edwards' motion would carry them out of that difficulty by appropriating any surplus of subscriptions towards the expense the Club might have to incur. In that view he thought it might be advantageous to pass it.

The motion being put was agreed to, and the proceedings, after a vote of thanks to the President on the motion of Mr. BALFOUR, were brought to a close.

## *RURAL LIFE IN EAST ABERDEENSHIRE.—V.*

Although the corn is cut, much has yet to be done before the farmer is prepared for winter. The corn, after standing in *stacks* for ten days, more or less, according to the weather, has to be *led* or carried. If the weather is favourable, this operation is conducted with all speed: often indeed, *leading* is continued all through a moonlight night, for it will not do to risk an autumn storm and deluge of rain upon the unprotected sheaves.

While one party is in the field loading the carts and bringing them in, another is stationed in the corn-yard, building the sheaves in huge ricks, which, before all is done, have to be thickly thatched with coarse grass, rushes or straw, which is securely tied down with a cunning network of straw rope, the manufacture of which has employed the servants on rainy days during the harvest.

Digging up the potatoes, and storing them in pits is the last work of the harvest hands. When that has been done, and the corn-yard made neat and tidy as a new pin, that farm is said to have "*got winter*." Sometimes the *meal and ale* supper is postponed until this time; sometimes a second feast takes place. Now it is winter indeed; although, after violent October storms, November occasionally sets in mild and damp, or gives us a few brief, bright days of St. Martin's summer. In the garden may yet be found some late annuals and the hardy Michaelmas daisy. Only a day or two ago forgotten gooseberries were hanging on the leafless bushes, and a diligent search might have been rewarded by a handful of belated strawberries. But now it is time to be thinking of Halloween. The celebrations of this time-honoured festival are so well and widely known that it is not necessary to say much about them here. The gathering of sticks for the *Hallow fire* was begun days and weeks before the longed for night arrived. The bigger the bonfire could be made the better. As soon as it was dusk the impatience of children could no longer be restrained, and out we went. There was a delicious feeling of doing something out of the way and almost wicked, when wrapped up warmly, we took our way in the darkness over ploughed fields and stubble to the pile of brushwood which loomed large and myterious in the gloom. A panful of burned peat soon set the wood in a blaze; then what clapping of hands and shouting; what rushing through the flames by adventurous spirits!; what roasting of potatoes and onions in the ashes! It must be confessed that one's face got roasted too, while one's back was shivering.

Leaving the embers still all aglow, the garden was next visited in order that the *custocs* might be pulled. *Custocs* are the cabbage or kail stalks and roots still left in the ground after the heads have been cut for domestic use, but stocks or plants of growing kail may also be taken. To the cabbage bed then we all stumble through the darkness, possibly encountering on our way the fate of the man of Thessaly who fell into a gooseberry bush and scratched out both his eyes. Each one pulls up a *custoc* at random and bears it to the house in triumph. If the stem is long and straight and handsome, so will your future husband or wife be, if poor, short and crooked, then no such prize awaits you in the matrimonial market. If much earth clings to the roots it is the sign of wealth, if the reverse, then poverty will be your portion.

Once more in the house dipping for apples, burning nuts, winding the blue clue, sowing hempseed, each and all of the old customs were remembered and practised. One, in particular used to make my blood run cold even to think of. A girl, if any could be found brave enough, must go alone to a stream where three lairds' lands met, dip her sleeve in the running water, and, on her return, hang the garment to dry before the fire. She must then retire for the night, and at midnight, when all was still, she would see the form of her lover, who was to be, come and turn the sleeve. It so happened that at the end of one of our fields, a little stream did, in effect, separate the lands of three different lairds, but though such a rare opportunity was ready to hand, nobody, so far as I remember, was ever found with strong enough nerves to put the spell to the test.

It may be thought that I have been guilty of na anachronism in talking of Halloween as coming in November: but it must be remembered that old style was, and still is kept in most remote country places.

This is Hallow even,
The mown hallowday;
Nine nichts to Martinmas
Will soon wear away.

is the rhyme sung by discontented servants, longing for the term, which may bring them a change of place; although *flitting* at Martinmas is not so common as at Whitsunday. Martinmas was the time when a good fat bullock was killed and salted for winter use. Although the practice is almost given up at the present day, the memory of the custom is preserved in the word *mort*, which means a fine beast, ready for the butcher's knife. Boiling, roasting, salting, sausage-making was the order of the day. Meal puddings were sausages stuffed with oat meal and finely chopped suet, seasoned with pepper, salt, and onions. The puddings were all made at one time, and boiled in a huge pot, care being taken to prevent the skin from bursting, as the contents swelled, by judicious pricking with a long darning-needle. Hence the proverb applied to a procrastinating fellow, "Ye never prick till the pudding runs out!" The sausages or meal puddings once cooked and cold were place in the meal *girnal*, or huge bin, containing the oatmeal for daily use. There they were ready at a moment's notice, only requiring to be reboiled for a few minutes, or broiled over a clear fire, to form a most excellent and savoury dish. These were sometimes called *white puddings*, to distinguish them from others, which were called *black puddings*, and of which bullocks' blood was a principal ingredient. But these were never made, much less eaten in our house.

It fell about a Mart'mas time,
And a gay time it was then, O!
When our gudewife had puddings to mak,'
And she boiled them in the pan, O!
* * * * * *
And first they ate the white puddings
And then they ate the black, O!
Tho' muckle thought the gude wife to hersel',
Yet ne'er a word she spak' O!

So runs a funny old song which I often heard as a child.

Close upon Martinmas follows the Christmas season, but New Christmas as they call the twenty-fifth of December is little noticed, no religious service being observed on that day except among the Episcopalians, and social festivities being, for the most part, postponed until the New Year, or *Auld Yule*, that is our Twelfth Day, the sixth of January.

To be sure, from the lairds' houses came presents of mince pies and hothouse grapes; and to the lairds' houses one was invited to Christmas dinner, where the traditional roast beef and plum pudding appeared, and where there were snapdragon, and games and dancing. But such things were only for the few. The general way of keeping Yule at the cottages and farm houses was by sitting up all night on the sixth of January, and playing "Catch the Ten" a modified kind of whist, in which the ten plays an important part. This varied by "Old maid" or the more boisterous game of "Keep" would go on the livelong night. At one or two o'clock in the morning *sowens* and cheese and ale were partaken of.

Drinking *sowens* is a kind of gruel made from the starchy sediment obtained by steeping the inner husks of the oats in water for several days, until it becames slightly sour. This sweetened with sugar or treacle and softened with a bit of butter, makes a pleasant and very wholesome drink. Boiled *sowens* is compounded of the same ingredients, but boiled until it becomes of the consistency of *blanc mange*. It is highly recommended by the faculty as a light nourishing diet for invalids and children, and is a favourite supper dish in every Scotch farm house, but of course one would never expect an Englishman to like it.

The last merry-making of the winter season is *Fosterns E'en* or Shrove Tuesday. Curious that its observance should still be preserved among the Presbyterians where neither fasting in Lent, nor feasting at Easter ever held a place. Beef "brose" is served at the mid day meal, and pancakes of course appear on every table. The making of the pancakes, or "sauty bannock" as they are called, is the great fun of the evening. They are made of oatmeal, milk, and eggs, a handful of snow, which can generally be found but too easily, and a good pinch of salt, from which the name "sauty" bannocks. I must confess they seem to me to bear more resemblance to Lenten than to Carnival fare. The last bannock is made extra thick and large, and a ring is hidden in the mess before it is poured on the hot iron plate or *gridle*, which hangs by a hook and iron chain over the peat fire.

The member of the household chosen to "fire"

Digitized by Google

the last bannock must perform her task in silence, or the spell is broken, and I know not what dire consequence may follow. All sorts of tricks and teasings are resorted to in order to irritate or surprise her into speech, but she is generally equal to the occasion. The merry-making finishes up with a game of cards or a dance.

I might tell of weddings, christenings, funerals, each with its own special customs; of the parish school; of the well-known and ever welcome fish-wife; of the better-known but not so welcome beggar-man and beggar-wife; of the national dress and national music, and many another link in the chain of old memories. Let it suffice to set down a few recollections of the fish-wife, and the "caird," or beggar. Before the opening of railways in our district the fish-wives would tramp from fourteen to sixteen miles in the early morning, and arrive at the village by breakfast time. From Cairubulg and Inverrallochy they mostly came, five or six in a company, all dressed alike in short blue cloth skirts, white "mutches" and plaids of a small blue and black check. The heavy "Creels" on their backs contained many pairs of fresh and fellow or smoked haddocks, red and grey cod, turbot, soles, skate and other kinds of fish. It was marvellous to see the speed with which the women got over the ground with quick short steps, known as "the fishers trot." Arrived at the village, the band would separate, each one having favourite customers, and houses where they were well known, and received almost as friends. The price of a pair of haddocks might be threepence, or a "pickle" meal. At the farm houses, indeed, money seldom appeared in the bargain, meal or potatoes, butter, or a bottle of milk did duty instead of coin, so that the poor fish-wife often went home more heavily laden than she set out.

These fisher folks of the east coast are a distinct race, differing in appearance, manners, and speech from their inland neighbours. They marry among themselves, and indeed, the variety of names seems as limited as in the case of *Dandy Dinmont's* celebrated terriers. I can remember an *auld* Annie Buchan, and a *young* Annie Buchan; a *muckle* Annie Buchan, and a *little* Annie Buchan; a *bonnie* Annie Buchan, and an *ill-faured* Annie Buchan.

In the herring season, July and August, the fish-wives never appeared: they were too busy at home mending and drying nets, even if they were not engaged by curers as "gutters" and "packers."

For herring we had to depend on the "cadger," a stranger in the district, and of the town tramp order. He passed every day with his little green cart, and wretched looking white pony. Half a mile off one could hear his cry of *Herrin'! Herrin'!* Then every wife rushed out with her dish in her hand, and a silver fourpence between her teeth, both hands were needed to "wale" or choose the fourteen fine fish which formed the cadger's dozen.

Hardly a day passed that two or three beggars did not come to the door. As a rule, money was not given, but if bread or meal would be accepted, the "puir folk" were never sent empty away. Most of them carried bags or "pokss" wherein to store the meal thus obtained, some of which they would use as brose or porridge, but most of which would be sold in the towns as food for poultry, and whiskey bought with the proceeds.

There was Nairn "Fimmie," the terror of our childhood, in his patched "muckle" coat and battered broad bonnet. He had a hideously protruding under lip, and a voice that might have suited the Giant *Blunderbore*. Whisky, and whisky alone was his object in life, but, as he never got any at our house he used to depart grumbling with his "pickle" meal, which he required some persuasion to take. He might have succeeded better if he had possessed the insinuating manners of another Highlandman who appeared one day, and after many compliments, whispered his request for a "tumblefull" of spirits, he having lately partaken of "an icatious drink o'could wather" from the effects of which unaccustomed tipple he was suffering.

Then there was "Thumll Ra" or the "Bearby man," whose real name was McKenzie, a splendid looking old man, with a snow-white beard falling over his breast. He was no beggar, however, but a licensed hawker. The contents of his boxes were chiefly cheap trinkets, eagerly bought by the servant girls, or by the men as presents for their sweethearts. But now and then a really quaint and handsome silver ornament might be picked up from him for a trifle. He too, had an enormous great coat, patched with every colour under the sun. He would lay it down on the kitchen floor while the bargaining went on, and there it was guarded faithfully by his little terrier, which rejoiced in the lengthy and inappropriate name of Jennie Mill Davidson, Jennie growled and showed her teeth in such an alarming manner if anyone but her master came near, that a widely spread belief prevailed that the "muckle" coat was heavy with treasure, quilted in between the patches.

"Peter the Sweep," with his two scampish grandsons and elfish daughter "Johan" formed a most undesirable family; still they were never refused quarters in the barn, or a bowl of porridge for their supper.

"Tipperary" was a dwarf with an unlimited capacity for whisky, and with such a wicked tongue that the children were banished from the kitchen on her approach. These are but two or three among the best remembered. Poor old folks! Their place knows them no more.

On a recent visit to Aberdeenshire one was met by strange faces at every turn; the children were middle-aged men and women, the old people were gone. Change had been busy in many ways; the open hearth was replaced by a brand-new American kitchener: the old well was gone, filled up, and the surrounding common ploughed and enclosed as part of the new Cemetery. The orchis, hairbell, and forget-me-not, the thousand wild flowers that delighted our childhood, where are they? Yes, the dear old well was gone, and there was a pump in the back-kitchen.

(THE END.)

## *LETTER FROM SAN FRANCISCO.*

(FROM OUR SPECIAL CORRESPONDENT.)

San Francisco, February 5th.

In my last, I chronicled the death of a King. I have now to report the death of a Cabinet officer, William Windom, Secretary of the Treasury. The papers are full of biographies of the late Secretary, in which the various public offices he filled are duly chronicled, and the usual eulogies on his character pronounced. The fact is that Mr. Windom was a type of what is known as a smart man. He was good tempered, genial, affable with every body; could see the point in a discussion as quick as the next man; and was adroit in the manipulation of politicians. But among those who knew him personally he passed for a shrewd and unscrupulous speculator, who was never without a few shares of stock in some wild scheme which he was willing to part with to a friend just to oblige him, and who thoroughly appreciated the large part which boodle plays in the modern world.

It is given out at Washington that no further attempt will be made to pass the Force Bill. Its parent, Senator Hoar, has delivered its obituary, and has informed the world that several senators who voted against the bill had given him their written promise to support it. That is quite likely; people often change their minds when they see that it would be dangerous to adhere to their original intentions. However this may be, the attempt to introduce federal bayonets at state elections, and its failure, will not rehabilitate the Republicans in public esteam.

No progress is being made with other party measures. An effort will be made to pass the bill granting subsidies to ocean steamers, with what result cannot now be predicted. The Apportionment Bill will be passed; its details have not been published; but it will not be a partisan measure, and will probably be fair. Under it a member of congress will represent more individuals than a member of any other legislative body in the world.

In view of the transfer of power next month from the Republican to the Democratic party, your readers may not object to read the following statement of the dividing line between the two parties, as given by Hon. Roger Q. Mills of Texas:—

The Democratic party has always been the strongest and retained the strongest hold on the confidence of the country when it was strictly Democratic. It has always been weakest when by time-serving politicians it has been led off after political heresies.

The country sustained the Democratic party when it was Democratic, because it enjoyed the highest prosperity under the laws enacted and administered in accordance with its principles, and it has been ready at all times and is now ready to give its support to all measures which are in harmony with these principles. The creed of the Democrat is self-government of the person, self-government of the subordinate locality, country, city or town, self-government of State and self-government of the United States. In all matters of doubt the constitutions and the laws of the nation and State should be construed in favour of the liberty of the citizen and against the surrender of power to the Government.

Every Democrat, if he is one from conviction, believes that the country will attain its highest prosperity and the people their highest possible liberty of thought and action from the smallest possible interference by the Government which is consistent with the preservation of order in the State. Guided by these principles, Democrats will always oppose all Federal legislation which proposes to usurp power rightfully belonging to State and local jurisdictions and all State or local interference with the individual right of a citizen.

The Federal party in its day held and the Republican party now holds precisely the opposite of these views. The Republican does not believe the people capable of self-government. He would probably not say it in so many words, but his party measures are in accord with that faith. He believes that the capacity to govern belongs to a class, and while the masses have the ballot, they may be governed in the interest of classes by discipline. A Republican believes in special privileges; a Democrat in equal rights.

The Prime Minister of Canada has dissolved Parliament in order to give the Canadian people an opportunity of electing a new Parliament which shall be fresh from the people, and shall be possessed of their views on commercial relations with the United States. A portion of the people of Canada are openly in favour of annexation; another portion seek reciprocity with the United States, and a third party opposes all legislation which might have the effect of drawing the two countries together. The Prime Minister, Sir John A. McDonald, who is a very old man, imbued with the prejudices of the past, should be classed with the last, though he would probably resent the imputation. But his following is not large. Nor is the annexation party strong enough to warrant a belief that it will attain its objects, at any rate in our time. Reciprocity would suit the bulk of the Canadians very well, and it would meet the views of most of the Democrats in this country; but it will probably have to wait until Mr. Harrison makes way for a Democratic President.

Preparations for the World's Fair at Chicago are progressing vigorously. The Directors have discovered that the buildings, &c., will cost not ten millions, which was the original estimate, but fifteen, and they are busily engaged in trying to raise the money. Any number of ingenious people are suggesting new features for the Fair. A Mr. Pennington has got a dirigeable balloon already on the ground, and proposes to give a series of ascents, on which the aëronauts will travel where they will. From the descriptions of his airship and his plans, it does not appear that Mr. Pennington has improved upon the aërostats with which M.M. Renard and Krebs made their ascents in 1884. Mr. William Steinway, of New York, the pianoforte manufacturer, proposes that there shall be a continuous musical festival during the Fair. He wants to collect all the eminent musicians in the world, and supply them with a trained orchestra, so that they shall discourse the finest music from morning till night. Each musician would give the music of his own country. Thus for a week there would be an English musical fête, then for a week an Italian fête, then a German fête, then a French, Spanish, and so on. Subscriptions are being taken for the purpose, and it is possible that the idea may be carried out. People are already beginning to believe that the Fair will be a success. It is observed that the Paris exposition, which cost 41,500,000 francs, realised a profit of 8,000,000 francs, and it is said that we ought to do as well.

A queer old woman named Catherine McKnight hanged herself in Chicago last week. She was the wife of a Union soldier during the war, and when he was made prisoner, she became a Union spy. Disguised in man's clothes, she made her way to the prison where her husband was confined, changed clothes with him, and enabled him to escape—but he was unfortunately shot in the act. She was caught, and sentenced to death, but being remarkably good looking, she contrived to get away without being shot. Her adventure engendered in her an extraordinary fondness for lawless adventurers. After the war, she married a notorious convict named Daley; him she lost owing to his being caught in the act of burglarizing a house. Then she married another convict named Matthews, and again she lost him, owing to his sentence to prison for life. Faithful to the breed, she took a fourth husband in the shape of a forger, who was shot dead by a policeman in New Orleans. Her fifth and last husband is not known to have been a convict. But she could not get along with him, and she divorced him after two years of matrimony. For eight years she lived unmarried; but she probably found single life tedious, for after putting her papers in order, she hanged herself in her own house, and has gone to that world where we may assume that there are neither divorces nor convicts.

Some time next month, a "committee of two hundred," representing the Spanish-American nations and the United States will meet in Washington to confer on common interests. Simultaneously a delegation from Canada will repair to the same city to consult with Mr. Blaine on commercial relations. Thus, for the first time in history, representatives of the two Americas from the Arctic Ocean to the Straits of Magellan will meet in council. The Committee of two hundred is to organize as a real Parliament, or Con-

Digitized by Google

gress, with two houses, and a set of Parliamentary rules framed on Cushing's manual. It will consider all questions which concern the material development of the continent, and likewise all questions which have a bearing on the spread of free institutions. The power of the body will be limited; it will not be clothed with authority to enforce its views; but as an advisory commission, its recommendations are likely to be received with respect throughout the continent. The value of those recommendations will depend on the quality of the men who take the lead in the conduct of its business.

The medical faculty is engaged in testing Dr. Koch's lymph at the hospitals. Thus far no instance of cure has been reported; but it is perhaps premature to form an opinion on the efficiency of the German remedy. Meanwhile, devout folks have placed their faith not on lymph, but on the intercession of St. Blaise, who, as everybody knows, was entrusted by the Almighty, 1,600 years ago, with power to cure diseases of the respiratory system. His festival was kept last week, and the church of St. Ignatius, where prayers could be addressed to him with a reasonable certainty of reaching their destination, was crowded from dawn to dusk with sufferers from bronchitis and consumption. There were swarms of children, who seemed to intend to cough their heads off; large numbers of emaciated men and women; and many grey-haired members of both sexes, who had crawled to the sacred edifice to beseech the saint to relieve their sufferings. The steps at the rails of the altar were thronged all day long. At intervals, a bell rang, and a priest in white surplice and red stole came forward to slow music, stood in front of a cross made of flickering candles, and muttered to each kneeling supplicant "May God deliver thee from all evils of the throat, through the intercession of St. Blaise." The invocation over, the invalids struggled to their feet, and went home in high hope. St. Blaise's famous operation on the throat of a boy in which a fish bone had stuck is of course familiar to your readers. The saint dissolved the bone with a short but vigorous prayer, and the boy was cured. He (the saint) had shown in his own case his short and easy way of dealing with bodily ailments. He was put on the rack, and his flesh torn from his bones with iron pincers; but when the tortures were over, he went about his business as if nothing had happened. Then the heathen persecutors threw him into a lake to drown, but he walked the water as if it had been an asphalt pavement. At last they cut his head off, and hid it, where he could not find it. And this finished him. To such a personage, the cure of a case of bronchitis must be child's play.

## *LETTER FROM DENVER.*

(From our Special Correspondent.)

Denver, Colo., January 21st.

Distress has grown acute upon the eastern edges of Colorado. Farmers were attracted thither by lying prophets who told of an annually advancing rain belt. Man could conquer nature by faith. All he had to do was to plant his seed, watch for rain and build a house. Claims were taken up, townships formed, banks established, land courts opened, mills erected. But the rain did not come, means of irrigation there were almost none, and the history of the whole undertaking has been sorrowful enough. All over these western plains and prairies, for several years, farming has been conducted at a loss for lack of rain. There might have been no Indian trouble if Dakota had but given them crops for their tilling and seed-sowing. The "untutored mind" could find but faint traces of God in barren harvest fields; for broken treaties with their white brother were too manifestly the efficient cause of their dependence on Dakota's bounty. They were starving. General Miles became a veritable Messiah, clearing away swindling agents and offering a feast of fat things to hungry bucks and squaws. In the future let us hope that so much of civil service reform as is needed to keep faith with these remnants of great nations will be effected. One would naturally suppose that this country too, is large enough for both pale face and redskin, and that our Government is rich enough to keep faith with such men as Red Cloud and Sitting Bull. Certainly if the conscience of the American people had its way in the Indian difficulty there would be no difficulty. The Indians would be paid well and honourably in the best land the continent affords, and would soon need no "rations." All these broad Western lands would bring forth bountifully if they could but have water. To depend on a mythical "rain belt" is impossible. Up the canons and in the "parks" each summer gives a fair amount of wet, but even there close to the foothills, farmers do not depend upon the rainfall. Irrigation is the one essential. But when irrigation is possible the results are astonishing. Land that a few years ago produced nothing but buffalo grass, brown for eleven months in every year, patches of cactus and the uninteresting sage-brush, now bears huge potatoes, oats, corn, and wheat, far above the average in quality and quantity. The prices of this produce are always good. Potatoes are now selling at $2 per hundred pounds, and a vegetable infinitely inferior to the once despised *Satsuma-imo*, a cadaverous looking root, long and scraggy, is sold to the consumer at the modest price of a nickel a pound. These are the average prices. A man from Tennessee says "Down in my country they feed them to the pigs, sir!"—speaking not of prices but of sweet-potatoes.

In a letter last November I mentioned that a split had taken place in local political ranks. The Republican majority was rent in twain. A natural sequel was considerable Democratic rejoicing and a good deal of Democratic success in the elections. Now the contest has been transferred to the legislative chambers, the speaker of the House of Representatives has been ejected from office, blood has been boiling on both sides, notorious "toughs" from the saloons and slums have been in the pay of "the gang" or the "anti-gang" factions, nominally as deputy sheriffs, really to overawe the other side, and at last two policemen have been shot down by "deputy sheriffs," and one of them has had the misfortune to die before he saw his assailant wriggle out of the clutches of the law. The wriggling is an expensive process, so that a man guilty of the crime of poverty as well as of murder is now and then sacrificed at the altar of abstract justice.

But it is not only here that the sweets of office tempt men to the resolute policy of the revolver. Only a short time ago Oklahoma was torn asunder by the rival claims of Guthrie and Kingfisher for the privilege of capital. Oklahoma was to be a paradise. That semi-nomadic population that dwells upon the borders of civilization, was being poured into the new territory. It is now being poured back again, and some of it will be happy if it can get to Illinois. Hardly anywhere else in the world can there be found such classes of frontier agriculturalists as in this West. They seem perennially dissatisfied. There is always an El Dorado in front awaiting their arrival. The sun shines more helpfully anywhere else than where they are now located. Like poor Jo, they are bound to move on. They do not seem to desire wealth so much as new surroundings. They will lay hold of the most unpromising claim, make it their own by a few years' residence and scratching, then get away to fresh fields and pastures new. Those on the plains are now "down on the hard-pan," "right on bed rock, sure." Denver is sending a few of them some food, seed, and clothes.

We await with eagerness the issue of the present silver muddle. The West will be content with nothing less than free coinage. If we had power to take our bars of silver to the local mint and bring away white dollars in exchange, less only cost of minting, we would soon be leading the waters of the Rockies to every bit of available farm land in the State, storing the winter waste for the summer want, loaning money to farmers at easy rates, and building up the West on the broadest basis. Free coinage will have to come. If no one else will give it, all Western parties will be focussed on a single man, pledged to the cause of silver. Senator Stanford seems head and shoulders above other honest politicians, and would command the endorsement of an overwhelming majority. He will champion that people against the money lenders, wire pulling statesmen and party shams. Hardly any other man could now arouse the enthusiasm that the name of Stanford awakes. Such a man entering the lists at once as silver knight and farmers' champion would dazzle every eye.

In speaking of Oklahoma I omitted to mention a curious fact. Where white men cannot live negroes from Carolina are settling in considerable numbers. Several hundred families are now on their way, held by an organization of their own, to this western home. No one doubts that, if they can make a living of it, this is a healthy movement. Especially helpful will be the fact that the younger generation of coloured people will forget or never learn the word "slavery."

We are having a particularly cold and snowy winter. Last year was bad enough in this respect, but this goes beyond the record yet made in snowfall.

It is curious to watch the statements made in the papers concerning Irish affairs. Parnellism and anti-Parnellism have each a few followers, but no one seems able to decide the rival claims. The newspaper toadies are in a quandary. They are afraid to utter anti-Parnell blasts lest they should be followed to-morrow by Parnellite victories; and McCarthy is a name for pressmen to tremble at. And so, since the *deus ex machinâ*, the populace, is paralysed, waiting to know what to think, the papers are content to publish telegrams without note or comment.

We live to learn! I found the other day at a meeting of good people, where a letter from Japan was read, that the curious fetish in Asakusa temple, a type of Jizo Sama I believe, is the Goddess of Mercy, and that it is the fruitful cause of sore eyes among the Japanese people. By rubbing this stone image and then passing their hand over their own face they convey virus which induces ophthalmia! Henceforth we have visions of forty million people making periodical pilgrimages to Asakusa and rubbing what Miss Bird or some other author called Bimzuru Sama.

## *IN THE U.S. CONSULAR-GENERAL COURT.*

Before G. H. Scidmore, Esq., Vice-Consul-General, and Messrs. J. K. Goodrich and Geo. E. Rice, Associates.—Monday, March 2nd, 1891.

### DOERING V. PRICE.

An action, brought by J. G. Doering against Mrs. Bonnie Price, No. 88, Yokohama, was heard to-day.

Mr. Uchiyama Rossetsu appeared for the plaintiff, and the defendant appeared in person.

The Associates having been sworn,

Mr. Uchiyama Rossetsu asked whether the defendant had complied with the requirement of his notice of Friday to produce a certain agreement and any other documents bearing on the case.

The agreement and other papers were produced.

Mr. Uchiyama went on to say that the plaintiff had sold to the defendant the houses and outhouses at No. 88, with the residue of the lease of six years still to run. Before the actual agreement was made there were a great many interviews about the price at which the house was to be sold, Mr. Doering in the beginning asking $2,500 which, however, the defendant was not prepared to give. After a great deal of haggling and bargaining, it was finally agreed that in consideration of the defendant paying $1,500 in cash; further in consideration of her giving a promissory note for $500, making a total of $2,000; and further in consideration of the defendant allowing plaintiff the free use of part of the godown valued at about $15, during the period of non-payment of the promissory note, the sale should be made. Further, if the defendant chose to pay the amount of the promissory note before the expiry of six months, then the plaintiff would be obliged to pay godown rent or give up the godown. Mr. Uchiyama here read the petition and answer. In the petition the plaintiff set forth that on or about the 31st day of May, 1890, he sold to the defendant the dwelling house and buildings situated on Lot No. 88B Yokohama, and transferred the same to her together with the lease of the lot of land. In paragraph 3 it was stated that the larger portion of the purchase money for the premises was then and there paid to the plaintiff by the defendant, that a balance of $500 remained due and owing by the defendant. As security for the payment of the balance of $500 the defendant gave plaintiff her promissory note in the following terms:—

"I promise to pay to J. G. Doering, Yokohama, *on* or before and *not later than Nov. 31st, 1890*, the sum of mex. $500 (mex. dollars five hundred) and interest thereon at rate of 10 per cent. per annum for value received (being balance due him on property No. 88B Creekside.)

"(Sd.) B. Price,
"Witness Uchiyama Rossetsu,
"No. 32 Yokohama.

"Yokohama, May 31st, 1890."

The petition went on to say that the sum of $500 and interest still remains due and owing to the plaintiff and all his efforts to induce the defendant to pay it or any part of it have been fruitless.

In her answer the defendant admitted the first four paragraphs of the petition and as to paragraph 5 she said—I have always been and am now willing to pay plaintiff the sum of $500 mexican and the sum of $25 mexican due on promissory note due for six months interest from 1st June till 30th November 1890, as per promissory note making a total sum of $525 less the sum of $232.50 mexican due to me from the above plaintiff for rent of a godown on Lot No. 88, Yokohama, from the 1st of June till the 31st December, 1890,

Digitized by Google

and a further sum of $40 mexican, being one month's rent of dwelling house and out houses on Lot No. 88, collected from Miss Grant by the plaintiff on my account, making a total sum of $242,50 mex. due to me by the aforesaid plaintiff." On this calculation the answer showed the defendant to be indebted to the plaintiff in the sum of $282.50 (the promissory note, principal and interest being set at $525) which sum the defendant deposited with the Court.

Mr. Uchiyama proceeded to say that the point at issue was therefore to prove or disprove the correctness of the counter claim. First he pointed out that the defendant had calculated her interest up to the end of November, instead of reckoning it to date. She had had the use of the money; the plaintiff had been kept out of it till now. As to the counter claim, he repeated the conditions under which the sale was effected, remarking that the tenancy of a part of the godown was one of those conditions, Mr. Doering desiring to sell the premises, which were not desirable for a gentleman doing business in Yokohama. Had the defendant paid the promissory note on the date (30th November) stipulated the total amount that Mr. Doering would have received (including $15 per month as value of godown tenancy) was $2,090.

J. G. Doering, sworn, deponed—I am a German subject living at No. 109. I am a piano manufacturer. In May, 1890, I was the owner of the house No. 88B, Creekside. Previous to 30th May, 1890, the defendant made overtures to me to purchase the premises. I was naturally desirous to sell the premises, but the offer came from the other side. Early in the morning of May 31st I received a letter from Mr. Litchfield in which he informed me that Miss Everdale declined to purchase the lease of the lot No. 88, on the terms proposed, as there were only 6 years to run. She was willing to take over the lease at a reduced price or to negotiate for an early tenancy of the house if we could arrange on suitable terms. I replied that on the terms stated in that letter there was no chance whatever of coming to terms in regard to the matter. During that day the agreement was finally come to; cash $1,500, $500 to be paid afterwards, and the free use of the godown until the promissory note for $500 was paid. You were present when this agreement was handed to the defendant: It was ready, and had only to be copied before handing it over. You then read over and explained to the defendant every clause in the agreement. You pointed out to her that she was agreeing to give me free use of part of her godown during non-payment of the promissory note. The provision as to the keeping of the insurance papers, which gave to me the insurance policy in security for payment of the balance of the rent was excised at the defendant's request. I then at once received the amount of $1,500, and defendant's promissory note. I also handed her all the papers, including the insurance policy. Later on the same day, the defendant asked a proper indenture of the sale with a view to its registry. I think about the 4th or 5th of June a deed of sale was made out and signed. I have never had any payment in part or whole of this promissory note. I have received from Mr. Litchfield on behalf of Mrs. Price communications as to payment of godown rent. The letter of agreement that was handed to the defendant was as follows:—

May 31st, 1890.

Mrs. Bonnie Price (Ellendale),
Club Hotel, Yokohama.

Dear Madam,—I take great pleasure in stating, as verbally arranged, the terms under which the buildings on Lot No. 88, Creekside, Foreign Concession, Yokohama, as per lease of ground, consisting of a two-storied dwelling house, complete outhouses and godown, as it stands, will be sold and delivered to you.

The price including all gas fixtures and chandeliers as well as water service and taps is agreed upon $2,000 (Mex. dollars two thousand only) of which I am to receive a part payment in cash of $1,500 (fifteen hundred) the *balance* of $500 to be paid to me *on* or before and *not later* than the 31st of November, charging thereon interest at the rate of 10 per cent. per annum.

[For better securing to me the balance due you agree to leave in my hands and care the policy of insurance of said buildings, which will be transferred unto you by entry of agent the day the balance due me plus interest has been duly and truly paid me.]

The rent of premises for June will be collected by myself as due me, in consideration whereof I pay ground or lease rent due until June 30th; all other payments for water, gas supply, etc., will naturally fall to you.

You further agree to leave me the use of godown as hitherto without charge until balance due me has been settled, from then at a monthly rent to be agreed upon, the power of giving notice of leaving being on my side exclusively.

Yours faithfully,
(Signed.) J. G. Doering.

I had already paid $45 for three months' ground rent to the Kencho, and in consideration of that I stipulated to have the collection of the June rent. I received the following letter from Mr. Litchfield on 3rd July:—

"I shall be glad to hear from you if you are willing to continue the occupation of the portion of the godown on Lot No. 88, which has hitherto been occupied by you, and at what rent. It is desirable that this matter should be speedily placed on a settled basis so as to avoid further disputes." In reply to the above letter, I went myself to explain matters to Mr. Litchfield. I next received the following letter, dated August 11th:—

"Miss Price, the owner of the buildings on lot No. 88B, instructs me to request you to send me rent for the godown on part of that lot now occupied by you as per memo. below, viz—

| | |
|---|---|
| To rent of godown 1st June to 15th July at $40 per mo. | $60.00 |
| To rent of part of same godown from 15th July to 31st July, 1890, at $25 | 12.50 |
| | $72.50 |

I wrote in reply to the above on August 12th to Mr. Litchfeld:—

"Your note of yesterday to hand. I am sorry to say you are under quite a wrong impression in regard to me occupying a part of godown on Lot No. 88, Creekside; at least you must have been wrongly informed.

"My letter of May 31st to present owner says:—'You further agree to leave me use of godown as hitherto without charge until balance due me has been settled, from then at a monthly rent to be agreed upon, the power of giving notice of leaving being on my side exclusively.'

"It would strike a stranger as being unfair to have the right reserved me of occupying godown free of charge for six months and likewise charging 10 per cent. interest on balance due me as stated in promissory note, but this was done because I lowered my price considerably, and also by agreeing to wait six months for said balance, whereas cash would have been far more preferable to me.

"Regarding charges stated in yours of yesterday, I can only refer you or the owner to above extract from my letter, which was delivered to her before the purchase was concluded and transfer effected.

"It was further verbally agreed that if Miss Price wished to settle the balance of $500 before being due as stated in promissory note, she would only be charged interest to date at same rate, and that I from the last day of the month during which such payment was effected should naturally pay rent for the use of godown, provided such payment in full was made not later than the 20th day of the month, otherwise to enjoy the privilege of free use for another month.

"This will show you that I am not one cent indebted to the owner at present, and that your statements in yours of yesterday based upon her information are not only incorrect but also absurd.

"I trust this will serve you as a guidance, as I remember having called on you in answer to your note sent me on July 3rd, when I imparted to you all information needed in regard to future renting of godown from the present owner."

Ultimately I demanded payment of the promissory note on December 2nd, sending at the same time the other letter bearing the same date:—

"I beg to advise you herewith that the promissory note of $500 (dollars five hundred) handed me by you on purchase of the property No. 88, Creekside, was due on November 30th together with interest thereon for six months, in full $550 local currency, and unless I have received from you the above named sum by to-morrow, the 3rd inst. at noon I shall have recourse to cashing same through Consular assistance."

The second letter was:—

"According to our agreement handed to you (in presence of Mr. Uchiyama Rossetsu) on and dated May 31st I am entitled to enjoy the privilege of free use of godown on Lot No. 88, Creekside, until your promissory note on balance due me of same date and due November 30th has been duly settled.

"As this term has expired I shall be glad of your informing me how much monthly rental you ask for said godown."

In reply to these letters the defendant wrote on December 3rd:—

"In reply to your two notes of yesterday I have to inform you that I an ready to pay to you the sum of $500 as due on promissory note less the sum of $152.50 due by yourself to me, for rent of godown due up till 31st October as per bills presented to you by Mr. Woodruff, and the sum of $40, one month's rent of house on Lot 88, Creekside collected by you from Miss Grant, and the further sum of $50 as payment of rent on part of godown on Lot 88 for the months of November and December, 1890, making the total sum of $242.50 owing by you to myself; and I have further to state that your assertion as to an agreement allowing you to occupy the godown rent free is an attempt of *sharp practice on your part*, and I have further to refer you to my registered letter of date November 19th, 1890, notifying you to vacate the godown on the 31st December, 1890."

I subsequently received the following, dated December 17th, 1890:—"I beg to inform you that I am ready and willing to pay you the sum of $257.50 as payment of the sum of $500 owing to you by promissory note, less $242.50 owing by you to me for rent."

Finally the defendant wrote to me as follows on January 20th:—

"I beg to inform you that I have sold and transferred the lease and buildings on lot 88B, Foreign Settlement, Yokohama, to Mr. Alexander Clark of No. 88A, Yokohama, and that the aforesaid Mr. Alexander Clark will collect all rent due from the first day of January, 1891, from you for part of a godown rented and occupied by you on the said lot No. 88, Yokohama, at the rental of $25 per month."

I have not paid Mr. Clark anything since I received that notice. I left the premises about the 21st of last month. Mr. Clark claimed $25 a month from me, and I paid him more than that for leaving without proper notice:

To Mr. Scidmore—The ground-rent that I paid was $45 for three months, and I collected $40 for one month, June. I paid Mr. Clark $50 to settle the matter. He claimed $75 for rent up to the end of March, and took the claim to the German Consulate. Mr. Clark made me an offer that I should pay $50 in full and I accepted it. Mr. Woodruff presented to me the bills now shown me.

Cross-examination resumed—It was a mistake for me to claim $50 as interest on the promissory note; it should only have been 10 per cent. I received $40 rent from Miss Grant. I did not receive from Mr. Litchfield a notice about that.

The defendant deponed—I never knew anything about the agreement until I received my papers from Mr. Litchfield. He told me that Mr. Uchiyama had agreed to it. He told me he was very sorry about it. I knew nothing about, and had never seen, the agreement till I paid my bill to Mr. Litchfield on June 7th. I had an interview with Doering on 31st May. He never offered to let me have the property for $2,500. He told me the then tenant, Miss Grant, had no lease, but that he would let me have a lease. He said—"Why do you not buy the property?" and said the price was $2,000. I called to see Mr. Litchfield and found Mr. Uchiyama, who accompanied me to Mr. Doering's. Nothing was said as to who was to collect the rent for June. Not a word was said as to Mr. Doering occupying the godown till the promissory note was paid. On the way I specially asked that he should not mention the godown. I was shown the lease and asked Mr. Uchiyama to see that my interests were looked after, as I was going to Kobe. I asked some questions about the interest on the promissory note, and afterwards I went to the bank and got the money, $1,500, and went back and paid it, Mr. Doering and Mr. Uchiyama having everything ready. When I came to the Consulate Mr. Greathouse told me I must have a deed. I produce a regular deed signed and presented at the Consulate for record on 4th June. Mr. Litchfietd and Mr. Uchiyama told me the first agreement was not of any value. I did not agree to permit plaintiff to occupy the godown free till the promissory note was paid. I only saw the agreement on the 7th June, when it was handed to me among others by Mr. Litchfield.

Cross-examined—It was not at my request that the clause as to the insurance policy was struck out. I did not see the agreement on 31st May. I swear that I got it from Mr. Litchfield with the other papers. Nothing was said at the interview about the godown. Mr. Greathouse's reason for saying when I came here that a deed was necessary was that I had nothing but the lease of the ground.

Mr. Doering, recalled by the Court, deponed—Previons to my occupancy I do not know what rent was charged for the godown. Mr. Clark's first demand was for $75, and I compromised for $50 because I wished to have nothing to do with him. I calculated that if I had been paid the promissory note at the proper time I should have had to pay rent for the godown for December, January, and February; sooner than have anything to do with Mr. Clark further I compro-

Digitized by Google

mised the matter. I handed the money to him through the German Consulate.

Mr. Scidmore at this stage, in consideration that the defendant was undefended, decided to allow Mr. Clark, who was in Court, to cross-examine Mr. Doering on her behalf.

Plaintiff, to Mr. Clark—I paid you $50 rent for the godown, through the German Consulate. As far as I understand you claimed $75 for three months' rent. Afterwards you offered to take $50 and take over the godown and I accepted it. I first offered you the keys of the godown about 23rd February; and you finally accepted them on February 28th. The receipt that I got through the German Consulate was as follows, dated February 25th:—Received from J. G. Doering $50 as payment in full for my claim against him for rent of part of godown on No. 88, and I taking over the keys of godown."

Mr. Clark then entered the box to give evidence for the defendant.

Mr. Uchiyama objected to his evidence on the ground that Mr. Clark had stirred up all the strife, all the letters to the plaintiff from the defendant being in his writing. He had a spite against the plaintiff, and was known to have a spite against him, and if Counsel had known the question would arise he would have had witnesses to prove it. He objected to Mr. Clark's evidence being accepted as that of an expert as to the value of the godown.

Mr. Scidmore said he was not called as an expert.

Mr. Clark deponed that part of the godown was unoccupied, but two-thirds had been occupied since Saturday when witness received the keys from Mr. Doering. Witness knew nothing about the rent prior to his purchase of the property. He had not leased the godown out.

After hearing Mr. Uchiyama the Court reserved judgment.

---

THURSDAY March 5th 1891.

Judgment was given to-day in the above action. Mr. Scidmore read the judgment as follows:—

"Having heard and considered the pleadings, testimony, and arguments of the parties herein, it is hereby ordered and adjudged that said plaintiff have and recover from said defendant the sum of three hundred and ninety mexican dollars.

"It is further ordered and adjudged that each party to this action shall pay one half of the costs.

"G. H. SCIDMORE,
"Vice-Consul-General of the United States,
acting judicially.

We concur:

GEO. E. RICE,
J. K. GOODRICH, } Associates.

## *THE STRANDING OF THE "TOKYO MARU."*

### COURT OF ENQUIRY.

A court of enquiry was held at the Marine Bureau of the Communications Department in Tokyo on the 27th ult., with regard to the stranding of the *Tokio Maru* on 6th Dec. last.

Captain Yebiko presided, and the other members of the Court were Commander Squire, R.N., and Captain Allen of the *Meiji Maru*. Captain Tomioka and Captain Morimoto were present as Nautical Assessors, and Mr. Torii as Engineer Assessor.

The regulations under which the Court was held were read over by Captain Squire, being paragraph 2 of section 10.

Captain Drummond, cautioned, deponed—I joined the *Tokio Maru* about the 17th of November, 1889. I produce my certificate. The ship grounded on the morning of December 6th a few minutes to six o'clock, on the voyage from Oginohama to Yokohama. I left Oginohama about 5.40 on the morning of the 5th, with a full cargo and passengers—I do not remember how many. I sighted Inuboye Light about 7.15 p.m. the same day, one point on the starboard bow. When abeam it was bearing W. by N.¼ N., and by 4-point bearing distant 4¼ miles. I altered the course when the light was abeam to S. 37° W., the weather being then fine and clear, very little wind, with a heavy swell from the south. We had a slight current against us. The ship's speed was about 11½ knots. We sighted Noshima light at 3 in the morning of the 6th, it then bearing west, and passed it at 5.10. I was not on deck when we passed, having gone below at 4.10, when the light was bearing W.N.W., leaving the chief officer on deck. I gave him orders to steer W. by N. and to call me when Noshima light was abeam, my course being shaped to pass the light 2 miles distant. I show on the chart the ship's position at 5.10. I did not go on the bridge from 4.10 till two minutes before she struck the beach. There was no deviation, and my course was magnetic, the compass being true. I expected to be abeam of Noshima about 5 o'clock. Having altered the course and gone below, my reason for remaining below was that the chief officer did not call me as I had ordered him to do. I fell asleep. When I left the deck at 4.10 I left orders to be called off Noshima. I do not know what course was steered afterwards until I was awakened two minutes before the accident by the cries of fishermen. I at once went on deck, thinking we had run a fishing boat down, and, going on the bridge I asked the chief officer what was the matter. He replied "Nothing." I asked—"Where is Noshima light?" He said—"We have passed it." I then asked "How are you steering?" He replied, "N. by E. ½ E." At that moment I saw breakers ahead and ordered the helm to be put hard a starboard, and, finding the ship did not answer her helm, ordered the engines to be put full speed astern. Before half of her way could be taken off by turning the engines astern she struck, and in five or ten minutes she slewed broadside on to the beach, the sea then taking her on the beam. When I went on deck I saw nothing but a line of breakers across the bow; there was a slight mist or fog hanging over the land. The stars were clear overhead, and it was just break of day. No land could be seen. I had not told the officer on watch to alter the course. The statement I have just made about ordering the chief officer to call me off Noshima is entered in the ship's log; he altered the course on his own account. The log was written up immediately after the stranding of the ship by the chief officer, who was, as I have said, also officer of the watch. I considered that the chief officer was of sufficient experience as a chief officer. I did not think him qualified by sufficient experience of the coast to navigate the ship himself. I never allowed him to do so. I had not previous to this had any fault to find with him. After the ship stranded the passengers were landed in the ship's boats, that is all that were on the starboard, or shore side. No lives were lost. The port boats could not be lowered.

To Captain Squire—I have been in command on the coast of Japan for 21 years on the 1st of next June. During that time I have never had any accident to a ship under my command. This is the first time the chief officer has ever disobeyed orders. When I came on deck and the chief officer told me he had passed Noshima, the light was not in sight.

The evidence was then read over to the witness.

The following amended question was put—Why, knowing that Noshima Light was so close at hand, did you leave the deck and remain below?—I left the chief officer on deck with orders to call me, but he neglected to do so.

Henry E. Browning, cautioned, deponed—I joined the *Tokio Maru* in June last year. I hand in my certificate. We left Oginohama on December 5th. I do not know how many passengers we had. I do not know when we sighted Inuboye Light; it was not during my watch. I wish to correct that statement. I was on watch. We sighted the light about seven o'clock. I cannot recollect the bearing. (The log, it was pointed out, stated the light to be sighted at 7.15 p.m.) I do not recollect the bearing, but that given in the log is correct. When Noshima Light was sighted it was the second officer's watch and I was below. My watch was from 4 to 8. Noshima Light was passed during my watch, and it then bore N., distant 2¼ miles. The captain was not then on deck, having gone below about 4.10 or 4.15. The captain left orders with me to call him when we were up to or coming up to Noshima Light. I did not obey that order. I cannot give any reason for that. I am not able to give any reason. The captain gave me no order to alter the course. After we passed Noshima I did alter the course on my own account, at 5.30, the time in the log. I do not remember it myself. I altered the course because I found what I took then to be Susaki bearing N. by E. That was what guided me. It was about my fourth or fifth voyage between Oginohama and Yokohama. Off Noshima Light the weather was bright and clear, perhaps a slight haze over the land. After altering the course at 5.30 a thick fog came down, the wind being light about N.W., perhaps about 2 to 3 force. At 5.30 I altered the course to N.N.W. The fog shut out all objects except Melasaki, which I had taken for Susaki, and which was in sight all the time. I kept on until what I had taken for Susaki (Melasaki) was abeam, when I altered the course to N. by E. If the log says N. by E. ¼ E. that is the course that I altered to. My attention was then taken up by the fishing boats. The captain then came up, awakened by their cries, and he saw a light line ahead which I took for a break in the fog, but which proved to be breakers. I had not noticed it before the captain did. He pointed it out me. The helm was then put hard a starboard, and the engines put astern, but it was too late and the ship took the ground shortly afterwards. I altered the course without referring to the chart. I know how far the ship had gone after passing Noshima before I altered the course. I know how far I should have gone before altering. I went, however, entirely on the bearing of what I took to be Susaki. After she went ashore the engines were kept going astern till the ship got broadside on to the beach, there being a heavy south-west surf. We then got the boats out and landed the the passengers. Shortly after the ship went ashore she began to make water; I do not know from where. It was only in the after-hold and engine-room. There are five bulkheads in the ship. The engine-room pumps were set to work as far as I know, until the engine-room was flooded. I did not know then to what extent the bottom was damaged, nor can I say now.

To Captain Allen—I ascertained the distance off Noshima Light by a 4-point bearing. I considered that the ship had run about 4 miles from the time Noshima bore N. till I altered the course. That point was not considered then at all. I never thought at all about the distance, when I altered the course. I think now that was the distance run. I had no chart on the bridge to refer to. I had intended to call the captain when the weather came down foggy, but I was so engaged steering clear of the fishermen, that I had no time to do so. A quartermaster was on the look-out on the bridge along with me.

Captain Squire suggested that it would not be necessary to examine any more witnesses. It seemed to him the case was perfectly clear.

Captain Allen expressed a similar view.

The President thought it would be advisable to call the quartermaster who was on the bridge.

This course was ultimately resolved upon, and the Court them adjourned for tiffin.

On resuming.

Ikeda Sotaro, cautioned, deponed—I was quarter-master of the *Tokyo Maru* on the 4 to 8 watch in the morning. I was at the wheel; the other quartermaster is under arrest in connection with the murder of a Chinaman.

Mr. Browning stated that the man now in prison was on the bridge with him.

Examination continued—I was at the wheel when passing Noshima, when the course was altered to W. by S. After fifteen minutes the course was altered by order of the chief mate to N.W. ½ W., I think the captain was then below. Again some 15 minutes later the course was altered to N.W. by N. ½ N. At about 5.45 it was again altered to N. ½ E. The weather was foggy when the last alteration was made. I could not, being inside the wheel house, see anything. The last course was kept till the ship struck.

To Captain Allen—There were many fishing boats about, and three or four times starboard helm was given the vessel to clear them.

To the President—The captain was aroused by the cries of the fishermen.

To Captain Squire—Every time the helm was starboarded to clear the fishing boats the ship was afterwards put again on her course.

To the President—Just before the ship grounded the helm was put hard a starboard and the engines reversed. No soundings were taken; there was no time to take them.

Captain Squire here read the report transmitted to the Nippon Yusen Kaisha by Captain Drummond with regard to the casualty.

In reply to Captain Squire,

Captain Drummond stated that the orders on the first page of the order-book were his and were to the effect that the captain should be called every time the course was changed; whenever the officer of the watch was in doubt; and in foggy weather he was to be called at once and the engines put at half speed.

The Court here adjourned.

---

Judgment was given yesterday at the Mercantile Marine Bureau of the Communications Department, by the Court of Enquiry into the circumstances attending the recent stranding of the Nippon Yusen Kaisha steamer *Tokyo Maru*. Capt Yebiko presided.

Commander Squire, R.N., one of the assessors, read the following translation of the finding of the Court:—

The *Tokyo Maru* is an iron screw steamer belonging to the Nippon Yusen Kaisha of Tokyo. Her registered tonnage is 1,360 and nominal horse-power 211. The master was James Drum-

Digitized by Google

mond and the chief officer Henry E. Browning, both British subjects. From the evidence given before the Court it appears that the vessel sailed on a voyage from Oginohama to Yokohama, leaving Oginohama at 5.40 a.m. on the 5th December, 1890. Inuboye Light was sighted at 7.15 p.m. and passed at a distance of 4.25 miles when the master altered course to S. 37 W. Noshima Light was sighted at 3 a.m. and the master, having shaped a course in order to pass the light at a distance of two miles, went to his room giving the chief officer, whose watch it was, orders to call him when the light was abeam. It appears that the master while waiting in his room fell asleep. Noshima Light was passed at 5.10 at a distance of 2.25 miles, but the master was not called. At 5.30 the chief officer altered course to N.N.W. stating that he mistook Merasaki for Sunosaki, without taking into consideration the time or distance run since passing the light. At 5.50 he again altered course to N. by E. 25 E., and shortly after, the weather becoming foggy over the land, the ship ran among a number of fishing boats, the cries from which aroused the master, who immediately went on deck and after asking the chief officer a few pertinent questions observed a line of breakers across the bow, ordered the helm to be put hard a starboard and the engines to be reversed full speed, but this was too late to be of much use for the ship took the ground almost directly and within about ten minutes was carried broadside on to the beach by the heavy swell that was running. All available means were successfully used to get the passengers and crew on shore, no lives being lost.

JUDGMENT.

The Court is of opinion that no blame is attributable to the master, James Drummond, for this casualty, and therefore exonerates him, recommending that his certificate be returned to him. The casualty was caused by the chief officer, Henry E. Browning, who not only disobeyed the master's distinct and admitted orders given to him that morning, but also two of the orders in the master's night order-book which he had signed, viz., to call the master whenever the course was altered, and also, should the weather become foggy. The Court therefore recommends that his certificate be suspended for a period of twelve months.

President, EBIKO SUYEJIRO.

Assessors { MOUNTJOY SQUIRE. J. F. ALLEN. TOMIOKA SHUNJIRO. TORII SEIJI.

I hereby approve of this decision and direct that it be carried out accordingly.

(Signed) GOTO SHOJIRO, Count,
Minister of State for the Department of Communications.

Tokyo, 6th March, 1891.

The certificate of Captain Drummond was then handed back to him, and the Court was closed.

# *LATEST COMMERCIAL.*

## IMPORTS.

A further improvement took place in Yarns at the beginning of the week, and a few sales were made at better prices, but during the last few days no transactions have been reported; holders are firm and want a further advance to do business; this seems to have checked the inquiry, which was evidently of a speculative character. Other imports, although dull, are more or less firm in sympathy with their enhanced cost. Sales for the week amount to 550 bales English Yarns and 500 bales Bombays.

### METALS.

Not much business doing; but dealers are paying rather better prices, and quotations may be advanced all round about 5 cents per picul.

| | | | |
|---|---|---|---|
| | | PER PICUL. | |
| Flat Bars, ¼ inch | $2.70 | to | 2.75 |
| Flat Bars, ½ inch | 2.80 | to | 2.85 |
| Round and square up to ½ inch | 2.75 | to | 2.85 |
| Nailrod, assorted | | Nom. | |
| Nailrod, small size | | Nom. | |
| Iron Plates, assorted | 2.75 | to | 2.85 |
| Sheet Iron | 3.00 | to | 3.40 |
| Galvanized Iron sheets | 5.90 | to | 6.10 |
| Wire Nails, assorted | 4.30 | to | 4.60 |
| Tin Plates, per box | 5.20 | to | 5.50 |
| Pig Iron, No. 3 | 1.35 | to | 1.40 |

### KEROSENE.

Quiet market, no fresh sales to advise. The *Elwell* has just arrived with a full cargo from New York; and 50,000 cases Russian *ex Ceylon* have been forwarded on to Kobe. Quotations unchanged.

QUOTATIONS.

| | | | |
|---|---|---|---|
| Chester | $1.67½ | to | 1.70 |
| Comet | 1.65 | to | 1.67½ |
| Devoe | 1 62½ | to | 1.65 |
| Russian | 1.57½ | to | 1.60 |

### SUGAR.

A current business doing in Browns at quotations, and deliveries are good. White refined is also in some request, and the general aspect is fairly good.

| | | | |
|---|---|---|---|
| | | PER PICUL. | |
| Brown Takao | $3.80 | to | 3.85 |
| Brown Daitong | 3.20 | to | 3.80 |
| Brown Canton | 5.20 | to | 6.20 |
| Brown Java and Penang | 5.50 | to | 6.00 |
| White Refined | 4.75 | to | 7.75 |

## EXPORTS.

### RAW SILK.

Our last issue was of the 27th ult, since which date settlements in this Market amount to 692 piculs, divided thus: *Hanks*, 132; *Filatures*, 349; *Re-reels*, 7; *Kakeda*, 168; *Oshu*, 36. There have been no direct shipments by Japanese this week, consequently the total export trade of the week is represented by the above figures.

There has been a fair amount of buying from day to day, both for Europe and America. Exchange has been fairly low and holders have sold currently, so that shippers have succeeded in filling several of their orders. A temporary rise in Exchange, however, checked the daily trade, but at closing a fresh decline in silver allows buyers to operate more freely.

Arrivals are coming in a little more freely but the stock of prime silk is slowly and surely diminishing; this especially noticeable in *Hanks*.

Holders are willing to be moving, but at the same time they will not give way in price to any great extent at present. They are, however, inclined to consider matters from a reasonable point of view, and the near approach of Spring weather, with the consequent talk about New Crop prospects, will no doubt assist them to make up their minds to do business. Quotations given below will give a fair idea of values here. Some holders are strong, while others might sell at a slight fractional reduction from quotation.

There has been only one shipping opportunity since we last wrote, the French mail steamer *Natal*, which left port on the 1st inst, carried 753 bales for Europe. Her departure brings the present export figures up to 21,110 piculs, against 33,930 last year and 36,702 piculs at the same date in 1889.

*Hanks.*—There has been again some business in these at high rates consisting of *Shinshu*, 2⅔, at $535; *Boshu*, No. 2. at $545; with *Hachoji* at from $480 to $490.

*Filatures.*—These have been freely bought both for Europe and America, some good silks being taken at our quotations. In fine sizes good *Oshu* has been done at $630; *Mino*, $620; with *Koshu* at $610, In full sizes best *Shinshu*, like *Choshinsha*, has brought $625 and a line of *Tokosha* $610. One small parcel *Meijusha* noted at $620. This class of silks appears to be the cheapest in the market. *Re-reels* being held abnormally high, while *Kakedas* and *Hanks* are in very small supply.

*Re-reels.*—No business, holders maintain their strong attitude and demand prices which shippers are unable to pay.

*Kakeda.*—More doing in these, sellers having met buyers in the matter of price. Stock is once more reduced and some qualities of medium grades are now very hard to find.

*Oshu.*—Small business, there being no stock to select from. The trade done was in *Sendai* at $540 and $545 per picul.

| Available supplies to date | 32,150 | 37,350 | 41,200 |

### WASTE SILK.

Settlements in this branch are 312 piculs, divided thus: *Cocoons*, 68; *Noshi*, 46; *Kakeda*, 193; *Neri*, 5.

Business this week has been very small, not for lack of buyers but for lack of stock to operate upon. Quotations all round are firm and shippers would gladly pay some advance of present quotations if they could obtain superior quality.

There have been two shipping opportunities: the *Natal*, on the 1st inst., had 474 bales, and the *General Werder*, which left port on the 4th inst., took also a fair quantity. Present export is, therefore, 25,024 piculs, against 22,895 last year, and 26,430 at the same date in 1889.

*Pierced Coccons.*—Nothing done, the only parcel which has passed the scales being *Waste Cocoons* of very poor quality, at $14 per picul.

*Noshi.*—Very small business for lack of the requisite quality. Some arrivals have come in from the interior, but these do not supply the Market with what is most in demand.

*Kibiso.*—The bulk of the trade has been in this class and consists of medium *Joshu* kinds at about $32 per picul.

*Mawata.*—No business, stock is small and undesirable.

*Sundries.*—A small transaction in *Neri* at $14 completes the list.

QUOTATIONS.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).
LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

KEATING'S COUGH LOZENGES.

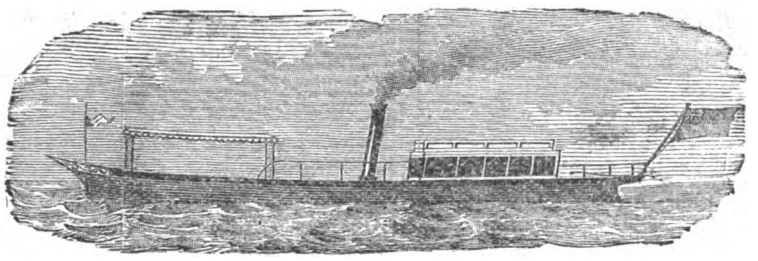
COUGHS, ASTHMA, BRONCHITIS, DIFFICULTY OF BREATHING are speedily cured by KEATING'S COUGH LOZENGES (recognised and recommended by the Medical Faculty). No other remedy is half so effective. One Lozenge alone gives relief. They contain no Opium, Morphia, nor any violent drug, and may be taken by the most delicate. One or two at bed-time ensure rest when troubled by the throat. Sold by all Chemists, in Small Tins. Dec. 27th, 1890.—21ins.

THE GREATEST WONDER OF MODERN TIMES.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir Samuel Baker, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In I short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."



SIMPLE, SAFE, AND CERTAIN!

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulceration of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, aud in arresting and subduing all inflammations.

Mr. J. T. Cooper, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up he small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

YARROW'S

SMALL STEAMERS AND STEAM LAUNCHES.

Screw Steamers with speeds ranging up to 30 miles an hour.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

Machinery constructed for Boats built abroad.

YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition.

A FINE ART Exhibition will be held on and after the 21st instant at the rooms of the Fine Art Society at Uyeno.

CAPTAIN W. HOEHN, formerly an employé of the Metropolitan Police Office, sailed from this port on the 7th instant on board the *Oceanic*.

THEIR Imperial Highnessess Princesses Tsune and Kane, who had spent some time at Oiso, returned to the capital on the 7th instant.

COUNT ITO sent in on the 7th instant his resignation of his offices of President of the House of Peers and member of the Privy Court Council.

THE line of the Sanyo Railway between Hyogo and Okayama, which was completed recently, will be opened for traffic about the 20th instant.

MR. ASADA, Governor of Kanagawa, left Yokohama on the 7th inst. to make a tour of inspection through Minamitamagori and Kitatamagori.

MR. TAKAGI SABURO, of the Yokohama Doshin Kaisha, who had been abroad for some time, returned to Japan on the 7th instant by the *Gaelic*.

FIRE broke out on the 10th instant, at 2 a.m., in the buildings of the Parliamentary Club, and destroyed the whole edifice.

MR. E. KNIPPING, an employé of the Geographical Bureau of the Home Department, will leave this country about the 15th instant, his engagement in Japan having terminated.

THE Tokyo Electric Light Company received on the 5th instant an order from the Imperial Household Department to fit up a system of electric lighting in the Hama Detached Palace.

AT a meeting of the Yokohama Educational Society, held on the 8th instant at the Machigaisho, Honchodori, Messrs. Kimura Riyemon and Kurusu Sobei were elected President and Vice-President respectively.

THE PRINCE IMPERIAL proceeded on the afternoon of the 6th instant to the Imperial Palace, where he was received in audience by Their Majesties the Emperor and Empress, retiring from the Palace about 4 p.m.

THE Home Department has granted a charter to Mr. Adachi Tamiharu, a resident of Sapporo, Hokkaido, and two others to lay a tramway between Kita-rokuje, in the city of Sapporo, and Hatsutarobetsu and Ananosawa.

THE buildings of the Tokyo Postal and Telegraph Office near Yedobashi, and the premises of the Patent Bureau at Kobiki-cho, the contracts for which have been obtained by the Nippon Doboku Kaisha, will be completed in June next.

LIEUTENANT-COLONEL ISONO MISAO, of the Fifth Division (Hiroshima), stabbed himself fatally with a sword on the night of the 3rd instant at his residence at No. 58, Hatsuchobori, Hiroshima. No reason for the suicide has yet been ascertained.

DURING last month gold, silver, and nickel coins were struck at the Osaka Mint in the following amounts:—Gold 5-*yen* pieces, *yen* 76,250.00; silver 1-*yen* pieces, *yen* 195,155.00; silver 20-*sen* pieces, *yen* 500,276.80; silver 10-*sen* pieces, *yen* 131,000.00, and nickel 5-*sen* pieces, *yen* 7,937.35.

THE election to fill the vacancy caused by the resignation of Mr. Nakaye, a member of the Lower House for the fourth district of Osaka, will take place on the 17th instant. Messrs. Kitamura Sakichi, Mi-ichi Noriyasu, and Shinogawa Riyu are candidates for the seat.

ON the night of the 3rd instant a thief entered the house of Mr. Nakashima, Director of the Yuzawa branch office of the 1st National Bank, at Yuzawa-machi, Okatsugori, Akita Prefecture, and stole the sum of about 100 *yen*, killing Mr. Nakashima and five other members of his family.

AN ordinary meeting of the Cabinet was held on the 10th instant, at which all the Ministers of State, with the exception of Counts Yamagata and Oyama, Viscount Kabayama, and Mr. Yoshikawa were present. The proceedings lasted from 11 in the forenoon till a little past 5 in the afternoon.

DURING the month of January last the number of shares that changed hands in the Kyoto Stock Exchange was 31,834, of which 12,032 were Kansai Railway Company, 488 Sanyo Railway Company, 19,302 Kyushu Railway Company, 11 Kyoto Weaving Company, and 2 Kyoto Stock Exchange shares.

THE section between Miishi and Okayama (distance about 29 miles) on the Sanyo Railway Company having been completed, a trial run was made on the 8th instant. The section between Okayama and Kuroshiki (distance about 12 miles) on the same railway will be completed about the middle of next month.

AT the meeting of the Standing Committee of the Kyushu Railway Company, held on the 9th instant, it was decided that the work of constructing the railway of the company, with the exception of the works on the line between Monji, Kokura, Kumamoto, Kurume, and Saga, which are now in course of being carried out, should be stopped for a time.

THE graduation ceremony of the Tokyo Postal and Telegraph School was held on the 7th instant, the meeting being opened by the reading of the reports of the school for the last year by Mr. Tanaka, manager of the school. Mr. Kurino Shinichiro, President of the institution, presented certificates to the graduates. Several officials of the Communications Department and principals of Government schools in the capital were present on the occasion.

THE Import trade remains much in the same condition as last reported, and though business in Yarns and Shirtings remains rather slack, holders are not pushing sales, as they are in hope of obtaining better rates when the expected demand sets in. Woollens and Fancy goods receive little attention at present, but few purchases being made, though enquiries are heard. The Metal trade continues dull, small parcels of Iron being the principal business reported. Kerosene is without demand, and quotations are nominally unaltered. Sugar is quiet so far as Whites are concerned, but large arrivals of new Formosa are being landed, a fair amount of settlements being daily effected. Small musters of new Tea have been shown, but these are of forced growth, and the trade is fully a month from its commencement. Exchange has been steadily hardening, and is firm at the close.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).
LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. Arthur Wadham, proprietor of *The Machinery Market and Exporter* (illustrated) — the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery aud Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." 1y. June 28, 1890.

KEATING'S COUGH LOZENGES.

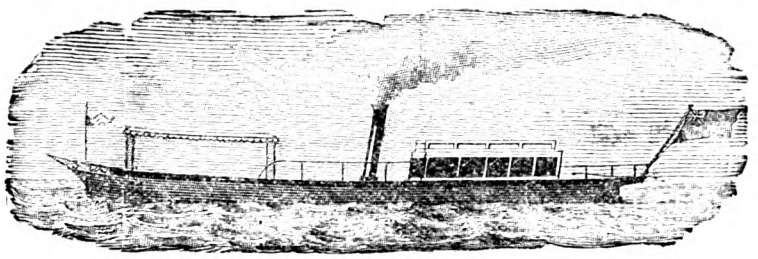
COUGHS, ASTHMA, BRONCHITIS, DIFFICULTY OF BREATHING are speedily cured by KEATING'S COUGH LOZENGES (recognised and recommended by the Medical Faculty). No other remedy is half so effective. One Lozenge alone gives relief. They contain no Opium, Morphia, nor any violent drug, and may be taken by the most delicate. One or two at bed-time ensure rest when troubled by the throat. Sold by all Chemists, in Small Tins. Dec. 27th, 1890.—21ins.

THE GREATEST WONDER OF MODERN TIMES.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir Samuel Baker, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In I short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."



SIMPLE, SAFE, AND CERTAIN!

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulceration of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, aud in arresting and subduing all inflammations.

Mr. J. T. Cooper, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up he small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

YARROW'S

SMALL STEAMERS AND STEAM LAUNCHES.

Screw Steamers with speeds ranging up to 30 miles an hour.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

Machinery constructed for Boats built abroad.

YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition.

## *SUMMARY OF NEWS.*

THE closing ceremony of the Imperial Diet took place on the 8th instant in the Imperial Palace.

THE United States Representative died suddenly at his Legation in Tokyo on the 10th instant.

H.I.H. PRINCESS KAGEKO left the capital on the 7th instant, for Oiso.

COUNT KATSU, a Privy Councillor, is at present suffering from influenza.

THE Japanese man-of-war *Chiyoda Kan* arrived at Colombo on the 5th instant.

THE Prince Imperial proceeded on the 8th inst. at 10 a.m. to the Shiba Detached Palace.

H.I.H. PRINCE ARISUGAWA left Yokosuka on the 5th instant for Saseho to inspect the Naval Station there.

THE quantity of kerosene now in stock in the godowns at Nakamura, Ishikawa, Yokohama, is 727,225 cases.

MR. HANABUSA, formerly Minister in Korea, has been appointed Vice-Minister of the Household Department.

ANOTHER batch of Japanese emigrants to the Hawaiian Islands, numbering in all about one thousand and fifty, will start from this port on the 17th instant by the *Omi Maru*.

VISCOUNT TANAKA has resigned the office of Chief of the Metropolitan Police, and been appointed a Privy Court Councillor.

A FINE ART Exhibition will be held on and after the 21st instant at the rooms of the Fine Art Society at Uyeno.

CAPTAIN W. HOEHN, formerly an employé of the Metropolitan Police Office, sailed from this port on the 7th instant on board the *Oceanic*.

THEIR Imperial Highnessess Princesses Tsune and Kane, who had spent some time at Oiso, returned to the capital on the 7th instant.

COUNT ITO sent in on the 7th instant his resignation of his offices of President of the House of Peers and member of the Privy Court Council.

THE line of the Sanyo Railway between Hyogo and Okayama, which was completed recently, will be opened for traffic about the 20th instant.

MR. ASADA, Governor of Kanagawa, left Yokohama on the 7th inst. to make a tour of inspection through Minamitamagori and Kitatamagori.

MR. TAKAGI SABURO, of the Yokohama Doshin Kaisha, who had been abroad for some time, returned to Japan on the 7th instant by the *Gaelic*.

FIRE broke out on the 10th instant, at 2 a.m., in the buildings of the Parliamentary Club, and destroyed the whole edifice.

MR. E. KNIPPING, an employé of the Geographical Bureau of the Home Department, will leave this country about the 15th instant, his engagement in Japan having terminated.

THE Tokyo Electric Light Company received on the 5th instant an order from the Imperial Household Department to fit up a system of electric lighting in the Hama Detached Palace.

AT a meeting of the Yokohama Educational Society, held on the 8th instant at the Machigaisho, Honchodori, Messrs. Kimura Riyemon and Kurusu Sobei were elected President and Vice-President respectively.

THE PRINCE IMPERIAL proceeded on the afternoon of the 6th instant to the Imperial Palace, where he was received in audience by Their Majesties the Emperor and Empress, retiring from the Palace about 4 p.m.

THE Home Department has granted a charter to Mr. Adachi Tamiharu, a resident of Sapporo, Hokkaido, and two others to lay a tramway between Kita-rokuje, in the city of Sapporo, and Hatsutarobetsu and Ananosawa.

THE buildings of the Tokyo Postal and Telegraph Office near Yedobashi, and the premises of the Patent Bureau at Kobiki-cho, the contracts for which have been obtained by the Nippon Doboku Kaisha, will be completed in June next.

LIEUTENANT-COLONEL ISONO MISAO, of the Fifth Division (Hiroshima), stabbed himself fatally with a sword on the night of the 3rd instant at his residence at No. 58, Hatsuchobori, Hiroshima. No reason for the suicide has yet been ascertained.

DURING last month gold, silver, and nickel coins were struck at the Osaka Mint in the following amounts:—Gold 5-*yen* pieces, *yen* 76,250.00; silver 1-*yen* pieces, *yen* 195,155.00; silver 20-*sen* pieces, *yen* 500,276.80; silver 10-*sen* pieces, *yen* 131,000.00, and nickel 5-*sen* pieces, *yen* 7,937.35.

THE election to fill the vacancy caused by the resignation of Mr. Nakaye, a member of the Lower House for the fourth district of Osaka, will take place on the 17th instant. Messrs. Kitamura Sakichi, Mi-ichi Noriyasu, and Shinogawa Riyu are candidates for the seat.

ON the night of the 3rd instant a thief entered the house of Mr. Nakashima, Director of the Yuzawa branch office of the 1st National Bank, at Yuzawa-machi, Okatsugori, Akita Prefecture, and stole the sum of about 100 *yen*, killing Mr. Nakashima and five other members of his family.

AN ordinary meeting of the Cabinet was held on the 10th instant, at which all the Ministers of State, with the exception of Counts Yamagata and Oyama, Viscount Kabayama, and Mr. Yoshikawa were present. The proceedings lasted from 11 in the forenoon till a little past 5 in the afternoon.

DURING the month of January last the number of shares that changed hands in the Kyoto Stock Exchange was 31,834, of which 12,032 were Kansai Railway Company, 488 Sanyo Railway Company, 19,302 Kyushu Railway Company, 11 Kyoto Weaving Company, and 2 Kyoto Stock Exchange shares.

THE section between Miishi and Okayama (distance about 29 miles) on the Sanyo Railway Company having been completed, a trial run was made on the 8th instant. The section between Okayama and Kuroshiki (distance about 12 miles) on the same railway will be completed about the middle of next month.

AT the meeting of the Standing Committee of the Kyushu Railway Company, held on the 9th instant, it was decided that the work of constructing the railway of the company, with the exception of the works on the line between Monji, Kokura, Kumamoto, Kurume, and Saga, which are now in course of being carried out, should be stopped for a time.

THE graduation ceremony of the Tokyo Postal and Telegraph School was held on the 7th instant, the meeting being opened by the reading of the reports of the school for the last year by Mr. Tanaka, manager of the school. Mr. Kurino Shinichiro, President of the institution, presented certificates to the graduates. Several officials of the Communications Department and principals of Government schools in the capital were present on the occasion.

## *EDITORIAL NOTES.*

### THE CLOSING OF THE DIET.

THE ceremony of closing the Diet was performed on Sunday in the Throne Room (*Homeiden*) of the Imperial Palace. From an early hour in the morning large bodies of troops, gendarmerie and police were posted along all the avenues of approach, but no other preparations could be discerned. At ten o'clock the members of the Diet began to arrive. Passing under the Great Vestibule, and thence through the main entrance, they were received by ushers, and conducted to the Eastern and Western antechambers, the Representatives assembling in the former and the Peers in the latter. After an hour's interval, the President of the Lower House, in obedience to a summons conveyed by a chamberlain, conducted the Representatives, of whom over two hundred and seventy were present, to the *Homeiden*, where they took their places on the right of the Throne. Shortly afterwards the Peers followed, led by the Acting President, Count Higashi-Kuze—both Count Ito and Prince Konoye being too ill to attend—and ranged themselves on the left of the Throne. All this took place amid absolute silence, though it had been observed that during the interval of waiting in the Eastern Ante-chamber the members of the Lower House, having to all appearances completely forgotten the strong political animosities so recently displayed in debate and division, laughed and jested with as little concern for their surroundings as recollection of their past differences. Drawn up on either side of the Throne Room, the two Houses displayed the same marked contrast palpable on the occasion of the opening ceremony last November—the Commons a mass of black coats unrelieved by any point of colour or gleam of lace, the Peers a galaxy of brilliant uniforms and glittering orders. After a few moments of waiting, the Ministers of State came in by another entrance, and took their places on either side of the Throne, standing. The Minister President, who is suffering from a severe attack of influenza, was unable to be present, and his functions were performed by Count Saigo, Minister of State for Home Affairs. At 11.25 Count Saigo advanced and read from a scroll the Imperial Message, prefacing the reading by saying:—"In accordance with His Imperial Majesty's gracious commands, I gratefully proceed to read aloud the Imperial Message:—

My Lords and Gentlemen of the Houses of Peers and Representatives; We this day declare the Imperial Diet prorogued, acknowledging with satisfaction the zeal and diligence with which, during several months, you have discharged your labours.

At the conclusion of this brief message the assemblage bowed again, and Count Saigo handed the scroll to the Acting President of the House of Peers. Receiving it, Count Higashi-Kuze, after the usual reverential obeisance, called for three cheers for the Emperor, which were given with the utmost heartiness, the Palace ringing with the unwonted sounds of "*Tenno Heikwa Banzai*," uttered by five hundred voices. A little more than two years ago the Empeor, amid rejoicings not free from doubts, bestowed upon his people the Constitution whose first practical working His Majesty has now the satisfaction of seeing successfully concluded.

### VISCOUNT AOKI IN THE UPPER HOUSE.

ON Friday week, after the Budget had been passed by the Peers, Count Ito resumed his seat as President, and announced that the Minister of State for Foreign Affairs would answer certain questions previously put, on the subject of Treaty Revision. Viscount Aoki said:—

My Lords and Gentlemen, I shall have the honour to reply this evening to questions addressed to the Government on the 23rd of February by Mr. Nishimura Shigeki. The gist of the first question was whether it is proposed to give to foreigners the privilege of mixed residence. The question is a large one and affords much room for doubt. In order, therefore, to reply clearly, it becomes necessary to refer to the objects by which the empire's foreign policy has hitherto been directed. Since the Restoration, the guiding aims of the Administration have been to follow a liberal policy, to push forward towards the van of civilization, to effect reforms in all domestic affairs, holding to the good and rejecting the bad, to neglect nothing, however small, but by diligence to convert even stones into jewels, as the proverb says. At home the principles of liberty have been developed; abroad, the national bases have been strengthened, and the prestige of the country has been enhanced. Happily, domestic affairs having been brought into good order, we have been able to turn our attention to foreign intercourse, and by taking measures for protecting the lives and properties of Japanese merchants in foreign countries, the reputation of the empire has been enhanced. In carrying on this work, we are called upon to discharge the duties properly devolving on us, namely, to cement and strengthen our relations with foreign nations. Unfortunately, in following this route we come to a bridge, namely, the existing Treaties. Unless we cross the bridge, we cannot reach the opposite bank. That is the reason why the present treaties must be revised. If they be left unrevised, grave inconvenience must ensue. It is necessary that revision be achieved so as to recover the country's independence and vindicate its three sovereign rights. If this aim be achieved, the privilege of mixed residence will be granted to foreigners. With regard to the second question, whether the privilege of owning real estate will be extended to foreigners, the answer is that the Government does not approve of such a concession. The third question relates to the recovery of Tariff Autonomy and the revision of customs dues. To achieve the recovery of Tariff Autonomy the Government considers that a certain interval of years will be necessary. Meanwhile, our policy is to increase customs dues, by due proceess, so as to augment the revenue of the State. As to the fourth point, namely, whether foreigners will be permitted to take part in the cabotage, I answer emphatically that the Government will not grant such permission. The fifth question—whether a law for the naturalization of foreigners is to be soon enacted—I am not able to answer, since that point falls within the province the Legislature."

### POLITENESS.

WE did not imagine that the *Japan Gazette* would appreciate the discourtesy of its *mode of discussing* the applicability of the term "Excellency" in the case of a lady in Tokyo. Ignorance was the one and only excuse for its language, and the same ignorance prevents it from appreciating the rudeness, even when indicated. It claims now that its "remarks on the proper use of the term Excellency were interpreted as a breach of the canons of politeness!" We cannot emulate our naïve contemporary's polished ways by re-publishing and dissecting its *bevue*. But we may tell it, since it invites the information, that a thousand articles on the applicability of the title "Excellency" to the wives of Ministers Plenipotentiary in general would not constitute any breach of the canons of politeness, whereas one brief sentence in a note on the same subject might fatally offend against the commonest rules of courtesy. These are matters of training and instinct. If the latter is absent, the former is apt to fail.

### THE SPECIE BANK.

THE regular general meeting of shareholders of the Yokohama Specie Bank was held on the 10th instant. The total receipts during the past half-year were *yen* 800,798.357, of which *yen* 432,202.167 was deducted for expenses, leaving a profit of *yen* 368,596.160, to which *yen* 4,422.418 brought over from the last account were added, making the total of *yen* 373,018.578. Of this amount *yen* 25,000 were set apart as a special reserve, *yen* 34,350 for remuneration to officers, and *yen* 34,400 as a reserve, *yen* 268.578 being carried forward to next account. A dividend was declared at the rate of 16 per cent per annum.

### THE MODERATES AS A POLITICAL PARTY.

WE have stated more than once that the question of converting the *Taiseikai*, or so-called "Moderates," into a political party, has been under discussion, and that the advocates of the step were deterred from pushing matters openly in view of the evident reluctance of several members to depart from the neutral attitude assumed when they entered Parliament. The expediency of some definite organization seems to have presented itself with renewed force after the success which attended the action of the Moderates in the last stages of the Budget's career, and talk of the birth of a new and powerful political party began to be heard once more in the capital. But apparently the time has not yet come for any open step of that nature. It has been deemed more prudent to be content for the present with a club out of which the machinery for amalgamation will doubtless grow spontaneously. A meeting with that object was held on Saturday night. About fifty members of the Lower House attended. The *Taisei-kai*, the *Kokumin-to*, the *Jiyu-to*, the *Jichi-to*, and the *Kokken-to* (of Kumamoto) were all represented, and there were also present Messrs. Oye Taku, Sugehiro, and Inouye Kakugoro, who are now known as *Mushozoku-gi-in*, or members without any association. Mr. Suyematsu Kencho, who has become a recognised leader of the *Taiseikai*, was voted to the chair, and the following rules were adopted:—

1. The club shall be called the "*Kyodo Club*."
2. The club shall be composed of members of the Imperial Diet, and its objects shall be to take measures for the nation's progress and to promote intercourse between the members.
3. The office shall be in Tokyo.
4. There shall be five Managers, who will transact the general business of the club. They shall serve for one year, and shall be elected annually at the time of the Diet's opening.
5. There shall be two Secretaries chosen and appointed by the Managers.
6. There shall be one general meeting each month.
7. The expenses of the club shall be defrayed by the members.

It will be seen that every hint of political purpose is carefully banished from these rules. Nevertheless, there is considerable likelihood that the club may become the nucleus of one of the most important political parties hitherto organised in Japan.

### GEORGE DANDIN.

THE *Japan Gazette* is determined to draw attention to its blunders. It might save itself humiliation had it the sense to understand that some errors are secured against criticism by the pity they provoke. It asserts, and persists in asserting, that there has been a disruption of the Progressionist and the Radical Parties, and it charges us with shifting our ground because we refrain from further discussion of a statement so contrary to truth But our reason for refraining is because we perceive that the *Gazette's* difficulty is ignorance of the common meaning of terms. Just as the continuity of a correspondence is apt to be interrupted if one of the parties posts his letters in a disused pump, so a controversy is likely to come to a dead-lock if one of the controversialists does not understand the language he employs. The disruption of two parties means that the parties have separated; that they are no longer working in union. Nothing of the kind has happened in the case of the Progressionists and Radicals. They still stand shoulder to shoulder in the Diet, just as they did two months ago, when the fact of their unexpected combination caused so much surmise and comment. The *Gazette* affirms that there has been disruption, and in proof of its statement gives the names of a coterie of politicians who have receded from the ranks of the Radicals. Yet this same *Gazette* expects to be taken seriously. An object lesson may perhaps help its perception:—Suppose that a company of British soldiers had deserted during the Crimean compaign, could the event have been properly described as a disruption of the English and French armies? If the *Gazette* is incapable of appreciating this distinction, we begin to understand the origin of many of its curious mistakes. But an extraordinarily crude and inaccurate perception of current events is not the only trouble with our contemporary. The same confusion apparently extends to its ideas of right and wrong. It loves to charge others with shifting their ground and with general evasiveness, but the difficulty of

Digitized by Google

facing a plain issue is evidently insuperable for itself. What has become of its assertion that "the *Japan Mail*, relying on the credulity of its readers, attributed the defeat of the Extremists to the eloqueuce of a non-influential member of the Diet, Amano Jakuyen?" What has become of this assertion in the face of the facts, proved by verbatim extracts from our columns, that on the morrow of the defeat we assigned two causes for it, "first, and chiefly, the secession of a portion of the Radical Party; secondly, and in a very trifling degree, a growing conviction that if the House persisted in its course, dissolution was inevitable?" Is there anything here about Mr. Amano Jakuyen? In a note published several days after the causes of the discomfiture of the Extremists had been accurately explained in our leading columns and after their names had been given by us, we alluded to Mr. Amano Jakuyen's sudden celebrity, and gave his own account of the event, which, he said, "Providence or Hotoke had a large share in shaping." The note did not contain a single expression of our own opinion; a single statement of facts for which we vouched. What does the *Gazette* mean by pretending to twist such a note into an assertion that Mr. Amano's eloquence brought about the defeat of the Extremists? What does it mean by steadily ignoring the distinct statement of causes inserted several days previously in out leading columns? The necessity of dealing with such ingenuousness does not often present itself, and we frankly admit that we are perplexed how to treat it without recourse to terms equally uncommon. There appears to be on the part of the *Gazette* an absolute incapacity to grasp the most ordinary issue. Thus, it complains that its "casual statement" about Count Ito's presence in Prince Sanjo s funeral cortége is unfairly criticised as dishonest. What could be more evasive than such a demurrer? The *Gazette*, in the first place, expressed the pleasure it had derived from seeing that Count Ito had recovered sufficiently to be present. Being told that Count Ito was not present, it affirmed that it could bring "four or five persons who distinctly affirmed that they saw him pass down Reinanzaka." Then finally, having discovered that Count Ito was not in Tokyo at all that day, it described the whole thing as "a casual statement," and was indignant because others viewed it differently. What has become of the four or five eye witnesses? Were they also "a casual statement?" These things are trifles. We should not have alluded to them again, if the *Gazette* had been prudent enough to refrain from charging us with "shifting our ground," and from repeating its silly persiflage that "defence of the Japanese Government involves close adherence to such methods of controversy." If our unfortunate contemporary is determined to rush down the steep place, it must take the consequences.

### THE CHIEF OF METROPOLITAN POLICE.

THE resignation of Viscount Tanaka, Chief of the Metropolitan Police, attracts much attention in the capital. No occupant of the important post of *Keishi Sokan* has a better record than the Viscount. Under his superintendence the police force has been carried to a point of high efficiency, and the severest critic has not found a word to say against his manner of discharging his duties. His resignation is, of course, variously interpreted, but the most reasonable explanation appears to be that he declines to endorse the reductions made by the Diet in the appropriation for his Bureau. He claims, and with perfect justice it is said, that the strictest economy has not only been exercised in all matters relating to the police while under his direction, but has also been the guiding principle of his official career throughout. It was he who, in conjunction with General (now Count) Yamagata, carried out the economical reforms which, in 1878, led to the trouble known as the *Takebashi Sodo*, and he has never failed to make the reduction of official expenditure his object. So earnest was his desire of reform in this respect, that when he became Chief of Police one of his first steps was to cut down the establishment provided for his own convenience, his carriage being dispensed with among other things. He declares that the appropriation asked for in the Budget on account of his Bureau included no margin whatever, and represented the smallest sum compatible with efficiency of the police force. Nevertheless, this minimum has been cut down by ninety thousand *yen*, and the Viscount is reported to say that he is resolved not to attempt the fruitless task of adjusting expenditures to an inadequate allowance. We can entirely sympathise with him if this account of his motives be correct. A zealous officer takes a pride in the efficiency of the force under his charge, and if Viscount Tanaka is resolved not to attempt the task of policing the capital without sufficient resources, his retirement will not be the least creditable page of his record.

### MESSRS. MAWE AND COMPANY V. YEBIZUKA SHIROBEI.

AN appeal in this case has just been heard in Tokyo. The facts are of some interest. About the month of October, 1888, Messrs. Mawe & Company, of Kobe, received from Mr. Yebizuka a quantity of straw-braid for sale abroad, and a percentage of the estimated value of the braid was paid to the owner by the foreign firm. An agreement between the parties provided for the customary charges and commissions, and contained a condition that the goods should be sold within four months from the date of their transfer to Messrs. Mawe and Company, the selling price to be calculated on the basis of the estimated value *plus* the charges; and in case such an amount could not be realized, the best terms obtainable were to be taken. It was further agreed that should the sum realized be insufficient to cover the advances made by Messrs. Mawe & Company, the deficiency should be made good by Mr. Yebizuka, either in cash or in marketable securities. At dates subsequent to the above-named term of months, portions of the braid were sold in London, but the prices obtained were below the estimated values. Correspondence then ensued as to the actual state of the market and so forth. Messrs. Mawe and Company suggested the advisability of disposing of the braid at once, so as to avoid further loss, but for some reason the owner wished to have the goods held over until January, 1890. At the latter date, however, the market was found to be more unfavourable than ever, and Messrs. Mawe and Company, having waited until June, sold the braid, fearing that it might become altogether unsaleable, and seeing that no payment or deposit of securities was made to ensure them against loss. The proceeds of the sale did little more than suffice to cover the various charges on the goods, and account sales were duly rendered, but Mr. Yebizuka continued to negotiate for some reduction of his liabilities. Legal action was finally taken. Last September Messrs. Mawe and Company instructed Mr. Masujima to institute proceedings with the view of recovering the sums due. The case came up for hearing in the Yokohama Court. The defence set up was that Messrs. Mawe and Company had sold the braid at a date subsequent to that stipulated for, namely, January, 1890, without due care and for a price considerably below the limits originally fixed by the owner, thus disregarding the latter's interests. It was further urged that the goods had been disposed of by auction, an inference drawn from certain items which appeared in the account sales as auction expenses. Messrs. Mawe and Company replied in the first place, that auction was the usual mode of sale for all kinds of goods in London, market reports being almost always made out from the results of such sales; and in the second, that the goods in this particular case were not disposed of by auction, no auctioneer's commission having been charged. Moreover, the reasonableness of the sale was proved by reference to the reports of London brokers, and it was urged that carelessness of the owner's interest was most improbable on the part of Messrs. Mawe and Company, inasmuch as their profit depended solely on commission. The Court gave judgment in favour of the plaintiffs, on the ground that the latter had acted in compliance with the terms of the contract, and were justified in selling as they did at prices the propriety of which was proved by comparison with the London market reports. The defendant appealed, however, and the appeal was heard last week, the Upper Court sustaining the original judgment. An order was also granted, on the application of the plantiff's counsel and in accordance with the provisions of the new Code of Civil Procedure, which came into operation on the 1st of January, that the defendant should pay into Court the amount of the claim against him. An appeal to the Supreme Court is still open, but must be lodged within thirty days, and can only be taken on the ground that the judgment of the last Court is defective on some point of law. It will be seen that the time occupied in the disposal of this suit, up to the present, is not at all excessive. The chief point of interest, however, is that the case is the first in which the provisions of the new Code of Civil Procedure have been taken advantage of by a foreign suitor. The constant complaint hitherto urged by foreigners against Japanese Courts is that, owing to the latter's faulty procedure, a judgment obtained against a debtor possesses no practical value, inasmuch as pending the hearing of an appeal, the debtor can place all his property beyond the creditor's reach. The Code of Civil Procedure, which came into force at the beginning of the year, obviates this effectually by providing that a debtor, appealing from the judgment of a lower court, may be ordered to pay into court the amount for which judgment has been given against him, or, failing compliance, may have his property attached. No cause of complaint exists any longer on this score. Foreign suitors can count on obtaining justice, so far, at any rate, as the written law is concerned.

### SPURIOUS SOSHI.

THE *soshi* get the discredit of many things for which they are in no sense responsible. In the *Kokumin Shimbun* the other day we find the following:—"At five o'clock in the evening of the 7th instant, a *soshi* took hold of the wife of a Foreign Minister—the United States Representative, it is said—and used most abusive language to her. On being arrested he was found to be a native of Nagano Prefecture, by name Kumagaye. The lady very charitably intimated that she did not wish to have him punished, and he was accordingly released with a warning, after having tendered an apology." The facts of this case are that as Mrs. Swift was driving home on Saturday evening, a youth who had formerly been employed at the Legation, jumped up behind the carriage and having addressed to its immates a few words of broken and unintelligible English in a rapid and somewhat violent manner, took his departure. Naturally this proceeding caused some alarm, and as the carriage passed a police station shortly afterwards, information was given to the guardians of the law, who quickly arrested the agile individual. He showed much contrition for his conduct and was accordingly released. With what object he selected this peculiar fashion of address we have not learned. He had left the service of the American Legation by his own desire to seek special employment elsewhere, and it may be that failure to accomplish his purpose involved him in difficulties which threw him temporarily off his balance. While in service he had been fairly attentive to his duties, and there was no reason to suppose that his freak of last Saturday possessed any particular signifiance.

### THE LATE MR. COSMO INNES BURTON.

A RECENT China mail, says *Industries* of Jan. 23, has brought news of the death of Mr. Cosmo Innes Burton, who was appointed last year to the Professorship of Chemistry at the new Technical Institute of Shanghai. His death at the age of twenty-eight has excited feelings of regret among fellow workers in this country, who regarded him as one of the most original of the younger generation of chemists. Mr. Burton's father was Mr. John Hill Burton, the well-known Scottish historian. That his intellectual inheritance, however, was sci-

Digitized by Google

entific, not literary, was early apparent, for as a boy he worked in the chemical laboratory which he and his elder brother—now Professor of Sanitary Engineering in the University of Tokyo—fitted up for themselves. After graduating in Edinburgh, Mr. Burton became assistant to Dr. Japp, now professor of Chemistry at Aberdeen, and, in conjunction with him, contributed four memoirs to the Journal of the Chemical Society, embodying the results of extensive researches in the department of organic chemistry. His interests in chemistry, however, were essentialiy of a practical nature. He was interested in social reforms of every kind, and eagerly embraced the opportunity offered to him by the Town Council of Edinburgh of examining the air of public buildings in that city. He made a careful chemical and biological investigation of the air of the chief schools and theatres of the city, and drew up an exhaustive report on the subject. He was profoundly interested in both the technical and philosophic aspects of chemical science. One of his investigations, the subject of which was the heat produced by the compression of pure solid and liquid substances, was pretty far advanced before he left for China. His friend, Mr. W. Marshall, in conjuction with whom a large part of the work was carried out, will shortly publish the results of the research. Mr. Burton received last spring his appointment in China, and proceeded to Shanghai, where he arrived in the end of July. A letter written by him in the beginning of October was full of hope and enthusiasm about his work. Within a month of the date of the letter he was cut down by an attack of malignant small-pox, after two or three days' illness.

### THE SANYO RAILWAY.

It was expected that the section of the Sanyo Railway between Mitsuishi and Okayama would have been finished by the end of last month, and opened for traffic during the first ten days of this month. But considerable delay occurred in connection with three tunnels at Inaba, in Bingo, and the consequeuce is that a trial trip could not be made over the whole line until the 8th instant. It is stated that the regular inspection by experts of the Railway Department has been concluded, and sanction to run trains duly given. The opening to public traffic will probably take place on or about the 20th inst. The distance from Hyogo to Okayama is 90 miles, and in the section from Mitsuishi to Okayama there are six stations. We need scarcely tell our readers that the Sanyo Railway is the part of the main trunk line of Japan to the south of Hyogo. Its construction is in the hands of a private company. Mitsuishi, from which the line has now been carried forward, is an unimportant town of only three thousand inhabitants in Bizen, but Okayama in the same province has a population of over thirty-three thousand, and is one of the principal places between Himeji and Hagi.

### IRON MINING IN JAPAN.

It is curious that reports of large enterprise in the direction of iron mining should be associated at the present epoch with the name of Mr. Iwasaki Yanosuke. Statements of this nature made a few months ago would have been intelligible. Steps were then actually being taken to determine what if any deposits of iron might be worked with advantage, but a survey of various places, made, we believe, by Mr. J. M. Stoddart, led to an abandonment of the project for a time at all events, and to speak of its being on the *tapis* at present, or of large sums being devoted to it, is altogether a misconception. Kamaishi, in Iwate Prefecture, the mine upon which so much money was spent by the Treasury in former years, still enjoys the reputation of possessing the finest deposits of iron ore in Japan. Kamaishi labours under the fatal disadvantage of being far away from any supply of fuel, and whether to bring coal there for smelting purposes, or to carry the crude ore to the coal, is a problem that has not yet been solved so as to warrant any prudent capitalist in putting his money into the enterprise. Iron mining is therefore at a standstill in Japan, and no prospect exists of its being taken up in the immediate future.

### AN ENGLISH OPINION ON TREATY REVISION.

The question of treaty revision in Japan, to which we (*Industries*) have frequently referred, has become complicated by considerations of party politics and sectional opinions, and these will add immensely to the difficulty of settlement. As we have on a previous occasion pointed out, the question might have been settled some years ago with comparative ease, in a manner which would have prevented it being raised for a considerable time, for then the foreign Powers had only to deal with a comparatively despotic Government. Now it has to deal with a representative Government, which is criticised by a public press, and which is thus doubly bound to respect public opinion. It is stated by the foreign press in Japan that the recent proposals of the Government are for the purpose of conciliating the patriotic party in the country, and evoking the opinion of the foreign residents, which, in the open ports at least, is unanimously and decidedly against the proposals. It is not within our province to enter into the consideration of either the personal or political questions involved, but we have no hesitation in saying, after considerable personal knowledge of the country and the people, that the present state of affairs is a grave injustice to Japan and an injury to the foreign trade of the country. During the past twenty years the Japanese have made so much progress in every way that it is only right that they should expect a considerable relaxation of arrangements which were made under a totally different state of affairs. We trust that some method will soon be found to bring a change about.

### THE CAMP OF THE "KAISHIN TO."

We should not have supposed that Mr. Tanaka Shozo was likely to cause any friction in the ranks of the Progressionists. It always struck us that the House of Representatives did not take him very seriously, and there was reason to doubt even whether he took himself quite seriously. His action towards Count Goto was conspicuously silly. He had not sufficient artistic instinct to understand that all his grievances against that statesman were amply avenged by the clever speech which he made in connection with the appropriation for the Communications Department. If he had terminated his crusade there the public would have applauded, but he carried it on with a kind of clumsy vindictiveness that ultimately converted the whole affair into a burlesque. Assuredly if, as foreign observers, we were asked to point out the members whose conduct contributed least to impart dignity to the proceedings of the House of Representatives, we should put Mr. Tanaka Shozo at the head of the list, and certainly it would never have occurred to us to imagine that any portion of the *Kaishin-to* would be found supporting his claims to consideration at present. It is stated, however, that the reproaches levelled at Mr. Tanaka by some of his Progressionist associates have been resented by the others, and that trouble is not unlikely to arise in the party from this cause. The rumour appears to us wholly incredible.

### THE TWO HOUSES OF PARLIAMENT ENJOYING THEMSELVES.

On the 9th instant a garden party was given by the Cabinet at the Akasaka Detached Palace to the members of the two Houses of the Diet, and the chief parliamentary officials. More than five hundred persons were present, and after having walked round the beautiful garden and enjoyed the view from the various pavilions—the Pavilion of the Pure Heart, the Pavilion of Winter Perfumes, the Pavilion of the Lespedeza, and the Pavilion of the Lotus Lake—they were conducted by the Ministers of State to the great banquetting hall, where a sumptuous collation in foreign style was provided, Ministers, members of Parliament, farmers, merchants, noblemen, all enjoyed one another's society without any distinction of person. After the repast Mr. Inouye Kakugoro urged Viscount Aoki to speak, and the Viscount, standing in the verandah, addressed the assemblage as follows (we translate from the *Choya Shimbun*) :—

Gentlemen,—At the request of Mr. Inouye Kakugoro I will speak a few words. But it is understood that to-day no interrogations will be put to me.—(Hear, hear.) The Minister, President, Count Yamagata, should be your chief host to-day, but since the day before yesterday he has been suffering from inflammation of the lungs and is unable to attend, to his and our great regret.—(Cries of "Very sorry.") As we are without a President I hope we shall not fall into disorder.—(Hear, hear.) I can assure you, gentlemen, that it affords my colleagues of the Cabinet and myself the greatest satisfaction to meet you all here to-day. Let me say one word to you as we are on the eve of separating for a time. I told you the other day, when speaking in the House of Representatives, that to extend the power of the country blood and iron are needed. That may have seemed a strong statement, but the practical reality is that money is needed. —(Hear, hear.) According to circumstances, too, we must be prepared to see blood shed.—(Hear, hear.) Such being the case, it is a little painful that you, gentlemen, in this year's Diet, reduced our supplies of money.—("Certainly, certainly.") But we must seek to introduce large reforms in the Administration and to extend the country's power.—(Applause.) Of course our reforms must be carried out by due and deliberate processes. There must be no attempt to undertake heroic measures.—(Applause). As for Treaty Revision, it is a task that I cannot accomplish of my own strength. Nor have I any idea of trying to accomplish it in that way. Only by your united strength, gentlemen; only with the concurrence of you all, can the Treaties be revised and the national power extended.—(Applause and cries of "Treaty Revision for ever.")

After Viscount Aoki had ceased speaking several of the members called loudly for Count Goto, who, after a time, spoke as follows :—

Gentlemen,—I have nothing special to speak to you about. Viscount Aoki has told you everything that I would have said. But as you wish me to speak, I will do so. Until to-day I have not had a chance.—(Laughter.) I have been terribly bullied in the Diet by Mr. Tanaka.—(Loud laughter.) But that is purely a personal affair. Speaking seriously, the Government hopes to discharge all its responsibilities and to meet you next session with a good record. For my own part, I shall then be prepared to support an attack at the hands of you all, not at those of Mr. Tanaka alone. That is my resolution, gentlemen.—(Loud applause.)

Professor Toyama also made a speech in his usual humorous style, and after addresses from Mr. Iwasaki Manjuro and others, the party broke up.

### AN UNSETTLED QUESTION.

The correspondence which recently took place in this Settlement with reference to the Treaty Revision meeting of last autumn, appears to have been dropped just at the point where it began to have some interest. The journal in whose columns it appeared wrote a great deal of silly persiflage, evidently actuated by a desire to fix upon the *Japan Mail* a charge of having attacked the meeting in an unwarrantable manner, but inasmuch as it was quite apparent that the "honest" formulator of these charges had never read the *Japan Mail's* comments, or was incapable of understanding them, or had wilfully set out to misrepresent them, we did not taken the trouble to contradict him. The notion of pretending that the *Mail* had described the meeting as of "an ignominious type" was too absurd to be serious. In point of fact the meeting included nearly all the leading residents of Yokohama, and as to its thoroughly representative character there could not be the smallest doubt. It has been written of as a packed meeting, and some have said that the resolutions were rushed through by previous arrangement and without due consideration. Such criticisms are beside the mark, we think. A certain amount of preparation is necessary in the case of every meeting, if the projectors expect to pass any measure. Due public notice was given of the Yokohama meeting. Every one had the right to come, and discussion might have been raised had such a course appeared advisable. We do not think, indeed, that the resolutions were circulated with all the publicity claimed by their framers. No copy of them was sent to the newspapers, a significant omission, nor have we ever been able to discover that residents who would have been likely to take an opposite view

Digitized by Google

were furnished with any information whatsoever as to the nature of the proposals to be submitted to the meeting. However, that is not a point of great importance. As a representative gathering of foreign residents the meeting does not invite criticism, and, speaking roughly, the anti-Revision verdict recorded by it must be taken as the view of the majority of Yokohama residents. There were, indeed, many features open to strong criticism, as we showed at the time, but with one exception, the points discussed in the recent correspondence do not appear worthy of grave consideration. The exception, however, is interesting. Mr. Liscomb asked for a copy of the heading under which the Resolutions were sent to New York, or of the letter that accompanied them. It is wholly incredible that they can have been sent without a heading or covering letter. Why then, is information upon this point withheld? One of the chief objections to the methods adopted at the meeting was that no reasons whatever were given for the Resolutions. Has this omission been left unremedied to the present day? Surely not. On the contrary, it is generally rumoured that when the London Chamber of Commerce received the Resolutions, it asked for a statement of reasons, and that such a statement was prepared and forwarded. Where is it? Why should it be kept secret? It was doubtless written with every desire to be fair and accurate, and its compilers must have employed information which they believed to be entirely trustworthy. We fail to see why a document so important should remain private. If its arguments are convincing, let them be laid before the public.

---

### A STRANGE CHARGE.

A VERY singular incident has just occurred in Tokyo. On the 8th instant the *Nippon* newspaper published a document purporting to be a copy of a secret communication made by a Japanese to the former Chinese Representative in Japan. The date of the communication is February last, and with regard to the manner of its coming into the hands of the *Nippon*, it was given to the paper by one "Untosei," obviously a false name. The literary style bespoke a person deeply versed in Chinese. In fact the document was written so as to be intelligible to a Chinese reader. A highly educated Japanese can always write so as to attain that end, but this particular composition showed more than the knowledge of an ordinary Japanese classical scholar. Its contents were of a most startling nature. The Chinese Minister was informed that Japan had lost all her old spirit; that her people were no longer capable of fighting; that her administration was honeycombed with corruption; that her ships were decayed and her guns unserviceable; that her subjects were mere monkeys, and that the nation, if attacked by China, would simply put up its hands, and become a supplicant for mercy. No direct invitation to attempt the conquest of the country was given, but its condition was represented as encouraging attack, and there could not be the smallest doubt that the intentions of the writer were traitorous. It is scarcely necessary to say that the *Nippon* criticised the document in the strongest possible terms. It heaped epithets of scorn and wrath upon the writer, and gibbeted him as an object of universal execration. Of course this alone would have caused much excitement, but the great majority of the *Nippon's* readers would probably have concluded ere long that no Japanese could have been guilty of such a base act as to compose a document of the kind for the purpose of communicating it to a Chinese Minister, and that either the *Nippon*, or the original recipient of the memorandum had been hoaxed. Any such denouement was, however, effectually obviated by the course which the *Nippon* pursued, for it not only tore the document to pieces, figuratively speaking, but actually undertook to name the writer, calling him Mr. Tei. Now Mr. Tei is a well known Japanese who formerly occupied the position of Japanese Secretary of Legation and *Chargé d'Affaires* in Peking, and whose reputation as a Chinese scholar stands very high. By him certainly such a letter could have been written—speaking merely from a literary point of view—but whether he did write it, or would ever dream of writing it, is altogether a different question. The Tei family is of Chinese extraction. Its present representative, of whom we have just been writing, traces his descent direct from a celebrated Chinese General of former times. That a couple of centuries of residence in Japan and intermarriage with Japanese could have left any traces of Chinese patriotism in the family, it is hard to believe, but when evidence is diligently sought against a man, the limits of credulity are often stretched pretty freely. The *Nippon* asserted that from the description given of himself by the writer of the document—a description relating to the various offices held by him—his identity with Mr. Tei was fully established, and on the strength of this internal testimony an avalanche of opprobrium was heaped upon the unfortunate gentleman's head. But there are several Messrs. Tei. There is Mr. Tei Yeinei, the head of the family; there is Mr. Tei Yeisei, now an *attaché* of the Legation in Peking; there is Mr. Tei Yeibo, and there is Mr. Tei Yeikei, one of the two latter being an official in the Foreign Office in Tokyo. Which of all these was indicated by the *Nippon's* article? And not by the *Nippon* alone, but almost by the whole Japanese press. With exceptions so rare as to prove the rule, the entire journalistic fraternity of the capital took up the matter, and made the name of "Tei" stink in the nostrils of Tokyo. If there is one thing more than another execrated by a Japanese, that thing is disloyalty. The fealty that made the *Samurai* of old Japan hold his life at the absolute bidding of his lord, has developed into the patriotism of to-day, and when those folks who cheer to the echo every whisper of shedding blood or wielding iron in Japan's cause, are told that a man who held high office as a Japanese official has turned round, abused his country to a Chinaman, and encouraged China to attempt Japan's subjection, there is no moral thermometer capable of registering the heat of their indignation. One after another the phials of newspaper fury were poured upon the head of Mr. Tei, and in order, apparently, to place beyond all doubt the identity of the particular Tei referred to, the *Yomiuri Shimbun* raked up a story to the effect that Count Ito had sought to employ him as an interpreter at the Tientsin Conference, but found him too servile to the Chinese. On the 8th instant, as we have said, this thunder began to mutter, and very soon two of the Messrs. Tei Junior denounced the whole thing as a baseless falsehood. But this did not satisfy the newspapers. They drew attention to the fact that Mr. Tei Senior remained silent, and they thus fixed the libel beyond all doubt. Legal proceedings are now pending, it is said, and if there ever was a case calling for appeal to the Law Courts, this is one. If the *Nippon*, which set the thunder growling, has erred, a very severe penalty should be inflicted on it. For our own part, our knowledge of Mr. Tei Senior makes it quite impossible for us to credit the charge preferred against him. Moreover, we cannot conceive how such a document could have come into a newspaper's possession. The affair is on every body's lips in Tokyo at present, and its elucidation cannot take place too soon.

* * *

The above is the outline of the Tei affair, which is causing so much agitation in Tokyo at present. Our readers will doubtless be interested in a more detailed account of the document published by the *Nippon*. Dated last February, it was sent to the *Nippon* by a man signing himself *Untosei*, who did not comply with the ordinary journalistic condition by enclosing his real name and address. Nevertheless, the *Nippon* inserted the document. The writer of the latter introduces himself as a descendant of the famous champion of the *Ming* Dynasty, Tei Sei-kô (鄭成功) who, after making a gallant stand against the advancing troops of the present Manchurian Court, took refuge in the island of Formosa, and subsequently crossed to this country and settled down at Nagasaki, where his descendants served the Tokugawa Government as official interpreters. After holding office in various capacities under the Department of Foreign Affairs, the writer resigned his official post, and has since remained in obscurity, because his recommendations were disregarded by the Government. He then passes on to record his views on Japanese affairs, and in mysterious language urges the Chinese Minister to pay due attention to the old saying "a good general will, before all things, cause his enemies to fight among themselves." It is not easy to see the purport of this strange counsel, but the *Nippon* seems to think that the object of the memorialist is to persuade the Chinese Minister that the Japanese people are, or may be, divided among themselves. He then reviews the political history of the country, and narrates how the institutions of the *Tang* Dynasty were apishly copied by Japan; how the feudal rulers of Japan called themselves vassals of the Emperors of the *Ming* Dynasty; how, after a torpor of several centuries, the country awoke to find itself encompassed by the vessels of Europe and America, and how a band of desperate adventurers succeeded in pulling down feudalism and setting up Imperialism in its place. He argues that such a history proves the fickleness and levity of the people, and, again dealing in mystery, quotes the old saying that "a fickle people should be kept in a state of disorder." A disparaging picture is drawn of the mutability of Japan in adopting the civilization of the West, and it is stated that the wealth of the country is being gradually absorbed by the "bearded men" of Europe and America. In his endeavour to speak ill of Japan, the writer is not scrupulous as to facts. He even says that the war vessels and arms procured by her from abroad were old and unfit for use. "The people," he declares, "are so many sheep clad in tiger's skins; they are delighted at the sight of grass, but they shudder when they see a wolf." Speaking of the Government of the present era, he describes its principal members as entirely unfit for their posts, and alleges that their chief business has been to quarrel between themselves for the honey of office, and to enrich themselves at the expense of the starving nation. "It is their practice to shirk the responsibility of their office, and take refuge under the name of the Emperor, maintaining, as they do, that Imperial Ordinances are sacred and inviolable." The consequence is that the Government is distrusted and hated by the people. He then passes on to write about the Diet, and applies carping abusive terms to its members, calling them political adventurers who obtained votes by bribery, and men of low principles who are easily bought by the Government. The Diet, he continues, has thus forfeited the confidence of the nation. The Japanese laugh at the ignorance and cowardice of the Chinese, but Japan is in no condition to defend herself against an invading enemy. "Let those whom the Japanese regard as cowards come boldly with their fleets of war vessels; the Japanese will be at once cowed and only too glad to obey the commands of the invading forces." Such in effect is the general drift of the document. No wonder that great indignation has been roused against its alleged writer.

* * *

As to the authenticity of the document, there is room for doubt. It seems to us that the *Nippon* behaved rashly in publishing such a communication without even ascertaining the real name of the sender. Messrs. Tei Eibo and Tei Eikei, sons of Mr. Tei Einei, the alleged writer of the document, at once demanded that the article be retracted, but the *Nippon* declined, and published its reasons for believing in the authenticity of the paper. It says (issue of the 11th instant) that, although its practice is to take no notice of anonymous correspondence, it felt itself compelled to stretch a point in the case of this document. The sender, though declining to reveal his name, gave in his covering letter a circumstantial description of the manner in which the document had been ob-

Digitized by Google

tained, and there was, in the *Nippon's* opinion, an air of honesty about the account that precluded any suspicion of his being actuated by malicious motives. The *Nippon* offers three other reasons for its belief in the honesty of the informant. First, Mr. Tei is not a man of sufficient eminence in society to invite envy or hatred; neither is he rich enough to make enemies. Secondly, supposing that the purpose of the informant were to injure the reputation of Mr. Tei, the *Nippon* thinks it inconceivable that he should have taken the trouble to write such a long essay, whereas a mere report that Mr. Tei was a traitor would have answered the purpose. Thirdly, the memorial is written in such exceedingly good Chinese, and reveals such an insight into the affairs of the country, that it must have been composed by a scholar of high standing, and it is inconceivable that a man of finished education would debase himself to injure an obscure individual like Mr. Tei. Further the *Nippon* states that it is in possession of several facts about the doings of Mr. Tei, and will publish them when a proper occasion presents itself.

* * *

Our readers will probably agree with us that if these are all the reasons which the *Nippon* had for publishing the document, there never was a more reckless and less justifiable proceeding. It is impossible to read such explanations without astonishment. They amount simply to saying, first, that any charge, however heinous, brought against a man is to be credited if unfortunately he is not sufficiently conspicuous to warrant the idea of malicious attack; and secondly, that a person capable of writing in classical language must not be suspected of villainy or scheming. One thing is quite certain, that unless the *Nippon's* informant chooses to come forward, the paper cannot possibly prove that Mr. Tei wrote the memorandum, and its inability in that one respect will put it out of court.

* * *

Since the above was written a new character has been given to the affair by the publication, in yesterday's *Nippon*, of the following letter:—

SIR,—With reference to the statement made in your journal of the 8th instant that a certain Mr. Tei had addressed a document to our Minister Li, I have the honour to say, after examination, that nothing of the kind has occurred. I therefore beg that you will withdraw the statement.

(Signed) LU,
Councillor, Chinese Legation.

The *Nippon* is now in a pleasant position.

### THE LATE MR. SWIFT.

ACCORDING to present arrangements the body of the late Mr. Swift will be transported to the Episcopal Church in Tsukiji on Thursday night, and will remain there under military guard until the hour fixed for the funeral, namely ten o'clock of Friday forenoon. At that hour the funeral service will be performed, and the bier will then be carried to the railway terminus at Shimbashi, where the rites will end so far as Tokyo is concerned. On arriving in Yokohama the remains will be received by the Prefectural officials, and carried to the Cemetery, to be there temporarily interred pending transportation to the United States.

* * *

It appears that indications of heart trouble had been apparent for some time before the final attack. From the time of his influenza seizure at the commencement of the year, Mr. Swift complained frequently of a feeling of tightness across the chest, occasionally amounting to actual pain. If was supposed, however, that this trouble had its origin in muscular rheumatism. On the 8th instant, after having stood for more than two hours during the consecration service of the Church of the Resurrection, Mr. Swift returned home without partaking of the luncheon prepared in the mission buildings, his reason being that he felt faint and weary. Doubtless the strain of remaining so long on his feet, combined with the close atmosphere of the Cathedral—where over three thousand people were assembled, the windows not being opened until a late stage of the proceedings, and the fumes of incense and heat of the numerous candles helping to taint the air—over-taxed his strength and was highly imprudent under the circumstances. Mr. Swift had just entered his 63rd year at the time of his death. Born in Missouri in 1829, he went to California when about twenty-five years of age, and engaged in mercantile pursuits. Afterwards he took up the law as a profession, and before long his abilities and winning manners won for him a prominent place in the State. He became President of the Board of Trustees of the California State University, and about that time wrote two books which attained considerable popularity. Politics engaged a large share of his attention. He was elected a member of the Senate of California, and in 1889, he had the honour of being nominated for the Governorship of the State as Republican Candidate. Before this, he had spent some years travelling in Europe, and while in Paris, he had met, and contracted relations of a very friendly character with, Mr. Harrison, and when the latter became President of the United States, it was generally expected that Mr. Swift would become a member of the Cabinet, not alone because of his qualifications for the post, but also because the expediency of giving a portfolio, for the first time, to a representative of the Pacific slope was understood to have been recognised. This forecast was not realized, however, the President finding himself embarrassed by rival claims, but the nomination of Minister to Japan, a favourite post, was given to Mr. Swift at once. Independent in means, his political ambition does not seem to have been of a very absorbing nature, though his exceptional gifts as a speaker might have prompted such a career. As a barrister, too, he would undoubtedly have attained great eminence, but he always showed much fastidiousness in his choice of cases, and never placed himself at the beck and call of litigants. The recent death of Mr. Windom, Secretary of the Treasury, again brought Mr. Swift's name before the public as a probable addition to the United States Cabinet, but his untimely decease terminates these high hopes. Mr. Swift had no children. His widow happily has the consolation of her sister, Mrs. Norris', presence in this time of affliction.

### THE BANK OF JAPAN.

THE amounts of convertible notes and reserves in the Bank of Japan for the week ended the 7th instant were as follows:—

| CONVERTIBLE NOTES. | YEN. | RESERVES AND SECURITIES. | YEN. |
|---|---|---|---|
| Notes issued | 102,036,583 | Gold coin and bullion. | 24,993,710 |
| | | Silver coin and bullion. | 18,617,607 |
| | | Public Loan Bonds | 13,476,450 |
| | | Treasury Bills | — |
| | | Government Bills | 22,000,000 |
| | | Other securities | 8,848,005 |
| | | Commercial Bills | 58,425,266 |
| | 102,036,583 | | 102,036,583 |

Of the above total issue of notes, the sum of *yen* 7,600,276 is in the treasury of the Bank, 22,000,000 has been transferred on loan to the Government, and *yen* 72,436,307 is in actual circulation, the latter showing an increase of *yen* 673,903 as compared with *yen* 71,762,404 at the end of the previous week.

### THE INDEPENDENTS.

THE Independents, or Moderates, by whichever name they be called, are showing great activity. We gave in a recent issue an account of their new Club and its rules—the Kyodo Club. They have now elected their five Managers (*Kanji*), and have decided to hold a general meeting next June in Osaka. Meanwhile every possible step will be taken to secure associates. Mr. Suyematsu Kencho is going to stump the Tokaido districts; Mr. Aikawa Ryosuke will do Aomori, and Mr. Inouye Kakugoro will take the Sanyo and Sanin provinces. It would appear, therefore, that Mr. Inouye has fairly thrown in his lot with the *Taisei-kai*. He is a powerful addition to any party. More than 80 members of the House of Representatives are said to have inscribed their names in the Club's books, and it has been agreed that every associate shall pay 1 *yen* per month towards the expenses. Such a contribution will only pay for the dog that turns the spit, as the saying goes, but there are men of great wealth at the back of the *Taisei-kai*, and we presume that the Kyodo Club and the *Taisei-kai* may now be considered identical. A rumour is also circulated to the effect that an influential member of the Club—a certain Viscount—contemplates starting a big newspaper to be published in three languages, English, German, and French, which shall serve as the Empire's foreign organ. It is said that from two to three hundred thousand *yen* have been subscribed to a capital fund, but we confess that this journalistic part of the programme seems to us very apocryphal.

* * *

Meanwhile the Radicals (*Rikken Jiyu-to*) are by no means idle. On the 8th instant they held a meeting at the Tokyo office of the Party. A hundred and twenty members were present, and Mr. Kono Hironaka acted as President. The following resolutions were adopted:—"(1) A great meeting shall be held on the 20th of March in Osaka, and the representative members from all the districts shall be invited to attend in that city by the 18th instant (2) On the conclusion of the meeting the members shall distribute themselves throughout the provinces in order to spread the influence of the Party. The expenses of this campaign shall be borne by each district. (3) On the 15th instant a great lecture meeting shall be held in Tokyo, for the purpose of clearly defining the parliamentary policy of the Party. (4) The members of the Party in the various districts shall also organise lecture meetings to publish the aims and policy of the Party. (5) The members of the Party having seats in the Diet shall choose a certain number from among themselves to form a committee for conducting investigations into Administrative affairs, with a view to the uses of the next session of the Diet." So Japan is now fairly in the clutches of political agitators.

### OFFICIAL CHANGES.

THE resignation of Viscount Tanaka, Chief of the Metropolitan Police, has been accepted. He is gazetted a Court Councillor. Rumour is still uncertain as to the precise cause of this change, but the general opinion is that, as explained by us in a previous issue, the Viscount could not reconcile himself to the reductions made by the Diet in the appropriation for his Bureau. If the Diet had been allowed to follow its own courses, the Metropolitan Police Bureau would have ceased to be a separate Department, and become a portion of the municipal organization. We do not know whether that would have driven Viscount Tanaka out, but since he may justly claim that no section of the Executive has done its work better than his, he would probably have resented any radical change. At any rate, if the general impression be correct, he denies the possibility of carrying out such an economy as seventy thousand *yen* without impairing the efficiency of the force, and if he cannot be at the head of a thoroughly efficient Bureau, he prefers to stand aside altogether. There are different estimates of efficiency, and apparently the estimate of the Government is not the estimate of Viscount Tanaka. A commanding officer who brings his regiment to a high state of discipline and capacity, is often utterly intolerant of interference. It may, perhaps, be reasonable to hope that a lower standard than Viscount Tanaka's will suffice to preserve good order in the capital. But under any circumstances we cannot help regretting sincerely that the first consequence of the reduced Budget should be the resignation of so able an official. His successor is not yet appointed.

* * *

Another change of some importance is the appointment of Mr. Hanabusa Yoshitada to be Vice-Minister of the Imperial Household, the former incumbent of that post, Count Yoshii Tomozane, becoming an Officer of Service (*Goyogakari*) in the same Department. Mr.

Digitized by Google

Hanabusa was Japanese Representative in Korea at the time of the affair of 1884, when, the Legation being attacked, its inmates, with the Minister at their head, were obliged to force their way through the city and march to the sea-coast. The incident caused considerable excitement, and gained great credit for Mr. Hanabusa.

### ADJOURNMENT OF ASIATIC SOCIETY MEETING.

A MEETING of the Asiatic Society was held on Wednesday afternoon in Tokyo. There were only half a dozen persons present. Mr. N. J. Hannen, president, took the chair. The minutes of the previous meeting having been taken as read, Mr. Hannen said—I regret to inform you that owing to the deeply lamented death of the Minister for the United States of America, Mr. Van de Polder is unable to read his paper. Under the circumstances, out of respect to the memory of the late Minister, we have thought it better to adjourn this meeting until Tuesday next at the same hour. We feel that we are only doing what is right in showing the deepest respect to one who has been amongst us so great a friend and so much esteemed. At the same time the Council wish to express their regret that it has not been in their power to inform the members of the society before, so that those who have come should have been saved the trouble of attending. Under the circumstances, then, the paper will be read, we hope, and the coins will be exhibited, on Tuesday next at the same hour, 4 o'clock. Mr. Chamberlain announced the election as a member of Mr. G. J. Schurr. The meeting then adjourned.

### THE TRUST AND LOAN COMPANY OF CHINA, JAPAN, AND THE STRAITS, LIMITED.

THE following Report was presented to the Shareholders at the First Annual General Meeting, held on Thursday, the 12th day of February last in London :--The directors have pleasure in presenting to the shareholders the first annual report, with accounts duly audited. The accounts are made up for only ten months in the East, viz., to 31st October, 1890, but for London they embrace the period from the formation of the company on 6th December, 1889, to 31st December, 1890. As stated at the statutory meeting, the preliminary expenses incurred in the formation of the company were paid out of the premium received on the issue of the share capital, and the balance, amounting to £45,000, has been carried to reserve. The net profit, after deducting all expenses at head office, branches and agencies, including the remuneration of directors and the members of committees, agents' commission, and after allowing also for payment of interest on fixed deposits and income tax on profits, amounts to £87,099 5s. 2d. The directors propose to declare a dividend of 16 per cent. on the ordinary shares, and of £8 per share on founders' shares, and to place £55,000 to reserve, thus increasing it to £100,000, leaving a balance of £2,111 15s. 2d. to be carried to new account. In view of the large extension of the company's business, the directors consider it advisable to propose a further issue of 100,000 ordinary shares of £10 each, on which they propose to call up 25s. per share, and to give the existing holders of ordinary shares the option of taking up the new shares at such premium as may be resolved upon. It is considered by the directors desirable to change the name of the Company into "The Bank of China, Japan and the Straits, Limited," as a more appropriate designation, although the business of the company will continue on the lines which have hitherto been followed. Resolutions to this effect will be submitted to the extraordinary meeting convened in the notice. The period during which the company has been working is regarded by the board as indicating very satisfactorily the important character of the field of its operations, and they are of opinion the prospects before the company are most promising.

### TESTIMONIAL TO DR. THORNICRAFT.

THE Committee representing the Kobe community in this matter, waited on Dr. Thornicraft by appointment this afternoon (10th instant) at 2 p.m. After briefly explaining the object of the interview, Mr. Enslie, as Chairman, said :—

Dr. Thornicraft.—We wait on you to-day, with mixed feelings of pain and pleasure, for while being gratified at appearing as the spokesmen of this cosmopolitan Committee on the present occasion, we, in common with those we represent, much regret that this is caused by the prospect of your early departure.

During your long residence in this part of the Empire of Japan you have endeared yourself to all who have had the good fortune of knowing you, and the residents of Kobe desire to avail themselves of your approaching departure to give expression to the sentiments of respect and esteem entertained toward you as a friend and as a physician.

In the zealous and indefatigable discharge of your professional duties, the obligations incurred by us are too great for words to express, while our social intercourse with you has been such that your departure creates a void in the hearts of all, which it will be hard to fill.

A movement has been started to present you with some slight token of our sincere regard, but as devotion to your profession in connection with the requirements of this community has, until quite recently, made your arrangements very uncertain, it is impossible to carry out this intention before your departure, and we shall therefore take an early opportunity of communicating with you in writing.

Hoping that the relaxation you are about to take will be both pleasant and beneficial, we shall be greatly pleased if circumstances allow you to to return to us.—*Kobe Herald.*

### PETITIONS.

THE total number of Petitions presented to the House of Peers during the session just ended was 1,053, of which only a fraction received attention. As our readers are probably aware, there is a Memorials Committee in the House, and all such documents are examined by it in the first place. Four hundred and twenty-nine were thus examined, and from among them the Committee selected 63 for presentation to the House, rejected 350 as not complying with the prescribed conditions, and decided that 16 should not be submitted. Of the fortunate 63, only 41 were actually reported to the House. Four hundred and sixty-seven, though handed to the Committee, could not be examined for lack of time, and 157 did not reach the Committee at all. That only 79 Petitions out of 429 should have been prepared in such a manner as to comply with the rules, is even more remarkable than the fact that scarcely four per cent. of the total number of Petitions sent in should have reached the House. The Representatives were kinder to petitioners, for, finding that no time was available for considering the Petitions which had undergone examination at the Committee's hands, they sent them on to the Government by scores and fifties.

### A STORY OF CROWN JEWELS.

WE take this from a home journal:—A very curious action has just been concluded in the court of the Recorder of Rangoon. The plaintiff was one of the wives of Mindoon Min, King of Burmah, Thebaw's father and predecessor, and is known as the Limban Queen, and she claimed as sole heiress of her daughter, the Sawlin Princess, to be entitled to a large amount of jewellery deposited with the defendants in 1878 under unusual circumstances. The Princess, it seems, was a great favourite with her father, King Mindoon Min, who made her large and frequent presents of gems and jewellery of all kinds. In 1878 Mindoon Min was on the point of death, and it was known that confusion in the palace would follow on that event. It was apparently foreseen that his successor, Thebaw, would, as in fact he did, murder most of his relatives at once, and while the King lay dying special measures for guarding the palace were taken. The Limban Queen and her daughter, the Sawlin Princess, dreading what the near future had in store for them, concerted measures to get the jewels of the latter out of the palace to a place of safety, where they would be accessible in case of need later on. For this purpose they took into their confidence certain bazaar dealers who had access to the ladies' quarters to sell their wares, and by their aid succeeded in getting out all the jewels, packed to look like sweetmeats. These dealers and one Aga Khorasani, a Mahommedan merchant, were the defendants. They absolutely denied any deposit of the kind, but the Recorder found against them on the facts, and decided that about 3,000 precious stones, which were specified by weight and value in a list made at the time in the palace, and retained ever since by the Queen, had in fact, been placed in their charge immediately prior to Mindoon Min's death, and in anticipation of that event. The Princess died a few months after. The Queen, her mother, remained in prison until the British troops occupied Mandalay in 1885, when she was, of course, released. All this time she heard nothing of the jewels, for she had no opportunity of doing so, and obviously did not desire to have them returned. The dealers with whom they were deposited left Mandalay soon after Thebaw began to reign; but on her release the Queen inquired after them and found them in Rangoon, when, as already stated, she was met by a blank denial that such jewels had ever been deposited with them. But here the Judge found against them, largely on the evidence that nine years ago, and three years after the deposit, one of the defendants had in his possession a large ruby, cut in the shape of a wild duck, which was described in the Queen's list as having been handed over to the defendants in the sweetmeat-boxes in 1878. A decree of restitution was therefore made against all the defendants except one, in regard to whom the action was held barred by the Statute of Limitations. Subsequent to her release from imprisonment the Queen was prevented from suing for five years in consequence of her poverty.

### A WONDERFUL STORY.

AMONG the items of news gravely published by the *London and China Express* is a story that one Professor Frederick Stein, who died on the 28th of January in the Charity Hospital on Blackwell's Island, had married the sister of the Emperor of Japan in 1878. When he contracted this wonderful alliance he was a Professor of Foreign Languages in the University of Tokyo. His marvellous career did not end there. "Not long afterwards he became engaged in a love affair with a lady of honour at the Japanese Court, and was expelled from the country." The same highly trustworthy authority informs us that the marriage with the Emperor's sister "created a great sensation at the time." There have been a great many ridiculous fables published about Japan, but assuredly this takes the palm. What strikes us as supremely funny is that a newspaper which solemnly undertakes, from time to time, to discuss Japanese politics and Japanese affairs with the authority of an expert, should show, by inserting such crazy absurdities, that it knows as much about Japan as it does about the other side of the moon.

### THE SUDBURY NICKEL MINES.

A REPORT on the Sudbury Nickel Mines has been drawn up by commissioners, who were appointed by the United States naval authorities for that purpose. The report states that from the surface indications and the shafts already sunk, there appears to be an amount of mineral which cannot be exhausted by the present generation, and estimates the tons of ore above the surface of the ground as 650,000,000. With reference to facilities for treating the ores, which do not require the admixture of fluxing substances, it is stated that "the dead pine timber found in great abundance in the neighbourhood, and which can be delivered at the furnace at $1 80c. a cord, is a good fuel for roasting, though hardwood would be better, but owing to the fusible qualities of the ores and the intermixed rock, the pine answers the purpose. Coke is hence the only material that has to be brought from abroad. This is procured from Pittsburgh, and can be delivered at the works at $7 a ton.' The amount of ore taken from the mines up to the 1st October last is about 175,000 tons. The daily crushing capacity of the machinery at work on the ground is about 1,750 tons, and the daily furnace capacity is about 100 tons.

### THE "FAREWELL CUP" SAILING RACE.

A DECISION has now been given in reference to the race for the Farewell Cup, sailed on the 4th and 18th of October last. The delay has probably arisen in consequence of the point raised having been referred to home authorities. It

Digitized by Google

may be recalled that the incident which gave rise to the question occurred on the 18th, when the boats were racing over the Club's longer course, round the North Mark Lightship, and home. The North Mark, a sampan, was riding with a considerable length of rope out, the effect of which, of course, in the strong tide-way, was that for some distance from the boat's bow the mooring line was near the surface of the water. When, therefore, *Maid Marion*, passing well clear of the mark and at such a distance as would have enabled her also to clear a mooring line under ordinary conditions, caught the rope with her centreboard, and hung there until the people in the sampan slackened it, a foul was established and the officer of the day, Mr. Beart, proceeding on the strict reading of the rules, declared her disqualified, thus anticipating a protest lodged by *La Belle* for the same reason. But it was admitted pretty generally, and by none more readily than by Mr. Beart, that the disqualification bore very hardly on the *Maid*, and that a good deal could be said on the other side. The point, being an exceptional one, was, we believe, referred home. At any rate Mr. Averill has just written to Mr. Owston (Hon. Secy. of the Sailing Club) intimating, as the joint decision of Messrs. Beart, Campbell, and himself, that *Maid Marion* is entitled to first place and therefore to the cup. This verdict will, no doubt, be endorsed by most members of the Club.

### THE AMERICAN RESIDENTS OF TOKYO AND THE LATE MR. SWIFT.

THE demise of the Minister of the United States was made the subject of a meeting of American citizens in Tokyo, held yesterday in the Union Church, Tsukiji. Dr. D. B. McCartee, was called to the chair, and Messrs. M. S. Vail and J. H. Wigmore were appointed a Committee to draw up resolutions appropriate to the object of the meeting. The resolutions reported by the Committee and adopted by the meeting were as follows :—

At a meeting of the citizens of the United States of America held in the Union Church, Tsukiji, on March 12th, 1891, the following minute was adopted :—

Resolved, that we desire to give expression to the feelings of deep and unfeigned sorrow called forth by the heavy bereavement which has so suddenly befallen us in the death of our distinguished and highly accomplished Minister Plenipotentiary in Japan, the Honourable John Franklin Swift.

He has been taken from us in the fullness of his powers and in the midst of his usefulness. We feel moved to pay our tribute of admiration and respect for the eminent and patriotic services which he has rendered our country both at home and abroad. He has displayed abilities and has accomplished results which have secured him a lasting remembrance among his own countrymen, and have justly earned the highest encomiums from eminent diplomatists and statesmen of other lands.

Resolved also, that we desire to put on record our heartfelt appreciation of the genial disposition he has uniformly manifested, and the prompt and sincere efforts which he has always shown himself ready to make in the interests of his countrymen. We shall hold him always in warm but sorrowful remembrance. We desire also to assure his bereaved wife and sorrowing household of our deepfelt sympathy in their great affliction.

Resolved, also, that a copy of this minute be transmitted to his family.

(Signed) D. B. McCARTEE, Chairman.
M. S. VAIL, } Secretaries.
J. H. WIGMORE, }

It was further decided by the meeting that the Church in which the funeral services were to be held should be appropriately decorated, and that the American citizens residing in Tokyo should be invited to contribute to the expense.

### THE BUDGET.

IT will be seen from our report that the House of Peers has passed the Budget as amended by the Representatives and approved by the Government. The opposition, headed by Viscount Tani, Mr. Miura Yasu, and Viscount Kiooka, made a tolerably resolute fight, but were outnumbered by more than two to one. The great majority of the Peers were evidently resolved to bring the Budget into existence. They were obliged to depart very considerably from their usually short hours of session, but they showed themselves well equal to the occasion. Count Ito's presence on Friday in the President's chair materially facilitated the progress of business, but he was still too unwell to risk any extraordinary exertion, and when the House re-assembled in the evening, it came once more under the presidency of Count Higashi-Kuze. We have no doubt that the self-sacrificing course adopted by the Peers in this matter will receive the universal approval of the nation.

### RESIGNATIONS.

THE *Tokyo Shimpo* draws attention to the exceptional number of resignations now under discussion. It gives the following list, which includes, as our readers will see, some resignations that have been already accepted :—

Count Ito resigns the Presidency of the Upper House and the post of Privy Court Councillor.
Mr. Nakajima resigns the Presidency of the Lower House.
Mr. Inouye Ki resigns the Chiefship of the Law Compilation Bureau.
Mr. Uyemura resigns the Presidency of the Administrative Court.
Mr. Ozaki Saburo resigns the Chiefship of a Section of the Law Compilation Bureau.
Viscount Tanaka resigns the Chiefship of the Metropolitan Police.
Mr. Mayejima resigns the Vice-Ministership of the Department of Communications.

### THE ARTICLES REMAINING FROM THE INDUSTRIAL EXHIBITION.

TO-DAY is the last day for viewing the articles remaining unsold from the Industrial Exhibition of last year. They are to be seen at the *Kogyokan* (Industrial Hall), at Uyeno. The number of these exhibits is over thirty-five thousand, and they consist, for the most part, of porcelain, lacquer, and bronze. Several of the specimens are valued at three or four hundred *yen*, and some go as high as a thousand *yen*. The drawing of the lottery commences to-morrow (11th) and will probably be concluded by the 15th or 16th instant. Nothing more has been heard of the suit said to have been instituted against the promoters of the lottery, so we presume that it did not come up for hearing. We have always understood that lotteries in Japan are illegal only when there is a possibility of drawing a blank, whereas in the case of the Exhibition Lottery, every subscriber receives something for each ticket.

### THE VICTORIA PUBLIC SCHOOL.

THE Victoria Public School is, we learn, about to lose the services of Mr. Hinton. It was on Mr. Hinton's fortunate presence in Japan that the founders of the School built their first hopes of success. The School Committee could not have reasonably expected that the services of such an able man would have been available had it been necessary to seek a head-master through ordinary channels. But Mr. Hinton happened to be on the spot, and consented to take charge of the School for an exceptionally small remuneration. His loss will be proportionately severe. A man of high attainments, who possesses the knack of winning the affection as well as the respect of his pupils, is as rare as he is valuable. Mr. Hinton has accepted service, we understand, at one of the Japanese Upper Middle Schools, and we sincerely trust that his career in his new sphere will be not less successful that he deserves.

### COUNT YAMAGATA.

THE inability of the Minister President of State to take part in any of the functions connected with the closing of the Diet, has given rise to a rumour that his indisposition is of a serious character. We are happy to be able to say that such is not the fact. The Minister's attack of influenza has been severe, but no grave complications have supervened, and it is now only a question of recruiting strength after a long bout of fever. The behaviour of the influenza has been remarkably uniform in the case of men over forty-five years of age. Instead of developing high but brief fever, they have suffered for days from fever of medium acuteness and more or less typhoidal affinities, great prostration naturally resulting. It was so with Viscount Kabayama, and it has also been so with Count Yamagata.

### NEWSPAPERS IN CHINA.

JAPANESE intelligence from China is to the effect that the Chinese are growing tired of leaving foreigners to control the only Chinese newspapers published in China, and that a movement is on foot to start two journals under native ownership and direction. One of the projected newspapers is to be called the *Kwayo Nippo* (*Hwayang Chihpao*), and its owner's name is Hitsu Gyokuyen (Pih Yu-yuen); the other is to be the *Geirin Shimpo* (*'Ilin Sinpao*), its owner being Ko Daichi (Kao Dach'). The story does not extend to details as to place of publication, but we gather that Shanghai is contemplated. Imagine Tientsin with its seven hundred thousand inhabitants, and one Chinese newspaper, the *Shi-pao*, owned and directed by foreigners.

### CHINA TRADERS' INSURANCE COMPANY, LIMITED.

THE report presented to the shareholders at the twenty-fourth ordinary meeting, was as follows :—The Directors have now the pleasure to lay before the shareholders a statement of the Company's Accounts for the year ended April 30th last. The net premium earned amounts to $653,507.45, and the working account shows a balance at credit of $404,929.49, which sum the directors recommend be appropriated in the following manner :—A dividend of 18 per cent. to shareholders, $108,000.00 ; a dividend of 15 per cent. on contributions, payable to all contributors of business, whether shareholders or not, $92,000.00 ; to be carried to new account, $204,929.49.

### THE BOMB OF OCTOBER 18TH, 1889.

WHEN Kurushima cut his throat after throwing the bomb that shattered Count Okuma's leg, all sorts of surmises found expression as to the instigators of the crime, and the source whence the missile had been obtained. By and by suspicion feel upon one man after another, but finally two, Umehara Kenzo and Watanabe Issaku, were arrested and held in custody as implicated in the affair. More than a year has now elapsed, but it appears that these men have not yet been finally placed on their trial. Brought up time after time before a magistrate, they have been remanded on each occasion at the request of the police. A case has, however, been at last made out against them. They are to be tried within a few days in the Third Criminal Division, Tokyo, before Judge Yamagawa.

### TO SHIPMASTERS AND OTHERS.

WE are requested to make the following announcement :—Gun-practice at any of the forts in Miura-gori, Kanagawa Ken, will in future be carried on as follows :—

1.—A warning gun will be fired from the fort, on the day when gun-practice is to take place there.

2.—A red-flag will be hoisted in a position to be plainly visible during the practice.

3.—Should guns be discharged towards the sea, buoys carrying red flags will be placed at several points, in order to show the direction of the shots and the limit of the range.

4.—Should the target be placed on shore, a red-flag will be hoisted in the vicinity of the same.

### DEATH OF THE JAPANESE REPRESENTATIVE IN KOREA.

ON the 10th instant news was received in Tokyo of the death of Mr. Kawakita, Japanese Representative at the Korean Court. Mr. Kawakita had only been appointed a very short time previously. He had scarcely taken up the duties of his post when lung trouble, from which he had long suffered, developed dangerous symptoms, and carried him off on the 8th instant. He served formerly in the Army, and held the rank of Major.

### THE NEW BUILDINGS OF THE PATENTS BUREAU.

SOME surprise may have been occasioned by the suggestion recently made in the Diet as to the

Digitized by Google

sittings of that body taking place in the new buildings of the Patent Office. The marvel, however, will cease to exist in the mind of anyone who sees the imposing pile now rising to completion on the lately vacant ground opposite the Seiyoken Hotel, in Tsukiji, where in future the Patent Office will be situated. The work is being carried out by the Tokyo Doboku Kaisha, and, so far as a cursory view justifies a conclusion, it will reflect high credit on all concerned,

### THE HALF-BRED GRIFFINS.

A CURIOUS paragraph appears in Tuesday night's *Herald* in reference to the half-bred griffins, which have arrived in Tokyo. They are stated to be "nothing like what they have been represented"—that they . . "looked anything but like race ponies." Who ever saw a mob of griffins that did look like race ponies? Then "most of them appeared to be only half-bred and some even quarter-bred." The Argus-eyed gentlemen who have the temerity to venture into fractions on the amount of blood to be seen through a winter coat like unto a Leicester fleece, may doubtless believe in their own judgment, but judges of horseflesh do not display quite so much assurance. Then they are "not only rough looking," but "small in stature." Perhaps they were expected from the bleak north with coats of satin; at all events they will look smaller when they are clipped. But the curious statement follows, that—"several of the subscribers and two of the Committee of the N.R.C. were present, and at first emphatically refused to take them." This was rather an extraordinary proceeding, seeing that a contract had been entered into, and that the majority of the subscribers were not present. At any rate, although the reason is not stated, the *emphatic refusal* collapsed, and the ponies were drawn, two being rejected and put up at auction. As an instance of judgment in the case of youngsters, under similar circumstances, one of the best ponies that ever looked through a bridle in this country was "rejected" as a griffin, and subsequently trained. "The result of the subscription," the paragraph goes on, "has been very unsatisfactory, and is likely to deter foreigners from again entering into such a speculation." One would imagine that to enter into a contract and then "emphatically refuse" to carry it out would be about the best way to be deprived in future of the chance of "entering into such a speculation;" in which case the members of the N.R.C. would have to revert to the "unlovely packhorse," or to the importation of Mongolians that have been "added to the list," as Rule No. 2 has it, to "improve the breed of horses." After all these complaints, the paragraph winds up:—"On the other hand, it must be borne in mind that the ponies from the Hokkaido have had a long tramp through the snow, not to mention the voyage over, which would naturally make them appear more ungainly than they really are. Probably after a few days' rest and good food they will look very different animals." It is quite true that these ponies were referred to last year as a "very superior lot." This is nothing new. "'Twas ever thus." What appears probable is that the judgment of those who described the animals as a "very superior lot" is as wide of the mark in one direction as is the more recent verdict in the other. There may not be a Dublin, a Nikko, or a Starlight in this lot, but how many of the like have there been since General Saigo's handsome chesnut first faced the starter?

### NIPPON RACE CLUB.

WE are requested to state that the following alterations have been made in the spring meeting programme of the N. R. C.:—

First day—Race No. 1. After "Subscription Ponies" read "and Ponies which ran, but did not win at the Autumn meeting, 1890" 7 lbs. allowance.

Second day—Race No. 4. The conditions will read: For Japan Subscription Ponies of 1889 and 1890 Weight as per scale. Previous Winners, 7 lbs. extra for one race, 10 lbs. for two or more races. Once round.

The dates fixed for the meeting are Tuesday, Wednesday, and Thursday, April 28th, 29th and 30th. Entries to be sent to the Honorary Secretary, No. 236, by 4 p.m. on Wednesday, April 8th.

### COUNT INOUYE.

COUNT INOUYE returned to Tokyo yesterday morning. Doubtless his re-appearance in the capital will set the tongues of the political gossips wagging. The fact of his having remained in seclusion so long as the Diet was sitting will be construed in all kinds of ways, and mystery-mongers will decline to be satisfied with the true explanation that, even though not in office, the Count's presence in Tokyo exposes him to a perpetual fire of query and consultation, which would probably have proved exceedingly irksome during the critical time just ended. He doubtless preferred to be absent at such a season, and if he comes back now, it is because Tokyo is not without attractions of its own in the early spring.

### COUNT ITO.

THE talk of Count Ito's resigning the Presidency of the Upper House is again renewed. Some say that he desires to proceed as Minister to China; others that he merely purposes travelling in Japan. But all agree in asserting that he has either sent in, or is on the point of sending in, his resignation. We do not think it at all likely that, under any circumstances, the Count will retain the office of President of the House of Peers. He declared from the first that his acceptance of the post would be only temporary, and he generally means what he says.

### SIR R. RENNIE.

SIR RICHARD RENNIE will not pay a visit to Japan on his way home, to the great disappointment of his many friends in this country. His present intention is to leave Shanghai by the French mail of April 4th, and to proceed direct to Europe. He says, in his own pleasant way, that if he came here, he should certainly be tempted to linger, whereas there are reasons for his presence in London in the middle of May. We can only hope that he may hereafter find an opportunity to come and spend some months in a land where he is so universally liked and respected.

### MR. HOEHN.

IN recognition of services of Mr. W. Hoehn in the Training School for police officers, Messrs. Tamba, Uchimura, and more than three hundred others who were under his instruction while at the school, presented to him a set of armour by Myochin, a pair of swords manufactured by Norinaga, and the bâton or staff of a commander-in-chief of the ancient army of Japan. It is stated that Mr. Hoehn was greatly pleased at receiving from his late students such a friendly recognition of their connection, and he so expressed himself in a letter of thanks.

### AN INFERENCE.

THE *Hyogo News* draws a peculiar inference from Viscount Aoki's speech in the House of Peers. "The Japanese," it writes, "are to have full rights to levy customs, but foreigners must not trade at other than the open ports, no coasting trade being allowed." Does the *Hyogo News* really imagine that "coasting trade" means trade carried on at places on the coast? We cannot conceive that it should be guilty of a misconception so extraordinary. Yet, if not, how are its remarks to be interpreted?

### MRS. BINGHAM.

NEWS has been received in Tokyo of the death of Mrs. Bingham on the 31st of January. She had been ailing for some time, and no hope of restoration to health at her advanced age could be entertained. Mrs. Bingham's life in Japan was a round of quiet unostentatious acts of kindness and charity. Worthy wife of one of the noblest men who ever fought the battle of international philanthropy, our sorrow for her death is embittered by the thought of what he must suffer by the separation.

## *THE SPIRIT OF THE VERNACULAR PRESS DURING THE WEEK.*

The vernacular press has been, during the week, chiefly occupied in reviewing the labours of the Diet in its first session, discussing the present situation of the Cabinet and of political parties, and biding farewell to the dispersing members of the Diet. Another subject that has claimed a large share of the attention relates to a memorial alleged to have been presented to the Chinese Minister by Mr. Tei Yeinei.

* * *

The closing cerenomy of the Diet was performed on the 7th instant in the *Homei-den* in the Imperial Palace. None of the papers express entire satisfaction with the labours of the Diet during the session; but even journals that distinguished themselves by unfavourable criticism of the members of the Diet, now admit that, with all its shortcomings and blunders, the Legislature has acquitted itself in a creditable manner. The papers in favour of the Extremists would have spoken more highly of the Representatives had they persisted in maintaining an uncompromising attitude towards the Ministry, and thus brought about the dissolution of the Diet. But even these papers are forced to admit that the ultimate reductions agreed upon between the Cabinet and the Diet, though falling short of what they had originally proposed, are better than no reductions.

* * *

The *Mainichi Shimbun*, which, as the organ of the Progressionist party, is one of the warmest supporters of the Extremists, observes that, though the session just ended has not been free from some ridiculous blunders, due allowance must be made on account of the infancy of the representative system of Government in Japan. Viewing things from this standpoint, it must be admitted, continues our contemporary, that the first session of the first Diet in an Oriental State has ended in a manner far more satisfactory than many people would have expected. The *Mainichi* is not satisfied with the reductions effected in the Budget, but, inadequate as they are, the Diet must be thanked for them, because even such reductions would not have been possible had there been no Diet.

* * *

The *Jiji Shimpo* congratulates the country on the happy ending of the first session, but expresses strong disapproval of the conduct of the Diet in relation to certain commercial subjects. It claims that the members showed themselves entirely indifferent to the interests of the commercial class, and it attributes such a state of things to the circumstance that most of the Representatives have little knowledge and experience of the business world, their attention having hitherto been entirely occupied with political questions. The *Jiji* hopes that they will gradually mend their ways and comply with the wishes of the business section of the community.

* * *

The *Kokkwai* is glad to be able to say that Japan may well be proud of the first session of her Diet. The amount of work done has not been large, but the Japanese nation is now fully entitled to the honour of being the first non-Christian and non-European race that has successfully introduced a representative government. In another article, the Tokyo paper observes that, apart from political work, the first session of the Diet has been productive of wholesome results from social points of view. One of such good results has been the pulling down of the social barriers between official and non-official classes.

* * *

The *Choya Shimbun* speaks of the Diet in the most appreciative tone. That the first session has been so free from mistakes and errors, is attributed by our contemporary to the wisdom and forethought of the statesmen who have guided the nation in its career of progress since the Restoration. The

Digitized by Google

Local Assemblies which have now existed for more than ten years, have given the people an excellent training preparatory to the introduction of constitutional Government. On the other hand, the Senate has been the means of educating a class of functionaries who now form the strength and ornament of the House of Peers. Thus the smooth introduction of a parliamentary Government in Japan is, in the *Choya's* opinion, due in no small degree to the wise measures of preparation worked out by the Government of the Restoration.

* * *

Formerly it was the universal practice among literary men in Japan to write something, either in verse or in prose, in honour of a friend starting on a journey. In pursuance of this time-honoured custom, the Metropolitan papers have addressed farewell articles to the dispersing members of the Diet. Journals that sympathized with the Moderates address the Representatives in a more or less appreciative tone. But the *Kaishin-to* and the *Rikken Jiyu-to* organs betray an ungracious mood. They recommend the members to go home and consider whether they have been true to the pledges they made to their electors. It is evident that these papers principally address themselves to the members who took exception to the Budget Committee's report, and in particular to the seceders from the ranks of the *Rikken Jiyu-to*, whose opportune movement saved the first Diet from the probable calamity of either dissolution or the non-existence of the Budget. The *Yomiuri Shimbun* even goes so far as to call upon the electors to examine whether their respective Representatives have fulfilled their promises, and in case a verdict to the contrary is pronounced, to demand their resignation. For, our contemporary argues, the constituencies ought to possess not only the right of electing, but also that of dismissing, their Representatives. The *Kaishin-to* papers are particularly enthusiastic in giving the electors advice of this nature. Disappointed in their hope of a general re-election, the members of that party, say some people, now set their papers to issue inflammatory articles, for the purpose of compelling weak-minded Representatives to step aside in favour of bolder spirits of the Progressionist Party.

* * *

Apparently the position of the present Ministry is now very much stronger than before. It has had to comply with reductions of over six million *yen*, but of this sum the vital part only amounts to about four million *yen*. Still, there is talk of some changes in the *personnel* of the Cabinet Ministers, it being confidently stated that Count Yamagata is bent upon leaving his post. His probable successor is expected to be Count Saigo. But for the present at least, there is no indication of this forecast being realized.

* * *

The *Hochi Shimbun*, reviewing the present position of the Cabinet and political parties, observes that the parliamentary warfare of the first session has resulted in a victory for the Government. There is, however, one element of uncertainty in the position of the Yamagata Cabinet, namely, that the Ministry has to effect, on its sole responsibility, the changes necessitated by the reductions voted in the Budget. Whether the Cabinet will continue to be master of the situation or not, must depend upon the manner in which these changes are accomplished. Had it agreed with the Budget Committee's report, there would have been no necessity for the Administration to take upon itself such responsibility, since all the required changes were indicated, and the Government would have simply had to put them into practice.

* * *

The *Rikken Jiyu Shimbun*, writing on the same subject, remarks that the present Minister President appears at first sight to be happily circumstanced, since he has obtained a decided victory over his opponents. But his position may in reality be far from agreeable. Being himself in some respects a creature of clan influences, he is not perhaps uninfluenced by the weight of personal considerations inseparable from clan Government. Statesmen backed by strong clan support may be seeking to succeed him as Minister President. Others, perhaps, may be plotting to overturn his Cabinet. The *Rikken Jiyu Shimbun* advises him to use his power for cleansing the official world of all the evils of clan Government. If he should prove himself unequal to such a task, pity and commiseration are all that he can seek.

* * *

As to the political parties, they have arranged themselves into two camps for all practical purposes. The *Taisei-kwai*, the National Liberals, the 29 seceders from the *Rikken Jiyu-to*, and the *Jichi-to* have formed an alliance under the name of the *Kyôdô* Club. On the other hand, the *Kaishin-to* and the *Rikken Jiyu-to* constitute another confederation. There is talk of the National Liberals adopting some daring plan to increase their influence, and there is also a proposal for the open amalgamation of the *Rikken Jiyu-to* and the *Kaishin-to*. In the opinion of the *Hochi Shimbun*, the latter step would be rather premature. The two parties are now on good terms, and in course of time, their alliance will gradually and insensibly grow into amalgamation, For the present, the *Hochi* recommends them to restrict their efforts to the maintenance of friendly relations at their head-quarters in Tokyo, and at local centres in the provinces.

* * *

The *Kokkwai*, conspicuous for its dislike of the *Kaishin-to*, observes that that party is certainly doomed to extinction, for how can a party maintain its permanent existence after a series of ignominous defeats such as the *Kaishin-to* has sustained in recent years? It has now an extremely injurious record of having endeavoured to encroach on the prerogatives of the Emperor. Moreover, its conduct in the late session confirmed the general opinion that its policy is under-handed and selfish. The time is thus near at hand when the *Kaishin-to* will for ever cease to be a force in practical politics. So says the *Kokkwai*. We (*Japan Mail*) cannot endorse any such gloomy forecast. We have great faith in the *Kaishin-to* though we deem it unfortunate that the party broke through its traditional reputation for sobriety and moderation by pursuing an extreme, and in some senses destructive, policy in the late session of the Diet.

* * *

The Bill for the reduction of the Land Tax was passed by the Lower House, as stated in our last weekly summary; but the Peers did not or could not take it up, their time having been entirely occupied with the Budget. This is a great disappointment to the landed class throughout the country. Land-owners took such a keen interest in the progress of this Bill in the Lower House, that many of them came to the capital for the sole purpose of watching the debates and the conduct of their respective Representatives. Loud complaints are uttered on the subject by certain members of the Lower House against the Peers. The *Yomiuri Shimbun* evidently reflects the sentiment of these people when it observes that the Bill having been sent up to the Peers either on the 27th or on the 28th ultimo, they would have had ample time to take it into consideratiou, if they were inclined to do so. With the question of the land-tax unsettled, what is the use of reducing the expenditures of the Government? The only result of the three months' debates has been to make a deposit of 6½ million *yen* with the Government by suspending some works or undertakings. The *Yomiuri* thinks that the Upper House was morally bound to make every possible effort for the passage of the Bill. It was the Peers, declares the *Yomiuri*, that wittingly thwarted the consummation of the long cherished object of giving relief to the overburdened people.

* * *

As to the memorial alleged to have been presented to the Chinese Minister by a certain Mr. Tei, the majority of the Tokyo papers seem to regard the story as well founded. The *Mimpo* states that the result of its extensive inquiries about the affair has been to confirm the report of the *Nippon*. The *Hochi Shimbun* and the *Nippon* discuss in a significant manner the difference between the verdict of a law court and the truth of a given matter, and remark that what is morally true may lack legal proof. In such a case, say these papers, the culprit must be left to the punishment of public opinion. The *Nichi Nichi Shimbun* and the *Choya Shimbun* write in a tone more or less sympathetic with the Tei family, while the *Jiji Shimpo*, *Rikken Jiyu Shimbun*, and *Mainichi Shimbun* refrain from touching the question pending the result of the hearing of the suit instituted against the *Nippon* by Mr. Tei.

* * *

The question of alliance between Japan, England, and China is debated in certain quarters more seriously than ever. There is a small but influential section in favour of such an alliance, but another party advocates a counter course, namely, alliance with some Power, Russia for instance, opposed to England and China, while a third party maintains that it is Japan's interest to keep aloof, as far as possible, from any international combination. We cannot say which of these opinions finds favour with the majority of the educated class. Mr. Takahashi Kiichi, a journalist of considerable reputation, writes on the subject in the editorial columns of the *Rikken Jiyu Shimbun*. He is of opinion that it would be unwise for Japan to join the Anglo-Chinese alliance. Whether or no the latter alliance exists, the writer declares it an unmistakable fact that England and China are on exceptionally good terms. In return for China's friendship, England has of late changed her policy relating to Korea, for she now seems willing to recognize the suzerainty of China over the peninsular Kingdom. Whatever England or China may think of Korea, Japan, says Mr. Takahashi, ought not to abandon her hitherto righteous policy of recognizing the independence of that country. He considers it advisable for Japan to join with some strong European Power in opposition to the Anglo-Chinese alliance.

* * *

The *Yomiuri Shimbun*, writing of the approaching visit of the Russian Crown Prince, observes that, considering the position which Russia occupies in Europe and Asia, this visit must be regarded as an international affair of vital importance. Our contemporary is very glad that Japan is to have in it a unique opportunity of showing herself as she is to a personage who may at any moment mount the throne of the greatest country in the world. The Czarevitch will make extensive journeys in the interior, and our contemporary advises the provincial population to spare nothing to receive and entertain the imperial visitor in a manner befitting his high position.

* * *

The *Toyo Shimpo* devotes several articles to the question of the Columbian Exhibition of 1893. It suggests the desirability of His Majesty the Emperor's visiting the Exhibition. America is the country which first introduced Japan into the comity of nations, and which has since been her most devoted friend and sympathizer. Should His Majesty condescend to visit the States, the people of the trans-Pacific Republic would warmly appreciate the special honour done to them, and the friendly relations between the two countries would be confirmed for all the ages to come. Such a visit would also contribute to the further development of trade between the two nations.

* * *

The *Kokumin Shimbun*, writing of the recent extraordinary growth of novel writing, regrets to notice a conspicuous absence of novels dealing with the ennobling relations of home life. The rising school of novelists take for their model either the celebrated authors of the *Genroku* period or the school of novelists represented by Zola. Our contemporary advises young novelists to turn their attention to the nobler and plainer themes of domestic virtues.

## *DEATH OF THE UNITED STATES REPRESENTATIVE.*

WITH great pain we have to announce the death of the Honourable J. F. SWIFT, United States Representative, which took place on Tuesday evening at his residence in Tokyo. Mr. SWIFT suffered at the commencement of the year from a severe attack of influenza, and though he recovered sufficiently to go about his business as usual, he complained of feeling only partially restored to health, and his looks showed that the effects of the illness were not completely shaken off. Nevertheless, no suspicion existed of the slightest cause for uneasiness. He himself attributed his weakened condition to malaria, and made all the necessary arrangements for a trip to America in May. Last Sunday he attended the ceremony of consecrating the new Cathedral of the Greek Church at Surugadai. He remained standing throughout the long service of nearly two and a half hours without exhibiting any fatigue, and on Monday and Tuesday he attended his office, showing all his wonted genial cheeriness of manner. But on Tuesday afternoon he spoke of a slight pain in his chest that seemed to require attention, and he asked that the doctor should be sent for either that night or the following morning. At about five o'clock he went to bed, saying that he should probably feel easier lying down. There was then no specially distressing symptom, nor any evidence of prostration. He lay for a time, chatting with Mrs. SWIFT, who stood at the foot of the bed. That he had no consciousness of imminent danger was proved by his mooting the idea of a run to Hongkong for change of air. It was then a few minutes past six. Mrs. SWIFT turned away for an instant, but her attention was immediately recalled by the sound of distressed breathing, and before she could reach her husband's side, he was dead. Medical assistance soon arrived, and every effort was made to restore animation, but without avail. Paralysis of the heart had done its work finally, and in a second of time. The sad event will be deeply mourned in Tokyo and Yokohama. Mr. SWIFT had endeared himself to everyone that knew him. His absolute freedom from any shadow of affectation, his wide information, and his ready but always kindly wit, attracted notice which soon ripened into sincere affection and esteem. A large-hearted man in the strongest sense of the term, he leaves behind him a full record of benevolence and upright dealing, and for this he himself would certainly have preferred to be remembered rather than for the abilities which won him so much distinction at home, and which, in his office abroad, he employed so earnestly to promote the interests of his country. An end so speedy and painless suggests some grounds of consolation to those that mourn; but, on the other hand, its suddenness is appalling. In the ordinary course of nature Mr. SWIFT should have had many years of successful service before him still. His country suffers a heavy loss by his untimely decease, and his numerous friends will be inexpressibly grieved that he should have been cut off in the maturity of his capacity, and in the midst of a genial intercourse at once rare and charming.

## *CLOSING SCENES IN THE HOUSES.*

THE last few hours of the Lower House's first session were looked forward to with curiosity and some uneasiness. It was felt that the Extremists would not be likely to resign themselves tamely to the signal discomfiture suffered by them at the moment when victory seemed to be within their grasp, and that some effort to retrieve the situation might be anticipated. For a time rumour remained steadfast to the project of a simple vote of want of confidence, but this expectation had to be modified on the 6th instant, when Mr. ORITA KENSHI, one of the Kagoshima representatives, and a leader among the Extremists, handed in a motion to the effect that the Government's answer to the application for concurrence made by the House in respect of the Budget, violated the Constitution. The motion not having come up for discussion, we cannot say with absolute certainty in what particulars the obnoxious message is charged with being contrary to the Constitution, but from speeches delivered in connection with previous questions by Mr. SHIMADA SABURO and others, there can be little doubt that the great point of attack would have been the Government's declaration that the reductions recommended by the Budget Committee's Report represented procedure in excess of the House's legitimate powers. The Government, in short, asserted that the functions of the House in connection with the Budget could not lawfully be extended to administrative re-organization, and to making changes in expenditures expressly exempted by the Constitution from such treatment. No protest was raised at first against this ruling. But when the Extremists came to consider it carefully, they thought that it afforded an opportunity for renewed attack. According to their view, the House is at liberty to make any and every conceivable change in the items of the Budget, provided that before definitely voting such changes the Government's concurrence be sought. They professed to set the settlement of this question far above the mere arithmetic of the estimates, and they determined to employ it as the text of a fresh crusade. But their difficulty was that, by failing to choose their line of action at an earlier date, they were unable to get a motion included in the Orders of the Day until the 6th instant, when they found themselves in company with a number of other applicants for the ear of the House. Would it be possible to extricate Mr. ORITA'S motion from the general ruck, and to obtain a hearing for it before the session came to an end? Keen was the excitement on this subject when the House found itself, in the afternoon of the 6th instant, within a few hours of prorogation, and not within measurable distance of the significant motion, unless, indeed, some exceptional device could be adopted to shorten the interval. No such device presented itself, and the last chance seemed to be destroyed when Mr. HAMANO NOBORU, while nearly two hours of the legitimate working day still remained, moved that in view of the evident futility of attempting to deal with numerous matters still remaining in the Orders of the Day, the House should then and there stand adjourned. Involved in this motion, and but little concealed by its language, was the assumption that no selection could properly be made among the various items awaiting discussion; an idea which found many opponents even among the Moderates. After much tumult and controversy the motion was put, and rejected by the narrow majority of 5 in a House of 243 members. But, though not directly successful, the manœuvre virtually achieved its purpose. The closeness of the division necessitated a ballot, and that caused so much delay that when the result was announced, the Extremists abandoned all organized attempt to utilize the brief interval still remaining. Then ensued a scene such as the House had not witnessed before. Every member having an urgency motion in the Orders of the Day—and there were more than a dozen—and every one interested in an urgency motion, became a free lance to save his own particular "innocent" from slaughter. There certainly was much excuse for excitement under such circumstances. The House became a babel. Cries of "Order" from the chair were utterly disregarded, and after a vain attempt to restore things to their normal condition, the President announced a recess. Forty-five minutes afterwards the House re-assembled as calmly and leisurely as though its whole existence had been free from even a breath of excitement. The members took their places with a nonchalant air; there was not even an attempt at

Digitized by Google

conversation, and when the President sauntered to his desk, it became plain that all the electricity had disappeared. The fact was that during the brief recess the members had agreed to a compromise—namely, that every one should sacrifice his pet Bill, and that the session should come to an end. Mr. ORITA, however, would not go home without firing at least a blank cartridge. He declared that though his motion could not be discussed, he wished to record his emphatic opinion that the Government had transgressed the Constitution—a statement which galvanized Mr. TANAKA SHOZO into a state of the wildest but briefest excitement and pleasure. The President then spoke a dozen words, his ordinarily quiet manner intensified into impressive deliberation, and the members took their departure evidently well pleased with themselves. It did not occur to them apparently to cheer for either the EMPEROR, the Constitution, or their President, an omission which the Upper House was careful to avoid. The procedure of the Peers, indeed, differed altogether from that of the Representatives. Entirely uninfluenced, apparently, by the close proximity of the session's end, they went on to the last calmly submitting Bills to special Committees, and generally behaving as though months not minutes of debating leisure were still before them. Count ITO'S speech made a worthy termination to a session of which the Japanese nobles and their associates in the Upper House may justly be proud.

## *OPENING OF THE CATHEDRAL OF THE GREEK CHURCH IN JAPAN.*

MORE than five years have elapsed since the presence in Japan of that powerful and constantly growing representative of Christianity, the Greek Church, was prominently recalled to the recollection of the foreign residents of Tokyo on a memorable occasion, the funeral of the Russian Minister, Mr. A. DAVIDOW. A State funeral under the auspices of the Japanese Government, the ceremonial was on a striking scale, Japanese Princes of the Blood attending in the Chapel, Japanese Ministers of State in full uniform walking behind the bier, and Japanese Imperial Guards lining the road as the cortége passed. What chiefly attracted attention, however, was the association of all this official pomp with Christian burial rites performed chiefly by Japanese, for although the Bishop of the Greek Church directed the ceremony, they were Japanese Christian priests who swung the censers and intoned the litanies, and Japanese Christian girls and boys whe chaunted the requiem for the dead. Watchful observers, taking note of these things, said that with the body of the large-minded and universally beloved gentleman who had passed so suddenly and sadly from our midst, were buried the last traces of anti-Christian prejudice that during more than two centuries had isolated Japan from the Western world. It was an eminent incident in the history of the Greek Church in Japan that it should have performed the rites at this figurative interment, and while people took cognisance of the fact, they did not fail to notice also what a high degree of training and organization the officiating votaries of the faith had attained. To the general public these evidences of the Church's progress were a surprise, for, like the Roman Catholics, the propagandists of the Russian national creed are absolutely self-effacing. Their zeal never flags; their ambition never soars above the successful spread of their tenets. But no hermit ever hid himself more effectually in his cave than they bury themselves in the humblest task falling to their lot. The world sees nothing, hears nothing of their every-day work, unless some exceptional occasion brings them into momentary and conspicuous notice. Such an occasion was the memorable funeral in the fall of 1885, and such another was the consecration of the Cathedral on Surugadai last Sunday. The Cathedral, standing as it does on one of the highest sites in the capital, and borrowing additional grandeur from its skilful adaptation to this lofty situation, has long been a striking object from every part of the city. With the huge but comparatively lowly structures of Kwannon at Asakusa and Monzeki in Tsukiji, it form a triangle of sacred edifices not unsuggestive of the variety of creeds offered for the choice of modern Japan. Since the time when, six years ago, a huge network of scaffolding rose on the site of the future building, the people of the city have spoken of the Cathedral as *Nicolai Kyodo*, paying thus an eloquent if unconscious tribute to the great propagandist who for more than three decades has toiled in this empire with such devotion and ardour that, despite the changeless humility of his life, the Japanese public at large knows the Greek Church chiefly through his personality. Probably the new Cathedral will retain this appellation for many a generation to come, though worshippers there are instructed to call it the Holy Church of the Resurrection. It is an imposing structure in the Russo-Byzantine style. Massive proportions, a large dome and a lofty spire, aided by advantages of position, render it the most prominent building in the Tokyo of to-day. The plan is that of a Greek Cross having equal arms; the main edifice measuring 91 feet in each direction, and the western end having an additional pronaos and vestibule 35 feet in length, at the sides of which are the Baptistry, Sacristy, and Treasuries in two stories. The central space is covered by a grand octagonal dome, 50 feet in span, supported upon solid pendentives and piers, 8 feet thick. Internally the apex of the dome is some 80 feet from the floor; it is ornamented by an arcade and lighted by eight arched windows. The main arches of the transepts are about 40 feet in span and height. Viewed externally, and considered as an ornamental monument of a Church remarkable for the splendour of its ritualistic ceremonials, the Cathedral lacks something of the warmth and richness that colour imparts to architectural as well as to other artistic efforts. White walls, relieved only by the dull grey of Japanese building stone, impart an air of Methodist monotony to any features, however elaborate. The same criticism applies in a lesser degree to the interior, though here the sense of sameness is relieved by a magnificent gilded and painted screen which occupies the whole eastern end, dividing the chancel into three closed sanctuaries, and by rich silver candelabra hanging from the dome and principal arches. Opposite to this splendid and broad reredos, its tiers of massive gilt frames and richly chased interspaces enclosing brilliantly coloured representations of scenes from the life of Christ and the saints, the upper part of the western end of the edifice is occupied by a graceful iron gallery for the choir, an important element in the services of the Greek Church. The north and south transepts have large recessed entrances which form special features of the elevation. Iron framework, instead of solid brick or stone, has been used for the vaults. In other respects the greatest solidity of construction has been observed, but this, the only important modification, we believe, of the original project, was deemed an advisable concession to the risk of severe earthquakes. Standing as the cathedral does upon the extreme edge of an almost precipitous plateau, its foundations and other invisible parts must have involved large outlay, and it says much for the skill of the superintending architect, Mr. J. CONDER, that notwithstanding the terrace-like character of the sub-structure, the unequal weights and thrusts to be contended with, and the enormous span of the arches and thickness of the walls, no settlement or fissure of any kind has occurred in the superstructure. It is impossible, of course, not to be reminded of seismic eventualities in the life of such a building in Japan, but as an additional precaution the whole of the brickwork at different heights is bound with stout iron ties, spanning the arches and serving as supports for the ornamental candelabra. In the tower at the west end is a spacious belfry containing eight bells. It is crowned by a light copper-covered spire carrying a gilt ball and cross at the apex. The height from the ground to the top of this cross is 126 feet, and that of a similar cross crowning the lantern of the octogonal dome is 115 feet.

The consecration of this fine edifice was

Digitized by Google

conducted in the forenoon of the 8th inst. with all the pomp and éclat of the Greek Church. A congregation of over three thousand Japanese thronged the spacious building, their devout attention, genuflections, and frequent recourse to the sign of the cross proving that they had come to worship rather than to see. Unfortunately the Japanese Princes and Ministers were prevented from attending, their presence being required in the Palace to take part in the ceremony of closing the Diet. The Foreign Representatives were all present, with the exception of the Ministers of France, Austria, and Belgium. Several Protestant Missionaries, including the Venerable Archdeacon SHAW, also formed part of the congregation, their attendance evincing a spirit of Christian liberality to which their Roman Catholic brethren have apparently not yet attained. It is unnecessary to speak of the service at any length. The gorgeous robes of rich, gold embroidered brocades worn by the Bishop and his large band of assistants, the swaying of thuribles, the fumes of incense, the chaunting of the ritual, which was entirely in the Japanese language, the sacred vessels and many another element of the scene vividly recalled Buddhistic rites. Not the least remarkable feature was the admirable singing of the choir, incomparably the best of its kind ever achieved by Japanese choristers. The service lasted nearly four hours, and at its conclusion the first peal of bells ever heard in Tokyo rang out from the western tower. Those who had attended by invitation were then conducted to one of the Mission buildings, where they partook of a sumptuous *déjeuner*, the Russian Minister and the members of the Russian Legation acting as hosts.

## *THE SPEECH OF MR. MUTSU ON THE 7th INSTANT.*

WE have already given a brief *resumé* of the speech delivered by the Minister of Agriculture and Commerce in the House of Representatives on the 7th instant, but as the speech is of considerable interest, we translate it now in full:—

GENTLEMEN,—I have much pleasure in announcing the concurrence of the Government with the motion passed by a large majority of the House, namely, the motion by Messrs. Nakamura Yaroku and Naito Rihachi requesting the Government to lay before the House a Supplementary Budget to provide funds for taking part in the International Exhibition, which is to be held in Chicago on the 1st of May, 1893. You are doubtless aware that the Exhibition is to be in commemoration of the great discovery made by Columbus, the discovery of America; the year of holding the Exhibition being the fourth centennary of the famous discovery. The United States Government has moved all members of the comity of nations to contribute to the Exhibition. It will certainly be one of the greatest affairs of its kind ever organised, and for that reason as well as in consideration of the facts that the intercourse between the United States and our country stands on a footing of special amity, and that America, as you are aware, offers the largest market for our products, the Government has been preparing to take its place as a contributor immediately on receipt of an official notice from the Authorities of the United States. But, owing probably to the extensive preliminary arrangements connected with so large an Exhibition, the United States Government has been delayed in sending the official notice, and this Government did not receive it until the 2nd instant. However anxious we might be to take part in the Exhibition, it was obviously impossible to prepare and submit to the House an estimate of expenses prior to the receipt of the official intimation from Washington. When an international Exhibition is opened, it may be said to have become almost an established custom with the other members of the comity of nations to contribute to the enterprise, such an occasion being worthily and well adapted to enhance the reputation of a State. The Government, therefore, has not hesitated to contribute towards international exhibitions previously held. I need scarcely tell you that an Exhibition is not purely a commercial affair, nor does direct commercial profit constitute its chief object. It aims rather at advertising the productions of a nation, and introducing them to the knowledge of the world. It is, in fact, an opportunity to dispiay a country's manufactures and products before the people of all lands and to invite their judgment, for the ultimate purpose of eucouraging industry at home and opening new markets for the country's staples.—(Cries of "briefly," "briefly.") Yes, if you desire brevity, what I have said will suffice.—(Cries of "go on," "go on.") Well, I find myself in the face of two opposite wishes, so perhaps I had better finish what I have to say. In addition to these general considerations relating to exhibitions, our special relations with the United States constitute a still stronger reason for contributing to the Chicago affair. I would invite your attention to the fact that the greater part of our products are now absorbed by America, and that, consequently, in the opinion of the Government, the present is a rare opportunity for increasing the country's reputation and developing its avenues of profit. Ourselves entertaining these views, we have received your Representation urging that an estimate of the expenditure required for contributing to the Exhibition should be submitted to the House. The Government would not willingly lose a moment in submitting such an estimate, but unfortunately as only a few days remained before the end of the session, it was impossible to prepare the necessary calculations in time to lay them before you. Moreover, the outlay required during the present year will be small: most of the expenses will be incurred during the years 1892 and 1893, when considerable sums must be paid out. I may also remind you that an estimate of such expenditures involves unusual calculations, calling for great care and investigation, inasmuch as a considerable part of the outlay will take the form of subsidies to exhibitors and advances against articles exhibited. Payments made by the Treasury for such purposes require that examination should be made of the available productions, and that the best should be selected. In short, we have to see that the reputation of the country is enhanced. It is, however, a matter of no small difficulty, and one calling for much experience, to make suitable selections. Artists must be consulted, and thought given to questions of design, decoration, and so forth. Intelligent selection, however, needs time, and on the results of selection depend the expenses incurred and the assistance to contributors. We have to set out by an accurate examination of the long and minute rules for the guidance of foreign contributors issued by the American Government, and we have then to determine whether we shall contribute towards the shipping expenses; or whether we shall undertake the whole cost of fitting up and decorating the section assigned to Japan; or whether we shall give aid on account of travelling expenses. All this, you perceive, depends largely upon the condition of the contributors, and indicates that the views of our business men must be consulted beforehand. Otherwise considerable discrepancies are sure to appear between the sum asked for and the sum actually required. It will thus be apparent that time is needed for preparing the estimate. As I have already stated, we received the official announcement only on the 2nd instant, and the Government was then closely occupied with the task of adjusting the general Budget so as to obtain the consent of the House. There were therefore many difficulties in the way of submitting a detailed estimate. You, nevertheless, amid your pressure of business and without waiting for any application from the Government, in your capacity of the people's Representatives have presented a Representation to the Government, and from this earnest action of yours we infer that you are resolved to respond to the invitation of the United States, and I, as a Minister of State speaking on behalf of the Government, declare our concurrence with your Representation. It is a point of the greatest value that information should be thus publicly given of the consentient attitude of the House and the Government in respect of the American Exhibition. Your Representation is thus of much importance, domestically as an intimation to our business men of the views entertained by the Diet and the Government—an intimation that will have great influence in stimulating contributors—and externally as enabling the Government to express the unbounded goodwill of itself and the nation towards the United States of America. In your next session at the close of the year, I confidently anticipate that the subject of expenditure on account of the Exhibition will be considered early in your debates, and I trust that you will approach the subject with the spirit animating you to-day. Let me say one word in conclusion. This Diet being the first in our nation's history, both our own people and foreigners have watched its proceedings intently. During the session of ninety days, there have been some incidents of an exceptional character on the side of the House and the Government alike, but we have to be sincerely thankful that the spirit of compromise has prevailed, and that many useful measures have been passed. It gives me intense satisfaction to be able to stand here on this closing day addressing you on a subject concerning which our sentiments are absolutely one.

It is plain that the object of the Minister of Agriculture and Commerce, in making this speech, was to bring to the notice of the nation the combined resolve of the Government and the Diet in regard to the Chicago Exhibition. From that point of view the speech is excellently conceived. It may be supposed that just at the present moment Japanese manufacturers are not in the best possible mood towards international or national Exhibitions. Their experiences in connection with the Barcelona Exhibition were very bitter, and the results of last year's industrial show in Tokyo did not mend matters. If this spirit of depression were suffered to prevail, the invitation from Chicago would probably fall flat, and Japan would lose a splendid opportunity of extending her markets and making her productions known to the world. Mr. MUTSU has therefore acted with statesmanlike foresight in seizing the only available opportunity to inform manufacturers that both the Government and the Diet are resolved to assist them. The effect of his speech will certainly be very marked. It will be read at all the manufacturing centres, and a new stimulus will be given to flagging enterprise. But in other respects, also, the speech possesses great interest. It shows that a really intelligent policy is about to be pursued in directing Japan's efforts. It was of course to be expected that with a man of Mr. MUTSU'S great shrewdness and sound business views at the head of the Agricultural and Commercial Department, the mistakes hitherto made in preparing exhibits to send abroad and the indiscriminate methods too often adopted in extending official aid to exhibitors, would be avoided. None the less it is satisfactory to find strong assurance on these topics in the Minister's speech. He evidently appreciates the paramount importance of directing and guiding industrial effort. Japanese manufacturers never go wrong when they work for their own people. They rely upon instincts singularly correct and sound, and they appeal to tastes of

Digitized by Google

which they possess accurate gauges. But they do go lamentably wrong when they set about manufacturing for foreigners. They allow themselves then to be led by their conception of Western tastes and Western fancies, forgetting that their own strength lies in absolute independence of both the former and the latter, and forgetting also that, in nine hundred and ninety-nine cases out of every thousand, their knowledge of what the foreigner likes is utterly erroneous. There is no reason why Japan should send to Chicago any exhibits that will not find ready sale. Hitherto it has invariably been her fate to ship to every international exhibition quantities of stuff only a fraction of which found a market, the remainder being left on her hands. It would not have been unreasonable to hope that her costly experience in this matter might have borne fruit ere now, and that the Industrial Exhibition of last year would have been without any hybrid monstrosities betraying lamentable confusion between the genuine canons of Japanese art and the uninstructed globe-trotter's interpretation of them. But the hope was disappointed. The old want of discrimination made itself apparent, though happily on a smaller scale, and the consequences confront us to-day in the shape of a lottery to dispose of articles unsaleable on their own merits. There is much need of a guiding hand. The importance of extending State aid to contributors is as nothing compared with the importance of directing their efforts into intelligent channels. It is very fortunate for the country that an official of Mr. MUTSU'S capacity happens to be at the head of the Department of Agriculture and Commerce just now, and that he has for his lieutenant Mr. SAITO SHUICHIRO, Chief of the Industrial and Commercial Bureau. Mr. MUTSU, as his speech indicates, appreciates the fact that any want of discrimination on this occasion may not only entail heavy direct loss to the country, but may also impair Japan's reputation and seriously discourage the enterprise of her manufacturers. A good deal of the interest originally excited by her art productions has been weakened by her mistaken attempts to adapt herself to Western caprice, and the great Exhibition at Chicago offers an opportunity for repairing much of this mischief. Happily she has wise men to utilize the occasion.

## *THE PUSHING FOREIGNER.*

"FOREIGN merchants," says the *Riken Jiyu Shimbun*, "are supposed to be limited to the Settlements, but it appears that they go at present into the interior and make purchases and sales direct. Thus, in the case of Mr. TUSKA, as soon as it was decided, on the part of the miscellaneous-goods dealers, to put an end to all transactions with his firm, he immediately proceeded to Shizuoka, and directed an employé, one YASHIRO, to undertake purchases on his behalf. But the Shizuoka dealers, having been already warned by the Yokohama guild, declined, it is said, to enter into any transactions with him. It is quite a habit with foreigners now-a-days to go into the interior on the plea of recruiting their health, and then to engage in transactions of trade in the name of a Japanese. The Authorities, say the Yokohama merchants, ought to adopt strict measures for the control of foreign merchants, and for the protection of the interests of Japanese tradespeople."

It is always "the Authorities." Upon their shoulders every sin is laid, and to them every one looks for redress or aid in all contingencies. But how, in the name of every thing practical, are the Authorities to prevent foreigners from doing what, whether truly or falsely, the *Jiyu Shimbun* says that Mr. TUSKA did? Long ago the circumstances of Japan became incompatible with maintenance of the restrictions imposed upon trade by the present treaties. When railways run from the door of his house to every part of the country, the foreign merchant cannot be restrained from placing himself in contact with producers and consumers in the interior, if such a course presents advantages. He can always work nominally through a Japanese, and no law now in existence, or capable of being carried out if enacted, gives the Authorities power to scrutinise commercial transactions conducted by one Japanese subject with another. The general lesson to be learned from the gradual ramification of direct or semi-direct trade by foreigners outside the settlements, is that the attempt to confine foreigners to the Settlements under existing conditions is as idle as it would be to try and keep water in a vessel the sides of which had been broken down. The enterprising foreign merchant, driven by the keen competition that renders him so easy a prey to Japanese guilds and combinations, will go where profit calls him, whatever be the risk involved; and since in this case there is virtually no risk, his inclination to take advantage of every facility is correspondingly active. If the country is not opened lawfully, and under proper conditions as to jurisdiction, it will be opened in defiance of law and without any judicial arrangements other than the extremely imperfect ones existing already. That is the general outlook easily and certainly discernible by any one who performs the familiar operation of putting two and two together. As for the particular inference to be drawn from this "Tuska incident," it seems to us equally clear. Some persons cry out against the tyranny of the guild that decreed the ostracism of the American firm, and others even assert its illegality. But surely both views are equally idle? The whole tendency of modern commerce is in the direction of despotic combinations. The large syndicates and trusts of the West are characteristic of the age, and to cry out against guilds in Japan while they exist among ourselves on such a large scale, is absurd. Guilds have their uses. It is to their existence from old time in China that we must attribute the development there of a sounder system of commercial morality than can be found in Japan, though individually it is not credible that the Chinaman is one whit more honest than the Japanese, or that either is less honest than the European. The law cannot touch guilds unless they employ their combined power for improper purposes, and recent experience in the British Courts shows how difficult it is to establish any charge of that nature. Assuredly if a number of merchants agree not to sell their goods to a certain firm, a question of profit or loss alone being involved, no civilized tribunal could be found to pronounce their agreement illegal. But why should a Japanese guild adopt such a course for the sake of one of its members? Why should twenty or thirty merchants pledge themselves to turn away customers from their doors on account of a supposed injustice done to one of their number, instead of resorting to the far simpler and more natural expedient of letting the aggrieved person seek his remedy in a Court of Law? Because a Japanese will not go into the foreign Law Courts if he can possibly avoid doing so. He shrinks from the costly and intricate nature of our legal processes, not being able to foresee where a suit may end, or what expense it may not involve. Westerns having properly equipped Courts here are proud of the justice and ability of their judges, but they cannot hide from themselves that to a Japanese suitor the intricacies of their law are deterrent, and the cost of appealing to it is prohibitive. These things are responsible for such action as that taken by the guild of miscellaneous dealers in the TUSKA case. They provide a substitute for legal recourse, and although the notion of their setting themselves up as judges in matters where they must necessarily be partisans, is decidedly repugnant to our sense of fair play, there is no official help for it. The development of such guilds in order to relieve their members from the necessity of having recourse to the intricate and expensive machinery of foreign Courts; the growth of combinations to take the fullest advantage of the keen competition among foreign merchants; the impossibility of any appeal to Japanese public opinion on the part of men who insist upon remaining in a state of haughty isolation; the gradually increasing umbrage which impels the Japanese to close every avenue of employment or profit to foreign experts—all these things are inevitable consequences of the system under which we live, and which we avowedly prefer to maintain.

## *THE FOREIGN TRADE OF JAPAN.*

ACCORDING to returns compiled at the Finance Department, the total value of the Exports from Japan to foreign countries during 1890 was 56,603,506 *yen*, and the total value of Imports, 81,728,580 *yen*. These two figures aggregate 138,332,086 *yen*, against 136,103,766 *yen* for 1889, and 131,166,744 *yen* for 1888. There is consequently an increase of 2,228,320 *yen* in the bulk of the trade for 1890, as compared with 1889. This, from a merely arithmetical point of view, is a poor showing. In 1887, the trade amounted, in round numbers, to 104 million *yen;* in 1888, it grew to 131 millions; in 1889, to 136 millions, and in 1890, to 138 millions. Consequently the increment standing to the credit of the year just passed is the smallest witnessed since 1888. But when we come to examine Exports and Imports separately, striking differences present themselves. Never in the history of the trade has there been any such record on the Import side. The figures for the three past years are as follow :—

IMPORTS.

| | *yen.* |
|---|---|
| 1888 | 65,455,234 |
| 1889 | 66,103,766 |
| 1890 | 81,728,580 |

It thus appears that the increase in Imports for 1890, as compared with 1889, was no less than 15,624,814 *yen*. Even in 1888, when the bulk of the whole trade showed the unprecedented increment of 27 million *yen*, in round members, less than 14 millions of this total stood to the credit of Imports. But a mere statement of Customs figures conveys no real idea as to the nature of the trade. It is necessary to examine the actual deliveries, for to import a quantity of goods and find no sale for them, cannot be considered a profitable employment. The Report of the Chamber of Commerce has told us that deliveries were most unsatisfactory, and that the end of last year saw the godowns filled with unsold or undelivered goods. We must conclude, therefore, that the import trade was overdone and that its results were not good. Nor, indeed, is this to be wondered at, for the people's purchases of foreign manufactures must depend, to a great extent, on the sale of their own productions, aud the record for Exports is most disheartening. The following table shows that there has been a distinct retrogression on this side of the account :—

EXPORTS.

| | *yen.* |
|---|---|
| 1887 | 52,407,681 |
| 1888 | 65,705,510 |
| 1889 | 70,060,705 |
| 1890 | 56,603,506 |

It thus appears that the Exports nearly fell back to their condition in 1887, and that their decrease in 1890, as compared with 1889, was 13,457,199 *yen*. Of course there is no difficulty in accounting for this. About eight millions of the difference is to be put down to the account of rice, and the remainder to the block that paralysed the silk market during the closing months of 1890. The crippling effects of the failure of the rice crop of 1889 were felt all through 1890 in every branch of trade, and this, added to the extraordinary stoppage of the export of silk, fully accounts for the figures before us. The difference between Exports and Imports, striking enough even on the showing of the above tables—namely, 25,125,074 *yen*—becomes still more remarkable if we correct the Imports so as to obtain their value laid down in Japan. Their value in the table is that at the port of shipment, and to this 18 per cent. must be added on account of various charges. The total figure for Imports then becomes 96,439,724 *yen*, and their excess over Exports is 39,836,218 *yen*. It does not indeed follow that Japan paid out the whole of the latter sum during 1890, because, as stated above, the imported goods were not all sold. But we may fairly assume that the country's purchases exceeded its sales by from 25 to 30 million *yen*. In no year since the Empire opened its ports has a balance been attained between Exports and Imports, and in no year has the excess of Imports been so striking as in 1890. We conclude this brief analysis by noting that the one item of rice accounts for a great part of the discrepancy. Speaking roughly, there ought to have been an export of rice to the extent of 8 million *yen*, whereas there was actually an import to the extent of 10 millions. Making these allowances, the Imports would stand at 72 millions and the Exports at 64 millions, approximately.

## *IRRIGATION IN INDIA.*

THE extraordinary efforts made by the British authorities in India to extend artificial irrigation, and to exorcise permanently in this way the spectre of famine which at one time haunted the country every year, are of great interest. The last Indian administrative report describes the general policy of the Government in dealing with this vitally important subject. Irrigation is extensively used in most parts of India under one or more of the three following methods. The first and most widely used is irrigation from wells. This does not, however, come within the scope of operations of the Public Works Department, which is confined to the more elaborate methods of irrigation from tanks and canals. The storage of water in tanks for purposes of irrigation has been practised most extensively, and on the largest scale in Southern India. There the works are principally of native origin, but much has been done under the British Government in repairing old tanks, and constructing new works, in Madras, the Bombay Deccan, and in Ajmere-Merwara. It is in canal irrigation, however, that the efforts of English engineers to carry out systematic irrigation on a large scale are seen to greatest advantage, and have produced the most important results. Irrigation canals are of two descriptions, viz., "perennial" and "inundation." The former class includes many magnificent works, which have required large capital outlay and the highest professional skill in their construction. They are furnished with permanent headworks and weirs, and as, for the most part, they draw an unfailing supply of water from the larger rivers, they are capable of irrigating wide tracts of country throughout the year, independently of the local rainfall. The inundation canals, which are peculiar to the Punjab and Sind, are of a much simpler and less costly description than the perennial canals. They are for the most part simple earthen channels, made without expensive machinery of masonry dams and sluices, and supplied with water by the annual rise in May of the Indus and its affluents. They constitute a very useful class of irrigation works, and in some cases have produced most successful financial results. The success of canal irrigation, as measured by financial results, has been very different in different parts of India, though, even where no adequate return on the capital sunk has been obtained, it is difficult to overrate the value of the security provided by this means against loss of life and property in times of drought. The causes of comparative financial success and failure are numerous. In some districts, as in Sind, the very existence of cultivation depends on irrigation works; in others, as in a great part of Bengal, the rainfall in ordinary years is sufficient for the needs of the cultivator, and the demand for irrigation only becomes urgent with a recurrence of drought. In some provinces the practice of irrigation on a large scale is of ancient standing, while in others, as in Bombay, it is of comparatively recent introduction, and it is difficult to induce the cultivators to take the trouble and incur the expense of preparing their lands for the artificial supply of water. In some districts the large rivers which traverse the country offer an unfailing supply of water; in others, as in Bombay, the supply is fluctuating, and irrigation is uncertain, and liable to fail when most needed. The different systems of collecting the revenue with which the irrigation systems are credited, have an important bearing on the financial success of the works. In Madras the bulk of the irrigation revenue is collected with the land revenue. In Bengal and Bombay, as in some other provinces, the receipts of the Irrigation Department consist to a great extent of "occupiers'" rates, not, with few exceptions, of a share of the land revenue. In Sind the revenue of the canals consists almost entirely of a share of the land revenue allotted to irrigation. Cultivation is dependent on the artificial supply of water, and the consolidated revenue from

Digitized by Google

the irrigated lands is divided in the proportion of 90 per cent. to irrigation and 10 per cent. to land. In the North-Western Provinces and Oudh, and in the Punjab, direct water rates are assessed partly on the occupier and partly on the owner of the land, the bulk of the rates falling on the former, and the irrigation receipts are further increased by a not unimportant contribution from the land revenue. All the irrigation works under the control of the Public Werks Department are divided into two classes, "major" and "minor." The former includes all works constructed from borrowed funds, and the conditions attached to their being undertaken require that, as far as can be foreseen, the net revenue derived from them should at least equal the interest which Government has to pay on the money borrowed for their construction. This class also includes the works known as "protective," the cost of which has been met, not from borrowed money, but from tbe annual grant for famine relief and insurance. The cost of constructing, as well as of maintaining and carrying on, minor works is met from the ordinary revenues of the year, and for the greater part of this class of works distinct capital and revenue accounts are not kept. Such details as the above have great interest and value for the Japanese, to whom also the irrigation problem presents itself under many difficult aspects.

## *IMPERIAL PARLIAMENT.*

HOUSE OF PEERS.—MARCH 6TH.

The House continued its sitting on the 5th instant up to 11 p.m. At 9.45 p.m. a closed ballot was taken on the Committee's Report, when 112 votes were recorded in favour of accepting the Report, and 42 against it. The House then proceeded to discuss the items of the Budget. On the motion of Marquis Hachisuka, it was decided to lump the items instead of taking them one by one. The Opposition adopted every means of obstructing the proceedings. Thus the decision on Marquis Hachisuka's motion was challenged, and it became necessary to take an open ballot, the result being 110 "ayes" and 38 "noes." The section of the Budget relating to the Foreign Office was then voted and the House rose. At 10.30 a.m. on the 6th, the House re-assembled under the presidency of Count Ito. The President apologised for his long absence, and explained that he had not yet recovered fully from his illness, but that, owing to the near approach of the Diet's rising, he had determined to attend. The Home Office Section of the Budget was taken. Mr. Honda Fukuzen inquired why money was appropriated for the maintenance of a public garden for foreigners in Yokohama. The Delegate replied that the item was necessitated by the terms of the Convention of 1866. The section was then passed. The Ordinary Expenditures of the Finance, Judicial, and Army and Navy Departments were passed without difficulty, but on coming to the Educational Department Mr. Kato Hiroyuki proposed an amendment that the reduction recommended by the Budget Committee in the Lower House, and accepted by the Government, namely 100,000 *yen* in the appropriation for the support of schools and colleges, should be rejected. He spoke at some length against the policy of interfering with educational progress merely for the sake of effecting economies, and pointed out that although the amount did not appear large, it would entail a large reduction in the staff of teachers. Mr. Miura Yasu supported the amendment, as did also Mr. Funabashi, Viscount Tani, Baron Makimura, Mr. Yamagawa, and Viscount Kageyunokoji. The closure was moved and carried, and Mr. Kato's amendment was rejected by 102 to 46. The ordinary expenditures of the Departments of Agriculture and Commerce and of Communications were then passed without debate. A recess was taken at 4.50 p.m., and the House re-assembled at 6.45 p.m. under the presidency of Count Higashi-Kuze, and proceeding to the Revenue side, passed the Ordinary and Extraordinary Revenues. The Extraordinary Expenditures were next taken and passed with but little debate. The House, having concluded the Budget, rose at 9 p.m.

MARCH 7TH.

The House met at 10.50 a.m. under the presidency of Count Higashi-Kuze, and proceeded to consider Petitions relating to local boundaries. Mr. Obata asked permission to bring in an urgency motion for an appropriation on account of the Chicago International Exhibition. He urged the unquestionable importance to Japanese trade of taking advantage of such an opportunity to make known the country's products, and pointed out that preparations must be at once commenced. An appropriation would have been sought sooner had the necessary documents been received from the United States. He proposed to make the matter the subject of a Representation to the Government, leaving the latter to determine the amount. The House gave permission for urgency, and while the Government's consent to change the Orders of the Day was being sought, the debate on the Bill for the Protection of Japanese Females abroad was resumed in secret session. After a short interval the House was re-opened, the Government's consent having been received, and Mr. Obata's motion was debated. Marquis Hosokawa gave an account of Chicago, describing it as he had himself seen it. He strongly supported Mr. Obata's proposal. Mr. Miura Yasu approved the Representation, but took exception to the wording of one portion which suggested that Japan's relations with the United States were closer than those with any other country. He thought that the adoption of such a clause might give offence. In answer to Viscount Kioka, Mr. Obata said that as the Lower House had adopted a similar Representation, the Government would doubtless act on it when thus endorsed by the Peers. Marquis Hosokawa saw no reason to change the phraseology of the Representation. What it contained was quite true, and he failed to see that a Representation of this kind need have any serious effect on the country's foreign affairs. Viscount Tani said that international exhibitions were held in various countries, and applications for cōoperation would doubtless be received. Unless the same language could be employed towards all, offence would certainly be given. The House voted that the clause to which Mr. Miura took exception should be omitted, and that the Representation, thus amended, should be forwarded to the Government. A recess was then taken and on re-assembling at 1.40 p.m., Marquis Hosokawa moved that, in view of the great importance of the Bill for Amending the Periods of paying the Land Tax, the Orders of the Day should be changed for the purpose of debating that measure at once, and further that a Committee be appointed to examine the Bill. The Committee was chosen, and a recess was taken at 3.20 p.m. The House re-assembled at 4.15 p.m. The President announced that the Report of the Special Committee on the Bill for amending the Periods for paying the Land Tax had been received, and would be read by a Secretary. The Report recommended the adoption of the Bill as sent up from the Lower House. Mr. Watanabe Kiyoshi, in the temporary absence of Marquis Hachisuka, President of the Committee, explained the Bill. The House voted to proceed with the second reading, but the President said that he should previously have taken a decision as to altering the rule which provided for the lapse of a fixed number of days between the first and second readings. He was about to put this question when Viscount Yuri urged that the rule be observed. He thought that the Bill had not received sufficient attention at the hands of the Committee, and he objected to discussing a measure not fully comprehended. Marquis Hachisuka objected that the House had already decided to proceed with the second reading, and that no time remained for complying with the provisions of the rule. Viscount Kioka said that he could not admit the soundness of any argument based on the shortness of the time remaining, but as the Bill concerned the people's convenience, he wished it to be proceeded with at once. The House repeated its vote for the second reading. On the motion of Marquis Hachisuka, it was decided, by a two-thirds vote, to dispense with the third reading. The House then voted the Bill, and proceeded to the first reading of the Bill for abolishing the Peace Preservation Regulations. Marquis Daigo thought that the time for abolition had not come. Marquis Nakayama expressed the same opinion, and moved that the Bill be handed to a Special Committee according to the usual routine. Viscount Kioka supported this proposition. The House decided to leave the appointment of the Committee to the President, and then proceeded to the Copyright Law, which it was decided to hand over to a Special Committee. The next measure was the Bill for postponing the date of Operation of the City, Prefecture, and District Local Government System. It was similarly treated. The President then announced that the session was at an end, and the House rose at 5 p.m., but afterwards re-assembled at 5.35 to hear the following address by Count Ito:—

MY LORDS AND GENTLEMEN,—Having been unfortunately prevented by illness from meeting you since the passing of the Budget, I have asked you to attend here that I might say a few words about the working of the Constitution. This Diet marks the opening year of the operation of the Constitution. I think I shall not be exceeding the truth if I say that in no country and in no history has there been any instance of a first Parliament carried to so successful and orderly an issue. In Western countries what we see everywhere is that Constitutional institutions have grown out of disputes between rulers and ruled. None can show, as we can, a parliament which owes its existence to harmony between the Sovereign and his subjects. It is true that during the twenty odd years of the *Meiji* era, difficulties of an insignificant character have arisen, but beyond all question the advance of the nation towards representative institutions has been due to a consensus of opinion between the ruler and the ruled. In extreme cases you will find that the first page of other States' constitutions has been written in blood, but it has been our country's great good fortune to see the constitution carried into operation amid peace and concord. Whatever differences of opinion recently presented themselves between the Government and the people, were trifles of very limited character. The Constitution has become a living reality, and though its life has been for but a few months in actuality, the fact stands good for the whole year. This result, my Lords and Gentlemen, is due, I venture to affirm, to the loyal and devoted spirit in which you have received the Constitution. And because of these high qualities displayed by you, I believe that the glory of the Constitution will shine through all the ages of our Imperial country's life. Let me say a word about the story of the Constitution, if you will pardon me for venturing to express an opinion on such a subject. Foreigners assert that our Constitution has no history. That is because they are ignorant of our country. The early days of the era of the Restoration were pregnant with the beginning of our Constitution. I do not say that the establishment of representative institutions to-day was then indicated with perfect clearness, but the inclination was assuredly there. Many vicissitudes did indeed subsequently occur, but the fact that nothing ever opposed that general tendency shows how the majority were disposed. Think well, my Lords and Gentlemen. Could we have attained the enjoyment of this blessing had not the great patriots of the Restoration, Sanjo, Kido, Okubo and our illustrious predecessors worked so faithfully in their country's cause? And if among the people there had not been men who toiled diligently in behalf of the nation, could the great result have been achieved? The history of our country's Con-

Digitized by Google

stitution does, it is true, read differently from the history of foreign constitutions. In Western States changes occur while the Constitution is already in existence, but here they have preceded the birth of the Constitution. Yet this difference does not justify the assertion that our Constitution has no history. The records of the achievements of those heroes of the Restoration, and of the patriots who have laboured among the people up to this day, are inseparably associated with our Constitution. How can it be said to lack a history? A long road, however, still lies before the Constitution. By the aid of the Constitution we have to establish the power of the Throne ever more firmly; to make the prestige of the country shine everywhere, and to promote the happiness and prosperity of the people. It is your function, your duty, my Lords and Gentlemen, to achieve these objects. May you be ever more earnest and zealous in their pursuit. This year's Diet has run its course successfully. There have been some differences of opinion, but there can be no doubt as to the earnestness with which you have worked in the country's cause, and in the fact lies firm assurance that the glory of the Constitution will continue to grow in the future.

At the conclusion of this address, cheers were given for the Emperor, the Constitution, and the President, Count Ito.

HOUSE OF REPRESENTATIVES.—MARCH 6TH.

The House met at 11.05 a.m. The President announced that a Representation had been presented by Mr. Komabayashi Koun on the subject of Tariff and Treaty Revision. Mr. Kataoka Kenkichi, on behalf of the Petitions Committee, said that the following petitions, namely, 189 petitions asking for a reduction of the Land Tax; 197 approving of special re-assessment of taxation values, and 85 opposing it; 17 on the subject of Registration amendment; and 6, on the subject of Urban and Prefectural Local Government, had been examined by the Committee and accepted for submission to the House; but, inasmuch as Bills relating to all these subjects had been under debate, the Committee recommended the forwarding of the petitions *en masse* to the Government. With regard to 17 petitions approving reform of the regulations relating to silkworm's eggs and 9 petitions in the opposite sense, it was understood that the Government had contemplated introducing a new law on this subject, but nothing had yet come before the House. There were 7 petitions relating to the amendment of the Confectionary Tax, 26 relating to the Tax on *Sake* Brewing, and 159 relating to local boundaries. Drafts of laws had also been received, but as there was no possibility of their being discussed by the House during the session, the Committee proposed to forward them at once to the Government. This Report was endorsed by the House without discussion. Mr. Yamada Taizo, on behalf of the Committee for Disciplinary Punishments, reported that, on examination, the Committee, had seen no reason to inflict any penalty on Mr. Mutsu Munemitsu. The records of attendance previous to the burning of the Diet buildings were not complete, but since the burning Mr. Mutsu had been absent once for three days without leave, and once for one day. On every other occasion of absence, daily application had been made by him for leave. Mr. Suyehiro Shigeyasu moved that the Registration Bill should be handed over to the Continuing Committee, so as to come up for debate next session, but the President ruled that the House should proceed to the second reading as determined the preceding day. The ruling was challenged, and a vote taken, when Mr. Suyehiro's motion was rejected. The first Section of the Registration Bill, as amended by the Peers, was then passed after some debate, and the House rose for the mid-day recess. On re-assembling a reply from the Minister of Finance was read with regard to land survey for taxation purposes. Mr. Tanaka Shozo objected to the Committee's report about Mr. Mutsu, and asked at whose request they had made it. Mr. Oyagi Biichiro, on behalf of the Committee on the Criminal Code Bill, reported that the Committee approved of the Code on the whole, but had been unable to examine it minutely owing to want of time. Mr. Imai Isoichiro asked permission to move a Representation to the Government on the subject of re-assessment for Land Tax purposes. The House granted leave by 105 to 102. Mr. Takanashi opposed the motion on the grounds, first, that the Constitution forbade the re-introduction of a Bill which had been already rejected in the same session; and secondly, that if the House really wished for re-assessment it ought to draft a law in that sense itself, instead of leaving the matter to the Executive. Mr. Seki Naohiko traversed Mr. Takanashi's arguments. The Legislature did not divest itself of any of its powers by entrusting to the Executive the duty of preparing a law. The acceptance, rejection, or amendment of the law ultimately rested with the Legislature. He supported the proposal. Mr. Ebashi Ko denounced the measure as being merely a desire to interrupt the passage of the Registration Bill. The closure was put and carried. A closed ballot was taken when 113 "ayes" and 117 "noes" were recorded. The House then resumed the second reading of the Registration Bill. After a very brief debate, the third reading was opened without opposition. Mr. Takagi Masatoshi urged the House to reject the Bill. He said that the object of the Government in pushing it forward was to obtain another lever for carrying out the objectionable Civil Code. The House rose at 4 o'clock.

MARCH 7TH.

The House met at 10 a.m. The President announced the receipt of answers from the Government to various questions, and said that, unless objection were raised, he should consider that the House approved the urgency motion introduced by Mr. Kikuchi Kanji relating to the privilege of memorializing the Throne for the pardon of persons who, though undergoing punishment as ordinary criminals, were found to have committed offences which, in their origin or purpose, were of a State character. Mr. Hayakawa Riyosuke raised the question that as the pardon of criminals was a matter falling entirely within the Imperial Prerogative, Parliament should not interfere. In deference to this objection a vote was taken, and the motion was passed. The third reading of the Registration Bill was then proceeded with. Mr. Kuroda, Government Delegate, gave a futher explanation of the Bill, in order to dispose of objections that had been advanced by some of the members. Mr. Suyehiro urged that the measure was too important to be disposed of in a couple of days, and pointed out that as it was not proposed to enforce it until 1893, the House could afford to postpone the subject until more time was available. An open ballot was then taken, the result being 43 "ayes" and 125 "noes." Mr. Mutsu, Minister of State for Agriculture and Commerce, asked permission to address the House. He said that the Representation made by the House, on the motion of Mr. Nakamura Yaroku, for an appropriation in connection with the Chicago Exhibition, was entirely in accordance with the Government's views. The Exhibition, being held to commemorate the 400th universary of the discovery of America by Columbus, promised to be an affair of exceptional magnificence. They all knew how close was the friendship existing, and how large the trade carried on, between Japan and the United States. The receipt of an application from the latter would impose on this country the obligation of immediate action. But owing to the great magnitude of the contemplated undertaking, much time had evidently been required by the Exhibition Committee for preparations, and official notice had only reached Japan last month. They would see, of course, that however well disposed the Government might be, it could take no steps to obtain the consent of the Diet prior to the receipt of an official application. On every occasion of holding an international exhibition, it had been customary for the Government of the country where it was held to seek the cöoperation of friendly States, and they, on their side, had always availed themselves of such opportunities to strengthen amicable relations and enhance the nation's commercial importance. The Government of Japan understood, and had not failed in its duty in this respect. Exhibitions were not for mere show. Their purpose was to promote trade by spreading among the different civilized peoples of the world an intimate knowledge of one another's manufacturing and producing capacities. If Japan's exhibits at Chicago attracted favourable notice, it would be reasonable to look for a corresponding extension of markets for her goods. (At this point cries of "be brief" were raised. The speaker said that he did not object to close his remarks at once, but many members called "go on, go on"). The United States was Japan's best customer. The people of America bought far more of her staples than did the people of any other country. For this, and the other reasons already mentioned, the Government, desiring not to lose an hour in assisting to organise preparations for the great exhibition, had received the Representation of the House with great satisfaction. But there was one difficulty. A supplementary Budget could not possibly be prepared, submitted to the House and passed within the few hours of the session still remaining. During the present year, no great outlay would be needed, but in 1892 and 1893 a considerable sum must be spent. Besides, a supplementary Budget, relating to such a matter, would need a considerable time for preparation. He explained at some length the nature of the outlay required, and the difficulty of estimating it without careful investigation, and said that the Government greatly regretted the impossibility of seeking the House's consent to an accurate Budget. But as the people's Representatives had evinced such anxiety to promote the business, he undertook to act in accordance with their wishes in the interests of Japan's commerce, and with the object of cementing her friendly relations with foreign countries. The unison of view between the House and the Government in this matter could not fail to inure to the national advantage. The House here rose for the mid-day recess and re-assembled at 1 p.m. The President announced the receipt of various replies from the Government to questions asked by members; also that the Petitions Committee had presented a Report recommending that the following petitions, since there was no time for their consideration by the House, should be forwarded to the Government for purposes of reference; namely, 7 petitions relating to sales of woods and forests; 131, to the transfer of irrigation expenses from local to national account; 3, to reform of the Patent Medicines stamp Regulations; 19, to the creating of new Export Ports; 8, to the construction of railways; and 2, to the building of Prefectural offices. The Committee further reported against the following petitions being submitted to the House, as they did not conform with the Regulations, namely, 10 petitions for the abolition of licensed prostitution; 5, for reform of the Law of Witnesses; 2, relating to the peopling of Hokkaido; 5, for the abolition of capital punishment; and 100, for reform of the Confectionary Tax Regulations. Finally, that the following be transmitted to the Government for the same reason as that applying to the petitions in the first category; namely, 10, for the reform of the Election Law; and 3, for the reform of Local Government. This Report was accepted without debate. Mr. Hamano Noboru asked leave to bring in an urgency motion to the effect that, though many Bills had been included in the Orders of the Day, as no time remained to debate them, the session should be closed. The President announced his intention of taking the sense of the House on this motion, whereupon much confusion arose. Many members objected to the proposal, and a disorderly debate ensued. Mr. Hashimoto Kiutaro remained standing in his place, and calling out that the course proposed would disgrace the House. Mr. Tanaka Shozo charged the Government with wrongly interpreting the Constitution. Mr. Orita Kenshi declared that to bring to an end before the regular hour a session which the Emperor had prolonged, would be contrary to the Imperial will. Mr. Inouye Kakugoro said that the Government's reply to the application for concurrence had

Digitized by Google

been quite correct. Mr. Fujino Masataka entreated the House to preserve order. Some semblance of order having been restored, the question of putting the motion to the vote was again raised. This brought Mr. Tanaka Shozo to his feet with loud protestations. He cried out that he had still many matters to discuss, chief among them being the improper payment of travelling expenses to Mr. Inouye Kakugoro. Mr. Watanabe Matasaburo reproved Mr. Tanaka's rudeness. A member asked whether there was such a thing as order. The President replied that order could only exist when the House observed it. Another member said that to preserve order was the President's duty. The President said:—"Gentlemen. I presume that you respect the decision of the majority. I have no resource but to seek the verdict of the majority. The sense of the House shall be taken." Mr. Inouye Kakugoro said that if such disorder continued, the only course was for the President to leave his place, when the members would follow his example and the session would come to a spontaneous conclusion. Mr. Hayama Chiuzayemon suggested the advisability of a short recess. Mr. Suzuki Shoji said that many important matters remained to be debated. Above all, the Representation as to the country's foreign relations demanded attention. The speech delivered by the Minister of Foreign Affairs in the House of Peers the preceding day contained statements at variance with those made by him previously to the Representatives. This matter must be discussed. Hereupon fresh commotion arose. The President called for a division. A member asked that the list of urgency motions before the House should be read. This was done, and at its conclusion the President put Mr. Hamano's motion. An open ballot was taken, when 119 "ayes" and 124 "noes" were recorded. Mr. Ayai Takeo asked that his urgency motion be taken, namely, that the consideration of bills relating to laws should be postponed and those relating to representations and memorials alone taken. He desired especially that the Representation as to Tariff Autonomy should come before the House. Matters relating to domestic affairs might be relegated to a future date, but matters of foreign policy must be debated at once. He was not satisfied with the answer given by the Minister of Foreign Affairs on the 5th instant to Mr. Misaki Kamenosuke, and he urged the necessity of dealing with this question at once. Mr. Naito Rihachi suggested that the sense of the House be taken as to the precedence, for debating purposes, of the various urgency motions mentioned in the Orders of the Day. The President called for a division on Mr. Ayai's motion, when 98 "ayes" and 91 "noes" were recorded. Various proposals were now made as to the order of taking the motions affected by this decision. The House again fell into a tumultuous state. Mr. Suyematsu Saburo proposed that the President be left to determine the order of taking the motions. This proposal being applauded, the President announced that the House should commence with No. 4 on the list. Mr. Suzuki Shoji took exception to the President's assuming this function merely on the strength of a suggestion from one member. Again the House fell into disorder, and finally, at 2.40 p.m., the President announced a recess. The House re-assembled at 3.55 p.m. Mr. Orita Kenshi rose and said that no time now remained for debate. He wished, therefore, merely to put on record his declaration that the answer given by the Government to the House's application for concurrence had been contrary to the Constitution and extremely improper. (This statement was received with violent applause by Mr. Tanaka Shozo and others.) The President announced the receipt of several urgency motions, but said that no time to submit them now remained. Then rising in his place, he said:—"Gentlemen. During the space of over ninety days, you have spared no exertions for the sake of our country and for the sake of the Diet. I, too, am fully conscious that your goodwill has enabled me to discharge my functions. Your zealous desire to serve your country to the utmost of your strength, was never in doubt. I beg to announce that the session is now at an end." (These words were loudly applauded.)

## *CORRESPONDENCE.*

### SLIPSHOD JOURNALISM.

SIR,—As a regular subscriber of the *Japan Gazette*, I seek the aid of your columns to ventilate a grievance, which I, in common with many other subscribers, justly consider should be made public.

During a long residence in Japan I recollect no local print that has in any way approached some of the *Gazette's* recent issues for brain-breaking English, haphazard punctuation, and careless composition.

Take for instance the paper of the 5th instant. Although this contained no leading article, but only some notes and comments and a parliamentary report of the proceedings of March 3rd (that is of two days previous!!), the following are a few illustrations appearing in it of the grounds for the grievance that I allude to:—

BRAIN-BREAKING ENGLISH.

"and to whom poverty and misery are such strangers compared with *that* we were wont to see around us at home."

"and the keen air brought back a certain amount of *bracing energy*."

"In Paris about the middle of January there were 50,000 destitute, *and the number was no smaller even as far south as Naples*."

"But anything like a true estimate of what this winter has cost Europe *only those who have shared the bitter experience can tell*."

"The food of the lower classes has, in modern times, improved, but this does not in any way *atone for the work* which is expected of every toiler, be the weather what it may; *and yet never was the physical condition more unequal to the increasing demands on it then now*."

"The first volume contains fifteen short biographies, containing *those* of Count Itagaki and *that* of Mr. Hatoyama."

"The fact is that the *evidences* of Mr. Amano being a mere tool *has* been placed beyond all dispute."

HAPHAZARD PUNCTUATION.

"The suffering and misery which the unusually severe winter throughout Europe has brought, is a new experience."

"It is argued that in by gone days, a hard winter....."

"But even so, the farmers....."

"At the state dinner, which was held at Government House the next evening there were no speeches."

"We have to acknowledge the receipt of the Dai-nihon-meishi-den, or lives of noted Japanese from the author, Mr. Yamadera Seijiro."

"I thank thee, oh! So much, for the pleasure thy visit afford me."

"And the work it is said, will be carried on."

"It aims at shewing that. (1) By .....; (2) By ..... and justice, and (3) by the amalgamation of the armies of the world into one grand force, each country."

CARELESSNESS.

"and *con*plain."

"the farmers were dis-*contended*."

"the doings of some country *magnet*."

"an invaluable source *oft* knowledge, but we fear that the day is *no* at hand."

"to enlighten *constitutents*."

"*infini-tely*."

Surely this is a good gleaning from *three columns* of a single issue. The new Printing and Publishing Company can hardly look to pay a dividend unless the paper's editor mends his ways.

I am, Sir, your obedient servant,

A "JAPAN GAZETTE" SUBSCRIBER.

Yokohama, March 6th, 1891.

### A CORRECTION.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Referring to the leader in your issue of this morning, under the heading "The Pushing Foreigner," kindly allow me to contradict the statement made by the *Rikken Jiyu Shimbun*, according to your translation, as to my having "proceeded to Shizuoka and directed an employé, one Yashiro, to undertake purchases on my behalf." The fact of the matter is that ever since the misunderstanding which has arisen between the Japanese manufacturer and myself, I have not set foot out of Yokohama, except to go to Tokyo, nor has my employé, Yashiro, been out of Yokohama either of his own accord or by my instructions.

I am very much averse to airing my grievances in public, but if it interests you sufficiently, I will be only too glad to give you full particulars covering all points of the misunderstanding in question, which will enable you when commenting on or translating items appearing in the native papers concerning my difficulties with the Japanese, to determine what is based on facts, and what is, as in the case of the *Rikken Jiyu Shimbun* above quoted, pure fiction.

Very truly yours, E. H. TUSKA.

Yokohama, March 12th, 1891.

### WHICH IS TRUE?

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—A large number of American residents in Japan feel that your San Francisco correspondent persistently misrepresents the American people. A patent illustration of this misrepresentation appears in his letter dated February 5th. Speaking of the late Secretary Windom he says:—"He was good tempered, genial, affable with every body; could see the point in a discussion as quick as the next man; and was adroit in the manipulation of politicians. But among those who knew him personally he passed for a shrewd and unscrupulous speculator, who was never without a few shares of stock in some wild scheme which he was willing to part with to a friend just to oblige him, and who thoroughly appreciated the large part which boodle plays in the modern world."

This it will be noticed, is not a criticism of the Secretary's financial views or policy; it is a grave charge against his moral character. Is this charge true?

Writing upon the subject, *Harper's Weekly* of February 7th says:—

"There was universal confidence in the ability and fairness and high integrity of Secretary Windom. He was a man of great public experience and conservative moderation of temperament. His mind was hospitable to new ideas, but it was not erratic or unwisely impulsive. His official discretion was great, and his death at this moment is a serious public loss. The reform in the civil service to which his party was pledged had in Mr. Windom a sincere friend."

These words stand in the columns of a paper of which George William Curtis is the editor. He is not generally supposed to indulge in giving certificates of good character to rascals. If we accept his words as true, how shall we avoid declaring your correspondent's statements as false? And if false in this instance how can we believe his unsubstantiated charges against other American public men?

Yours sincerely, M. L. GORDON.

Kyoto, March 9th, 1891.

### THE JIZEN-KAI.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—So many of your readers have kindly contributed to the Yokohama Fujin Jizenkai (Japanese Ladies' Benevolent Society), that we think a short statement of the work of that organization during the past year may be of interest, incomplete though it must be or else of undue length. In January, 1890, the Society had been in existence but two months, and its membership fees amounted to about twelve *yen* per month. The work of the committees, however, soon revealed such a state of destitution, owing to the high price of rice, that the needs of the society were made public by the kindness of the Yokohama press and other agencies. The response was so generous that four rice kitchens were established, from which food was given to many starving people, during the months of May, June, July, and August. The sick poor have been a problem all along. Medical aid and medicine have been given, as will be seen from the report, but the bad air and absence of all comforts, have often made recovery impossible. A house was rented in July, and retained until October, where seventeen persons could be admitted, and this was filled most of the time. The great need for some suitable building for these poor people induced the society to attempt a permanent work, by the erection of a charity hospital, as soon as the pressing needs caused by the rice famine had been met as far as possible. This is the work before the Jizenkai at present, and it is hoped to have a building that will accommodate twenty women and children, before the end of the year—for a beginning. The condition of young girls in the families of the very poor, has appealed

Digitized by Google

strongly to all who have come in contact with them. Industrial classes for these girls are being started, and it is hoped by the teaching of practical things for two or three hours daily, to open up some honest avenues to escape from starvation. This work has only begun, as yet, but twenty-seven girls, from six to thirteen years of age, are already in the first class. The condition of orphan children is, of course, very sad, and many appeals to the Jizenkai are made in their behalf, which will be considered as soon as practicable, unless their case is undertaken in the meantime by some other agency.

It has been the determination from the first not to foster a spirit of pauperism. In accordance with this idea, money has very seldom given, and rice and clothing only to those unable to work, except in a few instances, for a short time. The society has been able to undertake only a limited amount of work, of course; yet we believe that as much distress has been relieved as could be with the amount of money spent.

We are sincerely grateful to all who have contributed to, and are still assisting the work of the Jizenkai. The report given below does not pretend to be full. It does not mention any of the work done through the Jizenkai by private benevolence.

SUYE INAGAKI,
March 10th, 1891. President, Jizenkai.

JANUARY TO DECEMBER, 1890.

## "MISSION COMITY."

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—A circular with the above title has reached me, and as there is no name attached, I beg leave to return thanks through your columns, and to humbly suggest that it does not go far enough. It will certainly be an encouraging advance if (unless prompted by conviction of duty) a small church be not persuaded to unite with a stronger mission, nor a preacher be employed at larger salary by a wealthier mission than the one which educated him, and that it shall be deemed unfortunate if one be compelled to build a big meeting house near a small one belonging to another mission. I would suggest the following for the next circular:

Whereas, the Church of God was one in the councils and purpose of God in eternity; one in the typical history and symbolism of the Old Testament; one in prophecy; one in the mind of Christ; one in all the declarations made or figures used by him; one in the apostles' teaching and practice; one under their leadership to all countries; one for three hundred years or more after the last apostle died, and will be one in the millenium and in heaven throughout eternity, and whereas, divisions among the people of God, and the saying, "I am of Luther, and I of Wesley, and I of Calvin," are denounced in the scripture as carnal, and as sects are classed with drunkenness, fornication, and idolatry, all being works of the flesh, therefore:

Resolved, that we will teach the Japanese believers that sectarianism is sin, and ought to be abolished as speedily as possible.

Resolved, that, as human creeds used as tests of fellowship are divisive and repellent, we will teach that the Bible alone, *without any other creed whatsoever*, is an all-sufficient rule of faith and practice.

Resolved, that as human names attached to any portion of God's people tend to foster division and jealousy, we will teach the Japanese believers to call themselves by no names which are not given by the spirit of God in the Holy Scriptures.

Resolved, that we will teach that these sects arose partly from questions long since dead, and are maintained partly because men love sect more than Christian unity, and partly because we cannot break off from the past in a day, but that it would be sinful sectarianism for the Japanese to continue these divisions, and that their aim should be to build up in Japan the pure and sacred Church of the New Testament, rejecting everything on authority less than 1,800 years old, and scaling off with unsparing hand whatever human folly or human wickedness has piled on to the church since it was established by Jesus and the Twelve.

There are missionaries in Japan who recognize the evils of sectarianism, and who can rise above their denominational preferences to further Christian union. The Lord will honour such.

There must be concession if we attain to the unity for which the Redeemer prayed; it were as unreasonable to suppose that any one religious body has the truth, the whole truth, and nothing but the truth as to suppose that any one man is perfect in wisdom. "Mission Comity" will be best attained when all who call themselves Christians, who believe in Jesus and keep his commandments, recognize the fact that the names, creeds, and opinions which separate them are of human origin, and as "every plant which my Heavenly Father hath not planted shall be rooted up," these all shall be rooted up, and all Christians ought to work to pull down these barriers and become one even as the Father and Son are one.

The question arises whether the benign suggestions of "Mission Comity" reach to the Greeks and Romans. I presume not. I think it is held, perhaps unconsciously, that it is right to convict a man of a great error and win him over from the Greek or Roman Catholic church, but to convince a man of a lesser error is out of order. Truth is voluble but must be handled carefully. Some Protestants have said, don't preach it to the unlearned.

I was under the temptation to ask if "Mission Comity" includes the Unitarians and Universalists, but I anticipate the answer as follows:—"Unitarianism is not a religion, it is a philosophy of the 19th century, and its life is pretty late in the afternoon; the cruelty of universalism puts it outside the pale of mercy."

GEO. T. SMITH.
152, Higashi Katamachi, Hongo, Tokyo.

## *YOKOHAMA GENERAL CEMETERY.*

The annual general meeting of the members of the community to receive the report of the Cemetery Committee and the Treasurer's statement of accounts for the year ending 31st December last, was held on Tuesday afternoon in the Chamber of Commerce Rooms. Among, those present were Messrs. J. Troup (H.B.M. Consul), A. O. Gay, F. O. Eustace, W. B. Walter, J. H. Brooke, B. Gillett (Hon. Treas.), J. P. Mollison, Rev. E. C. Irwine, Messrs. J. A. Fraser, and J. Rickett.

Mr. TROUP took the chair, and after stating that the minutes of last meeting should be taken as read, called on the Hon. Treasurer to read the report and accounts for last year.

Mr. GILLETT read the report and accounts as follows:—

The Committee of the Yokohama General Cemetery beg to place before the members of the Community the Treasurer's statement of account for the year ending 31st December, 1890, showing a credit balance of $3,182.69; of this amount $3,000.00 is placed on fixed deposit with the Hongkong and Shanghai Bank, producing 5 per cent interest. The balance, $182.69, it is more than probable will be required during the present year for cost of renewing a portion of the fence enclosing the Cemetery grounds, and some few other necessary repairs.

In connection with the Treasurer's statement of account, it may be observed that the amount under the heading of Labour and Wages on the debit side of the account, shows an increase in the expenditure of about $60 over that of the preceding year; also there is an increase under the heading of Postage and Sundries of about $15; in both of these cases the increase has been brought about in consequence of the robberies which took place in the Cemetery in the month of April last, and which rendered it advisable, in the opinion of the Committee, to engage the services of a watchman at $10 per month, who should patrol the Cemetery Grounds during the night; also several other small sundry amounts, which had to be expended, in order if possible, to prevent a recurrence of the depredations. On the credit side of the account, the amount received in the shape of fees for erecting head-stones and enclosing graves has fallen off by about $100, but this has been for the most part counterbalanced by the increase of about $100 in the amount received for reserved lots. With regard to the number of interments during the past year, it will be seen from the tabulated statement annexed to this Report, that there have been 45, against 46 in 1889; included in the former figures there are 13 seamen who have been connected with the shipping lying temporarily in the harbour, 4 visitors, and 1 Tokyo resident. Deducting these from the total number of interments, there remain 27 (including 8 children, all of whom, with only two exceptions, have been under the age of 12 months) as the number representing deaths from the *bonâ fide* members of the Yokohama community during the year 1890,

The resident foreign Community (exclusive of about 3,000 Chinese) on the 31st December, 1890, according to the returns kindly furnished by the various Consulates, amounted to 1,595. Taking these figures as a basis, we arrive at the estimated death-rate of 16.920 per mille, as against 18.970 in 1889, 17,300 in 1888, 21.00 in 1887, and 27.20 in 1886.

With these observations the present Committee, consisting of Messrs. E. Blanc, J. A. Fraser, H. Grauert, Rev. E. C. Irwine, N. F. Smith, and B. Gillett beg to tender their resignations.

INTERMENTS IN THE YOKOHAMA GENERAL CEMETERY FOR THE YEAR ENDING 31ST DECEMBER, 1890.

E. & O. E.

B. GILLETT, Hon. Treasurer.

Yokohama, January 1st, 1891.
Examined with vouchers and found correct:

E. WHITTALL.

The CHAIRMAN said the meeting would agree with him that the general state of the finances as shown by the accounts was eminently satisfactory. He would be glad to hear any remarks or enquiries from those present.

Mr. IRWINE said not only were the finances satisfactory, but the death-rate was also satisfactory. It showed that the improved state of the finances had not been gained at the expense of an increased death-rate, seeing that the death-rate was it anything below the average.

The CHAIRMAN said it was the lowest quoted.

Mr. W. B. WALTER, in proposing the adoption of the report and the accounts and thanking the Committee and the Honorary Treasurer for the care they had taken of the general interests of the Cemetery during the year, said he would like to bring before the incoming Committee one great want which he thought the finances were now in a position to meet. There was no mortuary chapel in the Cemetery and—especially in the case of strangers whose death occurred at one of the hotels, as also in other cases—it was very desirable that there should be such a building. He would suggest that the incoming Committee be authorized to spend an amount—it need not be very great; probably $1,000 or $1,200 would cover it—to supply this want, and put up a suitable wooden building which would be all that was necessary for some time to come. In case of removal of the Cemetery it would be quite easy to move a building of that sort at the same time.

Mr. GILLETT reminded Mr. Walter and the meeting that for two years and a half, a large vault in which a temporary interment had been made, was kept open for mortuary purposes, but it was found that no one made any use of it. Mr. Walter, he thought, had suggested that it should remain for use in case of a death at one of the hotels, but it was only made use of in one case. It appeared that there was an arrangement between the hotels and the undertakers by which the latter, when a death occurred, removed the body to their premises. As to the question of providing a special building at the Cemetery, probably the expense would not be very large, but the object of the

Digitized by Google

Committee in the past had been to accumulate as much as they possibly could against the time, which would come sooner or later, when the Cemetery would have to be removed. When the present cemetery is closed, there will always be a certain amount of money required to keep it up, and when those residents whose friends are buried there have left Yokohama, it always appeared to the Committee that it will be a matter of considerable difficulty to raise funds to keep it in decent order. With this fact before them they had endeavoured to secure that the expense shall be as light as possible when it does come, as it will one day.

Mr. WALTER said, with regard to Mr. Gillett's remarks as to a temporary tomb placed in the Cemetery some years since, he hardly thought that that answered the purpose to which he referred. A mortuary chapel was not only necessary for depositing bodies previous to burial, but also as a place where the friends of deceased persons might remain during the reading of the funeral service. They had seen—especially during the late severe winter—that on several occasions the clergymen officiating and the friends of the deceased had incurred considerable inconvenience and risk from the state of the weather. Although he quite agreed with Mr. Gillett that the Committee should have a considerable balance of funds in hand, it appeared to him that the object he had brought forward was one really worth spending some money on. He had no doubt that, if necessary, the community would readily respond to a request for subscriptions towards such a chapel. Probably Mr. Irwine would be in a better position, however, to tell the meeting about the matter.

Mr. IRWINE was sorry to say that his experience of mortuary chapels was not an agreeable one. There was, as a rule, great difficulty in keeping such buildings anything like warm and comfortable. They were only used on rare occasions, and as a rule they were cold and comfortless and from the same cause draughty. There was another consideration. There was a tendency sometimes on the part of those who officiate at interments to make the services at the cemetery rather long, a tendency which he thought was greatly to be deprecated, and, possibly, having a covered building in which to conduct the services might lead to a lengthening of those services, beyond even the limits to which sometimes they now extended. He remembered being present on one occasion when the services occupied three quarters of an hour, during which people had to stand uncovered in the open air, and got pretty well frozen. While admitting that it would be well to have a comfortable and warm place in which to conduct the services, he did not think it advisable that the Committee should launch out in that direction, as the main portion of the services was for the most part read in the chapels of the different religious bodies by whom the services were carried on.

Mr. BROOKE asked a question relative to the robberies of iron-work from the Cemetery that took place last year.

Mr. GILLETT said one man was caught, and was sentenced to 18 months' imprisonment with hard labour. His time had not yet expired. Since then one or two pieces of iron had disappeared, but nothing of any account had been taken. When the depredations occurred they were communicated to those interested in the maintenance of the graves, but beyond putting the graves again in proper order nothing had been done.

In reply to Mr. GILLETT,

Mr. JARMAIN, the keeper of the Cemetery, stated that the thief was sentenced to 18 months' imprisonment, to remain under police surveillance for 8 months, and to pay $22.50, the value of the property stolen.

Mr. GILLETT said the sentence had not yet expired; and as to getting back the $22.50, that was, he thought, a very doubtful matter.

Mr. IRWINE said as a matter of fact nothing had been lost of any consequence since the Committee had appointed the watchman.

Mr. BROOKE recalled that at a previous meeting some discussion arose on the question of the fence, when one gentleman stated that the fence along the high road spoilt a very fine view, and suggested that it should be lowered. Was that the fence which it was now intended to replace?

Mr. GILLETT said yes; the fence running up from Dr. Wheeler's house would have to be replaced, and it would be a question whether for the better protection of the Cemetery there should not be a high fence along the main road. Although the view was no doubt very nice, still he feared that they would have to revert to the tall fence. A low fence undoubtedly afforded facilities to thieves.

Mr. WALTER said not only did a low fence afford facilities to thieves, but on several occasions he had seen crowds of children outside the fence while interments were taking place, and their behaviour was most indecent.

Mr. GILLETT said the fence was lowered at the suggestion of Mr. Hall, and one or two others, as a matter of trial, but he thought experience indicated that they would have to go back to the former height.

Mr. MOLLISON said he had seen children throwing stones at persons, himself among the number, from the road leading up from Dr. Wheeler's, and he had also seen them throwing stones at some of the monuments. He had reason to believe that damage was done to a marble stone in the Cemetery some time ago by the throwing of stones, and it had been found necessary to put up a wire fence to protect the monument. He certainly endorsed what Mr. Walter had said as to raising the fence.

Mr. GILLETT said the replacing of the fence would probably be begun on the following day. It was a question whether bamboos should not be used to close up the fence.

Mr. BROOKE said galvanised wire netting was very cheap, and if it were put on the top of the fence the view would not be obscured, and children could not throw stones and thus disfigure the monuments.

Mr. IRWINE was afraid they would steal that also.

Mr. JARMAIN said the fence would be about 7 feet high, so that it would be impossible for a boy or a man even to throw stones over. The pales would be about 2 inches apart.

Mr. GILLETT thought and trusted that after the fence was put up they would have no further trouble. The meeting would readily understand that the matter of the thefts had caused considerable anxiety to the Committee, and the erection of the fence seemed to be the best way to protect the Cemetery. At any rate they could see how it worked. It was a very singular thing that for 9 or 10 years, with the tall fence, they had no robberies at all.

Mr. IRWINE remembered that he got considerably laughed at by the proposer of the motion when he said that the fence would be jumped over immediately after it was lowered. And yet that was exactly what had happened.

On the motion of Mr. WALTER, the report and accounts were unanimously adopted.

In reply to Mr. BROOKE,

Mr. GILLET said that with the exception of Mr. Grauert, who was absent, but had expressed a wish that his name should remain on the Committee, and of Mr. N. F. Smith, he had seen all the members and learned that they were willing to serve if re-elected.

On the motion of Mr. BROOKE, the Committee, consisting of Messrs. E. Blanc, J. A. Fraser, H. Grauert, N. F. Smith, Rev. P. C. Irwine, and B. Gillett was re-elected.

Mr. BROOKE thought a vote of thanks should be accorded to the Committee for their services during the past year, especially to Mr. Gillett, upon whom a great deal had depended, and who had done most valuable work.

The CHAIRMAN said they all agreed with the sentiment expressed by Mr. Brooke. There was, no doubt, a great deal of trouble involved in the management of the Cemetery, and he was sure the community was very deeply indebted to the Committee, and especially to Mr. Gillett for the great care he had taken in managing the Cemetery.

Mr. GILLETT thanked Mr. Brooke and the Chairman for their kind remarks in reference to himself, and, as to his colleagues, he could only say that whenever they were called upon they had shown the greatest willingness to give their services.

On the motion of Mr. IRWINE, a cordial vote of thanks was accorded to the Chairman, and the proceedings terminated.

## *THE AUTO-EPITAPH OF A MITO PRINCE.*

The second of the Tokugawa Princes of Mito was Mitsukuni, a grandson of Iyeyasu. He was born in 1628, succeeded his father as prince in 1661; gave up to his nephew and heir the government of the clan in 1690, and died in 1700. He is well known in Japanese annals as a scholar and a patron of scholars; and in Chamberlain's "Things Japanese" he is styled "the Japanese Macænas." He is famous for the compilation of *Dai-nihonshi*, the standard history. He it was who welcomed into his clan two Chinese refugees, one of whom became priest of a Buddhist temple in Mito; and the other of whom was the prince's instructor, and was honoured with burial in the cemetery of the princes at Zuiryū, about 15 miles north of Mito.

In this same cemetery is a small tomb which Mitsukuni, before his death, had constructed for himself. This tomb he called *Bairi-sensei no haka*. ("The plum-village teacher's tomb"); and for it he wrote an inscription which, abounding in queer Japanese ideas, may be interesting to Occidentals. It reads as follows:—

"The teacher (*sensei*) is a native of Mito, Hitachi. His eldest son was feeble; and his elder brother died young: so that he alone waited on his father in a respectful and obedient manner. As for his character, he is neither stubborn nor obstinate. Although he venerates Shintoism and Confucianism, yet he is wont to criticize them; and, although he is an intelligent student of Buddhism and Taoism, still he often assaults them. He likes guests, so that his gate is as crowded as a market-place. In his leisure he reads books, but does not require that they should be [perfectly] understood. Even pleasure does not gratify him; and grief does not trouble him. In the eve of the moon, and in the morn of flowers, taking the wine-cup, he indulges his appetete; singing poems, he humours his taste. The nice music, the beautiful female, the rich food, are not liked by him; the elegant mansion and rare furniture are not his aim: he is content with either affluence or indigence.

"From his youth he intended to write a [Japanese] history: but as reference books were scanty, he first sought for and bought them. Even a novel or a narrative was carefully read. The aim was to present the true facts, and to exclude doubtful matters. Having declared for the real Imperial line, and having criticized ancient "loyal subjects," he naturally formed original opinions.

"In 1690 he 'asked for his skeleton' [that is, resigned]. Before this he had adopted his nephew, had made him the heir; and he now consigned all the dominion to him. In such a way the long-cherished object was fulfilled. After a time he returned to his village; and, by his father's tomb on Mount Zuiryū, buried all his old official robes, and built a monument called 'the plum village teacher's tomb.' Ah! Here his spirit is to rest eternally! But his body is to be cast where it is destined: if in water, it is to be given to fishes and turtles; if on a mountain, it is to be fed to fowls and beasts. Hence there is no use even of 'the spade of Riūrei.'* The stanza says: 'Though the moon hides in the clouds of Zuiryū, yet its light remains for a moment on the peak of Nishiyama.' The person who built this tomb, and wrote this inscription, is Minamoto no Mitsukuni, Shiryū."

Mito, March 6th, 1891. CLEM.

## *LETTER FROM SHIMANE.*

(FROM OUR OWN CORRESPONDENT.)

Matsue, March 4th.

The month of February began here with severe weather, and ended with spring flowers and tepid winds. The winter on this coast is over; and the mountains encircling Lake Shinji and making its scenery so beautiful, have quite lost their snow, all except far Daisen, still ghostly white.

An event of scientific interest occurred here upon the 14th ult., but was not generally known until the 25th, namely a change of land-surface at a spot across the lake about two miles south-west of Matsue. Singular changes have been recorded on this part of the lake-coast for a very long time. About sixty years ago a large part of the hill called Otsutsumiyama sank with a great noise. Thirty years ago part of another hill called Otami-yama, in the same neighbourhood, sank; and the ravine thus formed is now called *Tabantani*.

The sites of these subsidences are in the neighbourhood of the village of Fujina, celebrated throughout Izumo for its yellow pottery. On the night of the 14th, at about 3 a.m., the people of Fujina and vicinity heard what they supposed to be a heavy thunder-roll. Some fishermen on the lake at the same hour were startled by a great swaying of the water, coincident with the noise; and looking south "saw the shore move." With the apathy characteristic of some of their class, however, they quietly went on fishing, and said nothing about the matter for several days. No examination of the spot was made for about a week. The hill, covered with pine-trees, is about half a mile from any habitation, and uncrossed by any path.

Upon news of the event reaching the police station, an examination was at once made. It was then found that along the foot of the hill, for a distance of about 480 feet (80 *ken*), east and west, the bed of the lake had been elevated to a height of more than 20 feet. The breadth of the strip of shore thus lifted—consisting of a dense black clay—is

* Riūrei was a famous Chinese scholar, who was attached to the doctrines of Laotse, and liked to drink wine. He once said: "When I die, I shall not need any funeral, only a spade will do, which will dig up the earth in the place where I may fall." Inasmuch as Mitsukuni's body was to be given, either "to fishes and turtles" or "to fowls and beasts," there was no need even of Riurei's spade to dig him a grave.

Digitized by Google

from 30 to 40 feet, from south to north. All this surface was cracked and fissured as by an enormous force. Embedded in the strata thus upheaved, two kinds of shells were found in great numbers, *shijimi*, still common in the lake, and *hamaguri*, which are marine, and no longer exist in these waters except as fossils.

But this was only one change. South-west of the part upheaved, on the other side of the hill there had been formed a new ravine. The ground had sunk for a length of 1,080 feet—making a ravine from 36 feet to 40 feet deep, with an average width of 60. Hundreds of pine-trees were buried.

On the news reaching Matsue, the students, male and female, of the Upper Schools and college, visited the spot accompanied by their teachers, to receive an object lesson in physiography such as few scholars have the opportunity of getting. It was interesting to see the girl-students walking fearlessly along the slippery edge of the cliff as nimbly as the young men. The lessons were excellently given. Even here, in Izumo, geology and physiography are taught according to the very latest scientific knowledge on the subject; and some of those wiseacres who have been writing in Yokohama papers about the inferior education of Japanese women would be considerably nonplussed could they see an Izumo school-girl's composition upon the geology of her own native hills, or the changes effected by seismic and volcanic action upon the face of the country of Shimane. Here it is the custom, in teaching botany or geology, to take the pupils out at times, and make them learn from direct personal observation. Excellent miscroscopes are also used in the classes; and a boy of sixteen is taught to study animal and vegetable tissues after a fashion that would surprise and delight a foreign savant. Study with the youth here is never a labour, but a pleasure. I could mention the name of a lad in the Middle School, for example, who collected and classified several hundred different kinds of seaweed to send to a teacher in Tokyo.

I think in my next letter, I shall be able to recount the opening of our new bridge over the Oshashi River. The difficulty encountered at the centre of the river bed, in making a solid foundation, has been overcome; and the work is nearly completed. The bridge is very handsome.

I wrote you before of the old bridge and its legend of Gensuke—the man buried under the pillar always called by his name, Gensuke-bashira. Doubtless a legend only. But in the country among the simpler folk, the legend is believed; and some old-fashioned people were afraid to come to town, for fear they should be buried under some pillar of the new bridge, to appease the spirits of the river.

The same legends and the same beliefs are not peculiar to Japan. Those who have read the ballads of Servia will remember the terrible and touching tradition entitled "The Foundation of Skadra (now called Scutari)."

Matsue has another such legend. The foundations of the castle were said to have been constructed only after some supernatural difficulties had been overcome by burying a girl under the walls. She was very fond of dancing; and the legend says that a law had to be passed forbidding any girl to dance in the street. For whenever one danced, the castle would tremble. But to-day I see pretty children dancing before the grim bastions; and the castle never trembles; and the legend itself is almost forgotten.

## *LETTER FROM SAN FRANCISCO.*

(From our Special Correspondent.)

San Francisco, February 14th.

Ex-President Cleveland has again brought himself prominently before the public by a letter written to an assembly of politicians who are in favour of unrestricted silver coinage. In that letter he said:

It surely cannot be necessary for me to make a formal expression of my agreement with those who believe that the greatest perils would be initiated by the adoption of the scheme embraced in adopting the measure now pending in Congress for the unlimited coinage of silver at our mints. If we have developed an unexpected capacity for the assimilation of a largely increased volume of currency, and even if we have demonstrated the usefulness of such an increase, these conditions fall short of insuring us against disaster, if in the present situation we enter upon the dangerous and reckless experiment of the free, unlimited, and independent silver coinage.

To appreciate the importance of this utterance, your readers must understand that the great bulk of the Democracy of the South and West—except California—is in favour of "free, unlimited, and independent silver coinage." Their reason is that they regard that step as leading to an expansion of the currency and an inflation of values, including the values of agricultural produce. They are not all agreed as to details. Some of the silver men propose that, in exchange for silver deposited at the Mints, silver coins shall be given by Government, equivalent to the gold value of the silver deposit on the day of the deposit. Others go further, and under the lead of the silver miners, demand that Government shall issue a silver dollar to every depositor of 412½ grains of silver, though on the day of the deposit that quantity of the metal may only be worth 75 or 85 cents in gold. But this difference apart, the Democrats of the South and West are generally in favour of coining all the silver that is brought to the Mints. The law of last year, which requires the Government to buy $4,500,000 ounces of silver every month for coinage, having failed to raise the price of silver above $1.01 per ounce, and having also failed to inflate prices, they now purpose to tear down the limit on coinage altogether.

To these wild visionaries, Mr. Cleveland has thrown the gauntlet. He was warned that opposition to the free coinage of silver might cost him the nomination for the Presidency, but he replied that the occupancy of the White House was not at all essential to his comfort, but it was essential to his comfort to tell the truth so far as he knew it. Republicans are shouting that he has committed political suicide, and Democrats are afraid that he has postponed their victory. But honest men in all parties applaud his wisdom and his courage.

The aberration of intellect which now pervades the grain-growing sections of this country, and which manifests itself in the wild demands of Farmers' Alliances for prosperity by Act of Congress, is the fruit of the low price which cereals have commanded throughout the world for the past five or six years. Farming has ceased to pay in the Mississippi and Missouri Valleys, and poverty has crazed the farmer. When wheat fell in the early seventies below the cost of production, the farmers of the central states fell upon the railroads, and insisted on getting their transportation for nothing. That scheme failed. And now the farmer assails the monetary system. That arrant demagogue, Leland Stanford, introduces a bill into Congress requiring the Government to issue new legal tenders to be loaned to farmers on the security of their land. The Farmers' Alliance of Kansas, which has swept that State, insists that Government shall likewise loan money on farm produce. And the farmers of the Democratic party are clear that nothing will fit the case but unlimited issues of silver money involving a premium on gold, a depreciated currency, and a revival of the wild era of speculation which prevailed during the war. It is refreshing to find one Democrat who has the nerve to hold fast by sound principles and to defy the march of error.

Nothing has occurred in Congress, since I last wrote, which calls for particular notice. Less than three weeks of the session remain, and it will consume all that time to pass the necessary appropriation bills. It is possible that the Steamship Subsidy Bill may pass, but that is quite uncertain.

Among the items in the naval appropriation bill just passed by the House is one for $25,000 to be expended on a submarine survey of the bed of the Pacific between San Francisco and the Hawaiian Islands, as a preliminary to the laying of a cable. The work can probably be accomplished within a year, and the laying of the cable at the cost of the Government is among the probabilities of the future. The event may possess some interest for your constituency, as a cable to Hawaii would be a link in a telegraphic chain to Japan. But the deep trough which skirts the southern boundary of the chief Japanese island constitutes an obstacle that will puzzle engineers to overcome.

Quite a remarkable case of highway robbery took place last Monday near Napa in this State. A substantial farmer named Greenwood was returning to his house about dusk when he was accosted by two well dressed strangers who bade him hold up his hands. He complied. They demanded his money; he replied that he had none. They then led him into the house, gagged him, tied him hand and foot with vineyard twine, and tied his hands and feet together, so that he was unable to move. His wife coming in at the moment from a neighbour's, they dragged her into an inner room, and after assuaging their brutality on her, gagged and bound her likewise. A struggle seems then to have ensued, when they shot her through the head, killing her instantly. Returning to her husband, they forced him to swallow a considerable quantity of stuff from a bottle, which produced insensiblity. It was several hours before he recovered consciousness. When he did, he managed to shuffle off his manacles sufficiently to sit up; but he had no sooner done so than the robbers reappeared, and each of them shot him in the head. He was not killed, however, for at seven next morning, he contrived to crawl out of the front door, and to attract the attention of a neighbour. The robbers had by that time made their escape apparently with little plunder. Captain Greenwood had no money in the house, and the burglars allowed his wife's watch to escape them. The whole country was at once aroused, and scoured for the murderers.

In parts of this state, there appears to be a sort of sympathy for highway robbers, such as exists in Missouri, and such as used to prevail in England in the days of Robin Hood. At Tulare, the other day, a railroad train was boarded by "road agents" who proceeded to go through it for plunder. The express messenger happened to be a plucky fellow; he barricaded his car, and took pot shots at the robbers whenever he could see them through his window. For quite a while, a regular battle between this man and four or five assailnats raged with such fury that the sides of the car were riddled with bullets, and the messenger to save his life had to lie down in the bottom of the car whenever his ammunition was expended and he had to reload. But he finally beat them off; whereupon the grand jury of Tulare found an indictment against him for manslaughter.

General Sherman is dying. He may be dead before this letter leaves the post. He is not a very old man, being only seventy-one, but he has been in poor health for some time. He will always occupy an honourable place in history as the leader of the march through Georgia, but his utterances and his acts since the war have furnished a new illustration of Buckle's saying that soldiers make poor statesmen. Except at the head of an army, he had neither judgment, nor foresight, nor a correct understanding of men or events. His one achievement was a stroke of genius. It was the decisive operation of the war. When he reached Savannah, having traversed without opposition and at a leisurely pace, the richest State of the Confederacy, Lee's continued resistance in Virginia was a mere waste of time and life. But having rendered this splendid service to his country, General Sherman subsided into nothingness. He lived an agreeable life, dined, wined, and was kissed by the girls wherever he went. But he was in fact a tedious and inconsequential old chatter-box.

A very different personage was Admiral Porter, who died yesterday. He was the Admiral of the Navy, and well deserved the post. He came of fighting stock. His father was the famous Commodore Porter who commanded the *Essex* in the war of 1812, and was one of the gallant band of sailors which included Decatur, Perry, and Lawrence. The Admiral who has just died was born in 1813, entered the service in 1829, and worked his way through the subordinate grades until the outbreak of the civil war found him Commander. In that war he had the remarkable luck of being assigned to solve problems which were new, and called for resources entirely outside of the regular routine. It was he who at the bombardment of Forts St. Philip and Jackson demonstrated what is now an axiom in gunnery that the damage done to a fortified work by a bombardment, however heavy, is inconsequential, if the garrison do not take fright and run away. A corollary to this proposition was his running the batteries at Vicksburg. He fitted out an old scow to resemble an ironclad, set her engines at full speed, and sent her past the batteries; they opened fire on her, but did not sink her, and could not hurt her, as there was nothing to damage, and no one on board. The rebels, terrified at the demonstration of this apparently invulnerable craft, blew up their own *Indianola*, a fine gunboat, to save her from capture, and the Union fleet passed the batteries in safety.

It was he, also, who demonstrated the fact that in the bayous of the Mississippi States, a properly built vessel, properly handled, can be sailed "whenever the soil is a little damp." He drove his ironclad craft, drawing six inches or less, through swamps and even ploughed fields. Where a tree stood in the way, his crew landed, sawed it off and hauled out the stump. In this way he quite often surprised rebel camps, which were thrown into consternation by the appearance in their rear of a fleet of ironclads steaming out of the woods, and seemingly travelling over dry land. For ingenuity and resource there was no one in the navy like David Dixon Porter; he richly deserved the promotion he got.

## *THE NEW CONSULAR MARRIAGE ACT.*

We reprint below from the offical copy of the statutes of last session the Marriage Act of 1890, on which we commented the other day. To make the record on this important subject complete, we append the Order in Council made under the Act from the *London Gazette* of November 25th, 1890.

53 & 44 Vict.—CHAPTER 47.

An Act to amend the Law relating to the marriage of British Subjects outside the United Kingdon.—(18th August, 1890.)

Be it enacted by the Queen's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal and Commons, in this present Parliament assembled, and by the authority of the same as follows:—

1.—(1) This Act may be cited for all purposes as the Marriage Act, 1890.

(2)—The Act of the session held in the twelfth and thirteenth years of Her Majesty, chapter sixty-eight, intituled "An Act for facilitating the marriage of British subjects resident in foreign Countries," is in this Act referred to, and may be cited as the Consular Marriage Act, 1849.

2.—Every marriage between parties of whom one at least is a British subject which, from and after the commencement of this Act, shall be solemnized in accordance with the provision of this Act in the house of any British ambassador or minister residing within the country to the Court of which he is accredited, shall be deemed and held to be as valid in the law as if the same had been solemnized within the United Kingdom with a due observance of all forms required by law, and the Consular Marriage Acts, as amended by this Act, and as modified by adaptations made in pursuance of this Act, shall apply accordingly.

3.—The Consular Marriage Act, 1849, and the Consular Marriage Act, 1868 (in this Act referred to as the Consular Marriage Acts), as amended by this Act, shall apply in the case of a marriage solemnized before any governor, high commissioner, resident, or consular or other officer directed or authorised to solemnize and register marriages in the manner provided by the nineteenth section of the said Consular Marriage Act, 1849, as if such governor, high commisioner, resident, or consular or other officer were a consul within the meaning of the Consular Marriage Acts. This section and the provisions of the Consular Marriage Acts, and this Act relating to the marriages in this section referred to shall not be limited to places outside Her Majesty's dominions.

4.—Every marriage between parties of whom one at least is a British subject which, from and after the commencement of this Act, shall be solemnized in accordance with the provisions of this Act on board one of Her Majesty's vessels on a foreign station, shall be deemed and held to be as valid in the law as if the same had been solemnized within the United Kingdom with a due observance of all forms required by the law.

5.—The Consular Marriage Acts as amended by this Act shall apply in the case of a marriage solemnized on board one of Her Majesty's vessels as if the commanding officer of the vessel were a consul within the meaning of the Consular Marriage Acts.

6.—Where a consul is satisfied, in accordance with regulations made under this Act, that a marriage between parties, of whom one at least is a British subject, has been duly solemnized there in accordance with the local law of the country, he may register the marriage, and thereupon, subject to the said regulations, the Consular Marriage Acts shall apply as if the marriage had been solemnized in pursuance of those Acts.

7.—(2). The period during which a copy of the notice referred to in section three of the Consular Marriage Act, 1849, is to be suspended in the office of the consulate shall be fourteen days, whether the marriage is solemnized by licence or without licence, and section nine of the same Act shall have effect as if the period therein referred to were fourteen days in the case both of marriage by licence and of marriage without licence.

(2) The affirmation or declaration required by section six of the Consular Marriage Act, 1849, in the case of marriages by licence shall be required whether the marriage is by licence or without licence, but the certificate referred to in that section shall only be given in cases of marriage by licence.

8.—Section nine of the Consular Marriage Act, 1849, shall have effect as if the words "eight in the forenoon and three in the afternoon" were substituted for words "eight and twelve in the forenoon."

9.—Her Majesty the Queen may, by Order in Council, make regulations—

(*a.*) Prohibiting or restricting the exercise by ambassadors, ministers, governors, high commissioners, residents, commanders of ships, consuls, and other officers of their powers under the Consular Marriage Acts and this Act in cases where the exercise of those powers appear to Her Majesty to be inconsistent with international law or the comity of nations, or in places where, in the opinion of Her Majesty, sufficient facilities exist without the exercise of those powers for the solemnization of marriages to which any British subject is a party; and

(*b.*) Determining what offices, chapels, or other places are, for the purposes of marriages under the Consular Marriage Acts or this Act, to be deemed to be part of the house of an ambassador or minister or of a consulate; and

(*c.*) Modifying in special cases or classes of cases the requirements of the Consular Marriage Acts and this Act as to residence and notice, so far as such modification appears to Her Majesty to be consistent with the observance of due precautions against the solemnization of clandestine marriages; and

(*d.*) Adapting the Consular Marriage Acts to marriages in the house of a British ambassador or minister, or on board one of Her Majesty's vessels, and determining by whom such marriages may be solemnized or registered; and

(*e.*) Adapting the Consular Marriage Acts to marriages before a governor, high commissioner, resident, or other officer; and

(*f.*) Determining the conditions under which and directing the mode in which marriages solemnized in accordance with the local law of a foreign country may be registered in pursuance of this Act; and

(*g.*) Varying and revoking any regulations previously made.

All such regulations shall be published under the superintendence of Her Majesty's Stationary Office, and laid before both Houses of Parliament, and shall in force have effect as if enacted by this Act.

10.—Nothing in this Act contained shall confirm or impair, or in anywise affect, or be construed to confirm or impair, or in anywise affect, the validity in law of any marriage solemnized beyond the seas, otherwise than as herein provided, and this Act shall not extend to the marriage of any of the Royal Family.

11.—This Act shall come into operation on the first day of January one thousand eight hundred and ninety-one.

12.—The enactments specified in the schedule to this Act are hereby repealed to the extent appearing in the third and sixth paragraphs of that schedule.

SCHEDULE.—ENACTMENTS REPEALED.

Session and Chapter.—4 Geo. 4. c. 67.

Title.—An Act to declare valid certain marriages that have been solemnized at St. Petersburg since the abolition of the British factory there.

Extent of Repeal.—The whole Act so far as it relates to any marriage solemnized after the commencement of this Act.

Session and Chapter.—4 Geo. 4. c. 91.

Title.—An Act to relieve His Majesty's subjects from all doubt concerning the validity of certain marriages solemnized abroad.

Extent of Repeal.—The whole Act, so far as it relates to any marriage solemnized after the commencement of this Act in the chapel or house of any British ambassador or minister, or in the chapel belonging to any British factory abroad, or in the house of any British subject residing at such factory.

At the Court at Windsor, the 22nd day of November, 1890.

PRESENT.

The Queen's Most Excellent Majesty.
Lord President.
Marquess of Salisbury.
Earl of Yarborough.
Mr. Ritchie.
Lord Justice Kay.

Whereas, by "The Marriage Act, 1890," the Consular Marriage Acts are amended, and as amended, are made applicable to marriages at British Embassies and Legations, or before Governors, High Commissioners, Residents, or Consular or other officers authorized in that behalf without or within Her Majesty's dominions, and by the same Act it is provided that Her Majesty the Queen may, by Order in Council, make Regulations for certain purposes specified in the said Act.

Now, therefore, Her Majesty, by virtue and in exercise of the powers by the said Act or otherwise in Her vested, is pleased by and with the advice of Her Privy Council to order, and it is hereby ordered as follows:—

1.—For the purposes of section two of "The Marriage Act, 1890," every office, room, or place within the precincts or curtilage of the house which is for the time being occupied by an Ambassador or Minister, or in which an Ambassador or Minister for the time being resides, and any church or chapel annexed to such house, or for the time being used with the consent of the Government to which the Ambassador or Minister is accredited, as the chapel thereof, shall be deemed to be part of the house of such Ambassador or Minister, and the Consular Marriage Acts shall apply *mutatis mutandis* to marriages solemnized in pursuance of the said section, as if the Ambassador or Minister were a Consul duly authorized within the meaning of the said Acts.

2.—For the purposes of section two of the said Act, expressions in the Consular Marriage Acts referring to dwelling or residence, or usual place of abode within the district of a Consul, shall be deemed to refer to dwelling or residence, or usual place of abode within the city or place at which the Ambassador or Minister officially resides, or within ten miles of his official residence.

3.—For the purposes of the Consular Marriage Acts as amended by the said Act, every office, room, or place within the precincts or curtilage of the office or Consulate of a Consul, as defined in the said Acts, shall be deemed to be part of the Consulate or office of the Consulate of such Consul.

4.—In case Her Majesty is pleased, under the provisions of sections three of the said Act, to authorize any Governor, High Commissioner, Resident, or other officer (not being a Consul within the meaning of the Consular Marriage Acts) to solemnize and register marriages, or any person to act as Her officer and commissioner for that purpose in any country or place outside Her Majesty's dominions, the district for which he is so authorized to act shall be deemed to be his district for the purposes of expressions in the Consular Marriage Acts referring to the district of a Consul, and the office or place specified in the writing by which he is authorized shall be deemed to be his Consulate or office of his Consulate, and any document required by those Acts to be authenticated by the Consular seal shall be sufficiently authenticated if sealed with his official seal, or if signed by him with the addition of his official name or description.

5.—This Order may be referred to as "The Foreign Marriages Order in Council, 1890."

And the Right Honourable the Marquess of Salisbury, K.G., Her Majesty's Secretary of State for Foreign Affairs, is to give the necessary directions herein. C. L. PEEL.

## *THE JAPANESE VIEW OF NEW JAPAN.*

The electric shock—perhaps the most violent and painful shock I ever experienced—effected by the telegraphic communication transmitted from Yokohama on the 19th of September last, aroused in me—a member of the most excitable nation in the world—the determination to take up my pen in her behalf. But the mental electricity induced was not sufficient to cause my pen immediately to throw its intense and sparkling light on the subject which excited my deepest interest, viz, the revision of the treaties existing between Japan and the Foreign Powers. I deemed it expedient to wait, though I did so very impatiently, until the power of steam should bring more detailed information from Japan respecting the anti-revision meeting which lately took place in Yokohama. From the newspapers, both native and foreign, and from the private letters which I have received during the last two months, I have obtained so clear an idea of what took place that there is no longer any excuse for delay. By means of that mighty instrument the pen I hope to throw such light on this vexed and intricate question as may excite the intelligent sympathy and goodwill of the British public.

Before entering into an account of the meeting recently held in Yokohama, let me briefly describe the condition of the country, and the circumstances under which the existing treaties were signed in 1858. Japan was then an obscure country, almost unknown to the rest of the world, and her government a now obsolete feudal system. The foot of man or horse supplied the place of mail-train, telegraph, and telephone; the back of beast or the shoulder of man was her only means of land transport; her people went about the streets armed with swords, and no sign of Western civilisation could be detected in her social or political life.

This state of things has so entirely ceased that we read of them as of ancient history. The very name of Tykoon—at that time the absolute ruler of Japan, and the man by whom the treaties were ratified—has been almost entirely lost in oblivion.

Digitized by Google

Moreover, the style of expression and the coins which are mentioned in the treaties are so strange to the present generation that we have great difficulty in understanding it. In brief the present treaties were signed when Japan was in a state of ignorance and inexperience with regard to international intercourse. This being so, we need not wonder that the conditions and articles of the covenant are somewhat peculiar and unsatisfactory to the New Japanese.

The main points of the agreement may be summed up as follows: The Tykoon's government was required to open seven ports as markets for foreign trade, to set apart a narrow section of each of these towns in which foreigners might reside and trade, and to allow aliens the privilege of making excursions in any direction whithin a certain distance (about twenty-four miles) of the towns. Beyond these limits foreigners might not go, unless they obtained passports from the Japanese Government. All foreigners were to enjoy the privilege of exercising their own laws under the system of consular jurisdiction, and were not to be subject to the Japanese courts or laws. Still more distressing is the clause which prevents any attempt to increase the duties more than a fixed rate of 5 per cent. *ad valorem*, and forbids Japan to levy any duties on foreign goods not liable to duty already. By these latter clauses both her judicial and tariff autonomy is fettered to a great extent, and her national rights infringed. From these facts my readers may judge of the unequal and unfair condition in which Japan has been placed by the Foreign Powers. Still it is hardly surprising, when we remember what the state of the country was, that such a treaty should be considered suitable and advantageous to both parties. Happily, however, the treaty contains a clause by which both parties had a right to demand a revision of the document at the end of foureen years, *i.e.* in 1872.

Thirty-two years have passed away, and in the interval our country has seen a great and glorious revolution, followed by a period of social and national progress which is unprecedented in the annals of the world. New Japan has risen in glorious majesty and splendour, fully justifying her claim to be called the "Land of the Rising Sun," yet her treaties with the Foreign Powers still remain as they were before she had seen the light of European cilvilisation.

Turning from the Old to the New Japan, the mind may well feel giddy to realise the amount of of progress which has been made. In twenty-three short years her government has been transformed from a feudal system, first to a bureaucracy, and then to a constitutional administration, with a representative parliament. Her national constitution—the object perhaps of her greatest pride—grew and blossomed in the atmosphere of peace and prosperity, unaccompanied by the storms and bloodshed which have nearly always prevailed in the countries of the West during their national struggles for freedom. Her army and navy have been entirely remodelled after the European pattern, and equipped with all the latest implements of warfare, in place of her ancient swords, bows, and arrows. A still greater change has been made in laws and in the judicial courts. The old Chinese system has been replaced by one thoroughly European, and, judging from results, our administration of justice would do no discredit to many a country in the West. Her police organisation also deserves the highest praise, the staff of the detective department being especially remarkable for their intelligence and morality. Education—the basis of all national greatness—receives the utmost attention. Every branch of science is being taught, and every kind of educational institution which has been introduced from the Occident has spread over the whole empire.

A few more details regarding her social and commercial improvement may be added to remove any lingering doubts as to the reality of our progress. The postal and telegraphic systems were introduced in 1872, and have been widely utilised. An official report which was issued about three years ago records that in one year 137 millions of letters, and over two and a half millions of telegrams, have been transmitted, with an annual increase of ten per cent. in both cases. The development of railways and of the mercantile marine, the building of lighthouses, the improvement of harbours and construction of docks, if they continue to progress at the present pace, will soon place Japan in a very satisfactory condition in these respects. It is a remarkable fact, and one deserving careful attention, that her foreign trade has doubled within the last ten years, and quadrupled during the last twenty years, whilst the growth of commercial and industrial enterprise has been something wonderful. Further, the members of New Japan, though proud of the position to which they have attained, are by no means satisfied to remain in their present state, but are ever ready to concentrate their energies on the improvement of any object which excites their national interest.

Truly Japan, like her celebrated Fuji Mountain, has suddenly sprung from the level plain to a celestial height, and is, like it, an object worthy of the admiration and wonder of the world, both for the beauty of its form and the rapidity of its construction. Though not yet equal to the Great Powers of Europe and America in every detail, Japan may be compared favourably with the rest of the civilised countries of the world, and is certainly superior to many of the countries in which the so-called Great Powers have not their extra-territorial jurisdiction.

Having once opened her eyes to the world, Japan soon became aware of the inequality of her national and commercial intercourse with foreign countries. Although an absolutely independent State, her judicial and tariff autonomy, the principal right of a nation, is under the control of other countries, and her government is deprived of the sovereign power which should belong exclusively to it.

Realising these afflictive facts, the people determined, as any other nation worthy of the name would have done, to remove the humiliating clauses from the international treaties. Other circumstances have tended to strengthen this determination. The extensive improvements and reforms, and the various public works which have been inaugurated within the last few years, have naturally entailed the expenditure of vast sums of money, to obtain which heavy taxes had to be levied upon the land and other estates, as the terms of the treaties prevented an increase in the tariff dues. Moreover, constant complaints have been made by the natives, that the aliens take an unfair advantage of the protection extended to them by the consular courts to annoy and defy the Japanese people. For all these reasons the Japanese Government, in 1882, made an application for the revision of the treaties. But what was the result? The friendly relations existing betwixt Japan and the "Powers" have been in a most critical condition ever since, and the result, instead of being an improvement in her condition, appears to be rather the reverse. In spite of the very reasonable, not to say humble, proposals of our Government, the negotiations for the revision of the treaties have been delayed by many difficulties and impediments.

During the last eight years no subject has created more excitement and agitation in Japan, nor has any political measure so sadly embarrassed the Government, as this affair. The following illustrations will be sufficient to prove this. The proposals made by the Japanese Government on two occasions have failed to bring the matter to a satisfactory conclusion in consequence of the persistent opposition of the Foreign Powers on the one hand, and the dissatisfaction of the Japanese people on the other. Hence, the Cabinet has resigned twice in three years, and two Ministers of Foreign Affairs have been obliged to retire from office, one having been crippled for life by the attack of a political fanatic. So violent did the excitement become, that it was found necessary to pass the "Peace Preservation Act," whereby many political agitators were banished from the capital. And what is the cause of all these deplorable events? Simply the demand of an independent nation for the recognition of its rights by the other nations of the earth!

But things have changed of late. The policy of agitation has now been adopted by the foreign residents in Japan. It is reported that, in the beginning of last September, a certain Englishman, residing in Yokohama, received information—the source of which is shrouded in mystery—that "Her Majesty's Principal Secretary of State for Foreign Affairs may be induced to concede the demand of the Japanese Government," and this he considered to thereaten serious dangers. On the 1st of September a notice, which, strange to say, bore no signature except "By Order," appeared in the foreign papers, inviting the foreign residents to attend a meeting at the Public Hall on the 11th of the month for the purpose of formulating and transmitting to Her Majesty's Government the views of the British subjects upon the question. It is stated that over three hundred persons of all nationalities attended this meeting, and Mr. J. A. Fraser, a tea merchant, was elected chairman. This gentleman read the resolutions, which were spoken to and seconded by Messrs. J. F. Lowder (a solicitor), J. H. Brooke (the editor of the *Japan Herald*), A. O. Gay, and other gentlemen. The resolutions were unanimously carried, and their terms run as follow:—

1. That in the opinion of this meeting the time has not arrived when questions in regard to rights, whether or property or person, arising between subjects and citizens of Foreign Powers in the dominions of his Majesty the Emperor of Japan can be unconditionally and safely subjected to the jurisdiction of Japanese tribunals; or when an estimate can be formed of the period within which the unconditional relinquishment of extra-territorial jurisdiction in Japan can be safely promised.

2 That in the opinion of this meeting it would be an act of grave injustice to foreigners who have purchased land in Japan, under covenant with the Japanese Government, if the conditions or incidents of their tenure of such land should be altered without their consent.

A week after the meeting the resolutions were telegraphed by the committee of the meeting to Mr. W. M. Strachan, 18, Leadenhall Street, London, through whom they were conveyed to the Chambers of Commerce of London, Manchester, Bradford, Glasgow, Liverpool, Paris, Lyons, Berlin, Hamburg, Rome, Milan, Berne, Amsterdam, New York, and Lisbon; also to leading English, Continental, and American newspapers. Thus the question has been brought before the English public.

I now wait with great interest to see what action these Chambers of Commerce—the most influential and well-informed representatives of the commercial community in Great Britain—will take in this matter. Up to the present I have heard nothing about any definite course of action on their part. They have considered the question at their committee meetings and applied to the Foreign Office for more accurate information as to the state of the treaty negotiations, which information the authorities have declined to make public for the present. The Chambers of Commerce have therefore postponed further action until they receive further details both from official and other sources.

In the meantime, let me take the opportunity to make a few remarks which may throw a little light upon the subject, not only for the sake of the Japanese, but the benefit of the English people. As no official announcement regarding the proposals of the Japanese Government has yet been made, we cannot discuss these points with absolute certainty. We may pretty confidently assume, however, that the Japanese Government will consent to throw open the whole Empire to foreigners to reside or trade in, and that at the utmost her demands will not exceed the following: (1) the restoration of judicial autonomy over the aliens in her dominions, and (2) the restoration of tariff autonomy. Whether some conditional arrangement may be adopted we are not yet in a position to judge; but, even in case no conditional arrangement is made, her Government claims not any special or higher privilege than the countries with whom she trades possess, but only an equal intercourse, and that freedom of action io which she is entitled as an independent realm.

But, from the remarks of Mr. Lowder, principal promoter of the anti-treaty revision agitation, it appears that there are some conditional arrangements being made. He said in his speech at the meeting that "the proposals now put forward by the Japanese Government are to this effect: that outside what are known as treaty limits foreigners shall immediately become subject to the jurisdiction of the Japanese tribunals, and that after a period of five years all foreigners, whether within what are known as the concessions or whether in the interior, shall become subject to Japanese jurisdiction." Should this be trustworthy information, as he persists, it appears that the Japanese Government are prepared to make a most liberal conditional settlement in favour of foreigners; yet so great is the dissatisfaction among certain sections of the foreign community in Japan, that they express serious alarm, and are making vigorous demonstrations both at home and abroad.

Their reasons for acting thus are easily learnt from the wording of the resolutions. The objection embodied in the first resolution involves, perhaps, two elements; firstly, dislike to surrender the privilege of appeal to consular courts, which has been theirs for so many years, and to submit to Japanese jurisdiction; and, secondly, distrust of Japanese laws and tribunals, together with a fear as to the safety of their lives and property. It is, perhaps, only natural that they should have such feelings when a change of the conditions under which they live is impending. The first of these feelings may be likened to that which everyone has when about to leave an old situation for a new, or to leave the society of old acquaintances and friends for that of strangers; whilst the latter is similar to that of people who have watched over children from their infancy, and, familiarity having rendered them unconscious of the children's growth, still look upon them as children when they are fully grown. I shall not attempt to argue against these common feelings of humanity, except to remark that our prejudices and habits of thought are not always strictly reasonable. But it is very doubtful whether the present state of the Japanese judicial organisation is so unsatisfactory as to justify the foreigners in their opposition to the treaty revision, when they would thereby obtain the invaluable privilege of free intercourse with the whole empire. It may be wise, however, to leave this question to the

Digitized by Google

impartial judgment of the English public, merely directing their attention to the following extract from Mr. B. H. Chamberlain's new book, entitled *Things Japanese*, which I trust may give a better and more impartial view of the matter than anything written by Japanese hands. Under the heading of "Law," Mr. Chamberlain writes thus:—

The new codes resulting from the legislative activity of the present reign are (1) The Criminal Code and the Code of Criminal Procedure, drafted by M. Boissonnade de Fontarabie on the basis of the Code Napoléon, with modifications, suggested by the old Japanese Criminal Law; these were published in 1882; (2) the Civil Code, the Code of Civil Procedure, and the Commercial Code, which were just enacted; the new Civil Code, however, includes as yet but the law of things. Traditional Japanese usage still regulates such important matters as marriage, succession, adoption, and others belonging to the law of persons.[1] The Code of Civil Procedure and the Commercial Code are to come into force on the 1st January, 1891. The Civil Code will not come into force till the 1st January, 1893. Though not actually entitled codes, we may also include (3) the Constitution, with its attendant laws regarding the Imperial House, the Diet, and Finance; (4) the laws for the exercise of local self-government; and (5) divers statutes on miscellaneous subjects, one of the most important of which is banking.

Crimes, as classified in the Japanese Criminal Code, are of three kinds, namely (1) crimes against the State or the Imperial family, and in violation of the public credit, policy, peace, health, &c; (2) crimes against person and property; (3) police offences. There is also a subdivision of (1) and (2) into major and minor crimes.

The punishments for major crimes are: (1) death by hanging; (1) deportation, with or without hard labour, for life or for a term of years; (3) imprisonment with or without hard labour, for life or for a term of years. The punishments for minor crimes include confinement, with or without hard labour, and fines. The punishments for police offences are detention for from one to ten days without hard labour and fines varying, from 5 *sen* to $195. The court which tries persons accused of major crimes consists of one *juge de paix*. Capital punishments are carried out in the presence of a procurator. They are now extremely rare. Criminals condemned to deportation are generally sent to the Island of Yezo, where they sometimes work in the mines. The ordinary prisons are situated in various parts of the empire, and number one hundred and ninety-three.

. . . At present the courts are divided into local courts (presided over by *juges de paix*), districts or provincial courts, courts of appeal, and a supreme court, all of which have jurisdiction both in criminal and civil suits. Each of these courts has branch offices established to accommodate suitors, regard being had to population and to the area of jurisdiction. The local courts have jurisdiction over police offences; the district courts over crimes, besides acting as courts of preliminary investigation; the appeal courts hear new trials; the supreme court hears criminal appeals on matters of law. All crimes, of whatever sort, are subjected to preliminary examination before actual trial. The conducting of criminal cases, from the very beginning down to the execution of the criminal, if he be condemned to suffer death, rests with the public procurator, who unites in his own person the functions of public prosecutor and of grand jury.

The present judiciary consists partly of men trained under the old pre-European *régime*, partly of graduates of the Law College of the Imperial University, and of the private law colleges, of which there are six in Tokyo, and eight altogether in the Empire. About a thousand young men graduate yearly. Lawyers are bound to pass a certain examination before being admitted to practise at the bar; but it is of a very theoretical nature, and is likely to be soon revised. The new law concerning the constitution of courts requires candidates for judgeships to pass two competitive examinations, unless they are graduates of the University, in which case they need only pass the second of the two, after having served as probationary judges for a term of three years. Judges are appointed for life.

Granting that the system described in the foregoing passage may not give the English public the same satisfaction as their own laws and tribunals, we must at the same time consider whether the Japanese laws and judges are less perfect than those of many other countries, with which Great British has equal intercourse, and whether British subjects in these countries are always perfectly satisfied with the laws by which they are governed. Further, Mr. Brooke, one of the chief speakers at the meeting, laid great stress on the fact that Japan has no writ of *habeas corpus* nor system of juries; but it is hardly necessary for me to show that these two points are no arguments against the treaty revision scheme. Because, if the English public will only take the trouble to examine the judicial systems of European and American countries, they will find that many of them are in the same position as Japan in this respect.

Leaving this theoretical argument, let us more carefully consider the practical and most important element which closely concerns the national welfare and prosperity of both countries. Twenty years ago the foreign trade of Japan was not very considerable, the total value of imports and exports per annum only amounting to $33,692,000, or about 5,615,000*l*. Ten years later it had increased to $61,128,000, or 10,188,000*l*., and in another ten years, viz. in 1889, it reached over $136,164,000, or 22,700,000*l*. More than one-fourth of her trade represented by these amounts has been done with England alone. This shows not only the unusual progress in our commerce, but also the great connection existing between England and Japan. Remember, too, that the foreign trade has been carried out, nominally in the seven ports, but practically in four—the remaining three being very insignificant on account of their bad geographical situation—and beyond these open ports there is not a single penny of foreign capital invested, not a single foreign company established; not even a single foreign partner in any Japanese firm, not a single foreign commercial traveller seeking fresh orders, nor a single foreign vessel engaged in the coasting trade; all these advantages indispensable to commerce, being prohibited by the existing treaties. These grievous restrictions once removed, how great a development would be immediately manifested in her foreign trade! And the revision of the treaties is the simple and only means by which these obstacles may be removed. Now, comparing these valuable commercial advantages with the slight disadvantage (if such it be) of Japanese jurisdiction, it is plain what answer should be returned by the commercial community of England. Moreover, one of the most admirable characteristics of Englishmen, to my mind, is that they—the greatest commercial and most enterprising nation—are unceasingly striving with their well-known pluck, perseverance, and patriotism, through perils and difficulties, to discover new markets for their manufactures in every corner of the world. They shrink not from the overwhelming heat of the torrid zone, nor from the icy blasts of the polar regions. They even dare to make their homes and form settlements in the midst of noxious vermin, poisonous reptiles, and beasts of prey. They are content to associate with treacherous savages among whom strife and bloodshed are the normal state of affairs. And why do they risk these perils and endure these hardships? Simply to increase their prosperity as individuals and as a nation. By this courage and perseverance has Great Britain attained, and still firmly maintains, her superiority in the world. Why, then, does that portion of her brave people in Japan refuse the liberal offer of the Japanese Government? Is it really through fear of the laws and judges of Japan? Do they consider that Japanese Jurisdiction is more intolerable than those severe climates, or more injurious than the wild animals, or more hazardous and unsafe than those turbulent and barbarous regions to which we have referred? No! They are intelligent enough, just as are their fellow-countrymen at home, to recognise the difference between Japan and those countries. They are also brave enough to dare the perils of Japanese jurisdiction, however imperfect it may be. What, then, can be the real reason why they object to the treaty revision? Merely to protect their own private interests, as will be shown later.

Passing to the consideration of the second resolution, this conviction will be confirmed. With reference to the land question, on which this resolution is framed, I am afraid the public will be misled by the wording of the resolution—drawn up apparently by one who has an entire misconception of the facts—should they not be made thoroughly acquainted with the matter. I shall, therefore, endeavour to put the facts, and point out the misconception of them, as briefly as possible. In the third article of the treaty between Japan and Great Britain the nature of the land-tenure is clearly defined. After enumerating the ports to be opened to British subjects the article goes on to say:—"In all the foregoing ports and towns, British subjects may permanently reside. They shall have the right to *lease land*, and purchase the buildings thereon." The land, it will be observed, is to be "leased," the buildings "purchased." In accordance with this compact, the Japanese authorities have disposed of the lease of certain tracts of land in each port to the aliens by public auction under the conditions or incidents agreed upon by the Japanese and foreign authorities, whilst other tracts of land have been handed over, on certain conditions, without any charges whatever. A detailed statement of the conditions of tenure and maintenance of the land at the Yokohama Settlement will be found in the "Memorandom for the Foreign Settlement at Yokohama," signed in 1864, and the "Convention of Improvement of Settlement, Race-course, Cemetery, &c., of Yokohama," signed in 1866. From these two documents we learn (1) that the Japanese authorities issued the title-deeds to those who occupied the land as an evidence of ownership; (2) that the occupiers have to pay rent annually to the Japanese Government; (3) that the proceeds obtained from the public auction have been added to the municipal fund in order to provide for the construction of drainage, roads, &c., and other improvements in the locality; and (4) that all foreigners were exempted from all taxes and duties upon the land, such as are imposed upon Japanese subjects. Further arrangements regarding the boundary-lines of the settlement, the filling up of "swamp lots," the allotment of the ground, laying of roads, locating of the cemetery, race-course, public park, &c., fixing of terms of rent and management of public works of improvement in the locality, together with the plans of the settlement, will also be found in these documents. There is no other authoritative averment than these documents to settle any discussion arising from the land of the foreign settlement. But we cannot find any terms which might lead us to suppose that the land has been purchased by foreigners. Moreover, as all these conditions or incidents of the land-tenure were originally settled by the Japanese Government with the foreign authorities directly, and not with foreign subjects, there is no obligation on the part of the Japanese Government to ask the consent of foreign subjects when any alteration of the land-tenure is intended. It is therefore quite absurd to base a resolution on these grounds, and charge the Japanese Government with "grave injustice."

Having now cleared up the misty notions which prevail on the subject of land-tenure by reference to facts and official documents, the next question which suggests itself is, "What changes will be effected in the condition of foreign land-renters by the proposed revision?" This question is, I imagine, so simple that any fair-minded and well-informed person may easily arrive at a pretty accurate conclusion. Firstly, we must admit that, if it is right to restore the judicial autonomy of a nation, it is equally right to restore also the fiscal autonomy. Secondly, it is a principle universally recognised that an alien should not legally claim more privileges and advantages than a native enjoys. Bearing these principles in mind, it is reasonable to suppose that all the foreign land-renters will be placed on the same footing with respect to land-tenure as Japanese subjects; in other words, they will be obliged to pay the same land taxes as the Japanese, instead of the present rent, and be liable in all other respects to whatever taxes or duties are leviable upon land similarly held by Japanese subjects. With reference to the ownership of the land by the present foreign occupiers, we are informed from a reliable source that they will recive new title-deeds of ownership in lieu of their present leases without any extra charges. Should this be true, what a liberal arrangement has been proposed by the Japanese Government! But the English public will say, "If the offer is so generous, why do our fellow-countrymen in Japan so strongly oppose the treaty revision? Are there not some good reasons for their opposition?" Yes, there is a good reason at the bottom of the question, from their point of view. The present foreign land-holders are highly benefited by the terms of the present treaties, which compel all the rest of the foreigners and newcomers to reside or establish their business within a limited area, and consequently enhance the value of the land year by year. If the treaties were revised and this restriction removed their interests would suffer. This is the serious reason to which I referred when I asserted that their objection was entirely based on selfish motives.

In conclusion, let me again remind the commercial community in England of a singular fact which has been revealed during the last few years respecting the trade of Japan with England and Germany. Since Sir Harry Parkes's "Gunboat Policy" began to be observed with distrustful eyes by the nation of Japan, since Sir Francis Plunkett raised so many objections against the first negotiations of the treaty revision, the feeling of the Japanese people has shown a tendency to favour Germany rather than England. Germany, on her part, being, as we well know, the keenest rival of England in every part of the world, loses no chance of gaining every advantage. The consequences are shown in the increase of her trade with Japan. Facts are said to be stubborn things, and the following may serve to show the serious position in which England is likely to be placed unless she regains the favour of Japan by promptly revising the treaty.

Official statistics show that the trade of Germany with Japan has increased threefold within the last seven years, whilst that of England has only doubled in that time. To give further details I compiled tables according to the official statistics. The first showed the percentage of the Export, Import, and total trade of Japan with England, Germany, America, and France; the second, the increase or decrease of the trade of these countries with Japan. From the first table we find that the proportion monopolised by England is steadily declining,

1 After this article was written, the writer received official information to the effect that the new Civil Code of Japan respecting property, marriage, succession, &c., received the sanction of H.M. the Emperor of Japan on the 6th of October last, and it will come into force on the 1st of January, 1893. So that the Japanese Civil Code is now complete.

Digitized by Google

whilst that of Germany shows a rapid rise. The second table showed that whilst the total trade of Japan increased during the last five years (1884-89) 114.2 per cent., her trade with Germany increased beyond this rate, 130.2 per cent., whereas the increase of her trade with the other three countries was much less than 114.2 per cent., England being lowest in the scale. This is said to be chiefly owing to the feeling prevailing among the Japanese people. Again, the recent meeting, having been promoted by the English residents, has greatly increased the ill-feeling; so much so, that many of the Japanese merchants and professional men have been combining, and agreeing not to have any commercial intercourse with those who held that meeting. These actions may be looked upon as narrow-minded, but experience has taught us that the trade of England must certainly suffer if the Japanese maintain the same feelings as now. Alas! that England, whilst seriously alarmed by the McKinley Tariff Bill in the United States, and watching with deep anxiety the attempts of France and Russia to erect similar obstacles in the way of their neighbours, should hesitate to accept the incalculable boon which the Japanese Government offers, viz., the opening up of the whole empire to England capitalists, manufacturers, and traders.

That it is the selfishness of a few traders which prevents this revision is fully demonstrated by the action of the English missionaries in Japan. These gentlemen, whose aim is not the accumulation of wealth, but the good of mankind, are so sensible of the mutual benefits which a revision of the treaty between Japan and England would bring, that they recently drew up and signed the memorial which was presented to Her Majesty's Minister in Tokyo on the 3rd of October last. Trusting that the mental electricity which induced me to pen this article has thrown some light—feeble though it may be—on this grave question of national importance to Englishmen and Japanese alike, I am now glad to turn out the electric current of my own arguments and leave the subject to the careful consideration of the public, displaying the enlightened memorial at the conclusion.

To His Excellency HUGH FRASER, Esquire, H.B.M.'s Envoy-Extraordinary and Minister-Plenipotentiary to Japan.

May it please Your Excellency.—We, the undersigned British subjects resident in Tokyo, and engaged in Christian mission work, under a sense of the many evils resulting from the postponement of the revision of the treaties between H.I.M.'s Japanese Government and Foreign Powers, desire to approach your Excellency in the following memorial.

We desire to express to your Excellency our sense of the great and successful efforts which have been made in recent years by the Government of Japan, especially in the compilation of her code of criminal and civil law, and in the organisation of her legal tribunals, to bring her methods of legal procedure into a position similar to that enjoyed by the most enlightened nations of the West.

We venture, therefore, to express the hope that such a revision of the treaties may speedily be brought about as will, while sufficiently safeguarding the rights and interests of H.B.M.'s subjects, satisfy the legitimate demands of H.I.M.'s Japanese Government in the matter of extraterritoriality.

We remain your Excellency's obedient servants.

Tokyo, October 3, 1890.

DAIGORO GOH.

## *LATEST TELEGRAMS.*

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, March 6th.

The United States Senate has rejected the Brussels Convention for the Suppression of the Slave Trade, fearing that it will interfere with private commercial enterprise.

London, March 8th.

Robert Antrobus, a partner in Coutts' Bank, has committed suicide.

A financial panic has occurred in Buenos Ayres.

Later.

The death of Mr. Antrobus is ascribed to accidental shooting.

The Argentine panic is over.

London, March 11th.

The Manchester City Council has advanced £2,500,000 to the Manchester Ship Canal Company.

London, March 12th.

A blizzard has swept over England unprecedented in severity. Snow in London is unabated, and trains in the south-east are blocked with snow. The Channel packets are twelve hours late.

(FROM THE "SINGAPORE FREE PRESS.")

London, February 18th.

The Egyptian troops have occupied El Teb unopposed.

The French Press strongly object to the nomination of Mr. Justice Scott, formerly of the Bombay High Court, as legal adviser to the Egyptian Government, it being considered that the appointment will greatly increase the influence of Great Britain in Egypt.

It is stated that Professor Liebreich of Berlin has discovered a curative substance for tubercle leprosy far surpassing that of Dr. Koch's.

London, February 19th.

France has protested against the appointment of Mr. Justice Scott as legal adviser to the Egyptian Government.

Last year the Egyptian surplus amounted to five hundred and ninety-eight thousand pounds.

A meeting of an excited nature has been held at Toronto, at which the Canadian Premier, Sir John A. Macdonald, read a document showing that the liberal Leaders had submitted to American statesmen an elaborate scheme for coercing Canada into a commercial union and annexation.

## *TIME TABLES AND STEAMERS.*

### TOKYO-YOKOHAMA RAILWAY.

DOWN TRAINS LEAVE SHIMBASHI Station at 6,* 7, 8.05, 9, 9.35.† 10.45, and 11.40† a.m., and 1.10, 2.20,† 3.35,‡ 4.45, 5.55, 6.50,† 8.30, 9.50,* and 11.15* p.m.

UP TRAINS LEAVE YOKOHAMA Station at 6.30, 7.45,* 8.20, 9.20,* 10.20, and 11.25* a.m., and 12.50, 1.50,* 2.55, 4.51,* 5.45, 7.05, 8, 8 58,† 10, and 11.05* p.m.

FARES—First-class, *sen* 60; second-class, *sen* 40; and third-class, *sen* 20.

Trains marked (*) run through without stopping at Omori, Kawasaki, and Tsurumi Stations. Those marked (†) run through without stopping at Omori and Tsurumi Stations. Those marked (‡) run through without stopping at Tsurumi Station.

### TOKAIDO RAILWAY.

TRAINS LEAVE YOKOHAMA (down) at 6.50, 9, and 10.25 a.m., and 12.30, 3.10, 4.30, 5.45, 7.40, and 10.40 p.m.; and KOZU (up) at 6.09, 7.30, 9.40, and 11.05 a.m., and 1.08, 3.13, 5.15, 7.17, and 9.43 p.m.

FARES—To Hodogaya, first-class *sen* 6, second-class *sen* 4, third-class *sen* 2; to Totsuka, *sen* 18, *sen* 12, *sen* 6; to Ofuna *sen* 36, *sen* 24, *sen* 12; to Fujisawa, *sen* 42, *sen* 28, *sen* 14; to Hiratsuka, *sen* 66, *sen* 44, *sen* 22; to Oiso, *sen* 75, *sen* 50, *sen* 25; and to Kozu, *sen* 93, *sen* 62, *sen* 31.

A tramway runs between KOZU and YUMOTO (distance 4 *ri*.) Jinrikisha may be hired between YUMOTO and MIYANOSHITA (distance 1½ *ri*)

### OFUNA-YOKOSUKA RAILWAY.

TRAINS LEAVE OFUNA (down) at 7.26 and 9.40 a.m., and 12.10, 3.50, 5.09, 6.25, and 8.20 p.m.; KAMAKURA (down) at 7.35 and 9.51 a.m., and 12.21, 4.01, 5.18, 6.36, and 8.31 p.m.; and DZUSHI (down) at 7.43 and 10 a.m., and 12.30, 4.10, 5.25, 6.45, and 8.40 p.m., YOKOSUKA (up) at 6.25, 8 02, and 11.20 a.m., and 3, 4.30, 5.45, and 7.35 p.m.; DZUSHI (up) at 6.41, 8.16, and 11.36 a.m., and 3.16, 4.46, 6, and 7.51 p.m.; and KAMAKURA (up) at 6.50, 8.25, and 11.46 a.m., and 3.26, 4.55, 6.08, and 8 p.m.

FARES—To Kamakura, first-class *sen* 9, second-class *sen* 6, third-class *sen* 3; to Zushimura *sen* 15, *sen* 10, *sen* 5; and to Yokosuka *sen* 30, *sen* 20, *sen* 10.

### UTSUNOMIYA-NIKKO RAILWAY.

TRAINS LEAVE UTSUNOMIYA (down) at 10.05 a.m., and 12.25* and 3.05 p.m.; and NIKKO (up) at 7.20 and 11.55 a.m., and 2.25 p.m.

* Through Trains to and from Uyeno.

FARES—First-class, 75 *sen*; second-class, 50 *sen* third-class, 25 *sen*.

### OYAMA-MITO RAILWAY.

TRAINS LEAVE OYAMA (down) at 6.50 and 9.25 a.m., and 2.20 and 5.15 p.m.; and MITO (up) at 6.25 and 10.10 a.m., and 2.05 and 4.55 p.m.

FARES—First-class, *yen* 1.56; second-class, *yen* 1.04; third-class, *sen* 52.

### OYAMA-MAEBASHI RAILWAY.

TRAINS LEAVE OYAMA (down) at 6 and 9.55 a.m. and 1.15 and 5.30 p.m.; KIRIU (down) at 7.50, and 11.48 a.m., and 3.08 and 7.23 p.m.; MAEBASHI (up) at 5.45 and 9.40 a.m., and 1 and 4.25 p.m.; and KIRIU (up) at 6.47 and 10.42 a.m., and 2.02 and 5.26 p.m.

FARES—Oyama to Kiriu, first-class *yen* 1.29, second-class *sen* 86, third-class *sen* 43; to Maebashi, first-class *yen* 1.98, second-class *yen* 1.32, third-class *sen* 66.

### KOZU-KOBE RAILWAY.

DOWN TRAINS LEAVE KOZU at 8.26 and 10.33 a.m., and 2.03, 4 42, and 6.09 p.m., and 12.08 a.m.; GOTEMBA at 9.48 and 11.55 a.m., and 3.32, 6.05, and 7.35 p.m., and 1.24 a.m.; NUMAZU at 10.37 a.m., and 1.10, 4.35, 7.10, and 8.30 p.m., and 2.12 a.m.; SHIZUOKA at 6 a.m., and 12.17, 3.30, 6.35, and 8.55 p.m., and 3.45 a.m.; HAMAMATSU at 9.05 and 11 55 a.m., and 2.44 6, and 9 20 p.m., and 6.10 a.m.; TOYOHASHI at 10.08 a.m., and 1.05, 3.48, 7.08, and 10.26 p.m., and 7.20 a.m.; OFU at 11.51 a.m., and 2.49, 5.21, 8.52 and 11.55 p.m., and 8.59 a.m.; NAGOYA at 5.45, a.m., and 12.45, 3.35, and 6.03 p.m., and 12.33 and 9.43 a.m.; GIFU at 6.43 a.m., and 1.52, 4.45, and 7 p.m., and 1.25 and 10.48 a.m.; OGAKI at 7.10 a.m., and 2.22, 5.18, and 7.29 p.m., and 1.54 and 11.20 a.m.; MAIBARA at 8.32 a.m., and 3.47, 6.47, and 8.46 p.m., and 3.10 a.m. and 12.50 p.m.; HIKONE at 8 43 a.m., and 3.59, 7.01, 8.57, and 1.01 p.m.; BABA (Otsu) at 10.18 a.m., and 6, 8.40, and 10.26 p.m., and 4.50 a.m., and 2.40 p.m.; KYOTO at 11.05 a.m., and 6.50, 9.30, and 11.08 p.m., and 5.36 a.m., and 3.30 p.m.; and OSAKA at 12.36, 8.18, and 11.12 p.m., and 7 a.m., and 5.05 p.m.

UP TRAINS LEAVE KOBE at 6.15 and 8.55 a.m. and 12, 1.50, and 9.30 p.m.; OSAKA at 4.45, 7.27, and 10.05 a.m., and 1.08, 2.54, and 10.36 p.m.; KYOTO at 6.07, 8.55, and 11.35 a.m., and 2.45 and 4.34 p.m., and 12.15 a.m.; BABA (Otsu) at 6.47 and 9.38 a.m., and 12.23, 3.32, and 5.19 p.m., and 1.10 a.m.; HIKONE at 8.16 and 11.07 a.m., and 1.53, 5.01, and 6.59 p.m., and 2.41 a.m.; MAIBARA at 8.30 and 11.21 a.m., and 2.09, 5.16, and 7.16 p.m., and 3 05 a.m.; OGAKI at 9.48 a.m., and 12.35, 3.25, 6.32, and 8.35 p.m., and 4.19 a.m.; GIFU at 10.14 a.m., and 1.01, 3.51, 6.58, and 9.02 p.m., and 4.44 a.m.; NAGOYA at 8.20 and 11.14 a.m., and 2.05, 4.46, and 8.10 p.m., and 5.45 a.m.; OFU at 9.01 and 11.53 a.m., and 2.52, 5.23, and 8.50 p.m., and 6.20 a.m.; TOYOHASHI at 10.40 a.m., and 1.36, 4.48, 7.09, and 10.29 p.m., and 7.56 a.m.; HAMAMATSU at 6.15 a.m., and 12.15, 2.50, 5.57, and 11.40 p.m., and 9.02 a.m.; SHIZUOKA at 5.15 and 8.51 a.m., and 3 and 5.20 p.m., and 2.05 and 11.17 a.m.; NUMAZU at 7.03 and 10.35 a.m., and 4.45 and 7.14 p.m., and 3.40 a.m., and 12.55 p.m.; GOTEMBA at 8.15 and 11 50 a.m., and 6.02 and 8.28 p.m., and 4.52 a.m., and 1.57 p.m.; and KOZU at 9.40 a.m., and 1.08, 7.17, and 9 43 p.m., and 6.09 a.m., and 3.13 p.m.

FARES—Kozu to Gotemba: first-class, *sen* 66, second-class *sen* 44, third-class *sen* 22; to Numazu *yen* 1.11, *sen* 74, *sen* 37; to Shizuoka *yen* 2.13, *yen* 1.42, *sen* 71; to Hamamatsu *yen* 3.57, *yen* 2.38, *yen* 1.19; to Toyohashi *yen* 4.23, *yen* 2.82, *yen* 1.41; to Ofu *yen* 5.22, *yen* 3 48, *yen* 1.74; to Nagoya *yen* 5.58, *yen* 3.72, *yen* 1.86; to Gifu *yen* 6.15, *yen* 4.10, *yen* 2.05; to Ogaki *yen* 6.42, *yen* 4.28, *yen* 2.14; to Maibara *yen* 7.05, *yen* 4.70, *yen* 2.35; to Hikone *yen* 7.17, *yen* 4.78, *yen* 2.39; to Baba *yen* 8.10, *yen* 5.40, *yen* 2.70; to Kyoto *yen* 8.40, *yen* 5.60, *yen* 2.80; to Osaka *yen* 9.21, *yen* 6.14, *yen* 3.07; and to Kobe *yen* 9.81, *yen* 6.54, *yen* 3.27.

### TOKYO-MAEBASHI RAILWAY.

TRAINS LEAVE TÔKYÔ (Ueno) (down) at 6, 6.35, 8.50, and 11.35 a.m., and 2.45 and 5.45 p.m.; and MAEBASHI (up) at 6, 8.50, and 11.45 a.m., and 2.40 and 5.45 p.m.

### TAKETOYO-OFU RAILWAY.

TRAINS LEAVE TAKETOYO (up) at 8 a.m., and 1.50 4.20 p.m., and OFU (down) at 2.55, 5.25, and 9.05 p.m.

FARES—Second-class, 26 *sen*, third-class, 13 *sen*.

### TOKYO-SHIOGAMA RAILWAY.

TRAINS LEAVE UENO (down) at 6, 6.35, 8.50, and 11.35 a.m., and 2.45 and 5.45 p.m.; UTSUNOMIYA (down) at 9.57 a.m. and 3.04 and 6.11 p.m.; SHIRAKAWA (down) at 8 a.m. and 12.34 and 5.42 p.m.; KORIYAMA (down) at 9.24 a.m. and 1.53 and 7.01 p.m.; FUKUSHIMA (down) at 7.30 and 11.35 a.m. and 3.48 p.m.; and SENDAI (down) at 6.15 and 10.25 a.m. and 2.35 and 6.45 p.m.

### PASSENGERS.

ARRIVED.

Per British steamer *Gaelic*, from San Francisco viâ Honolulu:—For Honolulu: Mr. J. A. Anthony in cabin. For Yokohama: Mr. Celestine Rambach, Mr. Emil Frichot, Mr. and Mrs. J. R. Simon, infant, and maid, Miss M. Fries, Miss C. Bloch, Messrs. Tozo Takayanagi, E. S. Bell, Frank J. Wilson, Samro Takaki, A. H. Dare, L. Wertheimber, and Mrs. Stanley Taylor in cabin. For Hongkong: Mr. Charles Freeman, Miss A. C. Freeman, Mr. J. A. Crawford, Mrs. Col. M. M. Spigel, Mr. and Mrs. Isaac Woolf and infant, Miss Marion Woolf, and Miss Jennie Klotz in cabin.

Per French steamer *Salazie*, from Hongkong viâ ports:—Mr. and Mrs. Eustace and child, Messrs. Yamada, S. Sato, Sarolidès, Captain Blair, Mrs. Blair, child, and maid, Mrs. S. Komuro and child, Mr. Sankichi Komuro, Mr. and Mrs. Orsolle Van Paryo, Messrs. R. D. Robison, Steenackers, and Elmann in cabin.

Per Japanese steamer *Sagami Maru*, from Kobe:—Mr. and Mrs. Hardy and son, Mr. Donald Fraser, and 11 Japanese in cabin; Mr. J. Cameron and 6 Japanese in second class, and 54 passengers in steerage.

Per British steamer *Parthia*, from Vancouver, B.C.:—Mr. Peter Lee in cabin; Captain Steele and Mr. and Mrs. Schneider in second class, and 8 Japanese and 11 Chinese in steerage.

Per Japanese steamer *Nagato Maru*, from Hakodate:—Messrs. Fujimoto, Y. Shibata, T. Kosugi, S. Kuwama, K. Otsuka, and H. Hattori in cabin; 55 passengers in steerage.

DEPARTED.

Per British steamer *Gaelic*, for Hongkong:—Mr. A. M. Essabhoy, Miss E. Block, Miss M. Fries, and Mr. G. N. Macondray in cabin.

Per Japanese steamer *Satsuma Maru*, for Kobe:—Miss B. Price, Mrs. Nose, Messrs. T. B. Glover, Steenacher, Nagamine, Mizutani, Lacey, E. V. Thorn, and Dangerfield in cabin; Mrs. Wakabayashi and Mr. Hayashi in second class, and 40 passengers in steerage.

### REPORTS.

The British steamer *Gaelic*, Captain Pearne, reports:—Left San Francisco the 14th February at 4.13 p.m.; had light variable winds to the 18th; thence to Honolulu strong westerly winds and head sea. Arrived at Honolulu the 21st at 5.25 p.m. and left the 22nd at 4.56 p.m.; had light northerly wind and fine weather to March 5th; thence to port westerly wind and head sea. Arrived at Yokohama the 7th March at 11.49 a.m.

The Japanese steamer *Sagami Maru*, Captain Walter, reports:—Left Kobe the 7th March at noon; had light N.E. winds to Oshima, which was passed at 9 p.m.; had fresh N.E. winds to port; passed Rock Island at 0.50 p.m. Arrived at Yokohama the 8th March at midnight.

The Japanese steamer *Satsuma Maru*, Captain Brown, reports:—Left Hakodate the 7th March at 5.30 a.m.; had fresh to moderate N.W. winds and cloudy weather up to Kurosaki, which was passed at 4.30 p.m.; thence light and variable winds and fine weather. Arrived at Oginohama the 8th at 3 a.m. and left at 11 a.m.; had light to moderate northerly winds and fine weather. Arrived at Yokohama the 9th March at 10.30 a.m.

The Japanese steamer *Nagato Maru*, Captain Ekstrand, reports:—Left Hakodate the 9th March at 2 p.m.; had moderate southerly winds and cloudy weather. On the 10th off Kinkasan wind hauled to N.E.; increasing rapidly and heavy E.S.E. sea getting up; afternoon heavy gale from N.E. and N. with blinding rain and heavy easterly swell; at 9 p.m. weather moderating but barometer falling still; 10 p.m. barometer 29.67; midnight, wind hauling to the westward. On the 11th at 8 a.m. wind S.W., strong breeze and clear weather. Arrived at Yokohama at 3.30 p.m.

The British steamer *Parthia*, Captain Panton, reports:—Left Vancouver at 8.17 a.m. on February 18th and Victoria at 2.46 p.m., and experienced fresh W. winds and heavy head sea to 21st; from 22nd to 25th inclusive moderate N.W. winds and fine weather; from 26th to March 2nd strong W.S.W. winds and heavy head sea; crossed the meridian in 49° N. on February 28th. From March 3rd to 5th inclusive, moderate winds and heavy head swell, and on the 6th strong S.W. gale and very heavy sea; 7th to 9th moderate N.W. winds and fine weather; 10th moderate S.W. gale and thick rainy weather; 11th strong S.W. gale and heavy sea. Arrived at Yokohama the 12th March at 7.53 a.m. Time from Victoria 20 days, 23 hours, and 32 minutes.

The Japanese steamer *Omi Maru*, Captain Wynn, reports:—Left Hiroshima the 12th March at 5.30 a.m.; had light variable winds with fine pleasant weather to Rock Island; thence light N.E. to N. winds and thick rain to port. Arrived at Yokohama and anchored inside of lightship the 14th at 1.30 a.m.; proceeded to buoy at 6 a.m.

# *LATEST COMMERCIAL.*

## IMPORTS.

The Import Market maintains a firm aspect, and although business continues rather slack, holders are not anxious sellers, hoping to see better prices when business is renewed. English Yarns and Shirtings have only been dealt in to a moderate extent. Fancies remain very dull. Sales for the week amount to 500 bales English Yarns, 100 bales Bombays, and 2,500 pieces Shirtings.

### COTTON PIECE GOODS.

| | | | |
|---|---|---|---|
| | PER PIECE. | | |
| Grey Shirtings—8¼ lb, 38½ yds. 39 inches | $1.50 | to | 2.20 |
| Grey Shirtings—9lb, 38½ yds. 45 inches | 1.65 | to | 2.52½ |
| T. Cloth—7lb, 24 yards, 32 inches | 1.25 | to | 1.47½ |
| Indigo Shirtings—12 yards, 44 inches | 1.20 | to | 1.60 |
| Prints—Assorted, 24 yards, 30 inches | 1.40 | to | 1.90 |
| | PER YARD. | | |
| Cotton—Italians and Satteens Black, 32 inches | 0.07 | to | 0.15 |
| | PER PIECE. | | |
| Turkey Reds—1¾ to 2¼lb, 24 yards, 30 inches | 1.07½ | to | 1.15½ |
| Turkey Reds—2¼ to 3lb, 24 yards, 30 inches | 1.27½ | to | 1.47½ |
| Turkey Reds—3¼ to 4lb, 24 yards, 30 inches | 1 87½ | to | 1.92½ |
| Velvets—Black, 35 yards, 22 inches | 4.50 | to | 6.00 |
| Victoria Lawns, 12 yards, 42-3 inches | 0.50 | to | 0.65 |
| Taffachelas, 12 yards, 43 inches | 1.35 | to | 2.25 |
| Turkey Reds—1.15 to 2lb, 24/25 yards, 30 inches. | | | |
| Turkey Reds—2.4 to 2.8lb, 24/25 yards, 30 inches. | | | |
| Turkey Reds—2.12 to 3lb, 24/25 yards, 30 inches. | | | |
| Turkey Reds—3.4 to 3.8lb, 24/25 yards, 30 inches. | | | |
| Turkey Reds—4 to 4.8lb, 24/25 yards, 30 inches. | | | |

### WOOLLENS.

| | | | |
|---|---|---|---|
| Plain Orleans, 40-42 yards, 32 inches | $1.00 | to | 5.50 |
| Italian Cloth, 30 yards, 32 inches best | 0.24½ | to | 28 |

| No. 42s, Two-fold | 36.00 | to | 38.50 |
| | PER BALE. | | |
| No. 20s, Bombay | 70.00 | to | 79.50 |
| No. 16s, Bombay | 72.00 | to | 78.00 |
| Nos. 10/14, Bombay | | — | |

### METALS.

The trade is not lively, but some small parcels of Iron are moving off at about previous rates. Holders would like to be selling more; but with a hardening exchange all the week, buyers rather hang back in the hope of better things from their point of view.

| | | | |
|---|---|---|---|
| | PER PICUL. | | |
| Flat Bars, ½ inch | $2.70 | to | 2.75 |
| Flat Bars, ¼ inch | 2.80 | to | 2.85 |
| Round and square up to ¾ inch | 2.75 | to | 2.85 |
| Nailrod, assorted | Nom. | | |
| Nailrod, small size | Nom. | | |
| Iron Plates, assorted | 2.75 | to | 2.85 |
| Sheet Iron | 3.00 | to | 3.40 |
| Galvanized Iron sheets | 5.90 | to | 6.10 |
| Wire Nails, assorted | 4.30 | to | 4.60 |
| Tin Plates, per box | 5.20 | to | 5.50 |
| Pig Iron, No. 3 | 1.35 | to | 1.40 |

### KEROSENE.

No fresh business to report. The Tokyo and consuming markets are said to be quiet, with prices declining. Quotations are nominally as last advised, but dealers expect some concessions in price before operating afresh.

QUOTATIONS.

| | | | |
|---|---|---|---|
| Chester | $1.67½ | to | 1.70 |
| Comet | 1.65 | to | 1.67½ |
| Devoe | 1 62½ | to | 1.65 |
| Russian | 1.57½ | to | 1.60 |

### SUGAR.

Arrivals are coming freely now of New Browns from Takao, and there is a fair current demand at quotations.

| | | | |
|---|---|---|---|
| | PER PICUL. | | |
| Brown Takao | $3.80 | to | 3.85 |
| Brown Daitong | 3.20 | to | 3.80 |
| Brown Canton | 5.20 | to | 6.20 |
| Brown Java and Penang | 5.50 | to | 6.00 |
| White Refined | 4.75 | to | 7.75 |

## EXPORTS.

### RAW SILK.

Our last issue was of the 6th inst., since which date settlements on this Market amount to 1,352 piculs, divided thus: *Hanks*, 11; *Filatures*, 765; *Re-reels*, 341; *Kakeda*, 230; *Oshu*, 5. In addition to these figures Japanese have shipped 27 bales to the States, consequently the business of the week is equal to 1,380 piculs.

As will be seen from the above statistics we have had a good daily business. Holders have been current in their ideas and shippers were able to operate accordingly. Exchange has improved somewhat as the week advanced, and holders have not failed to make a corresponding reduction in their quotations.

Arrivals from the interior are not large. Supplies of *Hanks* and *Kakedas* are very small, and the total stock shows a decrease of a thousand piculs since the 6th inst.

As noted above, holders have shown themselves current in their ideas and they are of now getting-rather anxious at the bad news which arrives from consuming markets. Then again the present fine weather appears like a harbinger of Spring and is exceedingly favourable for vegetation. At the same time there is no desire to throw their silks away for nothing, and they will continue to fight hard against any large reduction in price.

There have been two shipping opportunities since we last wrote, the American and English Mails of the 7th inst. both taking silk. The *Oceanic* had 498 bales for America, and *Verona* 407 bales for Europe. These departures bring the present export figures up to 22,023 piculs, against 34,370 piculs last year and 37,283 at the same date in 1889.

*Hanks.*—Small business in *Shinshu* kinds, medium grade, at $480. Other sorts neglected.

*Filatures.*—Considerable business has been done in these both for Europe and for the States, in spite of the bad market news which the cable brings us from day to day. With regard to our Italian friends, it would seem that they pursue the course of exporting their home grown silks to New York while they buy our high class Japans for their own use. Prices here have declined somewhat, but not to any very great extent; some large holders even succeeded in getting prices which seem out of proportion to other brands. *Tokosha* has been done in bulk at $592½; *Gakosha* $607½; *Kanayama* $585, and others in proportion. Some of the best known filatures such as *Kaimeisha, Hakuzuru* are extinct for the present season, and others will soon be off the list until new silks come round again.

*Re-reels.*—There has been a fair amount of business done in these at what seem to be high prices. *Kanra* $587½; *Three Girl* $585; *Five Girl* $577½, and others in proportion. These silks look dear by the side of filatures, but holders remain strong and seem to be able to get what they ask.

*Kakeda.*—There has been quite a run upon our small stock and good prices have been paid, No. 1 *Horsehead* being freely taken at $567½; No. 2 $550; No. 3 $535. Present stock is very small, and holders firm at quotations.

*Oshu.*—Nothing done since the purchase of a few bales *Sendai* at $540 a week ago.

QUOTATIONS.

| | | |
|---|---|---|
| Hanks—No. 1 | Nom. | — |
| Hanks—No. 2 (Shinshu) | Nom. | $545 to 550 |
| Hanks—No. 2 (Joshu) | Nom. | 540 to 545 |
| Hanks—No. 2½ (Shinshu) | Nom. | 530 to 535 |
| Hanks—No. 2½ (Joshu) | Nom. | 525 to 530 |
| Hanks—No. 2¾ to 3 | Nom. | 510 to 520 |
| Hanks—No. 3 | Nom. | 500 to 505 |
| Hanks—No. 3½ | Nom. | 480 to 490 |

### WASTE SILK.

Settlements in this branch are 250 piculs comprising *Noshi* 15, and *Kibiso* 235.

Situation remains unchanged. Waste is in demand, but shippers are unable to operate freely for lack of the necessary quality. Prices all round are well maintained, and anything special would command a good price.

The only shipping opportunity has been the *Verona*, on the 7th inst., which steamer took 154 bales of Waste for Europe. Present export is 25,489 piculs, against 23,884 last year and 27,319 at the same date in 1889.

*Pierced Cocoons.*—No business at all, and no change in the situation.

*Noshi.*—Only one parcel has passed the scales consisting of fine *Bushu* at $124.

*Kibiso.*—Filatures have been taken to some extent for Italy and Switzerland. Prices paid ranging from $93 to $116. Some *Low Curlies* have also been done at $32.

In other sorts nothing to mention.

QUOTATIONS.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).
LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. Arthur Wadham, proprietor of *The Machinery Market and Exporter* (illustrated) — the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery aud Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." 1y. June 28, 1890.

KEATING'S COUGH LOZENGES.

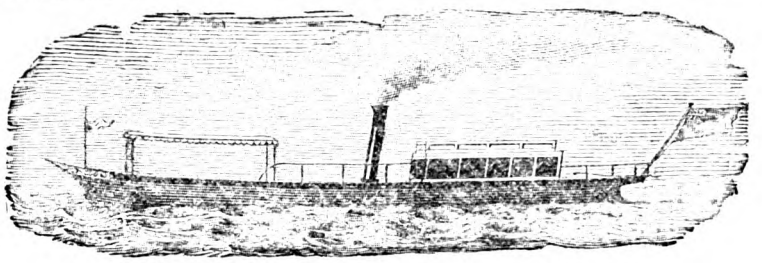
COUGHS, ASTHMA, BRONCHITIS, DIFFICULTY OF BREATHING are speedily cured by KEATING'S COUGH LOZENGES (recognised and recommended by the Medical Faculty). No other remedy is half so effective. One Lozenge alone gives relief. They contain no Opium, Morphia, nor any violent drug, and may be taken by the most delicate. One or two at bed-time ensure rest when troubled by the throat. Sold by all Chemists, in Small Tins. Dec. 27th, 1890.—21ins.

THE GREATEST WONDER OF MODERN TIMES.

HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir Samuel Baker, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the dragoman Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In I short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."



SIMPLE, SAFE, AND CERTAIN!

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulceration of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, aud in arresting and subduing all inflammations.

Mr. J. T. Cooper, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up he small remaining "stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

YARROW'S

SMALL STEAMERS AND STEAM LAUNCHES.

Screw Steamers with speeds ranging up to 30 miles an hour.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER.

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

Machinery constructed for Boats built abroad.

YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, MARCH 21, 1891.

DEATHS.

On February 18th, at Tacoma, Washington, Captain HENRY C. DEARBORN, aged 54 years.

At Kobe, on the 16th inst., B. ENTHOVEN, aged 28.

## *SUMMARY OF NEWS.*

H.I.H. PRINCE KITASHIRAKAWA YOSHIHISA left the capital on the 13th inst. for Atami.

THE Government has permitted the establishment of the Kanazawa Chamber of Commerce.

THE line between Okayama and Kobe on the Sanyo Railway Company was opened on the 18th instant.

THE doubling of the line between Oyama and Gotemba on the Tokaido Railway has been completed.

THE water-works of Nagasaki, now in course of construction, will, it is expected, be completed in April next.

ONE thousand and eighty Japanese emigrants to the Hawaiian Islands sailed from this port on the 17th instant by the *Omi Maru*.

HER IMPERIAL MAJESTY THE EMPRESS proceeded to the Aoyama Palace on the 17th instant, leaving the Imperial Palace at 2 p.m.

DURING last month the Kanagawa Prefectural Government granted 43 passports to foreigners wishing to visit the hot-springs at Atami and Hakone.

THE spring general meeting of members of the Tokyo Rice Merchants' Association was held on the 15th instant at the Ibumura-ro, Ryogoku, at which Messrs. Yura Seitaro and Sato Kakujiro were elected President and Vice-President respectively. Over five hundred persons attended the meeting.

A THIEF entered the godown of the Hiyoshi Shrine in the province of Omi, the other night, and stole various precious articles valued at over 10,000 *yen*.

SOME two hundred members of the House of Representatives were to proceed to Yokosuka on the 14th instant to view the Yokosuka Shipbuilding Yard.

THE total number of Japanese residing in Korea at the end of the year was 6,298, of whom 537 were in Söul, 1,624 in Jinsen, 3,567 in Fusan, and 570 in Gensan.

COUNT YAMAGATA, who had been confined for some time to his villa at Mejiro by indisposition, proceeded to Oiso on the 16th instant for the benefit of his health.

ON the night of the 12th instant fire occurred in a house at Shinyokocho, Atami, and five dwellings were burned to the ground before the flames could be subdued.

IT is stated that Count Yamagata, who is at present confined to his residence by indisposition, intends to proceed to Kamakura shortly for the benefit of his health.

IN aid of the funds of the Honjo Lying-in Hospital theatrical performances were held on the 14th and 15th instant at the Yuraku-kan, Kakigara-cho, Tokyo.

H.I.H. PRINCE KITASHIRAKAWA YOSHIHISA, who had been for some time in Saitama and Kanagawa Prefectures, on official business, returned to the capital on the 16th instant.

A MEETING of managers of the Tokyo Charity Hospital was held on the 15th instant. Her Imperial Highness Princess Tadako, and Countesses Goto and Ogasawara were present.

DURING a severe blow on the 15th instant a Japanese cargo boat, loaded with cement for the Yokohama harbour works, capsized near the English Hatoba. All the crew are missing.

MR. E. J. PEREIRA, Portuguese Vice-Consul at Yokohama, has started for home on leave. During his absence Mr. E. Durand De la Penne, Italian Consul, will, it is said, represent him.

SOME 410 shares (paid up *yen* 25) of the Yokohama Union Electric Light Company were offered for sale by public tender on the 13th inst., and over 200 were sold at *yen* 18 per share.

MR. MATSUNO SHINJIRO, an editor of the *Nippon*, was summoned on the 16th instant to the Tokyo District Court, and examined before Procurator Fujii in connection with the Tei affair.

THE resignation by Count Ito of his position of President of the House of Peers will be accepted in a few days. Count Higashi-Kuze, Vice-President of the House, will, it is stated, succeed him.

A CONCERT was held on the 14th instant at the Tokyo School of Music, Uyeno, by the members of the Dokokai, which was formed by students of the institution. Some three hundred persons were present on the occasion.

THE total quantity of tea that arrived in Yokohama from the interior from the commencement of last season to the 6th instant was 21,872,000 *kin* (one *kin* = 1⅓ lb. avoird), of which 21,686,500 *kin* were sold to foreign firms in the port, the quantity of tea that remained in stock on that date being 110,000 *kin*.

AN ordinary meeting of the Cabinet was held on the 17th instant, at which there were present Counts Saigo, Matsukata, Yamada, Oyama, and Goto, Viscounts Aoki and Kabayama, and Messrs. Yoshikawa and Mutsu.

ACCORDING to recent investigations the number of kindergartens in the capital is 26 (including both public and private institutions) in which 1,286 children (691 boys and 595 girls) are educated, the total number of teachers being 75.

THE total number of Primary Schools in the capital at present is 583, of which 223 are public and 360 private schools. The number of students in these schools is 778,200, of whom 47,090 belong to the former and 30,730 to the latter class.

DR. H. MAYER, an employé of the College of Agriculture in the Imperial University, will leave Japan for home shortly, his engagement in Japan having terminated. Dr. Mayer was received in audience by the Emperor on the 14th instant.

THE sections between Kurozaki and Monji (14 miles), and Kurume and Takase (34 miles) on the Kyushu Railway Company have been completed. Viscount Inouye, Chief Commissioner of the Railway Bureau, has left the capital to examine the works.

THE rumour that Mr. Hatoyama Kazuo would represent the plaintiff in the action for libel raised by Mr. Tei, proves to be entirely groundless. Mr. Okamura, formerly President of the Yokohama Law Courts, will, it is now said, appear for Mr. Tei.

IT is stated that important changes will be effected in the Judicial Department before the close of the present month, and that the Bureau of General Control, the Minister's Chamber, the Despatch and Receipt Office, and the Reports Office will be amalgamated.

THE total quantity of rice that arrived at the Fukagawa Granaries during last month was 172,731 bales, to which 453,026 bales, brought over from the previous month, were added, making a total of 625,757 bales. Of the above figure 324,494 bales were taken out during last month, the quantity of rice that remained in stock at the end of the month being 301,263 bales. As compared with the previous month the above figures show a decrease of 186,750 bales in the quantity that arrived, and an increase of 96,587 bales in the quantity removed.

THE Import trade is much in the condition last reported in so far as Yarns and Piece-goods are concerned, a small business in these having been done at rates that may be called slightly easier. A little life has been infused into the Metal trade, and fair sales have been effected, principally in consequence of buyers having run out of stocks. There have been sales of Kerosene to a moderate extent, but oil could only be moved at a reduction in most cases upon late rates, though holders are stiffening their attitude since the recent transactions. The stock is still very large. Sugar has been in moderate demand, and the new Formosa, which is coming in freely, sells well. The principal Export appears to be in fair demand, and a daily business takes place, the total Silk sales for the week being over 1,000 bales. For Waste Silk there has also been a fair demand. Exchange has again fluctuated, but not to any great extent on the week.

## *EDITORIAL NOTES.*

### THE BUSINESS OF THE TWO HOUSES.

THE business of the House of Representatives, while the House is not in session, is to be carried on in the building temporarily occupied by the House, namely, the formerly Engineering College. This spacious and handsome edifice—or rather pile of edifices—was utilized as the Nobles' School, after the absorption of the Engineering College into the University. By and by the Nobles' School was moved elsewhere, and the buildings were then partly occupied as a girls' school, the great hall and nearly all the adjoining class rooms remaining unemployed until they served the purposes of the Representatives after the destruction of the Diet by fire. Very shortly the whole compound is to be handed over to the Commissioners of the Imperial Museum. The buildings will require much alteration to fit them for museum purposes, but such is to be their fate. One or two rooms, however, will be lent to the Secretaries of the Lower House to carry on their business pending the re-building the Diet. The Secretaries of the Upper House are it is stated, to have a room at the official residence of the President in Nagata-cho, but we are not quite clear where that may be.

* * *

The transformation which the Examination Hall of the Engineering College underwent to prepare it for the sittings of the Representatives was not picturesque. It was converted into a great canvas box, huge pieces of linen being stretched at the sides and overhead, while to obtain space for the 300 members' seats, narrow wooden benches, partially covered with green baize, had to be crowded into every part. The acoustics were emphatically bad, the cold was often very trying, and the discomfort of the members must have been great. Never well lit, the Hall is not at present supplied with gas, and it was therefore impossible to continue the sittings of the House after sunset. This last point deserves to be noted, for we observe that the Representatives have been charged with want of zeal because they did not extend their hours of debate. Whatever their desire to be so, the thing was impossible. It may be assumed that they would have shown at least as much industry as the Peers, had it been in their power to do so, but whereas the Peers occupied a chamber well lit with electricity, the Representatives had to rely on the light of the sun.

### THE OLD QUESTION.

THERE is scarcely a Japanese journal of any consequence that has not, within the past twelve months, published some detailed account of a new scheme of Treaty Revision, confidently asserted to be the latest and most authentic on the *tapis*. For a time a lull occurred in this persistent shower of revelations, but the pastime has been taken up once more by the *Mimpo*, which writes in the following strain:—"The efforts to accomplish Treaty Revision made ever since the beginning of the Meiji era by Iwakura, Terashima, Soyejima, Inouye, and Okuma, all came to nothing, either because of difficulties raised by the Treaty Powers or in consequence of opposition on the part of the Japanese people themselves. Since Viscount Aoki became Minister of Foreign Affairs, the Government has not entrusted the matter to him alone, but has appointed Counts Saigo and Goto as joint Plenipotentiaries. These three Ministers have consequently resolved to bring the important work to a fine termination and to gain the reputation of being great statesmen. The point in Count Okuma's programme of last year that offended public opinion was the employment of foreigners in a judicial capacity, and it is therefore concluded that if this condition be expunged, and if other eliminations and additions of a minor character be made, there will be no difficulty in satisfying the public. Consequently, after careful consideration a draft of Revision has been made, and preparations are said to be in progress to complete the business satisfactorily during the course of the present year. From a trustworthy source of information we have obtained the following statement of the items of the new draft:—(1.) The idea of employing foreigners in the capicity of judges shall be abandoned. (2.) A short and simple naturalization law shall be compiled, so that foreigners, without going through the formalities prescribed by the generality of Western naturalization laws, may acquire the privileges enjoyed by Japanese subjects. (3.) The whole country shall be thrown open, and mixed residence permitted. (4.) Import dues shall be levied on a basis of ten per cent. *ad valorem* at most. (5.) Consular Jurisdiction shall be completely abolished. The Government, and especially Viscount Aoki and Count Goto, fearing lest opposition should be raised by the people to these terms, are endeavouring to win over the leaders of thought to their side."

* * *

This statement is advanced with so much confidence that many persons will probably be found to credit it. But in point of fact the *Mimpo's* programme is nothing more than a collection of floating rumours. It does not even allude to the important questions of the ownership of real property and the coastwise trade, both of which received treatment at Viscount Aoki's hands in the House of Peers. Moreover, it speaks of the abolition of Consular jurisdiction as a project of immediate realization, whereas both the language used by the Minister of Foreign Affairs in the Diet, and the Representation proposed in the Lower House, show that no such heroic step is contemplated. We allude to the *Mimpo's* story, because, if left undiscussed, it would assuredly be snapped up and republished as important information by some of our local contemporaries.

### THE DIET AND THE ARMY DEPARTMENT.

THE members of both Houses of the Diet are to proceed to-day, as guests of the Government, to view the fortifications in Tokyo Bay. They have shown themselves very inquisitive and to some extent impatient about these forts, some members crying out against the notion that so many years must elapse before the works are completed, others urging that Tokyo Bay ought to be properly equipped for defence before any other part of the Empire, and a few grumbling about the cost. They will now see for themselves, and understand the nature of the task in hand. It is a pity that this kind of practical education cannot be extended. If, for example, the Extremists in the Lower House could be put in charge of the Army Department for a season, they would acquire a useful knowledge of what is meant by cutting down expenses, where no margin for the operation exists. The War Office's appropriation amounts to nearly twelve million *yen*, and from of this amount only the paltry sum of two hundred thousand has been deducted. Yet it is asserted that great embarrassment will be felt. Up to the year 1885 the Army folks spent their money pretty freely. It is not claimed that they actually wasted the public funds, but they did things in a fine open-handed way, and did not mind having an ample band of office officials. During 1885 and 1886, however, drastic reforms were carried out, all superfluous officials being dismissed, and every expense reduced that was capable of reduction. There is no room, they assert, to accomplish any more, and under such circumstances this reduction of two hundred thousand *yen*, though an apparent bagatelle, has really the weight of the last straw. They allege that the only chance of effecting such a saving is to stop the building of the new barracks. But probably ends will be brought together in some way or another.

### CRIME IN TOKYO.

A TERRIBLE event occurred at the Yoshiwara in Tokyo on Saturday morning. At about 3.30 a.m. the porter sitting up in the Kajita-ro, one of the casinos in Yedo-cho, heard a jinrikisha drive up. Thinking that a guest had arrived, he threw open the door, and immediately received three disabling wounds from a large triangular-bladed knife (*deba-bocho*), with which the visitor attacked him furiously. Springing over the porter's body, the assailant made his way straight to the sleeping apartment of Kanda Kane, one of the prostitutes, and slashed her over the head and shoulders. The girl ran shrieking to the room of Kajita Zenjiro, father of the proprietor of the house, Kajita Tomejiro. Zenjiro, a powerful man, who had formerly served in the detective force, sprang from his bed and attempted to seize the ruffian, but received two severe wounds. Tomejiro and his wife Nabe appeared upon the scene at this juncture, and the madman attacked them at once with the greatest ferocity, injuring them both severely—so severely in Tomejiro's case that he expired the following morning. Having now, apparently, accomplished his purpose, the murderer fled, crossing the fence of the garden and effecting his escape before any hand could be stretched out to arrest him. Not before he had been identified, however, as one Izaka Shinkichi, a native of Ibaraki Prefecture, who had been a servant in the Kajita-ro until the close of January, when he was dismissed in consequence of the discovery that his relations were over-intimate with the girl Kane.

### THE AKITA MURDER.

SOME further particulars of the terrible murder in Yuzawa, Akita Prefecture, are now to hand. It appears that the head of the annihilated family, Mr. Nakajima, was in charge of the branch of the First National Bank at that place. He retired to rest as usual, having put the key of the safe into a chest-of-drawers in the godown communicating with his house. He himself and his wife, aged respectively 44 and 42, were sleeping in one room, and in the adjoining chambers were their daughters Fuji, aged 20, Tsugi, aged 18, and their adopted son's wife, Shige, aged 30, with her baby. When the alarm was given and the police summoned, it was found that the whole six had been killed where they lay asleep. Not one, apparently, had ventured to get up; or had been roused in time to do so. From the sleeping chambers to the go-down, and all through the latter, traces of bloody feet were found. The chest-of-drawers had been opened, the key of the safe taken out, and thrown down in a corner of the room. Apparently the intention of the burglars had been to rob the safe, which contained over four thousand *yen*, but something had prevented them from doing so: the safe was untouched. Some seventy thousand *yen*, however, were taken from the box where the key usually lay, and sundry articles of clothing appeared to have been also taken, but as the entire family were killed, no accurate account could be obtained of what there had been in the house. The police have not yet arrested any one, but they are persuaded that the burglars belong to the neighbourhood, and that their capture is only a question of time.

### DARE D'ARÔ?

WHO, we wonder, is the gentleman called "Yoshitani, Vice-Grand Master of Ceremonies," who according to the *Japan Gazette's* translation of the *Official Gazette* attended the funeral of the American Minister on behalf of Her Majesty the Empress. The Vice-Grand Master of Ceremonies is Mr. Sannomiya Yoshitane, one of the best known and most popular officials in Tokyo. To speak of him as "Yoshitani" is not only orthographically wrong and palpably rude, but is also to make the curious blunder of calling a man by what would be his Christian name in the West. It is as though one should say that John, Lord Justice of Scotland, presided on a certain occasion, or that Charles, Secretary to the Admiralty, wrote on behalf of the First Lord. People might recognise Mr. John Inglis and Mr. Charles Thomson Ritchie in these queer abbreviations, but they would be none the less startled by such a new departure in styles of public address. The editor of the *Japan Gazette* is evidently at sea in these matters. Some time ago, in a leading article, he spoke of Mr. Murata Tamotsu as "Mr. Tamotsu," plainly showing that his Japanese studies have not extended to the difference be-

Digitized by Google

tween personal and family names. By what curious episodes social intercourse would be chequered if some members were introduced who could not distinguish between a Christian name and a surname!

### THE DESTRUCTION OF THE PROGRESSIONISTS' ASSEMBLY HALL.

THE burning of a large building in Yurakucho, Sancho-me, which took place on the 10th instant at 3 a.m., has caused some comment and speculation in Tokyo. The house was used by the Progressionists (*Kaishin-to*) for the purpose of holding meetings and transacting the business of the party. It had been rented under an agreement providing that in the event of its destruction by fire, whether accidental or incendiary, the loss should be made good to the owner, and of course, under these circumstances, the lessees have no resource but to pay up. The sum involved is, however, very considerable. According to a rough calculation, it is asserted that though each *Kaishin-to* member of the Diet, who used the Club, should disburse the whole of his Parliamentary allowance, namely, 800 *yen*, there would still be a balance of indebtedness. In consideration of this point people speak of the affair as "the fire that burned the salaries" and there is naturally a strong impression that some of the political opponents of the *Kaishin-to* were the authors of the conflagration. Various stories are circulated, but the strong probability is that the incident will never be cleared up.

### THE MYSTERY OF THE "NIPPON."

THE mystery of the letter supposed to have been written by Mr. Tei Yeinei to the Chinese Representative in Tokyo, is pleasingly heightened by the *Japan Gazette's* comments. "The Chinese Minister and Mr. Tei," says that journal, "have both denied the authorship of the letter, and have prosecuted the first paper which published it, the *Nippon*." In this statement two very interesting pieces of news are contained; first, that the Chinese Representative has denied the authorship of the letter—a somewhat superfluous proceeding, seeing that he was never suspected of writing it—and, secondly, that he has instituted proceedings against the *Nippon*. Both items of intelligence are quite new. We fear that the Chinese Minister's grounds of action against the *Nippon* are scarcely sound. The mere statement that a man has had a letter addressed to him does not constitute a libel, and nothing more heinous has been charged against His Excellency Li. The Minister, however, will be very much astonished by the action attributed to him, for he has neither denied the authorship of the letter nor instituted proceedings against the *Nippon*. Both statements owe their existence entirely, not to the imagination of the *Japan Gazette*, but to its ignorance of the use of the English language.

* * *

To write English so clumsily that it shall convey utterly false ideas is, however, a very small part of the offence committed by the *Japan Gazette* in respect of this wretched business. The communication attributed to Mr. Tei primarily by the *Nippon*, and subsequently by other Japanese journals, contained no internal evidence of his authorship, except a description which the writer is made to give of himself. By this description Mr. Tei is easily identified, as it was obviously intended that he should be identified. The Chinese style of the document is quite insufficient to indicate the author, for there are hundreds of educated Japanese capable of such a literary achievement. The *Nippon*, then, having received the document from an anonymous source, and finding that the writer describes his antecedents so clearly as to be easily identifiable, does not hesitate to publish it and to openly ascribe the authorship to Mr. Tei. But testimony as to authorship furnished by the writer's account of his own antecedents is obviously quite valueless, unless the writer be really the person so designated. If Mr. Tei wrote the document, then his account of himself furnishes a trustworthy clue to his identification. But if he did not write the document, then a description inserted for the purpose of indicating him, is nothing more than an additional fraud. The case therefore stood thus at the outset:—A document received from an unknown source, and purporting to have been taken from the archives of the Chinese Legation, was published by the *Nippon*, and, on the strength of evidence absolutely valueless unless the document were authentic, the *Nippon* identified and declared the writer to be Mr. Tei. As for the contents of the document, nothing more terrible could have been alleged against a Japanese than that he had penned such words. A foul traitor to his country, he became at once an object of public loathing and execration. In point of fact, the greatest excitement was created in the capital, and if popular fury had proceeded to the length of active violence, nobody could have been surprised. But Mr. Tei lost no time in emphatically denying that he had ever written such a letter and in taking legal proceedings against the *Nippon*, while from the Chinese Legation an official denial was published that any letter of the kind had ever been received there. Now it will be remembered that the letter was said to have been taken from the archives of the Chinese Legation. Thus the latter's disavowal damned the whole story. Under these circumstances, what does the *Japan Gazette* do? Does it show any appreciation of the value attaching to the statement of an anonymous and unknown person, as compared with the open denials of the Chinese Legation and Mr. Tei? Has it the common decency to perceive that in such a conjuncture, even the strongest partisans of the libeller should exercise discretion? Does it recognise the rudimentary principle of justice that when popular fury has been roused against a man on account of a crime of which the balance of testimony goes to prove him innocent, every ordinarily honest journal ought at least to suspend judgment? Not a bit of it. The *Gazette*, on the contrary, goes out of its way to try and fix the charge. It writes as though Mr. Tei's authorship were beyond all doubt. "Mr. Tei," it says, "denounces his country and its institutions in such a forcible manner that he has aroused the most violent opposition, and his life is said to be in danger. And then, with that simulation of knowledge so comically familiar to its readers, it adds:—"The suspicion of all the best judges rests on one man. And the probabilities are that it is rightly placed." Nor does this suffice. In its next issue the *Japan Gazette* publishes the following:—

> The Chinese Minister has addressed a letter to the various Tōkyō papers denying that he received from Mr. Tei the letter whose publication by the *Nihon* has caused such a stir throughout the country, and asks that the statements attributing the authorship to Mr. Tei be withdrawn. The *Nihon* withdraws the statement, but is particular to explain that such a withdrawal is only made out of legal obligation, and that the paper still holds to its original assertion that Mr. Tei is the author of the letter in question; *it rightly argues that its failure to prove the authorship legally is not conclusive proof against the accuracy of its assertions.*

Now we are aware that to be obliged to acknowledge the reckless conduct of the *Nippon* in this matter would be very awkward for the *Japan Gazette*. The *Nippon* is the source of many of the wonderful revelations which our "honest" contemporary re-cooks and hashes up for its readers' edification, seasoning them with "private information" of its own. From the *Nippon* it obtained materials for its crusade against Count Yamada and the Cabinet, and the discrediting of the *Nippon* would mean that this prolific mine must be temporarily closed. But that such a consideration should betray the *Japan Gazette* into endeavouring to fix upon a man a foul crime unsupported by any evidence of the slightest value and contradicted by evidence of great weight; a crime which, if proved, must condenm himself and his whole family to national execration and even imperil their lives—this, we have no hesitation in saying, is one of the most disgraceful incidents that has ever disfigured the history of foreign journalism in Yokohama. The *Japan Gazette* is the publicly avowed organ of a number of leading residents of Yokohama. Its escapades concern the good name of the whole British community, and cannot be passed over in silence.

### KOREAN NEWS.

THE Tokyo papers have been, for the last few days, publishing alarming news from Söul. It is stated that the Chinese Resident, Mr. Yuan, has approached the Korean Court with two proposals of a startling nature. One relates to a treaty by which Korea gave to Russia great privileges of commerce and navigation on portions of the coast and on her borders. Several years ago, when this treaty was first concluded between the two countries, Mr. Yuan remonstrated with the Korean Government, and it was only the year before last that the treaty was ratified. As to the details of the demands preferred by the Chinese Resident in the present instance, no accurate information is given in any of the reports thus far published. The other proposal is said to have for its object the abdication of the present King in favour of his son. Some of the correspondents say that the Koreans are now very well disposed to Russia, and that they resent the interference of their western neighbour. The report published in the *Kokkai* states that the graves of the late King and Queen have been dug up and all jewels taken away. The grave-keepers were sentenced to banishment for their negligence.

### THE HONGKONG FIRE INSURANCE COMPANY, LIMITED.

THE following is the report presented to the shareholders at the twenty-second ordinary annual meeting held at the offices of the company in Hongkong on Saturday last:—1889 Account.—The result of the year's working shows a balance at credit of $187,874, which sum, with the approval of the Consulting Committee, it is now proposed to deal with as follows:—Reserve Fund, $3.951.00; Bonus to Contributing Shareholders, $39,923.00; Dividend of $18 per Share, 144,000.00. Mortgages.—The General Managers and Consulting Committee are satisfied from the valuations made by the Company's Surveyors in Shanghai and Hongkong that the properties held by the Company are good for the advances made, although considerable depreciation has taken place in Hongkong. Consulting Committee.—Messrs. S. G. Bird and A. P. McEwen having left the Colony, Messrs. F. T. P. Foster and C. J. Holliday have been nominated to the vacant seats, and their appointment now requires to be confirmed. The present members, the Hon. C. P. Chater, Messrs. J. S. Moses and T. E. Davies offer themselves for re-election. Auditors.—The Accounts have been audited by Messrs. G. S. Coxon and Fullarton Henderson and their re-election as Auditors of the Company is recommended.

### AN ASSOCIATION FOR PRACTICAL PURSUITS.

SEVERAL well known Japanese gentlemen, among them being Messrs. Hoshino Chotaro, Miyazaki Yukei, Miai Tetsunosuke, Yamada Jinnosuke, and others, have formed an association called the *Jitsugyo-gikai*, or society for deliberating about practical undertakings. Apparently the object of the step is to direct public attention from political into productive channels. There are to be five sections in the Association, devoted respectively to tea (*Chagyo-bu*), silk (*Sanyo-bu*), agriculture (*Nogyo-bu*), marine products (*Suisam-bu*), commerce (*Shogyo-bu*), industry (*Kogyo-bu*), and cattle rearing (*Bokuchiku-bu*). It is expected that the association will develop great activity, and that considerable practical results will be attained.

### THE THIRD EDITION OF "MURRAY'S GUIDE TO JAPAN."

THE printers are at last on the eve of receiving the manuscript of the third edition of "Murray's Guide to Japan." For a long time the work has been undergoing complete revision and enlargement at the hands of Messrs. B. H. Chamberlain and W. B. Mason, by whom the copyright has been acquired. Originally compiled

Digitized by Google

by two men of whom one stood at the head of contemporaneous sinologues, and the other possessed qualities eminently fitting him to cöoperate in such an undertaking, the book proved an incalculable boon to every foreigner living in or visiting Japan. It occupied the field permanently. Competition was out of the question; for such a mine of information was opened to the public in its pages, information historical, archæological, topographical, artistic, geographical, social, ethnological, and statistical, that the most insatiate inquirer found something to satisfy him. If the book had any fault, it was bulkiness. Superficial tourists did not need so much, and not every resident took sufficient interest in the country to delve into details of subjects entirely strange to him. The consequence was that shrewd plagiarists set themselves to condense or copy such portions of the volume as they judged important. We should not like to express any definite opinion about the drafts made upon the book by minor writers following in the same line. Conscience is not very exacting in such matters, and besides, the dead past may be suffered to bury its dead. Meanwhile, the second edition of the Guide Book was sold out, and it became almost impossible to procure a copy for love or money. A constant demand suggested the issue of a third edition as soon as possible. But the work needed large revision to bring it up to the time, as well as expansion so as to include new portions of the country, and both of the authors had left Japan. Happily, after some delay, Messrs. Chamberlain and Mason took it up, and it thus came into the hands of precisely the two men conspicuously competent to carry its scheme to completion. How long the work of revision and enlargement has been in progress we do not know exactly, but every one will be glad to hear that it is completed—very thoroughly completed, we understand—and that nothing now remains but the printers' part of the task. There will be great satisfaction when the object of such protracted and impatient expectation becomes at length actually procurable.

### A SINGULAR NOTION.

THE *Hochi Shimbun* contains a paragraph which we have read with much surprise. "Some persons assert," writes our contemporary, "that the approaching visit of the Russian Prince Imperial to Japan is not of an ordinary character, its object being to study the condition of our military organization with special regard to any important strategical positions on our northern borders. Among the people, therefore, who accompany his Imperial Highness, there are general officers and engineers, whose duty will be to examine, in the first place, all the ports and bays visible on the voyage from Kiushiu to Tokyo. Then, after a brief stay in the capital, the whole party will proceed to Niigata, there to embark in vessels of war for a trip to Hokkaido, going thence to Vladivostock. On the homeward voyage to Russia, the party will survey the Siberian Railway. The selection of this unwonted and inconvenient route *vid* Niigata affords ample grounds to divine the object in view." The *Mimpo* also writes in the same strain, evidently deriving its information from the *Hochi*, but seems to regard the motive attributed to the Prince Imperial as an additional reason for treating him hospitably. It is well known that the miscellaneous items in Japanese journals do not always receive careful scrutiny at the hands of the editor, but although such a want of proper care may be urged in extenuation of some errors, surely the visit of the Russian Prince Imperial is too important an event to be thus lightly treated? Japan has never before had the honour of entertaining the heir-apparent to the throne of one of the Great European Powers, and in visiting her shores the Russian Prince Imperial offers no small evidence of good will and amity. To suggest, under such circumstances, that he comes with an ulterior and unfriendly object, is not only most ungracious but highly impolitic. As for the motive assigned by the *Hochi Shimbun*, it sounds to us very laughable. If Russia wants to learn anything about Japan's harbours, bays, strategical positions, or military organizations, she has a thousand ways of doing so, without going to the extraordinary trouble of sending the Prince Imperial in quest of information. Truly, it is most singular to find such ill-considered and mischievous paragraphs in a journal of the *Hochi Shimbun's* high standing and generally sound views.

### VAIN TROUBLE.

NEVER was there such a prolific theme for misconceptions and misrepresentations as Treaty Revision. The latest phase is a meeting organised by Conservatives, Messrs. Nishimura, Tomita, Kimpara, and others, for the purpose of exorcising a phantom of their own imagination. They have learned, by some wonderful process, that negotations for Revision having been opened on much the same lines as those contemplated by Count Okuma, with the important exception of the provision about foreign Judges, England has agreed, but Russia insists that unless the coastwise trade be thrown open to her subjects, she cannot consent to dispense with the foreign-judge clause. They have further learned that to this compromise Viscount Aoki and Counts Saigo and Goto, the three Plenipotentiaries, have consented, and that Messrs. Mutsu and Yoshikawa are of the same opinion. Accordingly, a meeting of Conservatives is to be held to-day for the purpose of protesting against any such concession. No doubt the politicians present at the meeting—Mr. Oi Kentaro is to be amoug them, we read—will have a very satisfactory half hour, from their own point of view, but surely it is too silly of them to take Russia as their object of attack. Russia does not care a bundle of pins about the coastwise trade: she has not the most infinitesimal interest in securing for her subjects the privilege of engaging in it. As to the judge question, she is not, perhaps, equally indifferent, but it is well known that she has never assumed any obdurate attitude on that subject; nay, that in 1889 her friendship went to such lengths as to suggest that even larger concessions than those then sought by Count Okuma would not have provoked her opposition. Yet it is Russia whom the Conservatives now select to charge with this new phantasy! When will these good folks grow weary of beating the air, we wonder.

### THE ARTICLES REMAINING FROM THE INDUSTRIAL EXHIBITION.

A DIFFICULTY appears to have arisen in connection with the articles remaining from the Industrial Exhibition of last year. We stated in a recent issue that the lottery for disposing of these articles was to commence on the 11th instant and would probably be concluded by the 20th, but it is now asserted that the utnost exertions will not enable a beginning to be made before the latter date. We have no information as to the cause of the delay, but things are not progressing smoothly, and some time may yet be required before the arrangements can be finally completed. The action said to have been instituted against the projectors has evidently been dropped, so that the unlooked for tardiness of the management cannot be placed to that score.

### THE RUSSIAN PRINCE IMPERIAL.

THE arrival of the Russian Prince Imperial in Japan is expected to take place about the 15th of May. His Imperial Highness will land at Nagasaki, and after a very brief stay there will proceed by the Inland Sea to Kobe. It is not expected that more than a week will be available for sojourn in Tokyo, as the Prince will visit all the places of special interest in the interior. Great preparations for His Imperial Highness' reception are being made in Tokyo. The Palace of H.I.H. Prince Arisugawa is now undergoing thorough repairs and refitting, and will be placed entirely at the disposal of the illustrious visitor. This spacious and handsome edifice is particularly well suited for the purpose, being immediately behind the Foreign Office, about a hundred yards from the Russian Legation, and within five minutes' drive of the Emperor's palace. We observe that some comments have been made in the Japanese press with reference to the exceptional step of appropriating the residence of the Emperor's uncle for the reception of a foreign Prince; but it has been truly pointed out that no honour which Japan can pay to the Prince Imperial of Russia would be too great; and further, that the exceptional and magnificent courtesy shown by the present Emperor of Russia to Prince Arisugawa when the latter was despatched to St. Petersburg to represent Japan at the Coronation Ceremony, set an example of imperial hospitality not to be disregarded.

* * *

Our readers will remember that, towards the close of January, statements appeared in the Shanghai journals to the effect that the Viceroy of Hukuang had signified his resolve not to receive the Prince Imperial of Russia at Wuchang, and further, that the official intimation of the Prince's intended visit had been conveyed to the Viceroy by a Russian man-of-war sent by Admiral Nazimoff. We expressed our conviction at the time that both of these statements were entirely groundless, and it now turns out that we surmised correctly. Nothing of the kind has occurred in China. His Imperial Highness will carry out the whole of his originally projected programme there, and according to present appearances, his reception will be of the heartiest character.

### SHANGHAI AND ITS CHIEF-JUSTICE-CONSUL-GENERAL.

THE British residents of Shanghai were to hold a public meeting on the 18th instant, for the purpose of voting a protest against the proposal to roll into one the two offices of Consul-General and Chief Justice. The protest, a draft of which was published before the last mail left, is a collection of powerful reasons carefully marshalled. It ought to command attention. *Apropos* the fact that it is to be forwarded to H.B.M.'s Representative in Peking, we observe that no contradiction has yet been published in Shanghai of the assertion advanced some time ago with so much confidence, namely, that the amalgamation of the two offices had been recommended by the First Secretary of Legation in Peking, and was, in fact, due to his recommendation. Our own information is entirely opposed to this. We believe that the contemplated change has not been viewed with any favour at the Legation in Peking, and that the conception of it must be ascribed entirely to the Foreign Office in London, where, doubtless, the Constantinople precedent was not without influence.

* * *

The protest contains a statement decidedly interesting to us in Japan, namely:—

> Moreover if the Consul-Geneaal is to be Chief Justice also, and the Consul is to be Assistant Judge also, neither of these Officials will be able, with propriety, to hear the case and urge the claim of one side, when there is a possibility of the matter resolving itself into a suit against a British subject or of such a suit arising out of it.

This is exactly what we have been pointing out for years with reference to the Consular Courts in Japan. Only one of the Treaty Powers has, in this Empire, a court presided over by a regular Judge. All the rest have courts presided over by Consuls or Consuls-General. But the functions of Consul and Judge are incompatible. The Consul is expected to be the advocate of his nationals. That is his distinct duty. Thus when a complaint is carried to him by one of his own countrymen, he has to think first of the latter's interests, and must take up the complaint in that spirit. Then finally he is expected to sit as an impartial dispenser of justice in a case where he has already been acting as advocate for one side. We have actually had, in this Settlement, instances of a Consul, in his capacity as such, officially denouncing, in the strongest terms of opprobrium, men of another nationality who a few days subsequently, appeared as complainants in the same case before the tribunal where he sat as Judge. These glaring anomalies have been treated with cheerful indifference here because the only probable sufferers are Japanese and Chinese. But they do no little discredit to Powers satisfied with such an obviously indefensible system of judicial administration. We are interested to find

Digitized by Google

that the British residents of Shanghai are thoroughly alive to the anomaly, and have protested against it in the plainest terms. To Great Britain's credit she has hitherto laid herself open to no reproach of this nature. She has her duly equipped Courts in China and Japan, presided over by qualified Judges, who are entirely unconnected with Consular duties. It will be most regrettable if, for the sake of saving a paltry twenty-five hundred pounds annually, she descends from the eminence hitherto occupied by her, and places herself on the level of States which are content to roll into one the functions of Judge and advocate, forgetting that when they stipulated for immunity from territorial jurisdiction in China and Japan, they were bound to provide a proper substitute.

### COUNT ITAGAKI AND THE BUDGET.

WHEN Count Itagaki withdrew from the *Rikken Jiyu-to*, he set forth the reasons of his secession in a document eagerly scanned by the public. Among other statements he charged the *Jiyu-to* with excluding him from their counsels even in such a vital matter as the disintegration of the party, and from this accusation some people inferred that the Count intended to avow ignorance of the intention entertained by his former closest followers to introduce the motion which defeated the Extremists. We never held such a belief ourselves, but expressed the conviction that since Count Itagaki was understood to have made up his mind at a comparatively early date as to the unconstitutionality of the procedure advocated by the Extremists, he must have had full cognisance of the course contemplated in the House. His manifesto did not necessarily convey the former signification, and the probabilities were all against it. The *Choya Shimbun* now asserts that he was aware of the matter throughout. Mr. Misaki Kamenosuke, persuaded that if the plan advocated by the Extremists were persisted in the Budget could not possibly come into existence, consulted Count Itagaki as to the advisability of proposing reference to the Government at the close of the second reading. Count Itagaki was opposed at first, as he foresaw trouble in the Party, but ultimately he fell in with Mr. Misaki's views. The latter explained the matter to the *Taisei-kai*, and it was agreed that Mr. Amano Jakuyen should make the motion. All this sounds extremely probable.

### JAPANESE ENTERPRISE.

THE idea of "going down to the sea in ships" is evidently beginning to exercise upon the minds of the Japanese a charm such as it exercised in the days when their corsairs swept the neighbouring waters, and harried the unhappy shore-dwellers of China. The latest phase of the impulse is closely associaied with the names of Viscount Yenomoto and Mr. Arai Ikunosuke. A large association has been formed, having for its object the exploration of the seas south of the Bonin Islands, with the hope of finding some fertile spot invitating colonization, or some new market for Japanese goods. We do not possess sufficiently accurate information about the plans of the company—if, indeed, a company has been formed—to speak in detail of its proceedings, but rumour says that a large number of naval officers on the retired list, or who have resigned their posts, are associated with the scheme, and that a sailing ship will soon be equipped and despatched to the districts southward of Ogasawara-jima.

### POLITICAL PARTIES.

A SPLIT has occurred in the ranks of the *Aikokuko-to*, that is to say, in the party originally organized by Count Itagaki, subsequently amalgamated with the *Rikken Jiyu-to*, and recently brought into conspicuous notice by its secession from the latter at the critical stage of the Budget's progress through the House of Representatives. It is not, perhaps, quite accurate to call the *Aikokuko-to* a party, inasmuch as it has not, so far as we know, been officially reorganized since it ceased to be a part of the *Rikken Jiyu-to*. Still, its members had been old associates and were expected to work together, though not under the immediate leadership of Count Itagaki, who adheres to his resolve to stand aloof from political parties. Seceding from the Extremists, in other words from the combined *Rikken Jiyu-to* and *Kaishin-to*, the *Aikokuko-to* joined forces with the Moderates on the Constitutional question of procedure in regard to the Budget, and a belief gained ground that this alliance would prove permanent. But the latest development contradicts any such notion. A part of the *Aikokuko-to* has indeed been absorbed into the Moderates (*Taisei-kai*), but the remainder, numbering about thirteen members of the Lower House, have decided to hold aloof, and to form themselves into a New Radical Party (*Shin Jiyu-to*). It is now predicted that a further disintegration of the *Rikken Jiyu-to* will take place after the approaching meeting in Osaka, and that the seceders will probably divide themselves between the Moderates and the New Radicals. Apparently we are still distant from the time when Japan shall possess really firmly knit and intelligently based political parties.

### CHINESE IDEAS ON HYDROPHOBIA.

THE benighted condition of the Chinese in regard to diseases and their treatment is well illustrated by a translation from the *Lat Pau* in reference to hydrophobia, the occasion being the dreadful condition of Singapore, which has for some time past been overrun by packs of ownerless dogs, many of which are afflicted with rabies, and have bitten several people with fatal results :—

Cases of hydrophobia are very common in Singapore. Many victims have succumbed from it and the danger has now become so apparent that a deputation of gentlemen and merchants waited on His Excellency the Governor the other day to request him to devise some means which would free the public from this dreadful disease. The deputation suggested that an entire extirpation of dogs should be carried out. We are, however, of opinion that such a course of action is not at all necessary. The object of the deputation in making such a suggestion is no doubt to protect human life, but it should be remembered that the dog is not a wholly useless creature to man and it has also life in it. Even the smallest thing created by heaven should be treated with consideration, and entire extirpation in this case is out of the question. The best way of dealing with hydrophobia we believe is by medical treatment. When proper treatment is given the disease could easily be cured, and as a matter of fact it is utterly unnecessary to raise such an outcry against hydrophobia. The European doctors however, have not yet discovered a good prescription for this disease; therefore their treatment is not generally successful. We will now say a few words on the treatment and the symptoms of hydrophobia. When a man or even his clothes or queue, has been bitten by a rabid dog, he is affected by the poison of the animal. After some time the poison develops itself and the patient begins to show signs of madness. At this stage of the disease proper medical treatment should be given, otherwise the patient will imitate the movement of a dog—smell anything that comes in his way and bark himself to death. In some cases when a man is bitten he thinks very little of it. He merely stops the bleeding, applies some medicine to the wound, and when it is healed he believes that the danger is gone. But he forgets that though the wound is healed up the poison has not been extracted and in some future day the disease will surely break out again. This is the mistake that the European doctors generally fall into. Now in order to determine whether the disease that a patient suffers from is hydrophobia or not the following method should be adopied :—Get a gong or any large brass utensil and strike it before the patient. If he is suffering from hydrophobia he will at once show signs of madness; then fan him with a large palm-leaf fan and he will crouch down as if in great fear. When we have determined on the disease the next step that should be taken—a most important one—is to search the hair of the patient. There we will certainly find one hair of the colour of vermillion, and rather stronger and coarser than ordinary hair. This particular hair should be entirely pulled out, not even the smallest part of root must be left, otherwise the disease cannot be cured. When this has been done a prescription must be prepared and the drugs used should be of such a natnre as will expel the poison from where it has located itself. Any how great care should be exercised in the treatment of this disease, and that depends upon the doctor who has the case under his treatment.

### COMPETITION IN TEA PLANTATIONS.

THE following, taken from the *Weekly Dispatch* of January 25th, throws some light on the telegram published in this issue :—There seems to have set in a keen rivalry amongst Ceylon tea-planters. Some time back one Ceylon estate sent over a consignment that put Mincing-lane in a flutter. This was knocked down at 31s. 6d. per lb., and the last time it was heard of it was selling at 5s. per oz. Of course, the name of the estate that exported this tea was in everybody's mouth, and a good advertisement was thereby obtained. Now, however, the estate has had to take a back seat, for a consignment from another estate was knocked down the other day at £4 7s. per lb., and immediately resold for £5 10s.—just as near as can be 1s. a teaspoonfal. This is certainly a high price, but, from what a tea-broker tells us, it is nothing like the cost incurred in procuring such tea. In appearance this tea is golden coloured, and the leaves are exceedingly fine. They are young leaves, and, looked at through a microscope, appear to be covered with down. These downy projections enable them to cling to any cloth of a silky nature they may come in contact with, and this gives the clue to the secret of preparing these costly teas. Ordinary tea, in which there is a fair proportion of these golden leaves, is dabbed, so to speak, with a silk cloth, and the leaves that adhere to the silk are shaken into a pile by themselves. This tedious operation is repeated until the naturally gathered tea is exhausted of these golden, flossy leaves. The leaves that are left behind after this picking-out operation has been completed are, of course, not of the same value, weight for weight as before.

### KOREAN STONE-FIGHTS.

A CORRESPONDENT writes from Söul :—It is probable that in all countries there is a certain rotation of games, one style of amusement succeeding another in the same order year after year. But there are few countries where the transition is fixed at a certain date, as is the case in Korea. The first fifteen days of the year are taken up with the flying of kites. It must not be supposed that this sport is participated in by small boys only: young and middle aged men engage in it as well, and it is not an unmanly form of amusement as carried on in the peninsula. Immense sums of money are wasted in a single season. Thus it not infrequently happens that a man runs through the whole of his patrimony in two or three weeks. The reason is that kite flying in Korea is really kite fighting, the object being to get your kite string afoul of another man's string and then to see which will part the sooner. The kites cost practically nothing, but the string is very expensive, for it must combine strength and lightness. The best string is made of silk, and one skein of it, or enough to fly a kite, costs from seventy-five cents to a dollar. It is not uncommon to see small boys grinding up broken pieces of glass, mixing it with paste and putting it on their kite strings, so as more easily to saw off the enemy's strings. But if I were to tell of some of the exciting kite fights that have taken place here this winter I should have no room left to describe the still more interesting stone fights, or, as the Koreans call them, *pyensam*. On the fifteenth of the first month we see the last of the kites for the season, excepting those that festoon the trees and telegraph wires, these latter being the kite-flyer's greatest aversion and rock of offence. The kites all being put away on the fifteenth, the stone fights begin the very next day. The smaller ones take place in the streets of the city, but only between small boys. In the eastern part of the city there are large open spaces that have not as yet been built upon, and here occur the more serious and interesting fights. One section of the city is pitted against another, but any one can take a hand on either side at pleasure. There are no recognized leaders, but on either side the mass of fighters readily follows the lead of any one who shows himself to be a little more reckless than the rest. So you may imagine two mobs, consisting of fifty, seventy, or a hundred men each, drawn up against each other with an interval of perhaps fifty yards between them. There is an incessant shower of stones, and each man's business is to hit as many men as he can, and especially to dodge all the stones directed at him. But the fighting is not done with stones alone. From ten to twenty men on each side are armed with stout clubs and wear thick wadded helmets. These form the skirmishing line. They sally out from their respective sides and meeting in mid career, strike out viciously at each other's heads, each man holding up his cloak with his

Digitized by Google

left hand as a shield to ward off the blows of his adversary. These sallies are accompanied by a partial cessation of hostilities on the part of the stone throwers while they watch the outcome of the club fight of their champions. After the club fight has lasted about thirty seconds, one side or the other begins to give ground, which is the signal for the backers of the successful club men to set up a wild shout and rush down *en masse* to follow up the advantage gained. Almost invariably the other side breaks and runs, and sometimes they are run clean into their houses, but generally some one or two of the pursuing party press too closely upon the fugitives. Then the latter suddenly turn and deal a few staggering blows, which check the pursuers, and in a second more the tables are turned, and those who a moment ago were flushed with victory, are now in full flight before their enemies, who are rendered doubly furious by reason of their late humiliation. And so the battle goes back and forth across the fields, while the neighbouring embankments are crowded with spectators, who shout for whichever side seems to be getting the better of the fight. They like to be on the winning side, and never has it been my lot to hear from any spectator a word of encouragement for the weaker side. They evidently believe in the wisdom of the proverb "nothing succeeds like success." It would be difficult to make an estimate of how many people stand and watch these fights. I remember one that took place in the dry bed of a stream. There were artificial embankments on either side, and these embankments were covered for a distance of two hundred yards with solid phalanxes of men row upon row from twelve to fifteen deep. And when the battle was exciting and the sight of victory on either side roused the martial spirit of this mass of spectators, the thundering cheers which rose as from a single throat were something to remember. Probably nothing is more inspiriting than such a cheer from so many thousands of lungs. The effect upon the combatants is something marvellous. They charge upon each other as if in actual battle, and show in not a few instances considerable bravery, or at least what would be bravery if exercised in some useful cause. It is worth while to cite one or two cases which go to prove that there is occasionally more than ordinary sport in this kind of amusement. Near the river are numerous villages, numbering from a hundred to five hundred houses each. They are situated along the bank of the river at intervals of half a mile or sometimes of only a few hundred yards. These villages keep up a continual series of fights among themselves during the fighting season, one village being arrayed against another. After a few sharp skirmishes the forces closed in and settled down to business. It was evident from the first that there were some old scores to be settled that day, or at any rate that amusement was not the only motive. Men rarely work in such a fashion for the fun of the thing. Before long the Yongsan party began to gain ground. A yell went up that made the very earth tremble. The enemy broke and fled, but Yongsan was right on their heels. Away they went leaping the deep ditches or falling into them, and scrambling up the other side and away again right through the marshy paddy fields, never mind the shoes! there is no time to stop to recover them. A whole skin is better than a pair of straw shoes. On they sweep right up to the outskirts of the defeated party's village. Here they surely will stop. But no! right up to the houses the pursuers push, and lay their hands on anything, wood, tiles, fence, hedge, anything that is vulnerable! A door wrenched off its hinges is a laudable achievement, anything to indicate "*Yongsan—his mark.*" But by this time the whole village is up, and the victors know it is time for them to be moving back. And they are fortunate if they get back with whole heads. Such scenes are enacted daily during the "Season," and exciting sport it must be. What do broken arms or even heads signify? You must have amusement. It is the same grade of thing as the Roman Amphitheatre or the Spanish bull-fight, but not so brutal. Man against man is bad enough, but man against brute is worse. The first stone fight of the season which occurred a few days ago was rather more disastrous than usual. It is reported that six men were killed, but this is probably an exaggeration. At any rate a company of soldiers was ordered out to stop it; which they found some difficulty in doing even with fixed bayonets. The long inactivity of winter makes men rather too active in the first few rounds of the "game."

## CUSTOMS RETURNS.

THE following is a summary of the Customs Returns for January, showing the foreign trade of Japan for the month:—

EXPORTS AND IMPORTS.

| | 1890. SILVER YEN. | 1891. SILVER YEN. |
|---|---|---|
| Exports | 5,722,457,770 | 5,183,389,750 |
| Imports | 6,446,772,790 | 4,687,704,600 |
| Total exports and imports | | 10,071,064,350 |
| Excess of exports | | 695,685,150 |

## TREATY REVISION.

THE *Kokkai*, now recognized as one of the best among Japanese newspapers, says that a meeting was held on the 16th instant in the Kaikaro, Kanda, Tokyo, by members of the *Rikken Jiyu-to*, among whom Messrs. Hoshi Toru, Oi Kentaro, Kono Hironaka, and Komabayashi Koun were prominent. The subject of discussion was Treaty Revision, but the meeting was conducted with closed doors. No decision seems to have been reached. The *Kokkwai* asserts that the debate turned upon the difference between Viscount Aoki's programme and that of Count Okuma, and that the two were said to be virtually the same except in respect of the Foreign-Judges clause, which does not appear in the present proposals. According to the information before the meeting, Great Britain has resolutely declined to entertain Viscount Aoki's proposals, and declared that she could not consent to anything short of Count Okuma's; while Russia insists that if the Judges' condition be abandoned, Japan must consent to allow foreigners to take part in the coastwise trade. To this latter compromise the Japanese Plenipotentiaries are said to have agreed, and the meeting was informed that their Excellencies MM. Mutsu and Yoshikawa are of the same way of thinking. It was accordingly suggested that steps should be taken to organise agitation against such a concession, but the meeting probably thought that fuller information was essential before taking any definite action. In coming to this conclusion it acted wisely, for there is no difficulty in perceiving that the Japanese public is very much in the dark as to the bases of the new negotiations, and that, consequently, any agitation against particular concessions would be premature.

## LOCAL ASSEMBLIES AND LAND OWNERS.

WE recently reproduced from the *Keizai Zasshi* an article dealing with the excessive influence wielded by land owners in Japanese politics. The same journal has since published another article on this subject, showing, by statistics, the evil consequences of the Local Assemblies' partiality for the class which elects them. All the Local Assemblies, with the single and remarkable exception of that of Tokyo, make it their business to raise as much revenue as possible in the form of *kosu-wari* (rates equally divided among all the householders of the locality), of trade towns, and of miscellaneous taxes, and to reduce to a minimum the *chika-wari* (land-rates assessed upon the basis of the national land tax). The inevitable result of such an unfair system is that the lower classes, as tenants, petty tradesmen, and mechanics, find it, in too many cases, entirely beyond their means to defray their local dues. The arithmetical facts of the case will be seen from the following table, which shows the number of persons who could not pay the different kinds of taxes, throughout the country in the two years 1887 and 1888:—

| Tax. | Number of persons unable to pay. 1887. | 1888. | Amount of unpaid taxes. 1887. | 1888. |
|---|---|---|---|---|
| | *yen.* | *yen.* | *yen.* | *yen.* |
| *Chiso-wari* | 1,212 | 583 | 7,608 | 3,162 |
| *Kosū-wari* | 40,044 | 25,009 | 262,031 | 141,305 |
| Trade taxes | 6,418 | 4,335 | 13,973 | 8,386 |
| Miscellaneous taxes | 4,832 | 2,455 | 6,573 | 3,625 |
| Totals | 52,506 | 32,382 | 290,185 | 156,478 |

Of all these different kinds of taxes the *kosu-wari* is the most iniquitous, for, as already explained, it is imposed equally on all householders, without distinction as to differences of individual wealth or poverty. Hence the poor find it particularly difficult to pay it. Should the *chiso-wari* be levied up to legal limits, peasants, petty tradesmen, and mechanics would have far smaller burdens to bear. The *Keizai Zasshi*, consequently, thinks it extremely unjust and absurd to clamour for a further lightening of the public burdens of land-owners who are already enjoying iniquitous advantages over the poorer classes of the public.

## CHOICE OF LANGUAGE.

"THE other day," says a writer in the *Romaji Zasshi*, "when on visit a to Joshiu, I met a number of teachers at the Primary Schools. They spoke to me thus:—'We have been giving special attention to moral instruction and also to rules of behaviour and the choice of proper language. But when the honourable representatives of the people, in their places in the Tokyo Parliament, use language only suited to vulgar folks, and when their language is printed in the stenographic records and circulated everywhere, it is quite fruitless for us to inculcate the employment of polite words in the face of such a precedent set by men who ought to be a pattern to the nation.' I confess that I had to acknowledge the justice of this remark. It is to be hoped that, in the next session of the Diet, the members will take care to use gentlemanlike language, so as not to cause any more pain to the teachers at Primary Schools." This is fine sarcasm. Whose ears, we wonder, will tingle most when the gentle comment of the *Romaji*

Digitized by Google

*Zasshi* reaches them. The appearance of a picture depends, to a considerable extent, on its setting, and when, in the midst of a shower of highly polished and classical orations, we find interpolated a phrase like the notorious "*burei na monome-ga*" of Mr. Tanaka Shozo, such a gem of repartee stands out in doubly high relief. But the Japanese House of Representatives has still a considerable margin to work on. It has not yet any Irish element.

### THE NEW CURE.

"THE discovery," writes the *Pall Mall Budget*, "that Dr. Koch's lymph sometimes drives tubercle bacilli from the tissues into the blood, and thus mobilizes the enemy, so to speak, along a grand trunk railway over the whole body, is the most startling objection to the cure that has yet appeared. It confirms and explains Professor Virchow's observation of newly developing tubercles in different parts of the bodies of patients who had died after lymph injections. The hopes of the consumptive are thus dashed by the fear that in extirpating the disease from one quarter it may be given a fresh hold in others. But in the same day's news the sanguine patient finds a pretext for new hopes. France promises to succeed if Germany has failed. It is well known that goats cannot take consumption. What simpler than to transfuse goat's blood into the patient? It is to be hoped that the process will not communicate all the other hircine qualities along with immunity from tubercle."

### PARTIES.

THE *Jiji Shimpo*, commenting on the fact that a reconstitution of political parties is likely to be the immediate outcome of the discussions in the Diet, divides the 295 members of the Diet (five out of the original three hundred have resigned or died) as follow:—

| | | | |
|---|---|---|---|
| Kyodo Club | 81 | *Kaishin-to* | 38 |
| *Rikken Jiyu-to* | 77 | *Taisei-kai* | 27 |
| Seceders | 48 | Independents | 24 |

The Kyodo Club is the nominally non-political association recently formed by members of the *Taisei-kai* and seceders from the *Rikken Jiyu-to*. All the members of the *Taisei-kai* did not join it, twenty-four standing aloof; while of the seceders forty-eight were, at the time of the *Jiji's* analysis, independent though united. These seceders consisted, in great part, of members of the original *Aikokuko-to*. They have now split up into two camps, of which one calls itself the New Radicals, and the ultimate tendency of the other is uncertain. It will be apparent from the above table that the 99 members included under the headings of seceders, *Taisei-kai*, and Independents (*Mushozoku*) constitute a most important element of the situation: the side to which they attach themselves will be at once in a majority. It will also be evident that until the parties become a little more vertebrate as to their policies, a fringe of waverers must always hang upon their skirts. The Unionists (Kyodo Club) will have to declare themselves distinctly. Nothing is lost, however, by deliberation. The present expectation is that the general meeting of the *Rikken Jiyu-to* in Osaka at the close of this week will have the effect of further disintegrating that Party, and that the new seceders will drift, for the most part, into the ranks of the New Radicals. In that event the Extremists on the Radical side may find themselves left with only a skeleton of their former association.

* * *

The *Kaishin-to's* position is becoming decidedly difficult. Its failure at the last elections —a failure due in great part to the Treaty-Revision agitation of 1889—reduced it to comparative insignificance in the Diet. Still, with some forty members, it could have held the balance of power between the *Jiyu-to* and the *Taisei-kai*. But it threw in its lot finally with the Extremists, and of course the defeat suffered by the latter over the Budget question has helped materially to mar the reputation of the *Kaishin-to*. What will now be the programme adopted by this party which, though seemingly insignificant at the moment, numbers men of large means and eminent ability, and is directed by one of the greatest statesmen Japan has ever possessed? Will the *Kaishin-to* consent to suffer effacement by absorption into the ranks of the *Rikken Jiyu-to*, or will it seek to revert to an independent status? Strange things sometimes happen in politics, but it would be incredibly strange that the *Kaishin-to*, formerly remarkable for moderation and ballast, should definitely join forces with the most violent section of the Radicals. The disintegration of the Radicals in connection with the Budget, and the further disaffection likely to take place after the approaching Osaka meeting, will leave in the *Rikken Jiyu to* camp only the most pronounced Extremists. We cannot conceive an alliance between these and the *Kaishin-to*, yet, failing such alliance, the *Kaishin-to* will find itself ostracised, temporarily at any rate, from all the other political associations.

### JAPANESE ARCHITECTS.

WE are not surprised that the answer given by the Government Delegate in the House of Representatives on the 24th of February has caused some comment. Asked whether he thought it beyond the capacity of Japanese architects to direct the construction of the wooden edifice for the Diet, he replied:—"I do not think them incapable of doing it. They *might* be able if a very careful selection were made among them." The *Romaji Zasshi*, referring to the matter, says:—"According to the Government Delegate, although the building for the Diet is to be of wood and to cost only some two hundred thousand *yen*, a Japanese expert *might* be capable of undertaking it if he were very carefully selected. We deem this a strange assertion. Our own idea is that Japanese architects are not such inefficient persons, but since the statement has been openly made by an honourable Government Delegate before the honourable Imperial Diet, we cannot choose but believe it, pending due refutation. Verily! Verily!" The *Romaji Zasshi's* appears to forget that parliamentary buildings are not exactly as other buildings. It is conceivable that an architect of high capacity, speaking generally, might be unprepared for such special work. That, however, is a secondary consideration. The spirit of the comment is the really interesting part of it.

* * *

Speaking of this, it seems worth while to refer to a remark of Mr. Naito Rihachi in the same debate. The abbreviated report of the proceedings made Mr. Naito say that mistakes were understood to have occurred in consequence of employing foreign architects, and that Japanese experts should suffice. Naturally this caused some amusement to foreigners. "Considering," they observed, "that the Japanese owe any knowledge they possess of Western architure to foreign instruction, it is rather quaint to find them turning round at this eleventh hour, and asserting that as blunders have been committed by the teachers, the work had better be entrusted hereafter to the students." Certainly that would be very funny, but what Mr. Naito really said, according to the *Official Gazette's* report, does not altogether warrant such an interpretation. His words were:—"There was a rumour to the effect that the cost of the temporary buildings for the Diet was increased owing to some faultiness in the design of the foreign architect. I do not myself know precisely in what respect the plan was faulty, but I think it possible that some of you, gentlemen, may be acquainted with the actual circumstances of the defective plan and the additional expenditure. It was only a rumour, indeed, but as there does not appear to be any necessity now to employ a foreigner for the purpose of superintendence, I propose that the appropriation on that account be omitted." This is obviously a less sweeping assertion, though not incapable of being construed into something very like a claim of superiority for Japanese architects. On another score, however, it is very unjust. The truth is that no error whatsoever was committed by the architect. He planned the building in strict accord with his original instructions, but was subsequently obliged to make more than one addition to it in obedience to altered views on the part of his employers. Nothing is more creditable to him than the fact that he succeeded in preserving harmony and proportion despite these changes, made when it was too late to adapt the original plan to them. It is most regrettable that, before committing himself to a public statement, Mr. Naito Rihachi did not investigate the matter more minutely. He would then have found reason to praise rather than to censure the German architect.

### THE NICARAGUAN CANAL.

CAPTAIN TAYLOR, Commander of the U.S.S. *Alliance*, delivered his lecture on the Nicaraguan Canal and its relations to the trade of Japan before the members of the Asiatic Society of Japan, in the Public Hall, Yokohama on Wednesday evening. Mr. N. J. Hannen, H.B.M. Judge, President of the Society, occupied the chair and briefly introduced the lecturer. Captain Taylor then delivered his lecture, which was given in Tokyo before the Geographical Society on the 27th inst. and which was reported in the *Japan Mail* of January 29th. Speaking of views he had heard expressed by leading Japanese during his stay in Japan, Captain Taylor said there seemed to be an opinion that the connection between Japan and New Orleans to be brought about by the opening of the Nicarguan Canal would result in a very large trade. New Orleans was the natural outlet for the great interior valley of America, which in wealth, population, and activity was now really becoming America itself. With the opening of the Canal it was probable that there would begin a great interchange of commodities between Japan and New Orleans. It would be too much to attempt to prophecy what those commodities would be, but it seemed natural that there should be such an interchange between that great valley and Japan, each of which had so many products that were needed by the other. At the close of the lecture Mr. Hannen said he was sure he was only speaking for all present when he thanked Captain Taylor most heartily and sincerely for the interesting lecture he had given. Those who felt inclined to look more closely at the maps or charts displayed about the room would now be able to do so, and he felt sure that occupation would form an interesting termination to Captain Taylor's very enjoyable lecture.—(Applause.)

### CIVILIZATION.

A CORRESPONDENT signing himself "Scrutator" has been endeavouring to demonstrate, in the columns of a local contemporary, that the Victoria School's failure to obtain the support of the community is due to the reluctance of Western folks to allow their progeny to associate with childern of Oriental blood. "The leading merchant residents," he says, "have never sent their sons to the school, as they, like the British merchants in India, object to associating their children with children of Oriental blood, because of the low standard of Oriental morality, especially as regards truthfulness and respect to women." So bitterly prejudiced is this "Scrutator" that he extends his objection to children of mixed race, as though even a strain of Japanese blood were fatal, and he goes so far as to indicate that foreigners in the employment of the Japanese Government were not proper persons to be members of the School Committee. Of course such silly prejudices must be greeted with ridicule only. The leading foreign residents of Tokyo, high dignitaries of the Church, Ministers, merchants, men of science and so forth, unhesitatingly send their sons and daughters to schools where they associate freely with Japanese children and with children of mixed race. It has not occurred to them that any contamination is likely to result from the contact. "Scrutator's" condemnation extends even to Bishop Bickersteth, "whose experience of the East" is declared to be "insufficient to instil in his mind the deep seated feeling in the minds of British and American merchants in favour of keeping their boys surrounded by home associations." Long may Bishop Bickersteth's

Digitized by Google

experience remain insufficient, if sufficiency is synonymous with adherence to miserable prejudices that disgrace Occidental intelligence and Occidental civilization. Why, we wonder do men like "Scrutator" come to the East? If their surroundings here are so very repugnant to their fine moral sense; if they actually regard Japanese children as pariahs to be kept at arm's length, why do they not stay at home and thus avoid all risks of degradation? Their presence in the Orient, marked as it is by the most outspoken declarations of contempt for the people they live among, only has the effect of bringing unpopularity on their nationals and disgrace on their civilization. What feeling except one of intense umbrage and indignation can be roused in the minds of Japanese, when they are told in the public press that foreigners who come here to trade with the nation and to earn a subsistence in Japanese territory, regard the people of the country with such disdain and distrust that they will not even send their sons to a school where there is a risk of associating with Japanese boys? In the face of such open announcements of contempt and dislike on the foreign side, the Japanese are expected to treat foreigners with unvarying gentleness, consideration, and politeness! It is, we fear, of little avail to tell the Japanese that persons of "Scrutator's" type are in the minority, for unfortunately these representatives of blind prejudice have the advantage of always making themselves conspicuous. One of their intemperate utterances suffices to efface the effect produced by years of unostentatious liberality and friendliness on the part of more civilized Occidentals. Yet the Japanese themselves, we think, must have observed that the higher the social and educational standing of a European or American, the freer is he from ignorant narrow-mindedness like that of "Scrutator," and the less disposed is he to claim and rudely parade a superiority which exists chiefly in his own inflated imagination.

### THE ANTI-JACOBIN.

MR. FREDERICK GREENWOOD, who founded the *Pall Mall Gazette* twenty-five years ago, and the *St. James's Gazette* about ten years ago, and whose differences with the proprietors of these periodicals—differences which, by the way, were all to Mr. Greenwood's honour—will be remembered, has once more added to the list of newspapers by the publication of the *Anti-Jacobin*. At first sight the name might appear unfortunate as bringing the paper into competition with the immortal publication of the same name, with which the names of Canning and Frere are associated, and to which we owe the wittiest and most pungent ballads in the English language. But Mr. Greenwood has his own very good reasons for this, as he has for most things he has done, for, next to his gifts as an editor, next to his power for collecting around himself a band of able writers, who, whatever their constitutional differences, all bear in their writings the stamp of Mr. Greenwood himself; next to these, we say, sound unemotional commonsense, and a keen perception of the currents of foreign politics, are the characteristics of Mr. Greenwood as an editor. He admits that the political conditions and the literary manners of the old anti-jacobin are extinct, but the spirit embodied by the Jacobin tyranny of the French Revolution is not. In modern times, he thinks, Jacobinism is most likely to arise from the perversion of Democracy, although it has no necessary connection with any particular form of government. Disregard of justice, intolerance of free discussion and of free individual action, the imposition of political dogmas by mere weight of numbers before those dogmas have been fully and fairly discussed, unbounded belief, real, or professed, in the efficacy of political machinery, all these are characteristic of the modern Jacobin, and all need to be fought against. Hence the establishment of the *Anti-Jacobin*. It is a weekly publication, in appearance very much like the old *Examiner*, save that the paper is white instead of creamy. It closely resembles the *Saturday Review* and the *Spectator*—possibly a trifle smaller, but it has this very important advantage that it only costs 2d. From the introductory article—and, indeed, we scarcely wanted this to tell us so—Mr. Greenwood views with profound distrust the present tendency of politics to establish the growth of what is called "new radicalism." The political articles are all well and vigorously written. The articles in the middle are on social and art subjects; then follow a number of crisp notes on the events of the week, a poem, and several reviews of the leading books. Mr. Greenwood has been so fortunate as to secure some extracts from the forthcoming volumes of Reminiscences of Dr. Russell, the veteran correspondent of *The Times*. It is extremely difficult to say what are the conditions of success of a newspaper in England now. Good writing alone does not do; energetic management often fails, and the fairest prospects frequently end in disaster and disappointment. But the *Anti-Jacobin* would certainly seem to have in it all the elements of success. For Mr. Greenwood's sake we trust that these hopes will be amply fulfilled.

### TYPHOID AT KOBE.

WE hear that several cases of typhoid fever have occurred at Kobe, and referring to the fatal termination of one in the case of Mr. Enthoven, whose death we recorded yesterday, the *Hyogo News* of the 17th instant says:—"We sincerely regret to announce the death of Mr. B. Enthoven, who, at the early age of 28, succumbed yesterday to an attack of typhoid fever. He was taken ill last Friday week, and carried to the hospital the following Wednesday. Though the fever made rapid progress, the deceased retained his consciousness until Sunday at about 3 p.m., when he ceased to recognize anyone at his bedside. From that hour all hopes were abandoned, and he died yesterday evening at about 6 o'clock. He was attended by Drs. Miller and Graham, whose united efforts to check the fever, however, proved unavailing. Mr. Enthoven was very popular with all classes of the community here; his unassuming geniality, combined with his musical ability, gained for him the good-will of all. He was been in Japan four a half years in the service of Messrs. M. Levy & Co., by whom his services were highly valued." Mr. Enthoven was one of the Kobe Football team that rerecently visited this port.

### A LADY INTERVIEWER.

INTERVIEWING has now become one of the most important departments of journalism in Japan. During the last few years this practice has been extensively followed. The latest development is a interviewer, Miss Ikuno Fumi, on the staff of the *Jogaku Zasshi* ("Woman's Magazine"). She is a bright will informed writer. Her last interview was with Count Katsu, popularly known as the Count of Hikawa, from the place of his residence. Miss Ikuno's object was to obtain an explanation of some obscure points in the history of the Tokugawa House, but as the Count was not inclined to discuss these topics, the conversation turned to questions of current politics. Asked about the Diet, Count Katsu observed that the first session had passed off more creditably than he had expected. He reproved the men of the present generation for their want of originality. They converse well, argue skilfully, and know much, but, said he, they are anything but good public speakers. Asked whether the present *soshi* are much worse than the desperate youths before the Restoration, he replied that there is no radical difference between the two sets of men: the difference lies in the character of their leaders. Before the Restoration the persons who controlled the *soshi* were conspicuous for earnestness and solidity; whereas the leaders of the present *soshi* are fickle and untrustworthy. Of all modern Japanese statesmen, he thought that the late Saigo was the greatest. Lastly he alluded to the paramount importance of his countrymen becoming more careful in matters of private finance. Unless they developed the faculty of taking care each of his own purse, Japan could not become a prosperous country. Japanese ridiculed the Chinese as being mean and base. But the Chinese knew perfectly well how to enrich their country. During the last few years, he had noticed improvement in this respect among his countrymen, but some years must elapse before the truth of his observation would be recognized by the majority of the nation.

* * *

The above report of the Count's conversation is rendered in plain and graceful language. We notice Miss Ikuno's accounts of interviews show a wonderful power of reproducing the exact tone of the conversation. In the present case, for instance, she has retained all the characteristic phraseology and accentuation of the distinguished statesman so successfully that the reader imagines himself listening to the veritable Count of Hikawa.

### COLORADO NOTIONS OF JAPAN.

HERE is an extract from the *Rocky Mountain News*. It is headed "Back to Barbarism," and is evidently written by a person who, in so far as regards the moral attributes of civilization, has but a short distance himself to travel in order to reach the goal he indicates. We reproduce the foolish rigmarole, because its reference to the missionaries suggests that the duty of answering it devolves upon them:—

Yokohama. February 10th.

A most critical danger is looming up before the thousands of Christians in this government, and the religion is threatened with extirpation.

Some time ago a little cloud arose on the horizon of Christian work here, which to those who watched it from the hill-tops, threatened a deluge of opposition to the efforts being made to supplant a religion full of superstition by one whose influence would aid on the great work of modern civilization taking place.

The cloud is no longer a man's hand on the horizon, but it has burst and already the first drops are falling on the toilers in the mission field.

Japanese ingratitude is telling on the pastors who have given up their best years to the service, that the Japanese do not feel bound to be governed in their religion by any of the hard and fast doctrines recognized and revered by the West; that the time has come when they must make an individual and independent selection for themselves as to what creeds they must retain and what to reject. They are Japanese and must have a Japanese Christianity..

At Nagoya, where the third division of the army is quartered, there is a revolt in process. It started in the Nineteenth Regiment, but was in no way a political affair. Its cause was homely. its result prosaic.

Something fastidious in the tastes of the regiment led them to revolt against their rations. Considering what Japanese soldiers' rations are likely to consist of makes the case more noteworthy, and the general variety of Japanese ordinary dietary comprising nothing more startling than rice and fish or fish and rice, one or the other of these delicacies must have been astonishingly bad or the regiment astonshingly "nice" in their requirements.

A whole regiment is under arrest. The missionary has been in power in the land, teaching, speaking, and building, the land whereon he builds still remaining in Japanese hands, and the total becoming Japanese property when the missionary retires. And now they are not even to have the gratification of seeing the religion they have planted grow into a mustard tree.

There is to be a Japanese Christianity, and it is to be greatly feared with the Christ left out, and that Japan is going to try a little retrograde movement now.

She is going back to the days when she used to prefer calling all foreigners "ugly barbarians," with an impartiality that scorns a distinctive nationality.

Those who are her warm admirers fancied that she had quite dropped that pretty little habit of giving folks nicknames, but in moments of natural unrestraint, a little lapsus linguæ betrays the fact that her connection with old characteristics is not quite severed. The incident giving rise to the poetical phrase is a reference to the Russian legation episode, couched in language hardly redolent of the "altar of politeness" fragrance for which she is so far famed. The remarks appear in one of the leading native papers of the capital.

The real gist of the paragraph lies in a patriotic call on the youth of Japan to "eradicate the rudeness of the foreigner," viz., the accidental attitude of the Russian ladies when viewing the procession and consequent overlooking of the imperial cortége—aye, and "the foreigner himself from the shore which is Japan's and for the Japanese.

The youth scarcely needs "boiling up" by advice on this line, and newspaper "puffs" of this description recall the two-sworded days, which are not yet too remote to be remembered.

It should be added that the story is called "a special cablegram," and as no one is likely to have telegraphed such particulars in full, something may perhaps be due to reckless expansion.

### MR. INUGAI AND THE "SOSHI."

ON the 16th instant at 3 p.m, as Mr. Inugai Ki, a well known member of the Diet, and editor of the *Mimpo*, was driving in a *jinrikisha* past the Kogetsu-ro in Karasumori-cho, Tokyo, a *soshi* seized the jinriki from behind and arrested its motion. Mr. Inugai turned round quickly, and received two heavy blows from a stick which his assilant carried. The latter then ran away

Digitized by Google

at full speed, but the drawer of the *jinrikisha* a man named Fuji, pursued him vigorously, and after a short race succeeded in seizing and holding him until the police came and effected his arrest. It turned out that he was a native of Nakamura-machi in Tosa Prefecture, named Imaune Chojiro, aged 22, who had been living in the house of Mr. Kataoka Kenkichi, the well known Radical leader. The motive of the assault is said to have been political. Mr. Inugai's injuries are happily trifling.

### BOOKS.

We have on our desk some volumes awaiting comment. The first is a collection of press notices of Mr. Alfred East's exhibition of Japanese landscapes. The notices have been brought together and re-printed by Mr. Lazenby-Liberty, and are prefaced by the following words:—"To my good friend and fellow-traveller, Alfred East, Esq., R.I., R.P.E., these press cuttings have been compiled and printed as a souvenir of most pleasant days, by his friend and admirer, Lazenby Liberty." The volume contains eighty pages, but in this large assemblage of cuttings scarcely a word appears that is not complimentary to Mr. East. Undoubtedly that gentleman achieved a marked success by his visit to Japan, and we may be permitted to hope that the attractions which this country offers to an artist will induce him to re-visit the scenes he depicted so skilfully, and the friends his brief association with whom is remembered so pleasantly.

* * *

Mr. F. Warrington Eastlake and Professor I. Tanahashi have compiled a "Pocket Anglo-Japanese Dictionary," very handy as to size and complete as to matter. The book contains 871 pages, each tiny page measuring 3 inches by 2¼. There are numerous illustrations, diminutive but clear, which must be decidedly helpful to Japanese students. For the latter alone the dictionary is intended. It might have been made to serve the purpose of foreigners also by adding the romanized forms of the Japanese words, instead of giving the ideographs only; but this step was doubtless avoided in order to save space. After all, foreign purchasers of such a book are insignificant compared with the Japanese. The authors are to be congratulated on having furnished another material aid to the study of English.

* * *

Messrs. Berger-Levrault and Company, No. 5, Rue des Beaux-Arts, Paris, have just published a work of great beauty, namely, "Ancien Armorial équestre de la Taison d'or et de l'Europe au 15 e siècle." The book is a superb volume, folio, containing 293 pages and 114 chromotype plates, reproduced for the first time from the manuscript No. 4,790 in the Library of the Arsenal, by Lorédan Larchey. Only 500 copies have been printed, namely, 5 on Japanese paper at 450 francs; 5 on Whatman paper at 400 francs, and 490 on specially manufactured, tinted paper at 200 francs. All the great European families find in the beautiful work some interesting reminiscences of their doughty ancestors. The plates are facsimile reproductions of their originals. Many of them represent the notables of the time, all in full armour. The author justly reminds us that these equestrian figures have no individual character. Their purpose is to represent, not the men themselves, but the heraldic attributes belonging to their social ranks. They are, in fact, dummies, stiff as to attitude and conventional as to draughtsmanship. The rules of perspective are as conspicuously neglected as was the case in all pictorial representations of the middle ages. We have the pictures precisely as they came from the brush of the industrious author of the celebrated manuscript, concerning whom nothing is known, except that he was a military officer in the service of Philip the Good, Duke of Burgundy.

* * *

Mr. T. Hasegawa of Tokyo publishes a volume entitled "Japanese Jingles," by Mrs. St. John Bramhall. It is a unique little book, printed on the peculiar crape-paper familiar as a material for doylies. The verses occupy only a small portion of each page, the remaining space being filled with pictorial designs in brilliant colours, executed, on the whole, with much taste and care. As for the verses enshrined in such a dainty setting, their title, "Jingles," describes them pretty accurately. Here, for example, are some, called "The fickle little lantern":—

In my heart a tiny lantern
Burned its scented wick and swayed;
And the little flame was fervid
As flushed palm on cold pulse laid.
In its pink and tender glintings
Basked I through the live-long day;
And the night I *vow* I knew not
All because of this limpid ray.
Now "*Hail Fellow*" am I with shades,
And all things else belonging to night,
For, Ah! this lantern's folded up
And gone from out my sorrowing sight;
And the fitful little maid that trimmed it
Has now *another wick to prune*,
And I'm alone in the dappled shades,
With all my heart and soul aswoon.

The italics occur in the original. All the poems, so far as we have read, contain italicised portions, but for what purpose we cannot tell. "The frolic of a frivolous fan" runs thus:—

A frivolous fan
Of festive Japan
Unfurled its wonders unto me;
But this frivolous fan
Of festive Japan
Had n't the power to undo me.
Though it spread its net,
And its sail it set,
With a vowed intent to woo me.
With *anger* this fan
Of fitful Japan
I caught at with ruthless endeavour.
But alack! This fan
Of festive Japan
I failed from its *power* to sever;
Though I spread my net.
But a fan to get,
*I've secured its soft power for ever.*

Such verses, it is plain, would never be seriously published in Europe or America. Their presentation to the public in the elaborate and attractive form given to them by the Tokyo printer is decidedly comical. At the same time the little volume shows what wonderful strides have been made by Japanese representatives of the publishing art.

* * *

The Nautical "Pocket Manual," published by Messrs. Kelly and Walsh, now in its 17th year of existence, is too well known to need any special comment. It contains the Shanghai Tide Tables, Customs Signals, Woosung Bar Signals, and a quantity of other information essential to sailing masters entering or clearing from Shanghai. The volume is in the handy form of a tiny pocket-book.

### OFFICIAL SUAVITY.
